Mr. GOLDWATER. I think they can, too, but I do not think the Constitution gives a darn about how much it costs to live. The Constitution does not tell us what we can or cannot earn. The original concept of this body was sort of a part-time politician and a part-time businessman. It is no longer that. My argument is that we are talking about time. That is what Senator PACKWOOD is talking about. If we have the time we should be allowed it. If the time interferes with our duties as a Senator, I go along with the Senator.

Mr. THURMOND. This amendment goes much further than the $8,600. This amendment would put all unearned income into it and limit it all to 15 percent.

Mr. GOLDWATER. I am not talking about this amendment.

Mr. THURMOND. That is the amendment we are considering now.

Mr. GOLDWATER. I am not talking about this amendment.

Mr. THURMOND. Wait until we get to the next amendment and we will talk about that.

Mr. GOLDWATER. I am talking about 50 days.

Mr. THURMOND. This amendment puts unearned income on the same basis as earned income. If a man has rent, interest, investment or any income any-

where it puts it in here and limits it all to $8,600. I think that is unfair and I think it is unconstitutional. I do not think the Congress should pass such a law to do that. I do not think we can say that a man cannot earn but so much.

We are merely saying that as a Senator's personal service, we are limiting that to $8,600. Of course, that might be tested. I do not know whether that will be constitutional, but we think it is the right thing to do. We think the people of America feel that they deserve the Senator's time; that they deserve his talents. They are paying him $66,100, if we count in the $8,600, and we think that is reasonable.

Mr. GOLDWATER. Then by that argument we should have no time off.

Mr. THURMOND. I am not saying we should never have any time off.

Mr. GOLDWATER. We should never be allowed to see our families, we should never be allowed to go home, we must stay in Washington, and have our bed checks every Friday night to make sure we are here. I do not quite go along with that. We are not going to get rich but we ought to be allowed to make more than $8,600 a year extra, I do not care what the pay is. I came here when it was $10,000 and I got along pretty good.

Mr. THURMOND. The Senator will get along still better on $66,000.

Mr. GOLDWATER. On $44,000 I do not get along so good.

Mr. THURMOND. The Senator is now going to get $66,000, if he gets $8,600 for speaking, so he ought to be able to get along with that.

Mr. GOLDWATER. And Internal Revenue will let me have $400 a month out of that. Hurray for them.

Mr. THURMOND. I realize there are two sides to this thing, but the question is whether we are going to have a code of ethics or not. That is the whole thing. We think the time has come that we ought to have a code of ethics.

Mr. GOLDWATER. I agree with the Senator.

Mr. THURMOND. I realize it is going to pinch and pinch hard on a lot of people. I realize they are going to feel it is unreasonable, that it does hamper people. A lot of people can make more speeches; a lot of them turn down more speeches. But how can we do justice to our work here, justice to our families?

We have had many separations and divorces in the Congress. I do not know whether that is caused from so many running off and making speeches, the pressure of work, or what. But I know one thing, the pressure of the work is harder than ever. If we can limit the earned income to $8,600 and give a Senator $66,100, which we think is reasonable, it will be better for the Senators, it will be better for the families, and it will be better for the country.

Mr. GOLDWATER. If the Senator will allow one more comment, I believe in a code of conduct. I do not think this happens to be one. I do not see any penalties. I think one can still steal as much as he can. We will still have our Tongsun Parks. We will still hear rumors about 50 Members of Congress having received presents from Tongsun Park. I do not see anything in here that says we have to say adios to Tongsun Park, Where are the penalties in this thing?

Mr. THURMOND. We have penalties in the resolution.

Mr. GOLDWATER. Someone might get his wrist slapped real hard or someone might poke his eye out.

Mr. THURMOND. Censure, expulsion, or recommendation to the appropriate party conference regarding such Member's seniority or positions of responsibility. In the case of an officer or employee, it is suspension or dismissal.

Mr. GOLDWATER. Those are not penalties.

Mr. THURMOND. Well, it is a pretty bad penalty if they censure a Senator or expel one from the Senate.

Mr. GOLDWATER. That is pretty bad but I do not think they will ever do it.

(Mr. DECONCINI assumed the Chair at this point.)

Mr. MORGAN. Will the Senator yield?

Mr. THURMOND. I am pleased to yield to the distinguished Senator from North Carolina.

Mr. MORGAN. To try to define what earned income is, let me give an illustration and ask for the opinion of the Senator.

I am a farmer. Instead of investing in stock in General Motors all my life I have invested in farms. In every year of my life I have managed and run those farms myself. I am running them now. I have a farm manager I pay to look after them.

Quite frequently during the week he will call me from time to time for a decision. On the weekends when I go home we will ride out and look at the farms and we will talk about what is going to happen the next week. Is the income from that farm earned income?

Mr. THURMOND. No, that is not earned income. That is considered for the purposes of this code of ethics as unearned income.

Mr. MORGAN. Is that spelled out anywhere in here? I heard the quotation from the poll, but I do not find it in the report anywhere.

Mr. THURMOND. I guess the Senator has seen the report on page 38—

Paragraph 3(a) defines 'outside earned income' for purposes of this rule. Generally stated, outside earned income is any income received as a result of personal services actually rendered if such services are material income-producing factors, and where the active and actual participation of the individual is involved.

In other words, you have a manager that runs your business. Of course, you confer with him, but that is not as if it takes your time and you go down there yourself and are there a great portion of the time and run those farms. If you did not have a manager, that might put it in a different category, but if you run them without your personal supervision, then it is considered unearned income.

Mr. MORGAN. In all candor, I think I must say to the Senator that they do receive my personal supervision. The farm manager makes no decisions without consulting with me. On the weekends, we go out, we look at the crops, we talk about the crops.

I am not arguing the issue. I just want to know, am I going to have to dispose of those farms? I do not want to vote for something——

Mr. THURMOND. I would not think so because, as I understand, the Senator has a manager that runs it and tends to it.

Mr. MORGAN. I am the man that makes the decisions.

Mr. THURMOND. The Senator is down there on some weekends, not every weekend, I presume. Is he?

Mr. MORGAN. No, but frequently, he calls me.

Mr. THURMOND. He calls you and you talk about the business. I would not consider that as coming in the category defined for this codes purpose as unearned income.

Mr. MORGAN. Understanding that I received a call from him this morning and we talked about farm matter, along with the other instances that I gave, does the Senator still tell me it would not be earned income?

Mr. THURMOND. In my opinion, under this code, it would not be earned income.

Mr. MORGAN. Let me proceed one step further. Assume that my son and I have a convenience store that we are in partnership in. I am trying to get him started in a business. During the week, he runs the business, but on the weekends, I review the books with him, we talk about the purchases and the sales and receipts for the last week and what is going to happen the next week. Am I participating in the management to such an extent that any income from that would be earned income?

Mr. THURMOND. I think it would have to be determined on the facts, but I would say for the purpose of this code, it is not intended to bring that into play and it would be my judgment that that would be classified, too, as unearned income.

Mr. MORGAN. Let me pursue a matter further, if the Senator will. I, frankly, am for limitation on earned income, but for the life of me, I cannot see why we should perpetuate what I consider to be two classes of Senators. If I am going to be limited to, what is it, $65,000 to live on and I have to live on it——

Mr. THURMOND. $66,100.

Mr. MORGAN. Why should the man who sits in here with a million dollars in stock in General Motors—and the Senator and I know that it is going to take some of his time to manage that portfolio and he is going to sit here, if we are talking about the looks of the matter, the propriety of it—why should he be able to sit in here and draw dividends from General Motors and vote on public contracts, defense contracts that are involved in General Motors, when I am not going to be permitted to participate in the operation of a little convenience store down in Lillington, N.C.?

Mr. THURMOND. I would think that a man who is worth a million dollars or several million dollars invested in stocks and bonds would depend upon his stockbroker to advise him and he would follow that advice.

Mr. MORGAN. He would have to con-

sult him, just as I am going to consult with my son and my farm manager.

Mr. THURMOND. Surely he would consult with him, as the Senator consults with his manager and his son. We cannot take steps here to try to equalize the income of our different Senators. Some of our rich colleagues became wealthy before they came here. They have a lot of other income. Others have given more of their life to public service and have not had an opportunity to make as much. But that is a decision a man has to make.

If he wants to make money, public office is not the place to do it.

Mr. MORGAN. Is he not making money if he is managing his portfolio and drawing dividends from General Motors? If we are talking about standards of ethics and conduct and the propriety of the matter, does it not look just as bad to the public for a man to sit in here and do that, and vote on contracts that are directly affected by all of this, as it does for me to go home and manage my farm?

Mr. THURMOND. No, he is not supposed to vote on matters here where there is a conflict of interest. If he has stocks involved in companies, he is not supposed to cast his votes here where it can inure to his own benefit.

Mr. PERCY. Mr. President, will the Senator from South Carolina yield for just a moment so I can comment on the point made by the Senator from North Carolina while the majority leader is on the floor?

Mr. THURMOND. I am glad to yield to the Senator from Illinois.

Mr. PERCY. I think the Senator from North Carolina (Mr. MORGAN) has pointed out a basic fallacy and weakness in the resolution before us. In all fairness, as a person who has income from unearned income and, like most Senators, from assets acquired prior to entry into the Senate, I think there is a sense of unfairness in discriminating against those who need and acquire earned income as against unearned. If we are going to put a limitation on outside earned income—and I think it is part and parcel of our accepting the pay increase that we do place some limitation of a reasonable nature on earned income, and I do intend to vote against and speak against Muskie amendment No. 1, because I do not think we can go that route, having accepted this very large adjustment in salary—I feel that we need some kind of limit on the other unearned income side, but not in the way of the Muskie amendment. The whole purpose of this resolution is simply not to equalize living standards of all Senators; that is not the purpose. We have lost sight of what we are really trying to accomplish in this resolution to eliminate conflicts of interest and to be fair.

The Senator from Illinois, taking into account some of the points that have been raised, intends to introduce an amendment that would limit the amount of time a Senator can spend on the pursuit of unearned income. It would be highly possible for any Senator to spend half his time supervising and managing a portfolio of assets, analyzing and appraising their relative return on investment, and so forth, and that would not at all be limited. I think, therefore, we need language that will place a limitation on the time expended by a Senator on unearned income, because there is a limitation being accepted on earned income, and I think some limitation must be placed on the time spent on outside pursuits in earning income when we have accepted this very substantial pay adjustment.

So, possibly sometime tomorrow, the Senator from Illinois will offer an amendment which I hope will be acceptable to the managers of the bill that will simply say, in essence, that a Senator could not spend time on unearned income, so-called, in managing a portfolio, managing farms, and managing rental properties and so forth, that would in any way detract from his ability or would be inconsistent with the conscientious performance of his official duties. I think it is possible for a Senator to prove expenditure of time in many, many different ways. A Senator should not abuse his 6-year term by spending a lot of time earning money in the unearned income route.

This particular Senator has limited his time by simply appointing Arthur Andersen to do the accounting, Stein Roe and Farnham to do the investment counseling, and the Harris Trust and Savings Bank to be custodian and manager. I have totaled up the total amount of time on an estimated basis by consulting those who have worked with me. The Senator from Illinois, in 10 years, has spent less than 1 percent of his time in managing that portfolio, and has delegated that authority and responsibility to others. I think it is possible for most of us to establish such a limitation.

Mr. THURMOND. Does the Senator feel that it is possible for those with a substantial income to do the same thing? Does the Senator feel they will follow the same code?

Mr. PERCY. I oppose the Muskie amendment, because I do not——

Mr. THURMOND. I would like to see the Senator's amendment in writing, but offhand, I do not see any special objection in the wording he gave a few moments ago, where it is not a substantial part of a Senator's time that is taken to do that.

But I certainly will be glad to see the amendment.

Mr. PERCY. Yes, I will have the amendment ready in the morning and will be happy to share it with the floor managers of the bill to see if they feel this helps solve one of the problems that our distinguished colleague has raised.

Mr. THURMOND. That still would not affect——

Mr. PERCY. What we are trying to determine is, how can we find a way, having accepted a fairly large adjustment in salary, to assure the American public they are having a full-time Senator on duty.

There are various ways to do it, roll-call votes, how much time we spend in committee, how conscientious we are about serving our constituency.

I do not know how a Senator has much time to do other things. This Senator resigned the first year in the Senate from every single board he served on with one exception, the University of Chicago that I have been on for 25 years, and I have a very poor attendance at those board meetings. But there is no corporate or banking activity I could possibly keep up with.

Mr. THURMOND. As I understand what the Senator is thinking about, since we put a limitation of 15 percent on earned income, what he has in mind is to try to balance that a little on the unearned income so the public will see that those who have unearned incomes will not spend undue time on their investments or in handling their business that would interfere with the performance of their duties in the Senate.

Mr. PERCY. I feel that what is good for the goose is good for the gander and in this case those who have assets and money to work with should not then have the freedom to use their time when there is a restriction on time on other Senators.

Mr. THURMOND. Properly worded, I can see no objection.

Mr. PERCY. Senators should be honor bound not to spend their time making money, but to spend their time being essentially U.S. Senators.

Mr. THURMOND. If the amendment is properly worded, if it can be worded to accomplish that, I would see no special objection to it. I think, from my standpoint, I would be inclined to accept it.

Mr. McCLURE. Will the Senator yield?

Mr. THURMOND. Although I believe most people in the Senate in that category are more or less following the policy of the distinguished Senator from Illinois which is employing the services of others to perform those duties for him.

I am pleased to yield to the distinguished Senator from Idaho.

Mr. McCLURE. I thank the Senator for yielding.

Mr. President, we are groping in an area where we find it difficult to find any definition. For instance, it has been said that Members of the Senate should spend virtually all their time on being a Senator.

Maybe the answer lies in requiring a number of hours per week to be devoted to senatorial duties, rather than looking at the other side and saying we can spend so much time doing something other than being a Senator.

One of the proposals I have had kicking around for some time, which perhaps is pertinent at this point, if we are talking about activities that take a Senator away from his senatorial duties, if that is what we are really concerned about now, not only the appearance, but the fact of other activities that take Members of the Senate away from their duties as Senators, perhaps we should take that old proposal out again and attach it to this bill that will make it illegal for any sitting Members of Congress to be a candidate for the Presidency or Vice-Presidency of the United States.

Mr. THURMOND. That might be a wholesome step to take.

Mr. McCLURE. If anything has taken more time in the last 2 or 3 years, it has been that activity.

Mr. THURMOND. I think it would shorten sessions a lot, too, and it might save a lot of time in debate, because when Members of Congress become candidates for President of the United States we have a lot more speaking and more de-

bate, and we have some measures advocated that might not be advocated if they were not candidates.

Mr. McCLURE. The Senator knows, as do I, committee sessions suffer both in scheduling and in content, the work of the Senate becomes diverted into the political rhetoric that that particular candidate feels suitable for his own candidacy.

If we are really concerned about the time that is consumed by the Senate, or individual Members of the Senate, perhaps the most constructive single thing we can do is make it impossible for them while sitting as Members of the Senate to be conducting themselves as candidates for the Presidency or Vice Presidency of the United States.

Mr. THURMOND. I would not want to give a final answer, but it certainly is a valuable point the Senator has raised. I think I might be inclined to go along with such a position, if it arises.

Mr. WALLOP. Will the Senator yield?

Mr. McCLURE. I am pleased to yield to the able and distinguished Senator from Wyoming.

Mr. WALLOP. I thank the Senator.

Mr. President, I find it difficult to believe I am hearing this. I cannot believe we are sitting here talking about appearances when we have the appearances of rats in a cage.

We are sitting around here arguing about a piece of time, a piece of money, and some kind of log on our time, and where is our faith in the American people?

If we come out with a simple, straight disclosure, and say, "Here is where I was, here is where I spoke, here is all I have got, this is what I earn," have the American people not got enough sense to make a judgment of anything on their own?

We are talking about people who have been elected by the people of this country.

The Senator from North Carolina was talking about whether or not family farms would come under this outside earned income, and if we read the code, they do, and we cannot interpret it any other way. I do not care what the report says.

Furthermore, if the report does not say that and, in fact, the farms—by the Senate's definition—are not receiving the material participation of the farm-owner, then the tax laws under the Internal Revenue Code will not work—if we talk about Catch 22, there it is. The Senator from North Carolina and this Senator from Wyoming will have to sell their farms. There is no way.

The Senate says that we are not materially participating, and the Internal Revenue says we are not, and yet we are making the decisions, and there we are, we are stuck.

Beyond that, the argument here this afternoon wanders around whether we are spending too much time. It is all right to spend time on charity, but not if it is for ourselves.

But in the name of appearances, if I were a member of the public up in this balcony, I would make a judgment on appearances.

I do not think we will gain the confidence of the American public by passing a resolution like this, that is arbitrary, capricious, has no mention in it, when we do not have to aggregate gifts less than $35. So a guy comes up and lays $34 on our desk and says, "Happy birthday." He does that for 100 days and he has done a pretty good service to us. But we do not have to aggregate it because it is not up there.

The whole thing is arbitrary, these limits of income, these limits of time, $25,000. Where did we get that figure?

I can see people on my staff begging not to go to $25,000, to be paid $24,900, and they can earn $100,000 a year speaking on my behalf.

What we are doing here is trying to tailor a code for moral leaders to a Harris poll instead of looking at the men and women who may be elected to this thing, and who are elected to it now, and assuming there is some moral character in it, at least one of us, and that we are capable of making a judgment, basically honorable and ethical men.

That is the appearance we want, and no amount of words in a code like this and no time logs and no amount of anything else will achieve that until we get to a canon of behavior that will, in fact, let the public take a look at the behavior of the men in this body.

Mr. PERCY. Would my distinguished colleague from South Carolina (Mr. THURMOND) mind a question to my distinguished colleague from Wyoming (Mr. WALLOP) who has raised a very important point about staff?

Mr. THURMOND. Mr. President, I am pleased to yield to the Senator from Illinois if he wishes to make a statement.

Mr. PERCY. I appreciate that very much.

One other area in which I think there is a sense of unfairness in the resolution that the committee has worked on faithfully and hard and diligently is in the discrimination as to staff members. An earning limitation is put down. They can earn 15 percent of their salary for honoraria and speaking fees and so forth, but not professional services.

In other words, there are many lawyers on the staff here. If a lawyer performed a service in helping another staff member write a will and that staff member wanted to pay him $50 or $25, that, as I understand the resolution, would be prevented. He could not make such a payment. However, staff members could go out and get speaking engagements, and so forth, and write books, and earn honoraria, and that would be legal. But how many times does a staff member have an opportunity to do that? What they have are professional services.

They are still limited by 15 percent. But it seems grossly unfair not to permit them in their own time, on weekends, or nights, to perform up to 15 percent of their time in professional services; and many, many of them do that today.

Therefore, I think it is a discrimination in favor of Senators to allow honoraria and speaking fees, and so forth, and not permit professional services to be used by some Senators and by staff members when that is a form of supplementary income that would come most naturally to them.

So the Senator from Illinois does intend to offer an amendment that would permit that kind of service to be performed up to the ceiling and limit of 15 percent. I think 15 percent is pretty small. I would rather see it higher, frankly, but I think we all do accept the spirit of some earnings limitation. I am for that spirit, but I want to be fair, so that we do not discriminate against staff, who really only have professional services they could provide as a means of supplementing income, not speaking engagements or honoraria or fees that they might receive from writing books.

Mr. JAVITS. Mr. President, will the Senator yield?

Mr. THURMOND. I yield to the distinguished Senator from New York.

Mr. JAVITS. Mr. President, I sat on this committee, and I think I went through most of its deliberations.

I am extremely conscious of the arguments being made by Senator WALLOP and Senator PERCY and many others. I, too, am a man of some property—not as much as I am given credit for.

For years—10 years minimum—I have reported all my investments, income tax figures, and so forth.

One thing that I think is being overlooked in this debate is that we do have a basic structure which is essential, and that is a general prohibition against doing anything which would demean us or demean the Senate.

I remind my colleagues of that because it is very important that we hang onto those sections; because if we do, we can accommodate almost any other reasonable changes. I will give two examples.

We have discussed conflict of interest a great deal. I refer Senators to page 27, line 3. It is only 5 lines, and I shall read it:

> A Member, officer, or employee of the Senate shall not receive any compensation, nor shall he permit any compensation to accrue to his beneficial interest from any source, the receipt of which would occur by virtue of influence improperly exerted from his position as a Member, officer, or employee.

That subsumes everything in the conflict of interest. Look at "Gifts," page 21, lines 15 to 21:

> No Member, officer or employee of the Senate, shall solicit or accept a present or future gift, favor, service, or anything of value from any person, business, or other entity under circumstances where he knows by the exercise of ordinary care that such gift, favor, service, or thing of value will, might tend to, or is intended to affect the present or future performance of official duties.

Mr. WALLOP. Mr. President, will the Senator yield?

Mr. JAVITS. Let me explain that.

Mr. WALLOP. Would it be possible to go to the White House for lunch?

Mr. JAVITS. Yes, it would be entirely possible to go to the White House for lunch, because it would not tend to affect the present or future performance of the Senator's duty, depending upon the mind and disposition of the Senator. That is exactly what I am coming to, and that is why I ask that the Senator permit me to complete my argument.

Therefore, I believe that Senators, within this confine, require some specifications, and that is why we inserted the specifications—some specifications as to

what we mean by these broad generalities, which could be very hazardous to Members in the hands of an Ethics Committee which had it in for them. That is, hence, the specificity with which we dealt with many matters in this code.

So I believe that the way in which to resolve this situation is to be sure that, in the finite details that we prescribe, we are realistic and practical.

There seems to be a lot of deep feeling about 15 percent. I do not agree with Senator MUSKIE to take it all, or whatever other scheme he wants, but some reasonable figure. We had 25. That may be the reasonable figure that a consensus of the Senate can arrive at.

Similarly, with respect to gifts or any other matter, let us make them practical and realistic, but let us have a reasonable amount of specificity, so that Members are not cast adrift with the general statements which the Ethics Committee can use against them and bring them up on trial and cause heavy penalties if they believe one of these general statements is violated. I believe that is the way, the only way, in which we can fashion this code.

As a member of the committee, I have listened with deep attention to my colleagues. I am going to propose half a dozen amendments of my own in connection with things we have since picked up, which seem unwise or impractical, and I will vote for other amendments. But let us collaboratively try to obey both those principles—one, the general statement which gives the Ethics Committee a handle on anybody and, two, as much specificity as is needed to give Members a guideline for conduct.

Where Members feel that we are being impractical or unrealistic, let them come forward with their amendments, and I think they will find that most of us, even the members of the committee—and that includes those of us who may feel even more keenly about it than some others—will be generous and openminded about trying to write the specific terms.

In addition, there is no flap about this; if we take all week, it is all right. This is the right exercise to go through. It is an open, public explanation of our situation.

Finally, I should like to close with this: If we are going to adjust everything to what a man who is a blue-collar worker or a normal white-collar worker owns, forget it. We are getting $57,500 now. We were getting $44,000 before. In order of magnitude, that is high level pay. We must assume that the public are sending us high level people, or, if they are not, at least we want them to do so; and we do not want to discourage high level people from coming here, and we easily could.

Within those parameters, bearing in mind that that is big money, anyhow, whether it is $25,000 plus $57,000 or $8,000 plus $57,000, the order of magnitude is the same. At that point I agree with the Senator that we have to trust to the fact that the American people have some sense and a sense of perspective and a sense of proportion. I think we can work it out upon those principles.

Mr. WALLOP. Mr. President, will the Senator yield?

Mr. THURMOND. I am glad to yield to the distinguished Senator from Wyoming.

Mr. WALLOP. I have no quarrel with the purpose, and I certainly have no doubt in my mind that the committee worked long and hard. But I do question the thrust of it. The thrust of what is written here is accusatory in nature.

I agree that the conflict-of-interest section generally is pretty good. On the other hand, it does arrive at arbitrary figures, and the outside earned income figure is the one that concerns me at this moment.

I intend to offer amendments, because I see that the legal profession, bless their hearts, have seen to it that they are exempt from some of the provisions of the code and others of us are not. Even though it is not the intent, that is what the language says; and if somebody interprets language, the language in the resolution will be the prevailing language, I do not doubt.

The fact is that one could write a book while a Member of the Senate and earn income from it. One could sit in his office all day long and wheel and deal in real estate and earn income. But in the farm that the Senator from North Carolina and the Senator from Wyoming are referring to, you are caught between the rules of the Senate and the rules of the income tax people.

Throughout this there are areas that are completely arbitrary, and I do not think they serve the interests of a code of conduct. That is my only point.

I do not question the attitude of the committee that wrote it or anything else, but I wonder if we are not taking the wrong tack, and I would like for the Senate at this moment to think if we have to follow the House—I keep hearing the argument raised that the House has done it and, therefore, we must. I wonder if there is not time yet for us to consider another route, a time in which we would consider, much as the judiciary has, a canon of conduct for the Members of the Senate, not part of the rules but guided by the Ethics Committee, flushed out by the Ethics Committee, perhaps using the concept that Senator ROTH intends to propose of having an outside commission be able to make the determination of facts, and the Senate make the judgment as to what the punishment should be.

I do not think we have to follow the House. I do not think it is necessary. I do not even think the press expects us to. Maybe the Washington Post does, but they have not read Senate Resolution 110 either because they think we have all our unearned income in blind trusts where it is expressly forbidden.

But there is an opportunity right now for us to begin to contemplate taking another course which will be just as visible, do just as much for the public perception, and do more for us as men of honor, and make us more visible in what we are trying to do.

I do not think, I really do not think, there is a moment when we ought to react to a poll and to the posturings of moral elitists when we are talking about the role of the Senate and the Government of the United States for the next 25 or 30 years.

I thank the Senator from South Carolina for yielding.

Mr. THURMOND. Mr. President, if there are no questions, I yield the floor.

Mr. NELSON. Mr. President, I call attention to the absence of a quorum.

The PRESIDING OFFICER. On whose time?

Mr. NELSON. I ask unanimous consent that the time taken for the quorum call not be taken out of the time on the bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. MOYNIHAN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MOYNIHAN. Mr. President, I ask unanimous consent to be recognized for not to exceed 7 minutes to speak on a resolution which I wish to submit, and that the time not be charged under the time limits applicable to Senate Resolution 110.

The PRESIDING OFFICER. Without objection, it is so ordered.

SENATE RESOLUTION 122—SUBMISSION OF A RESOLUTION RELATING TO THE PARLIAMENTARY ELECTIONS IN THE REPUBLIC OF INDIA

(Referred to the Committee on Foreign Relations.)

Mr. MOYNIHAN submitted the following resolution:

S. RES. 122

Whereas, Americans believe that support for representative institutions and individual rights is an important objective of the foreign policy of the United States;

Whereas, the effective functioning of democratic societies in other parts of the world is of deep and permanent interest to the United States and its allies;

Whereas, the largest democratic election in history, involving more than 200 million citizens casting their free ballot, was recently held in the Republic of India: Now, therefore, be it

Resolved, SECTION 1. That the Senate congratulate the free people of the Republic of India for the successful holding of their recent parliamentary elections.

SEC. 2. That the Secretary of the Senate is hereby directed to provide a copy of this resolution to the Secretary of State for transmittal to the Acting President of India.

Mr. MOYNIHAN. Mr. President, I appreciate the courtesy of my distinguished colleagues in allowing me a moment to propose that we, in the Senate, pause to record an extraordinary event—the largest free election in world history.

This past weekend in the Republic of India some 200 million persons participated in an historic vote, a vote which reaffirmed India's status as we have come to know it—and did know it—as the world's largest democracy.

Mr. President, two things took place in India this last weekend. I think they may be summed up in the headline in the Washington Star, which states succinctly, "Gandhi Loses; India Civil Liberties Restored."

The point to note about this election is,

first, that it took place. It was a free election, and the largest number of persons ever voting in a free election participated.

The second point, and one easily overlooked, is that India has in these days passed the critical test of a democratic society: it has changed the party governing the state by a free electoral process.

We have heard, this last year, much talk of the American Bicentennial and of our Revolution in 1776. Yet there is a sense in which the American Revolution took place, not in 1776, but in 1801 when, for the first time under our party system, the party in office lost power and freely transferred the reins of Government to the party that had won.

There is a sense in which the American Revolution occurred in this city in March of 1801 when John Adams turned the Great Seal and the Treasury and the Army over to Thomas Jefferson, and went back to Quincy, Mass., thinking he had been a failure when, in fact, he had created democracy in the modern world.

That has happened in India. It has not happened in many other societies. Of all the nations that achieved independence from colonial rule after the Second World War only a handful, six by my count, have ever changed ruling parties by free election.

India, incomparably the largest, has now done so, and it has done so with an extraordinary assertion that democracy, that liberty, that civil rights, and civil liberties are not a luxury of the rich. They are in every sense a necessity of all peoples, the poor not the least; if anything, the poorest need them most.

Mr. President, this remarkable occurrence is of significance to us because it reminds us that democratic ideals and democratic procedures can still be a powerful force in the lives of men and nations, and that peoples, once having experienced the political life of free choice and free debate, are loath indeed to surrender it—that they are prepared to risk their lives, their fortunes, and their sacred honor to preserve it.

I think, Mr. President, our own democracy has been strengthened by these events half way around the world. As one who once had the honor of representing the United States as its Ambassador to India, it is with special satisfaction that I ask my colleagues to join me in the passage of this resolution of congratulations to the Indian people upon the successful conclusion of their parliamentary elections.

Mr. JAVITS. Mr. President, will the Senator yield?

Mr. President, my colleague from New York has taken a very fine initiative, very much in character. He was himself a most creditable Ambassador to India, and he knows that country very well, and he knows so very well the history of our doctrines of freedom in his professorial life and in his personal and political life.

In return, I would like to assure my colleague that, as a member of the Committee on Foreign Relations, I am glad he has had it referred to us. It is something we should do deliberately. I will do my utmost to bring about early but very thoughtful action on so fine an initiative as he has authored.

Mr. MOYNIHAN. I thank my cherished colleague, the senior Senator from New York, and I thank the Chair.

OFFICIAL CONDUCT AMENDMENTS OF 1977

The Senate continued with the consideration of the resolution (S. Res. 110) to establish a code of official conduct for the Members, officers, and employees of the U.S. Senate; and for other purposes.

The PRESIDING OFFICER. Who yields time?

Mr. NELSON. Mr. President, I suggest the absence of a quorum, and I ask unanimous consent that the time not be taken from the time on the resolution.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. MUSKIE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MUSKIE. Mr. President, will the majority leader yield me 3 minutes?

Mr. ROBERT C. BYRD. Yes, I yield the Senator 3 minutes.

AMENDMENT NO. 92

Mr. MUSKIE. Mr. President, we will shortly, I think, propose an agreement to vote on the issues we have been debating. Before we do so, I ask unanimous consent to have printed in the RECORD amendment No. 92, and immediately following it an explanation of the effect of that amendment which I submit for that purpose.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

AMENDMENT NO. 92

On page 24, beginning with line 13, strike out all through line 24 on page 26.

Renumber proposed rules XLV through L (and cross references thereto) as XLIV through XLIX, respectively.

The second amendment would strike the Committee's recommended limitations and would stress current legal limits and disclosure, the amendment:

1) strikes out the entire proposed Rule 44 and would thus remove the 15%-of-salary limitation on outside "earned" income as defined by the Committee, thereby treating all permissible outside income in the same manner;

2) preserves the public disclosure requirements contained in Rule 42 of the Committee's proposal;

3) leaves standing the proposed conflict of interest provision contained in Rule 45 of the Committee's proposal including the prohibition against providing professional services for compensation;

4) leaves standing those sections now contained in the Federal Election Campaign Act limiting honoraria income which Congressmen may receive to an annual total of $25,000 and a maximum of $2,000 per speech.

Mr. MUSKIE. The time agreement which we will be proposing, and to which I agree, will provide for a vote first on the pending amendment, which we have been debating for 2 days, and a second vote on the amendment which I have just inserted in the RECORD with an explanation, which will indicate to Senators who read the RECORD what the second amendment would accomplish if approved.

With that, I yield to the distinguished majority leader to propound the time agreement.

Mr. ROBERT C. BYRD. I thank the distinguished Senator from Maine (Mr. MUSKIE).

I ask Senator MUSKIE this question: Did I correctly understand amendment No. 92 as being the amendment which we really have been talking about, for the most part, during the last 2 days, to wit, the amendment that would remove the 15-percent limitation, thus leaving the present law obtaining? For example, that there would still be a limitation of $25,000 on outside earned income, which includes honoraria, with a maximum per honorarium of $2,000?

Mr. MUSKIE. That is correct, and of course in addition the disclosure requirements of the present law would apply to honoraria of any kind, so that if the second amendment is approved, the effect would apply to honorarium income the disclosure requirements, plus the higher limit which exists in present law of $25,000. As a matter of fact, we could not affect present law, I do not believe, by this resolution.

Mr. ROBERT C. BYRD. Yes.

Mr. MUSKIE. So the effect of the amendment is to eliminate the restrictions on honorarium income in the pending resolution, leaving in effect the restrictions that exist in the present law.

Mr. ROBERT C. BYRD. All right. So my understanding is correct, then, is it not, may I ask the able Senator from Maine, that amendment No. 92 is not a substitute amendment for the amendment that we have been discussing, even though that amendment has not been pending? We have all been referring to the second amendment as the amendment that eliminates the 15-percent limit on outside earned income, and this is that amendment; is that correct?

Mr. MUSKIE. The Senator is correct. Amendment No. 92 was introduced last week, it was printed last week, and it is the only amendment that was introduced last week, and the one we have been debating.

Mr. ROBERT C. BYRD. I thank the Senator.

UNANIMOUS-CONSENT AGREEMENT

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that at 5 o'clock tomorrow afternoon, the Senate proceed to vote up or down on amendment No. 93, which is the pending amendment; that no tabling motion, of course, be in order, and that no amendment to the amendment be in order;

That immediately upon the disposition of amendment No. 93, there be a limitation of 1 hour of debate on amendment No. 92, with the time to be equally divided between the author of amendment No. 92, Mr. MUSKIE, and the Senator from Wisconsin (Mr. NELSON);

Provided further, that the final 15 minutes of that 1 hour of debate be allotted to the Senator from Maine (Mr. MUSKIE);

Provided further, that at the hour of

6:15 p.m., which would be at the expiration of the 1 hour of debate, the Senate proceed to vote up or down—with no tabling motion in order, no further amendments in order, and no further debate in order—on amendment No. 92.

I have cleared this request with the Senator from Wisconsin (Mr. NELSON) and Mr. MUSKIE and I having discussed it with the Senators who are the principals in the offering of the two amendments and the distinguished Republican leader having been present, I believe that this request has been sufficiently cleared on both sides of the aisle.

Mr. BAKER. Mr. President, reserving the right to object, and I will not object, I commend the majority leader and the distinguished Senator from Maine for arriving at this accommodation in order to establish a regularity in our proceedings tomorrow. There is no objection on this side. I have consulted with the principals involved in these two amendments, and with Senator PACKWOOD. I know of no other objection to it and I therefore will not object.

The PRESIDING OFFICER. Without objection, it is so ordered.

The text of the agreement is as follows:

Ordered, That at the hour of 2 p.m. on Tuesday, March 22, 1977 the Senate resume consideration of Amendment No. 93 to S. Res. 110, with the time until 5 p.m. to be equally divided and controlled by the Senator from Maine (Mr. Muskie) and the Senator from Wisconsin (Mr. Nelson) and that at the hour of 5 p.m. the Senate proceed to vote on the amendment No. 93 and that no amendment to amendment No. 93 be in order.

Ordered further, That following the vote on the amendment No. 93 the Senate proceed to the consideration of amendment No. 92, and that debate on the amendment be limited to one hour to be equally divided and controlled by the Senator from Maine (Mr. Muskie) and the Senator from Wisconsin (Mr. Nelson) provided that the final 15 minutes be allocated to the Senator from Maine, at the conclusion of which the Senate proceed to vote on amendment No. 92 and that no amendment to amendment No. 92 be in order.

Provided further, That following the vote on amendment No. 92 the Senator from Connecticut (Mr. Weicker) be recognized.

Mr. ROBERT C. BYRD. Mr. President, I thank the distinguished Senator from Maine, the author of the amendment, the distinguished Republican leader, and all other Senators who have participated in the discussions leading up to the agreement.

Mr. MUSKIE. Mr. President, I would like to express my appreciation also to the distinguished majority leader for his understanding in scheduling the time for these votes. I think there has been ample debate and there is more scheduled for tomorrow. I gather that we will be resuming action about 1:30 or 2 o'clock tomorrow afternoon.

ORDER FOR RECESS UNTIL 1 P.M. AND SPECIAL ORDERS FOR TOMORROW

Mr. ROBERT C. BYRD. Mr. President, by way of answering the distinguished Senator, I ask unanimous consent that when the Senate completes its business today it stand in recess until 1 p.m. tomorrow; that after the two leaders or their designees have been recognized under the standing order, Mr. BARTLETT and Mr. ROTH each be recognized for not to exceed 15 minutes; that there then be a period for the transaction of routine morning business until the hour of 2 p.m., with statements limited therein to 5 minutes each, and that at the hour of 2 p.m. the Senate resume consideration of the pending business.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER DIVIDING TIME FOR DEBATE TOMORROW BETWEEN 2 P.M. AND 5 P.M.

Mr. ROBERT C. BYRD. Mr. President, I wonder if it might be well for us to agree at this point also—if the Senator from Maine would also agree—that the debate between the hour of 2 p.m. and the hour of 5 p.m. tomorrow be equally divided between Mr. MUSKIE and Mr. NELSON.

Mr. MUSKIE. I think that is an excellent suggestion. I thank the majority leader.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER PROHIBITING CONSIDERATION OF RESOLUTIONS UNDER THE RULE TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that no resolutions come over under the rule tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

(At this point Mr. ROBERT C. BYRD's statement of the program and related colloquy occurred, all of which is printed in today's RECORD just prior to the recess, by order of the Senate.)

ORDER FOR RECOGNITION OF SENATOR WEICKER UPON DISPOSITION OF TWO AMENDMENTS BY SENATOR MUSKIE

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that upon the disposition of the two amendments by Mr. MUSKIE, Mr. WEICKER be recognized to call up his amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I think our understanding is in accordance with the request that I promulgated.

Mr. BAKER. Mr. President, if the Senator will yield, let me state my understanding of the request now pending. I believe we are in agreement.

Mr. ROBERT C. BYRD. Yes; I yield.

Mr. BAKER. It is the understanding of the Senator from Tennessee of the request put by the majority leader that there will be no amendments to the two Muskie amendments.

Mr. ROBERT C. BYRD. Except by unanimous consent.

Mr. BAKER. Which, of course, we can always do, as the Senator from Alaska properly asked; but that, at the expiration of time for the two Muskie amendments, without an intervening tabling motion, without amendment and without further debate, there will be a vote on these amendments as otherwise prescribed in the unanimous-consent order.

Mr. ROBERT C. BYRD. The Senator is correct, with the understanding that a Senator may suggest the absence of a quorum in either event or both.

Mr. BAKER. And with the further understanding, as declared by the Senator from Alaska, if other amendments are not controversial; if they are worked out with the managers of the bill, by unanimous consent, they may be quickly taken up and disposed of quickly.

Mr. ROBERT C. BYRD. Yes.

May I ask the Chair if that is the understanding of the Parliamentarian with respect to my statement?

The PRESIDING OFFICER. The Senator is correct.

Mr. ROBERT C. BYRD. Again, if a quorum call should develop at 5 o'clock, or, as a matter of fact, if a quorum call should be underway at 5 o'clock, then upon the disposition of the first vote, which would be on amendment No. 93, there would be 1 hour of debate on the second amendment, amendment No. 92, so that the vote thereon would not necessarily occur at 6:15, but it would, in any event, occur at the expiration of the 1 hour of debate on amendment No. 92.

The PRESIDING OFFICER. The majority leader is correct.

Mr. ROBERT C. BYRD. I thank the Chair.

I thank all Senators.

I believe that about winds it up except for a couple of requests here.

REREFERRAL OF NOMINATION OF FRANK PRESS

Mr. ROBERT C. BYRD. Mr. President, on Friday, March 18, 1977, the nomination of Frank Press to be Director of the Office of Science and Technology was jointly referred to the Committee on Human Resources and to the Committee on Commerce, Science, and Transportation. As in executive session, I ask unanimous consent that the joint referral be vitiated and that the nomination be referred to the Committee on Commerce, Science, and Transportation pursuant to the provisions of Senate Resolution 4.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROGRAM

Mr. ROBERT C. BYRD. Mr. President, the program for tomorrow is as follows: The Senate will convene at the hour of 1 p.m. After the two leaders or their designees have been recognized under the standing order, Mr. BARTLETT and Mr. ROTH will be recognized each for not to exceed 15 minutes, after which there will be a period for the transaction of routine morning business not to extend beyond the hour of 2 p.m., with statements limited therein to 5 minutes each.

At the hour of 2 p.m., the Senate will resume consideration of the code of conduct resolution, at which time the question will be on the adoption of amendment No. 93 by Mr. MUSKIE, which is the pending amendment. There will be 3 hours of debate equally divided on that amendment. Of course, the debate may allude to the second amendment, amendment No. 92, if Senators so wish to direct their attention thereto.

At the hour of 5 p.m. a vote will occur on the adoption of amendment No. 93, which is the pending amendment. No amendment thereto will be in order. No tabling motion in relation thereto will be in order, and no further debate after the hour of 5 p.m. will be in order.

Upon the disposition of amendment No. 93, there will be 1 hour of debate on amendment No. 92—that is Mr. MUSKIE's second amendment—which is for the purpose of eliminating the 15-percent limitation on outside earned income, an amendment to which most Senators have been directing most of their remarks during the past few days.

At the expiration of the 1 hour of debate, and with Mr. MUSKIE having the last 15 minutes, the Senate will proceed to vote up or down an amendment No. 92 with no amendment thereto in order, with no tabling motion in order, and with no further debate in order. That will be an up or down vote.

Does any Senator misunderstand me to the point that he would like to make an observation or ask a question at this point?

Mr. MUSKIE. The distinguished majority leader has stated the agreement as I understand it.

Mr. BAKER. Mr. President, will the Senator yield?

Mr. ROBERT C. BYRD. Yes.

Mr. BAKER. Mr. President, on Friday last we discussed the possibility of the Weicker amendment being the next pending amendment. I believe there is now entered a unanimous-consent order that provides that the two Muskie amendments will not be laid aside in preference to any other amendment except the Weicker amendment. Might I ask the majority leader if he is prepared at this time to agree that the Weicker amendment would be the next pending business following the disposition of these two amendments?

Mr. ROBERT C. BYRD. Yes, indeed.

If I could, before I get to that, may I ask this question so that everyone will understand the situation to be as I understand it: It is possible that at the hour of 5 p.m., a quorum call could be suggested because any Senator is entitled to suggest the absence of a quorum under the Constitution, and all time having elapsed, such a quorum call would be in order. In the event such a quorum call is requested, this would mean, then, that the vote on the first of Mr. MUSKIE's amendments, the vote on No. 93, would not really occur at 5 p.m. It would occur at the close of the quorum call. Have I so worded my request that even though that eventuality should occur, there would still be 1 hour of debate on the second amendment?

The PRESIDING OFFICER. No. The request provides that the second vote will come at 6:15. Does the Senator wish 1 hour to be set aside? We would have to rescind that part of the request.

Mr. ROBERT C. BYRD. I do not recall having included that in my request. Did I? Very well. Then I think we have to provide for that eventuality because were a quorum call to occur, Senators would be shut out of a full hour of debate.

Let me modify my request, Mr. President, simply by amending it in this way:

That in any event, whether or not a quorum call should occur at 5 p.m., there be 1 hour of debate on the second amendment, amendment No. 92, to be equally divided between Mr. MUSKIE and Mr. NELSON, with Mr. MUSKIE having the final 15 minutes thereof, and that upon the expiration of that hour, or if it is yielded back, which I doubt that it will be, the vote then occur up or down on amendment No. 92 with no tabling motion in order, no amendment thereto in order, and no further debate thereon being in order.

Mr. MUSKIE. Mr. President, reserving the right to object, it is conceivable under the form that the majority leader has now proposed, and I am wholly in accord with it, that the vote could occur before 6:15. I think that ought to be clear on the RECORD so that the Senate will not hold us to the 6:15 time. In other words, if the time is yielded back, which is inconceivable but possible, then the vote could come earlier than 6:15.

Mr. ROBERT C. BYRD. Yes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Very well, Let me restate the program.

Mr. STEVENS. Will the Senator yield?

Mr. ROBERT C. BYRD. Yes.

Mr. STEVENS. I did not object because I did not intend to object to the agreement. But as I understand it there is no prohibition in this agreement we have just entered into to taking up, by unanimous consent, any of these perfecting amendments that some of us have been working on around here in this time frame, if it is agreeable. This is not to bar any of those? It was not the majority leader's intention that if we had the consent and were ready to go, that we could not get an agreement to take up in slack time some of the perfecting agreements, was it?

Mr. ROBERT C. BYRD. No, it was not, but I think the Senator raises an important point. The vote which is to occur on amendment No. 93 was specified as occurring up or down at 5 p.m. on amendment No. 93, with no amendment thereto in order.

I do not think I ruled out any amendments except at that point, did I, to amendment No. 93?

The PRESIDING OFFICER. Unless the time has expired on the amendment, an amendment thereto would not be in order. Until the time has expired, the amendment is not in order.

Mr. ROBERT C. BYRD. But did I say no amendment would be in order to amendment No. 93 when the hour of 5 o'clock arrived?

The PRESIDING OFFICER. The Senator did say that.

Mr. ROBERT C. BYRD. Then the Senator would have to have unanimous consent to offer an amendment prior to that hour with the time's not having expired.

The PRESIDING OFFICER. The Senator is correct.

Mr. ROBERT C. BYRD. I do not intend to rule out the Senator's opportunity, if it is agreeable with the Senator from Maine, to offer amendments to the first amendment during the first 3 hours tomorrow by unanimous consent. Is that the Senator's understanding?

The way I phrased the request, the vote will occur on amendment No. 93 at 5 o'clock. The time will not have expired until 5 o'clock. My request provides that no amendments be in order at 5 o'clock.

Mr. MUSKIE. I would have to say that it was my impression that we would not consider amendments during that time. I have not focused on the other possibility.

Mr. BAKER. Mr. President, the junior Senator from Oregon is not now present on the floor. If there is a possibility that amendments could be offered, I would like first to check with him, so I ask the majority leader to withhold that request if that is the intention.

Mr. STEVENS. I shall just not raise the issue further. If it comes up, we shall discuss it tomorrow. I have no objection to the agreement.

RECESS TO 1 P.M. TOMORROW

Mr. ROBERT C. BYRD. Mr. President, if there be no further business to come before the Senate, I move, in accordance with the previous order, that the Senate stand in recess until the hour of 1 o'clock p.m. tomorrow.

The motion was agreed to; and at 6:50 p.m., the Senate recessed until tomorrow, Tuesday, March 22, 1977, at 1 p.m.

NOMINATIONS

Executive nominations received by the Senate March 21, 1977:

DEPARTMENT OF STATE

Matthew Nimetz, of New York, to be Counselor of the Department of State.

Herbert J. Hansell, of Ohio, to be Legal Adviser of the Department of State.

U.S. GOVERNOR—INTERNATIONAL BANKS

W. Michael Blumenthal, of Michigan, to be U.S. Governor of the International Monetary Fund for a term of 5 years and U.S. Governor of the Internationl Bank for Reconstruction and Development for a term of 5 years; a Governor of the Inter-American Development Bank for a term of 5 years; and U.S. Governor of the Asian Development Bank and U.S. Governor of the African Development Fund.

DEPARTMENT OF THE TREASURY

Jerome Kurtz, of Pennsylvania, to be Commissioner of Internal Revenue, vice Donald C. Alexander, resigned.

DEPARTMENT OF DEFENSE

David Emerson Mann, of Maryland, to be an Assistant Secretary of the Navy, vice H. Tyler Marcy, resigning.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Harry K. Schwartz, of Pennsylvania, to be an Assistant Secretary of Housing and Urban Development, vice Sol Mosher, resigned.

Donna Edna Shalala, of New York, to be an Assistant Secretary of Housing and Urban Development, vice Charles J. Orlebeke, resigned.

IN THE AIR FORCE

The following officers for appointment in the Reserve of the Air Force to the grade indicated, under the provisions of chapter 837, title 10, United States Code:

To be major general

Brig. Gen. James D. Isaacks, Jr., [redacted] FV, Air Force Reserve.

Brig. Gen. Stephen T. Keefe, Jr., [redacted] FV, Air Force Reserve.

Brig. Gen. Roy M. Marshall, [redacted] FV, Air Force Reserve.

Brig. Gen. Sidney S. Novaresi, [redacted] FV, Air Force Reserve.

Brig. Gen. Ted W. Sorensen, [redacted] FV, Air Force Reserve.

To be brigadier general

Col. Richard D. Anderegg, xxx-xx-xxxx FV, Air Force Reserve.

Col. Donald H. Balch, xxx-xx-xxxx FV, Air Force Reserve.

Col. Milton J. Eberle, xxx-xx-xxxx FV, Air Force Reserve.

Col. Sloan R. Gill, xxx-xx-xxxx FV, Air Force Reserve.

Col. Thomas J. Gregory, xxx-xx-xxxx FV, Air Force Reserve.

Col. Frank E. Humpert, xxx-xx-xxxx FV, Air Force Reserve.

Col. Lewis E. Jones, xxx-xx-xxxx FV, Air Force Reserve.

Col. Samuel K. Lessey, Jr., xxx-xx-xxxx FV, Air Force Reserve.

Col. Martin M. Ostrow xxx-xx-xxxx FV, Air Force Reserve.

Col. Albin H. Schweers, xxx-xx-xxxx FV, Air Force Reserve.

Col. Joseph L. Shosid, xxx-xx-xxxx FV, Air Force Reserve.

Col. Robert E. Van Housen, xxx-xx-xxxx FV, Air Force Reserve.

EXTENSIONS OF REMARKS

THE GREENING OF CHICAGO

HON. JOHN G. FARY
OF ILLINOIS
IN THE HOUSE OF REPRESENTATIVES

Monday, March 21, 1977

Mr. FARY. Mr. Speaker, March 17 was the day the Irish, and is popularly said, those who wish they were Irish, celebrated the feast of the patron saint of Ireland, St. Patrick.

During the Chicago St. Patrick's Day Parade Congressman ANNUNZIO and I noticed most Americans were wearing a touch of green to signify they hold a special place for the spirit that is uniquely Irish. That spirit brought the sons and daughters of Ireland to this country where they helped build a Nation with compassion, understanding, and opportunity for all people.

The warmth and wisdom of the Irish is apparent in every aspect of American life—it is art, it is politics, and, indeed, it is very fiber. We can only hope that these qualities will prevail in Ireland, and we wish for its people an end to violence, and the restoration of the principles to which St. Patrick himself was dedicated.

I could not permit this joyous day to pass without making reference to an incident which occurred on the occasion of my becoming a Member of this august body when our then majority leader and, today, our distinguished Speaker, THOMAS J. O'NEILL, JR. approached me in the well of the House engulfing me in his arms and lifting me off the floor said "John we are happy to have you here with us"—from them on everything has been on the up.

I have been most fortunate in growing with, working with, and socializing with another great son of Ireland, the late Mayor Richard J. Daley. Regrettably the Lord did not permit him to be present to celebrate this St. Patrick's Day, but he was present if not in body then in spirit at the Chicago St. Patrick's Day Parade where the Sons of St. Patrick marched in his honor and memory.

It is the Boston Irish that lay a stranglehold on the claim that their forebearers were the first to march in such a St. Patrick's Day parade, 4 years before the Hibernian brothers in New York.

The first record of a parade in the Chicago area was in the early 1800's when "400" Friendly Sons of St. Patrick marched in a neighborhood restaurant led by an Irishman with the amazing name of Hercules Mulligan from Dungarvan, County Waterford. He was by trade a tailor and a close friend of early American Presidents.

The Chicago St. Patrick's Day Parade is now an annual event which draws thousands of spectators in the city of Chicago. The parades in the Chicago area were small neighborhood affairs until later when they were consolidated by Mayor Daley in 1956 and the parade route was changed to the world-famous State Street with each year's parade becoming larger and larger until today Chicago's St. Patrick Day Parade is the biggest event of the year with different Irish societies and counties dressed in colorful uniforms with other ethnic groups joined in their native garb with a touch of green entertwined in their costumes.

These parade festivals were peaceful affairs usually. At the turn of the century, however, there was an enterprising barber named Mikel Schwab who hung this sign in his shop at 11 State Street every March 17 "Black Eyes Treated Here" which went on for 20 years—Mikel and his son after him made a handsome purse after the parade, and the day following it.

Each year a committee of civic leaders coordinate the endeavors of the parade whose activities have grown from a single parade to a series of events including a colleen contest, a coronation ball, and many parade awards given in several categories.

This year's theme is "A Tribute To a Great Irishman, Mayor Richard J. Daley." This would have made him very proud. Indeed, no man ever loved a parade more than Mayor Daley, and he encouraged ethnic peoples living in and around Chicago to parade in all the national holidays of their countries. Mayor Daley's four sons, Richard, John, William, and Michael were the grand marshalls for the parade. Dan Lydon was the parade coordinator; 1,000,000 people marched along with 100 floats and 80 marching bands. Ed Brabec was general chairman.

Mr. Speaker, I cannot lay claim to any Irish blood, but each year for the past 20 years I have marched proudly in the Chicago St. Patrick's Day parade with my Irish friends. What impresses me most about the parade is the enthusiasm it generates among all the residents of Chicago—those of all ethnic backgrounds and of all ages. It is not only a community festival, and a super one, but it's renown has spread so that the spirit of the parade encompasses the entire State of Illinois. The parade stands as a symbol of the strong ties between the American and Irish peoples that remains firmly knotted in both war and peace.

It was a Brooklyn-born mathematics teacher, the late Eamon De Valera, who politically and militarily led the Irish rebels through the strife-torn rebellion and, finally, to independence and self-government.

The Irish leaders in that struggle were careful to stress that their effort was aimed not at creating a new nation but, rather, at reasserting the historic inalienable right of the Irish people to the control of their Irish destinies. The Irish declaration of independence proudly stated:

> The long usurpation of that right by a foreign peoples and governments has not extinguished the right, nor can it ever be extinguished except by the destruction of the Irish people.

This same strong tradition of political independence and love of freedom was infused into the American system by those immigrants who came to our shores. The early history of America is replete with the names of Irish immigrants. Charles Thompson, an Irishman, made the first copy of the Declaration of Independence. Another Irishman, John Dunlop, printed it. A third, John Nixon, read it publicly for the first time in Philadelphia. Lighthouse Harry Lee, said that his regiment should properly be called the "Irish Magruders" because 361 of the 731 foreign born in the regiment were Irishmen.

Sixteen of Washington's general officers were Irish, most of them members of the Friendly Sons of St. Patrick. In fact, George Washington was "unanimously adopted" by the Society of the Friendly Sons of St. Patrick when it was first organized in Philadelphia on March 16, 1771.

In the American democracy the Irish found political nobility and a productive channel for centuries of repressed political ambitions. They quickly recognized the potential for political gain that their numbers represented in the larger cities.

The Irish set the tone for the immigrant Polish, Italians, Jews, Croatians, Lithuanians, and other European ethnic groups that followed. Today, in similar fashions, hispanic and blacks are consolidating their bases of political power and sending their representatives to city hall, Washington, and State capitols.

With political power comes slow often painful social advancement. The offspring of these uneducated Irish immigrants entered American universities and, in time, gained entry into American professions and corporations.

Traditionally, the Irish have gravitated to "people" careers—fields that bring them in contact with others where their diplomatic ways and magnetic personalities can win over the most skeptical antagonists.

Irish leaders during the rebellion of 1916 were fond of reminding their people that "England's difficulties are Ireland's

opportunities." It can truly be said that Ireland's preindependence difficulties—those problems that pushed hundreds of thousands of Irishmen and Irishwomen to our land—were indeed "America's opportunities."

It was stated best during a conversation I had with Joe Meegan, executive director of the Back of the Yards Neighborhood Council of Chicago, and Patrick O'Malley, an expatriot of Boston and the head of the Automatic Canteen Corp. and president of the Chicago Parish District. Both Joe Meegan and Patrick O'Malley have lived in Chicago for many years. We were discussing Ireland when Joe Meegan turned and said to me, Johnny "Like a great tree that never eats it's own apples, Ireland raises men, and the whole world plucks them." America is fortunate in that we too have plucked from Ireland.

Mr. Speaker, joining the people of Chicago in this particular St. Patrick's Day celebration was an exciting experience for me. Members of the Irish Fellowship Club started the day with a memorial Mass to the late Mayor Daley at old St. Patrick's Cathedral. Concelebrants of the Mass were five close friends of Mayor Daley's family. Msgr. Daniel O'Rourke, pastor emeritus of St. Mary of the Woods, the Reverend John J. Lydon, pastor of Nativity of Our Lord Parish, the Reverend Stephen J. O'Donnell, pastor of St. Patrick's Cathedral, the Reverend Gilbert Graham, O.P., and the Reverend Joseph E. Bowen, S.J.

His Excellency, John Patrick Cardinal Cody, Archbishop of Chicago, and a famous pulpit orator, heralded Mayor Daley for his strong Christian belief, devotion to his family, and the great contribution he made during his lifetime to his beloved Chicago, the State, and the Nation.

It was a most picturesque sight, Mr. Speaker, on this beautiful St. Patrick's Day to see the Chicago fireboats in the distance sending a cascade of green spray skyward from Lake Michigan forming a rainbow over the city as the sons of Erin strutted down Chicago's State Street following the emerald green line to the strains of the Shannon Rovers Pipers as they passed the Chicago River dyed green for the occasion.

Everything this day in Chicago was green from the youngsters enjoying shamrock green milkshakes, to green beer for the grownups.

All this brought to mind how much richer and stronger our country is for the Irish people who settled here. This is a day to congratulate those persons of Irish heritage who have contributed their qualities and special character to this country, and to those who have successfully worked to symbolize that character in our Chicago St. Patrick's Day Parade.

Not to be outdone by the Irish Americans, the Polish and Italian peoples prepared a route for their own parade on March 19 for St. Joseph's Day the patron saint for both the Italian and Polish peoples.

To our Honorable Speaker, and you my colleagues in the House, and to the Irish-Americans of Chicago and all those who wish they were Irish on this glorious day—A Happy St. Patrick's Day—Erin Go Bragh.

GIBBONS TO CONTINUE TEAMSTERS-ERISA HEARINGS MARCH 24

HON. SAM GIBBONS

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 21, 1977

Mr. GIBBONS. Mr. Speaker, today I am announcing for the RECORD another hearing on enforcement of the Employee Retirement Income Security Act—ERISA. The hearing, which will focus on actions involving the Teamsters' Central States Pension Fund, will begin at 8:30 a.m., Thursday, March 24, in the Ways and Means Committee hearing room in the Longworth House Office Building.

The Secretary of Labor, Attorney General, IRS Commissioner, and their experts on the administration of ERISA have been invited to testify. The Subcommittee on Oversight is especially concerned about the decision to revoke the fund's tax exemption and subsequent reversal of that decision in return for promises of reform. Questions about this matter were originally pursued by subcommittee member J. J. PICKLE, Democrat of Texas.

The hearings will begin in open session. The subcommittee will take all testimony, including written statements, on the record.

MEASURING BASIC HUMAN NEEDS: A PHYSICAL QUALITY OF LIFE INDEX

HON. DONALD M. FRASER

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 21, 1977

Mr. FRASER. Mr. Speaker, the most widespread current measure of the extent of poverty and wealth in any country is the per capita gross national product. However, it has long been recognized that these average GNP figures mask enormous disparities of wealth and income within countries. They are poor indicators of the actual quality of life of the people in terms of the satisfaction of their basic needs for food, shelter, sanitation, education, and other requirements for physical well-being.

The lack of a commonly accepted social indicator to supplement the often misleading GNP figures has been keenly felt by those concerned with international development. This lack has been especially noticeable since the focus of development efforts in recent years has turned to programs designed to deal directly with the alleviation of poverty and the satisfaction of basic human needs.

Now, the Overseas Development Council—ODC—a Washington-based nonprofit research and public education organization, has devised a physical quality of life indicators, or PQLI, which attempts to meet the need for a more accurate measure of the true state of peoples' physical well-being. The PQLI is derived from statistics on life expectancy, infant mortality, and literacy. According to the ODC, these statistics are important not only in and of themselves but also as relatively sensitive indicators of income distribution, employment, nutrition, and other factors that contribute to total physical well-being.

A full explanation of the PQLI is included as a note to the statistical annexes of ODC's just-released fifth annual analysis of international development issues, "The United States and World Development: Agenda 1977," by John W. Sewell and the ODC staff. The explanation and the accompanying tables offer an intriguing glimpse into the inadequacy of the GNP measure and the potential for a more socially oriented yardstick.

It is difficult to tell if the PQLI is the best measure of this sort that could have been devised; ODC itself is still in the process of refining the concept. But there is little question that this kind of measure has been long overdue and that—whatever refinements may remain to be made—the PQLI is a usable, and most welcome, addition to the analytical tools available for understanding and dealing with poverty.

Accordingly, I insert and commend to the attention of all those who are interested in issues of poverty and development, first, an article on the PQLI by Ann Crittenden, which appeared in the New York Times on March 13, 1977, and second, the ODC's explanatory note from its agenda 1977:

A NEW INDEX ON THE QUALITY OF LIFE

(By Ann Crittenden)

For years economists have been concerned that traditional measures have failed to take into account the impact of economic growth on the lives of people.

Progress tends to be described in the crude shorthand of gross national product, or output of goods and services, although increases in G.N.P. alone reveal nothing about whether life is made easier, longer or richer for most individuals in a society.

Now a group of analysts has come up with a new measure of economic development, designed to correct the omission and to provide a simple guide to development planners, who are focusing more and more of their efforts on meeting the "basic human needs" of the poor.

The newly designed "physical quality of life index," conceived by the Overseas Development Council, a Washington-based economic research organization, is a composite measure with equal weights given to three indicators: literacy, life expectancy and infant mortality.

The assumption is that progress in these areas will indicate, at least roughly, how far a country or region has gone in satisfying the most fundamental needs of its people—the needs that relate directly to their quality of life.

"It gives us a stereoscopic view—a way of looking behind the facade of the G.N.P. numbers," claims James P. Grant, president of the council and a former Deputy Asssistant Secretary of State under President Kennedy.

Measuring countries on the P.Q.L.I. scale, the council team has uncovered some fascinating comparisons. For example, Algeria, which boasts of its socialist orientation and which has an annual per capita income of $710, has half the P.Q.L.I. of Sri Lanka, a

crowded island nation with a per capita G.N.P. of only $130.

Country (ranked by size of per capita gross national product)	*Index*
Kuwait	76
United States	96
Netherlands	99
Gabon	21
Iran	38
Taiwan	88
Algeria	42
Malaysia	59
Cuba	86
South Korea	80
India	41
Sri Lanka	83

(Source: Overseas Development Council).

Indeed, the people of Sri Lanka, one of the "poorest" nations in the world in terms of per capita output, live longer and have higher literacy rates than the citizens of almost all other developing countries, including Iran, with a per capita income of $1,250, and oil-rich Kuwait, whose national income now amounts to a whopping $11,770 per person.

The P.Q.L.I. can be used to measure changes over time as well as current levels of achievement. The index shows, for example, that between the 1950's and the 1970's India improved the lot of its people significantly, in spite of abrupt shifts in development strategy and erratic growth rates.

Similarly, the index can reveal interesting contrasts within nations, between regions and among various ethnic groups. Thus, black Americans have a P.Q.L.I. of 89, close to that of Taiwan, Hong Kong and several Caribbean nations, while white Americans have an index of 97, topped only by the residents of Denmark, Iceland, Norway, Sweden, Switzerland and Japan.

While the index does seem to be fairly well coordinated in national income, the few standout cases like Sri Lanka and the southern Indian state of Kerala do demonstrate, Mr. Grant maintains, that social policies alone can have an impact on well-being.

Both of these impoverished areas provide free education, cheap medical care and, in the case of Sri Lanka, a free portion of rice, the basic food, to everyone.

The Council economists admit that the P.Q.L.I. is still a somewhat crude device and warn that it should not be used too literally. They are working to refine the index.

The concept is being introduced in the Council's 1977 agenda on the United States and world development. A copy of the agenda, which will be released in Washington next week, was made available to The New York Times. It contains a review of the development issues and events of the last few years and describes policy choices now available to the Carter Administration.

A Physical Quality of Life Index (PQLI)*

In recent years, international development agencies and economic planners in many countries have become increasingly concerned with the task of meeting the "basic human needs" of the very poorest groups of people. As development strategies have shifted their emphasis toward addressing these minimum human needs, there has been a growing recognition of the need to devise an indicator that more effectively measures the degree of progress along these lines than is possible with GNP indicators. The U.S. Foreign Assistance Act of 1973 (and its subsequent amendments)—which mandated that an increasing amount of U.S. bilateral assistance be directed toward the improvement of the lot of the poor majority in developing countries—requires that appropriate criteria be established to assess the progress of countries in meeting this objective. Also in 1973, the Secretary General of the United Nations, in the first overall review and appraisal of progress in Development Decade II, recognized the need for a supplement to per capita GNP as a unit for measuring progress in addressing the human needs problems. And in 1976, the report *Reshaping the International Order*, prepared under the guidance of Professor Jan Tinbergen for the Club of Rome, called for the development of a quality of life index to be used in conjunction with the per capita GNP indicator.

The traditional measure of national economic progress—the gross national product (GNP) and its component elements—cannot very satisfactorily measure the extent to which the human needs of individuals are being met, nor should it be expected to do so. There is no automatic policy relationship between any particular level or rate of growth of GNP and improvement in such indicators as life expectancy, death rates, infant mortality, literacy, etc.

A nation's economic product at any particular level may be allocated in a variety of ways, both among areas of activities and among social groups; or national policies may emphasize the growth of military power and of sectors of the economy that do not contribute in any obvious way to improving the health and physical well-being of that country's people. Nor does the growth of average per capita GNP or personal disposable income necessarily improve the well-being of large portions of a country's population since that income may flow to social groups in very unequal proportions. The very poorest groups of the society may not benefit much, if at all, from rising incomes and some may even suffer declines in real income. Moreover, even if rising incomes are shared with the poorest groups, there is no guarantee that these increases in income will be spent in ways that improve physical well-being. For example, in some societies in which rising income has led to a decline in breast feeding and an increase in the use of breast-milk substitutes, higher infant mortality rates have resulted.

Thus the need for new measures of development progress arises from the facts that:

(1) GNP and per capita GNP say nothing about the *distribution* of income;

(2) the conceptual problems inherent in measuring income distribution in any society are compounded in the case of the developing countries, with their largely rural and non-monetary economies; and

(3) money measures do not in themselves indicate anything about the levels of physical well-being of individuals—which is what national and international development planners are seeking to achieve.

Most of the efforts to develop measures of human progress have used a variety of separate indicators such as per capita income, calorie intake, life expectancy, literacy, etc.—all of which improve or deteriorate at varying rates. Use of these disaggregated indicators makes it difficult for national policymakers or administrators of development assistance to determine the combined effectiveness of separate programs addressing different social conditions.

What is needed is not a variety of indicators but some *composite* measure that will summarize the different rates of improvement (or deterioration) in various categories and that will make it possible to estimate the extent to which the basic human needs of all people have or have not been equitably met. The few attempts at devising such a composite measure that have been made have tended to suffer from one or more of three defects:

(1) too close tying of the composite measure to the per capita GNP measure;

(2) use of components (e.g., urbanization, number of telephones per 1,000 people, number of homes with piped water) that assume that the poor countries must inevitably develop along lines followed by developed countries. This assumption, however, fails to take into consideration the long-run implications of the emerging labor-intensive strategy that is being supported by the U.S. Agency for International Development, the World Bank, and the International Labour Office;

(3) the setting of targets that may be excessively ethnocentric (as in the case of nutritional standards).

For the past year, the Overseas Development Council has been exploring the implications of alternative development strategies. One of the concerns in this effort has been to measure how effectively various development strategies distribute the most basic benefits of development progress to all parts of society. Out of this study has come a "Physical Quality of Life Index" (PQLI) that promises to serve as a useful measure of a country's general progress toward more equitably meeting basic human requirements for the majority of its population.

The PQLI does not attempt to measure the many other social and psychological characteristics suggested by the term "quality of life"—justice, political freedom, or a sense of participation. It is based on the assumption that the needs and desires of individuals initially and at the most basic level are for longer life expectancy, reduced illness, and greater opportunity. The index does not measure the amount or the type of effort put into achieving these goals, but the extent to which they are being met—that is, it measures *results*. It acknowledges that improvements in meeting these minimum needs can be achieved in a variety of ways—by better nutrition, improved medical care, better income distribution, increased levels of education, and increased employment.

Developed countries—as a result of improvements made over long periods of time—are today generally able to provide reasonable levels of these basic features of human existence to most of their people. But the poor countries cannot provide better diets, sanitation, medical care, education, etc., all at one time. Moreover, it should not be important that they provide a specific kind of medical organization, a particular type of sanitary facility, or a specific pattern of nutrition, for these are not in themselves ends. They are *means* and must be chosen to suit the resources and cultures of the individual countries. What is important is that, whatever the type of techniques and policies chosen, greater opportunities are made available to those who have the least of these. Thus policymakers are free to apply any mix of policies that will bring about the desired ends. Different policymakers in different countries will choose differently.

Although the Council's analysis is still in its early stages, it seems clear that three indicators—life expectancy, infant mortality, and literacy—can be used to measure the results of a wide range of policies. The PQLI consolidates these into a simple, composite index. Life expectancy, infant mortality, and literacy figures are each rated on an index of 1–100, within which individual countries are ranked according to their performance. For the life expectancy index, for example, the most favorable figure achieved by any country in 1973 (75 years in Sweden) was assigned the upper limit of 100 and the most unfavorable performance in 1950 (28 years in Guinea Bissau) was assigned the lower limit of one (1).[1] Similarly, for infant mortality, the best performance in 1973 (9 per thousand in Sweden) was rated 100 and the worst performance in 1950 was rated 1 (229 in Gabon). Actual literacy figures (being per-

*The PQLI concept is being developed at the Overseas Development Council under the direction of Morris David Morris, as part of a major project exploring alternative development strategies. A publication on the PQLI index will be issued by the ODC in late 1977.

[1] Use of the worst performance in 1950 as the lower limit of the index rather than current worst performance (38 years of life expectancy) allows for comparisons across time without resulting in negative ratings.

centages) are nearly identical to their index ratings.

A *composite* index was calculated by averaging the three indexes, giving equal weight to each of the three indicators. The composite rating for each country appears in Table A–3 of Annex A. The data below show a comparison of performance as measured by GNP and performance as measured by the Physical Quality of Life Index for income groups as well as for selected countries.

	Average per capita GNP	PQLI achievement
Lower-income countries	$152	39
India	140	41
Kerala, India	110	69
Sri Lanka	130	83
Lower middle-income countries	338	59
Malaysia	680	59
Korea, Republic of	480	80
Cuba	640	86
Upper middle-income countries	1,091	67
Gabon	1,960	21
Iran	1,250	38
Algeria	710	42
Taiwan (ROC)	810	88
High-income countries	4,361	95
Kuwait	11,770	76
United States	6,670	96
Netherlands	5,250	99

The data for the countries of the world when grouped by income (as shown here as well as in Tables A–1 and A–3) show the expected direct relationship between the level of per capita GNP and PQLI. On the other hand, the correlation for individual countries is not as clear. For example, Cuba, Korea, and Taiwan (with per capita GNPs more than $300) as well as Sri Lanka and the Indian state of Kerala (with per capita GNPs well below $300) all have PQLIs above the average of countries with incomes between $700 and $2,000. In fact their PQLI performances are well above those of Gabon, Iran, and Kuwait (with per capital GNPs of $1,960, $1,250, and what the expected relationship might be in- $11,770, respectively). These divergences from what the expected relationship might be indicate that significant improvements in basic quality of life levels can be attained before there is any great rise in per capita GNP, conversely, a rapid rise in per capita GNP is not in itself a guarantee of good levels of literacy, life expectancy, or infant mortality.

A major advantage of the PQLI is not only that it measures the current *level* of achievement, but that it appears to be a fairly sensitive measure of change over time as well. The data below shown quality of life changes over the last two decades for a number of countries.

	1950s	1960s	1970s
Algeria	35	38	42
India	28	36	42
Egypt	32	41	45
Brazil	53	--	66
Sri Lanka	62	77	83
Poland	72	86	93
United States	92	94	96
France	87	94	97
Norway	--	--	99

Similarly, the index can be used for intracountry as well as inter-country comparisons. The data below reveal interesting regional contrasts within the United States; it also suggests that comparisons can be made for various ethnic and other social groups as well. The sensitivity of the PQLI index suggests that policymakers can set appropriate targets for improvement in PQLI ratings not only for developing countries, but for developed countries and for regions and specific groups within countries.

	1900	1939	1950	1973
All U.S. population	63	85	91	96
White population	65	87	92	97
Other races	30	71	81	89
Selected States:				
Mississippi		81	87	92
New Mexico		69	85	94
Texas		81	87	95
Wisconsin		89	93	97
Minnesota		91	95	98

The PQLI seems to be fairly free of the major difficulties that in one way or another afflict most other measures of human progress. Because it is not weighted at all by the level of GNP, it avoids all problems of monetary measurement. It avoids ethnocentric biases about as much as is possible. While it does assume that almost all people everywhere would choose improvements in life expectancy, infant mortality, and literacy, the PQLI does not specify how these improvements ought to be achieved. Moreover, it avoids dependence on absolute technical standards (such as a fixed calorie requirement) about which there is no genuine agreement.

The PQLI has a number of advantages. It uses three indicators which apparently do reflect distributional characteristics within countries, for countries cannot achieve high national averages of literacy, life expectancy, and infant mortality unless majorities of their populations are receiving the benefits of progress in each of these areas. It also recognizes that there can be very complex tradeoffs among the inputs that would yield equivalent quality of life results; thus it enables the setting of targets that permit considerable flexibility without suffering from the GNP insensitivity to equity considerations. Moreover, the PQLI automatically narrows the range of data required to measure the extent to which a country is meeting basic human needs objectives; it can help planners decide what specific improvements in types and quality of data collection are immediately necessary.

Further work on the development of the PQLI is needed in refining it and in determining its limitations as well as where and how it can most usefully be employed. But in the meantime, the simplicity of the measure permits it to be easily understood by both lay people and policymakers interested in measuring the progress being made in meeting the most basic needs in particular countries and regions and groups within countries. This is a case in which use of "the good"—the PQLI—should not be precluded because of continuing pursuit of "the best." The PQLI—even in its present form—already serves as a useful measurement of progress in the address of basic human needs.

While there is the danger that the measure may be accepted with too much faith, this problem affects every effort to aggregate complex behavior into a more simple indicator. Future work at the Council will seek to establish methods to use the PQLI along with GNP. If these two can be used in tandem, many of the dangers of misuse and misinterpretation will be eliminated or at least minimized.

PERSONAL EXPENDITURES

HON. ANDREW JACOBS, JR.

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 21, 1977

Mr. JACOBS. Henceforth and hereafter—emphasize the third word—reimbursement of personal expenditures by Members of Congress for round trips to their districts will be paid promptly at age 62 or upon retirement, whichever comes later.

ALLOWING INDUSTRY TO SET ITS OWN STANDARDS

HON. RICHARD L. OTTINGER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, March 21, 1977

Mr. OTTINGER. Mr. Speaker, today's New York Times carried an article entitled, "Plan on Product Standards Is Decided by Four in Congress," by David Burnham. I would like to call it to the attention of my colleagues and to commend our fellow Members, Representatives DINGELL, Moss, and OBEY, and Senator ABOUREZK for their efforts to undo one of the more insidious legacies of the previous administrations.

The problem facing us is that the previous Office of Management and the Budget essentially offered to allow private interests, with a direct interest in the outcome, to establish the standards by which their products would be approved for marketing by the Government.

As Mr. DINGELL has discovered in efforts through the Subcommittee on Energy and Power which he chairs, and on which I am privilged to serve, one result of such "self-policing" has been to keep off the market items to decrease fuel consumption in home furnaces which would clearly contribute in an important way to energy conservation. The Times article warrants reading by all House Members:

PLAN ON PRODUCT STANDARDS IS DECIDED BY FOUR IN CONGRESS

(By David Burnham)

WASHINGTON, March 20.—A far-reaching plan to link the Federal Government with 400 professional or commercial groups that set standards for tens of thousands of widely used materials and products has been opposed by four members of Congress who say it would harm consumers and small businessmen and stifle technical innovation.

The plan to have the Government formally endorse the standards set by the private groups was recommended in the last days of the Ford Administration and is under apparently sympathetic consideration by the new head of the Office of Management and Budget, Bert Lance.

The proposal's possible impact on consumers looking for new and cheaper products, on businessmen seeking new markets and on the Justice Department's antitrust division is the subject of hearings, continuing tomorrow, by the House Energy and Power Subcommittee, headed by Representative John D. Dingell, Democrat of Michigan.

The subcommittee's interest in the private standard-setting groups has been kindled by testimony that such a group delayed the marketing of a device to reduce the amount of natural gas needed for home heating, and that the group is dominated by the natural gas industry and gas appliance manufacturers.

ECONOMIC IMPACT

According to a subcommittee staff memorandum, the standard-setting group, a committee of the American National Standards Institute, began considering data on automatic dampers for gas furnaces in 1971. So far, the memorandum says, the group has permitted such devices only on new furnaces. The document said the group had done nothing for those who own the 33 million furnaces now in existence, "unless, of course, the homeowner installs a new and expensive furnace."

Thus, beyond determining the physical qualities of an almost endless number of products—the dimensions of lumber, for example, the capacity of electrical wire and the diameter of piping—some of the standards can have a major economic impact by excluding new products or dictating which unions will handle certain jobs.

There now is no over-all policy that defines the Federal Government's relationship to the standard-setting groups. Because the standards often have been adopted in local and state building and safety codes, and in some instances by individual Federal agencies, the private standards frequently have come to have the force of law.

Opposition to the proposal by the Office of Management and Budget to formally endorse the private groups has been voiced by Senator James Abourezk, Democrat of South Dakota; Representative John E. Moss, Democrat of California and Representative David R. Obey, Democrat of Wisconsin, as well as Mr. Dingell.

"In essence," Mr. Obey contended in a recent statement, the O.M.B. plan "says that Federal regulations to protect workers and consumers and to determine Government purchasing practices should be based on the work and recommendations of industry-paid scientists rather than scientists employed by the Federal Government."

In some instances, Mr. Obey conceded, the private groups have a sufficiently broad membership so that the Federal Government could rely on their judgment.

"However," he said, "in the vast majority of regulatory situations it is the worker or the general public who will suffer as a result of weak or inadequate standards, and the corporations whose scientists dominate these commercial standard-setting boards that will profit."

The Ford Administration's proposal for "Federal Interaction with Commercial Standards Setting Bodies" was published Nov. 30 in the Federal Register.

In a letter to the committee in late February, Mr. Lance indicated that the Office of Management and Budget was considering comments on the initial plan and would soon publish a modified version of it. The initial plan, which if formally adopted would be an excutive order for all Federal agencies said it was the policy of the Government "to rely on commercial standards, both domestic and international, wherever feasible."

The plan said Federal participation could include direct financial support to the private groups through grants, sustaining membership and contracts or indirect support in the form of contributions toward costs of travel and the preparation of documents.

The O.M.B. draft plan said the objective of the program was to insure the maximum use of commercial standards by the Government, with the aim of saving money that would otherwise be spent to develop separate Federal standards.

"Over the years, an effective system of voluntary consensus standards activities has developed under the leadership of the American Society for Testing and Materials, American Society of Mechanical Engineers, American National Standards Institute and many others," the proposal said.

"In this voluntary system," the statement added, "a wide range of interests meld their expertise and compromise their differences, with the result that the standards produced are solidly based and widely accepted."

Representative Dingell, in a letter sent last week to Juanita M. Kreps, Secretary of Commerce, charged that a department official who had played a key role in drafting the overall plan, with those laudatory comments about voluntary standard setting procedures, was on the board of directors of the American National Standards Institute, one of the groups mentioned in the proposal.

"In our view, this presented an obvious conflict of interest," Mr. Dingell said, asking that Mrs. Kreps withdraw her department's support for the proposal.

Because many of the voluntary standards are adopted in building and safety codes by state and local governments, a decision by the voluntary organizations can have enormous economic impact.

An earlier report by the House Select Committee on Small Business, also headed by Representative Dingell, cited a standard requiring consumers to purchase acid-resistant porcelain bathtubs as an illustration of "the way in which a standard can be used to require members of the public to buy more expensive products than is reasonably required for their needs."

The same report cited a battle between the makers of cast-iron pipe and the plastic pipe industry fighting within a standards committee for the vast market represented by new housing construction.

In the way of safeguards against conflicts of interest, the O.M.B. plan urged only that the Federal agencies "encourage commercial standards-setting bodies with which they interact to observe rules and procedures that ensure prompt and full consideration of views and interests of all who might be materially affected by their actions and evaluate participation in these bodies in light of their adherence to such rules and procedures."

Joe Sims, Deputy Assistant Attorney General for antitrust matters, testified before the House Committee on March 3 that the Justice Department had "reservations" about the "hesitant wording" of the proposal and had urged mandatory provisions forbidding Federal participation where it appeared that consumer and other public interests were being ignored "in favor of the narrow economic interest of industry members."

SUPPORT FOR CARTER'S YOUTH EMPLOYMENT PROGRAM

HON. CARDISS COLLINS

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, March 21, 1977

Mrs. COLLINS of Illinois. Mr. Speaker, I would like to express my wholehearted support of President Carter's recent proposal that an additional $1.5 billion be authorized to put an extra 243,000 of our Nation's young people to work.

The arguments in favor of employing youths are well known: Jobs keep America's youths occupied, give them a sense of self-worth, and generally benefit not only the employed young persons but their families and communities as well.

As a representative of an inner-city district in Chicago, I have a more than passing familiarity with the unemployment affecting 3,400,000 persons between the ages of 16 and 24. It is impossible to walk down the street of any city in this country without encountering groups of bored, restless teenagers with nothing but time on their hands.

If Congress is really serious about ending unemployment—and I believe that it is—then we must vote for approval of President Carter's youth employment program. It is important that we help our Nation's youth now by providing them with a fair chance to obtain employment.

SOVIET MILITARY CAPABILITY MYTHS

HON. PARREN J. MITCHELL

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Monday, March 21, 1977

Mr. MITCHELL of Maryland. Mr. Speaker, the arms race continues almost unabated. Our reckless commitment to a large and unnecessary Department of Defense budget reflects the impact of a deliberate, systematic effort to revive cold war policy by presenting myths and fairy tales about Soviet military capability.

The two cogent articles which I am submitting for the RECORD today destroy the myths and expose the fairy tales for what they are. I commend the articles to my colleagues for careful reading and careful thought:

[From the Christian Science Monitor, Jan. 17, 1977]

HAZARDS OF SOVIET SCARE STORIES

(By G. B. Kistiakowsky)

A heavy rash of scare stories has appeared lately, such as: "Pentagon Fearful of Soviet Effort to Develop Hunter-Killer Satellites." "Carter to get U.S. Study Suggesting Soviets Seek Nuclear Superiority," "Top Scret National Intelligence Estimate Reports the Soviets Seek Military Superiority," and others. Similar but less macabre stories appear usually in the spring when Congress is working on the military budgets. The current crop is out of season, aimed evidently at influencing Jimmy Carter in the selection of his senior appointees and revising his campaign promise to seek the end of the nuclear arms race.

The leaking of sensitive foreign intelligence information by professional superpatriots in and out of the government is not new. In the early '50s the press was flooded with stories of a "bomber gap." The result of the campaign was the buildup of B–47 and B–52 strategic bomber forces, although gradually it came out that the gap was a myth.

In 1957 a major "top secret" study in the executive office of the President reported to him that "evidence clearly indicates increasing threat" of the Soviet Union, which will "become critical by 1959 or early 1960," because the U.S.S.R. will "acquire significant ICBM delivery capability with megaton warheads by 1959." It urged increasing United States military budgets and a multibillion dollar civilian defense program to counter that of the Soviets.

President Eisenhower took unkindly to most of these recommendations, and so the contents of this "Gaither" report were leaked out. They were much used by his opposition

in Congress and led to the "missile gap" of 1957–61.

The columnist Joseph Alsop confided to me "positive information" in the spring of 1959 that the Soviets had 150 ICBMs ready to strike the United States. I knew that actually our information (from U–2 flights, etc.) was totally negative, no deployment having been detected, but I could not discuss it. Later Mr. Alsop went public with his "information." Sen. John F. Kennedy used the "missile gap" in his 1960 campaign and in 1961 the strategic missiles program was greatly expanded, although the missile gap was turning out to be a myth.

A couple of years later there was a flurry of stories about the massive Soviet civil defense program that almost resulted in Washington's starting one. Still later stories appeared of a countryside Soviet deployment of an antimissile defense, nicknamed Tallinn, which would defeat American missiles and thus undermine the U.S. posture of secure deterrence. As some intelligence analysts asserted throughout, the Tallinn system was only for antiaircraft defense, but in the meantime the U.S. MIRV program got going. The Soviets followed suit and the MIRVed missiles have now greatly increased the already excessive destructiveness of strategic forces on both sides.

The currently leaked National Intelligence Estimate (NIE) was produced with the novel participation of a panel of outsiders chosen, it is said, for their hawkishness. One of the members was Paul H. Nitze, who 20 years ago was a member of the Gaither panel and still earlier authored the "NSC 68," a top secret paper that urged a cold-war posture on President Truman. History does repeat. The now leaked NIE concluded that the Soviets have a new goal of military superiority over the United States, as evidenced by various indicators, such as extensive civilian defense.

A word about the NIEs. Since Soviet society is tightly closed, it is usually possible to estimate only current military capabilities. To project the rates of production of missiles, planes, tanks, etc., into the future and to translate this into Soviet intentions involves largely value judgment. It is in this process that the intelligence community splits, and this time the extreme wing, evidently the Air Force as usual, was reinforced by the outside ultras.

The Soviet leaders make no secret of their desire to spread communism and to make the Soviet Union the world leader. Just as openly Americans pride themselves on being No. 1 and commit themselves to staying there. The real issue is whether the Soviets intend to risk nuclear war by driving for military superiority since the Cuban missile crisis showed how risky it is to bluff with nukes. This intent is firmly denied by the Soviet leaders and is not inferred by experienced analysts of Soviet intentions.

To assess this intent one must bear in mind that strategic weapons deployed by the U.S., half of them totally invulnerable in submarines, would wreak such unimaginably total damage on the Soviet Union that no civilian shelters, grain caches, etc., could make it in any sense the winner of a nuclear war, which would destroy the U.S. as well.

Both sides are pressing hard in the arms race, and the U.S. is not falling behind. Since 1972 it has added about 4,000 strategic warheads while the Soviets added about 1,500, so that now the U.S. deploys about 9,000 to the Soviets' 3,500. The U.S. Navy is second to none, its tonnage being nearly twice that of the Soviet Navy, and the average ages of its ships are lower. This year the CIA stated that no single weapon system of the Soviets is technologically superior to America's. The United States is bordered by friends—not, like the Soviet Union, by potential enemies or allies that need occupation troops to continue being allies.

But the future of the U.S. should not be a fortress existence. The unfortunate result of the current campaign could be another spurt in the arms race, further increasing the likelihood of nuclear war, instead of progressing toward arms control agreements that would provide both sides with secure nuclear deterrence on the road to real peace, as has been advocated by Mr. Carter.

[From Foreign Policy, Spring 1976]

OPINION: HOW TO LOOK AT THE SOVIET-AMERICAN BALANCE

(By Les Aspin)

The Soviet Union, we hear these days from the Pentagon, is now outspending the United States on defense. Yesterday's missile gap is today's dollar gap.

It is legitimate to ask two questions about the figures being bandied about. First, do the statistics fairly reflect reality? As Disraeli remarked, "There are three kind of lies: lies, damned lies, and statistics." Second, if there has been an increase in the Soviet defense budget, is it really something we have to worry about? After all, the U.S. military could add a billion dollars to its subsidies for commissaries or its budget for uniforms without generating any worries in the Soviet equivalent of the Pentagon.

When James Schlesinger was defense secretary, he said, "If one strips away pensions and other such considerations, the Soviets may at this point, in terms of the American dollar, be outspending us by 50 percent. They are outspending us, even including pensions, by approximately 30 percent." This has been echoed by others, inside and outside Defense.

The key phrase is "in terms of the American dollar." The Soviets, of course, do not spend dollars. But somehow, Soviet expenditures must be translated into figures comparable to American expenditures. The Pentagon does this by putting both defense budgets into dollars. Starting from observed Soviet defense activity (manpower, equipment, construction, and operations), analysts calculate the cost of procuring a similar force in this country. They ask, "What would it cost to buy the Soviet defense establishment in the United States at U.S. prices?" Based on preliminary figures, this calculation shows that last year the Soviets spent $107 billion on defense while the United States spent $79 billion, both in 1974 dollars.

This method of calculation seems fair on the surface. But there's a trap door. Soviet wages are generally much lower than American wages. But by computing Soviet manpower costs at U.S. rates, one discovers a huge Soviet defense manpower "budget" of over $50 billion that exists only in American documents.

Using this methodology, the largest single reason that Soviet defense spending exceeds our own has been the American decision to switch to an all-volunteer Army and to pay its servicemen civilian-level wages. The absurdity of this calculation then becomes clear: If the United States were to shave its military pay scales, Soviet defense "spending" would fall.

To be sure, calculating the cost of Soviet defenses in American dollars is one way of getting a perspective on the size of their effort. But it is not the only way. An alternative is to compute U.S. and Soviet defense expenditures in roubles.

This method is admittedly much more difficult. For example, we have no good way to estimate what it would cost the Soviets to produce the whole range of American equipment. We cannot turn a new tank over to a Soviet manufacturer and ask him what it would cost to produce it.

Nevertheless, a meaningful rouble comparison can still be made. The result is the reverse of the dollar comparison. Whereas the dollar comparison is weighted by the fact that it prices the manpower-intensive Soviet forces in terms of high U.S. personnel costs, the rouble comparison is weighted by the fact that it prices the technology-intensive U.S. forces in terms of the high costs of Soviet technology. When the calculations are done with roubles, the United States is the bigger spender.[1]

Actually, the rouble comparison understates the American lead in spending. Many of the more sophisticated items in the U.S. arsenal are beyond Soviet production capabilities: computers and other advanced electronics are prime examples. The standard estimate counts the cost in roubles of the closest item the Soviets can actually make. Since we alone have a TV homing, steerable bomb, for example, in roubles it would be priced as an ordinary bomb.

So the answer to the question, "who is spending more on defense," depends on the price system used.

A QUESTION OF TRENDS

Beyond the absolute levels of defense spending, there is the question of trends. It is impossible to ascertain with any relevant measure if the Soviets are outspending the United States in any given year, but the trends in spending over several years are not so ambiguous.[2]

According to the best estimates available, real Soviet defense spending has increased an average of 2.7 per cent a year over the decade 1964 to 1974.[3] U.S. defense spending, on the other hand, increased from 1964 to 1968, because of Vietnam, but has declined in real (not inflated dollar) terms since. The curve results in an annual net decline of 1 per cent per year.

Former Defense Secretary Melvin R. Laird believes the Soviet increase is evidence that "the Soviet Union has engaged in a relentless effort to attain military supremacy."[4] For him and others, détente is a smoke screen behind which the Soviets are hiding while still trying to surpass the United States in all dimensions of military power.

But there are two other possible explanations for Soviet behavior—explanations that are not so cataclysmic. The first is the timing of budget decisions. Right now the driving force behind rising Soviet expenditures is the new generation of intercontinental ballistic missiles (ICBMs). These systems have a long gestation period, and were being developed before the 1972 SALT agreements ushered in the era of détente.

This means that we cannot automatically assume that recent budget growth is a reflection of the current attitudes of the Soviet leaders. If the attitudes have changed, we may see a change in defense expenditures in late 1976 or 1977 when the current ICBM deployment nears completion.

The second possibility is that the growth in Soviet defense expenditures is a function of internal, bureaucratic/political factors in the Kremlin. Brezhnev, trying to keep a majority for détente in the politburo, cannot afford to alienate the armed forces. Using increased defense expenditures to keep the military on board for political purposes is not unknown in this country and may also be an accepted ploy in the Soviet Union.

But whatever the reason the trends are there. To quote Schlesinger again. By most of the available measures, American power is declining and Soviet power is rising. No one can say precisely where the peril points lie as this process unfolds. But if real expenditures by the United States remain constant or continue to fall, while real Soviet outlays continue to rise, the peril points will occur in the relatively near future."[5]

However, the critical issue is what the Soviets are spending their extra roubles on. If the increases are in forces that threaten the United States and its NATO allies, that is

---

Footnotes at end of article.

one thing. If the increases are for more troops on the Chinese border, that is something else. The accompanying table, based on previously unavailable data, shows what proportions of the total growth in Soviet defense spending have been devoted to each military mission.

IDENTIFYING THE INCREASES

Not all increases directly threaten U.S. interests. These include higher spending on four missions that comprise 36 per cent of the increase in Soviet spending in the 1964–1974 decade:

1. Since the Sino-Soviet split, the Soviet Union has boosted the number of troops and amount of equipment stationed along the Chinese border. (This accounts for 16 per cent of the budget increase.)

2. In response to the 1968 uprising in Czechoslovakia, the Soviets stationed five divisions there in order to restore control. They remain there. (This accounts for 5 per cent of the increase.)

3. In the 1964–1974 period, the Soviet Union significantly augmented the border troops of the KGB (Committee of State Security) and the security troops of the MVD (Ministry of Internal Affairs). These forces are "essentially paramilitary formations whose prinicpal functions are to police Soviet borders [and] cannot credibly be included in the Soviet land order of battle." [6] (This accounts for 8 per cent of the increase.)

4. The Soviet Union has traditionally been extremely sensitive about its vulnerability to attack and has made enormous investments in surface-to-air missiles and fighter-interceptor aircraft, even as the limited effectiveness of air defense led the Pentagon to trim outlays in that area drastically. (This accounts for 7 per cent of the increase.)

Other increases in Soviet defense spending directly threaten U.S. interests, at least in part.

Intercontinental-range offensive forces, composed of ICBMs, submarine-launched ballistic missiles (SLBMs), and long-range bombers, are generally considered the most threatening and account for 26 per cent of the increase. However, this increase was offset somewhat by a decline in spending for shorter-range strategic forces, such as medium- and intermediate-range missiles, which can threaten NATO.

Many of the Soviet allocations for research and development (R&D) can pose a potential threat to the United States and its allies. Spending for military R&D accounted for 18 per cent of the total growth in Moscow's defense budgets, although the proportion that went for programs affecting U.S. interests is uncertain. Furthermore, Soviet R&D efforts are less efficient. One estimate suggests that Soviet R&D outlays are only 40 per cent as productive as U.S. R&D outlays.

An estimated 100,000 additional Soviet troops were moved into the Eastern European satellites, excluding Czechoslovakia, during the decade. (This accounts for 10 per cent of the increase.) It should be noted, however, that the Soviets weren't the only ones to expand their force in the area; West Germany increased its army by 80,000 men in the 1964–1974 period and, as Schlesinger told Congress, ". . . the capacity of our [NATO] allies has improved substantially in the last decade." [7]

A moderate amount of the increase, 5 per cent, has gone into the navy (excluding ballistic missile submarines) and the tactical air forces—a portion of which went for squadrons assigned to the Far East for possible use against China.

In sum, about 36 per cent of the expansion in Soviet defense spending falls into categories that are not directly threatening and 51 per cent into areas that might threaten us. The 51 per cent, however, should be reduced somewhat because, as we have seen, it contains some built-in exaggerations of the threat to the United States.

There is a danger here of drawing this argument too finely and getting too absorbed in the statistics. It is impossible to neatly categorize every defense dollar (or rouble) as nonthreatening or threatening. Forces can be shifted from a nonthreatening front to a threatening one. Still, in the event of a European war, it is unlikely that the Soviets would uncover their Chinese flank by removing forces from the Far East. With regard to Czechoslovakia, the Soviet occupation forces there would have to contend with the possibility of an uprising in the event of general war in Europe. With these qualifications in mind, we can say that only about half of the Soviet growth in military spending of 2.7 per cent per year is threatening to America.

A LOOK AT THROW-WEIGHT

Three specific areas of Soviet spending are often pointed to with alarm—the Soviet strategic forces, navy, and ground forces.

In the strategic weapons area, the Soviets have indeed expanded rapidly, especially considering the fact that much of the R&D increase is for strategic weapons. About a third of the additional spending has gone here. As a result, the Soviets have moved from inferiority to rough parity in the missile area—a shift the Nixon administration publicly accepted on taking office. But still, some people fear that the Soviets have spent themselves into superiority. For them, "throw-weight" is now in vogue.[8]

Paul Nitze, for example, recently tried to show a Soviet advantage in throw-weight.[9] But the simple fact is that the United States has a commanding lead of 27 million pounds to 12 million pounds when total missile throw-weight and maximum bomber payload are combined.

Nitze appears to worry most that if the Soviets strike first and hit U.S. missile silos, they could, by his calculations, improve their throw-weight advantage, hold American cities hostage, and therefore "win" a nuclear war. He neglects one point: The superpower with the postattack advantage is the superpower that strikes first. If Washington were to launch a first strike against Soviet missile fields, we would end up with an absolutely enormous throw-weight advantage because much more Soviet throw-weight is carried on their vulnerable land-based missiles.

So it looks as if both superpowers face a throw-weight gap. But does it matter? Even if the Soviets successfully carried out a devastating attack on our forces,[10] the United States would still have about 3,100 surviving warheads—and that is 10 per cent more than the Soviet arsenal has now, before an attack. Even if the Soviets attacked first, the United States would still have enough surviving warheads to drop 13 on every Soviet city of more than 100,000 people. Is the politburo really going to sniff at the possibility of warheads raining down on the Kremlin by arguing, "We have more throw-weight than the Americans"? If they are really that irrational, then they aren't smart enough to understand the concept of throw-weight advantage in the first place. In the last analysis, both countries enjoy a surfeit of missilery. In light of that, the significance of any throw-weight advantage is nil.

In the other two areas—the navy and ground forces—the spending growth, as shown in the table above, was modest for those missions and locales that threaten the United States and its NATO allies.

Only 3 per cent of the growth in Soviet defense spending went to navy conventional forces (excluding strategic missile submarines that are covered in the strategic category). The Soviet navy has grown, but it has been able to do this within relatively level budgets because few ships were retired during the decade and it enjoyed a large budget growth prior to the base year 1964, used in the table. The Soviets have built more ships than the United States, but every year we produce more tons of ships; U.S. Navy warships are larger, more capable, and have greater firepower. The Soviet navy has grown, but according to many specialists, it is still largely designed for defensive purposes.[11]

The latest rage among those who view the Soviet military budget with alarm is the spending on ground forces. The numbers being published about Soviet production of tanks, trucks, cannon, and other equipment as well as figures on Soviet military manpower are impressive.

But is the equipment and manpower being sent where it is threatening to U.S. interests? And what kind of quality are they buying with their roubles?

Roughly one-third of Soviet ground forces and equipment are deployed to the Far East, another third faces NATO, while the remaining third is elsewhere. Thus, a sizable fraction does not endanger U.S. security interests. Moreover, as the table indicates, most of the increased spending on Soviet ground forces has gone for men and arms along the Chinese border and in Czechoslovakia, not Eastern Europe.

Tanks, artillery, and other equipment are ground out in quantity but don't measure up to the quality of American weaponry. For example, Soviet tanks have a lower rate of fire, are less accurate at long range, and do not have as much armor protection. The crew space is also cramped, making it difficult for Soviet tankers to work as effectively as their American counterparts.

The issue of quality also applies to manpower. The Soviets have added one million men in the last decade and now have twice as many in uniform as the United States. But Soviet troops are employed in agricultural and construction projects, and large numbers of Soviet officers are really party functionaires. Furthermore, the Soviet enlisted man is not as experienced as the American volunteer who serves longer tours in the U.S. Army. As Lieutenant General Daniel Graham, then director of the Defense Intelligence Agency, testified, "Every six months they replace a quarter of their draftees, and the Soviet army's enlisted strength is almost all draftee." [12] Because of this turnover, many of the men assigned to combat units are still undergoing training.

This is not to say that superior numbers are irrelevant. But part of the reason the United States trails in quantities of equipment is that the U.S. armed forces have decided they want their armories filled with high-quality and sophisticated items. If the services feel that quantity should now be the primary concern, then they can tell their designers to take that into account.

Numerical comparisons are important in any assessment of the military balance. But this does not mean that any simple statistic showing the Soviets ahead of the United States is cause for hand wringing.

I do not mean to suggest that Soviet defense spending should be ignored. Some of the increase in spending is certainly threatening. Additional spending in threatening areas can mount up over the years and this warrants our close attention. But a lot of statistics are abused when we talk of the Soviet military. We must put those numbers in perspective and not jump to the conclusion that the Soviet bear is 10 feet tall.

Footnotes at end of article.

Distribution of Changes in Soviet Defense Spending, 1963–74

[*As a percentage of the total increase*]

Mission:	Percent Change
Research and development	+18
Intercontinental range offense	+26
Intermediate range offense	− 8
Strategic defense	+ 7
Navy, general purpose forces	+ 3
Tactical air forces	+ 2
Chinese border	+16
Eastern Europe (minus Czechoslovakia)	+10
Czechoslovakia	+ 5
Internal security	+ 8
Other changes (unidentifiable by mission)	+13
Total	+100

NOTE: All changes in the missions listed in the table are cumulative (cumulative change equals the sum of the differences between spending in 1964 and in each of the succeeding years) and are expressed as percentages of the cumulative increase in total spending for the 1964–1974 period. Outlays for command and general support were allocated to various mission categories based primarily on those categories' proportions of the total budget in any given year. Research and development costs are not included in any mission categories apart from that entitled "research and development.")

(SOURCE: Estimates provided in the table were derived from the following sources: The Military Balance, various years, published by the International Institute for Strategic Studies; U.S. Congress, Joint Economic Committee, Subcommittee on Priorities and Economy in Government, Allocation of Resources in the Soviet Union and China, 1974 and 1975; and the best available intelligence community estimates as of January 1976.)

FOOTNOTES

[1] The results differ because the relative costs of manpower and equipment in the countries differ. Where relative costs vary, using a single monetary unit from either one of the two countries to make the comparison produces a bias—what economists call the "index number" problem.

[2] Trend calculations were worked from the dollar costs of Soviet spending. Although dollar figures give a misleading view of the absolute level of Soviet outlays, if applied consistently, they are valid in describing changes and trends.

[3] Former Secretary Schlesinger has put the long-term Soviet growth at between 3 and 5 per cent per year. Deputy Defense Secretary William Clements has claimed that the Soviet military budget "in real terms is increasing about 5 per cent a year . . ." (Defense Space Business Daily, May 31, 1975). Actually, the rate of growth has fluctuated between 1 and 5 per cent annually. And, in the 1964–1974 period, the annual rate of growth averaged 2.7 per cent, which corresponds to a 3 per cent slope in the long-term trend line.

CAREER EDUCATION

HON. WILLIAM L. DICKINSON

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 21, 1977

Mr. DICKINSON. Mr. Speaker, Dr. William J. Cook, Jr., of Montgomery, Ala., president of Alabama's Advisory Council on Career Education recently addressed the Governor's Workshop on Education and Economic Development.

The text of his remarks are most interesting, timely, and important and I would like to place his speech at this point in the RECORD to share his ideas with my colleagues:

CAREER EDUCATION AS AN ECONOMIC RESOURCE

At the outset, let me say that I count it a genuine honor to be asked to address The Governor's Workshop on Education and Economic Development. I have decided to speak to you today about what I consider our greatest present economic resource: That is, the students now enrolled in our schools and colleges.

I suppose I speak from a substantial bias because of my current involvement in Career Education. Last summer, I was invited by Dr. Wayne Teague to serve on the State's Advisory Council for Career Education, and, at the first meeting of that Council, I was elected President. I accepted reluctantly, but I am reluctant no longer. I have not only learned to love and appreciate the dedicated staff of the State Department of Education and the members of the Council, but I have become increasingly dedicated to the concept of Career Education as a comprehensive educational philosophy.

As a result of the efforts of this Council and upon the recommendation of Dr. Teague, the State Board of Education, at its last meeting, adopted a resolution which 1) defined Career Education, and 2) called for immediate implementation of such programs throughout the State. For your information and to assure a common understanding, I want to read here that definition:

"Career education is an instructional strategy which includes an awareness of the world of work, broad orientation in occupations (professional and nonprofessional), in-depth exploration of occupational clusters, career preparation and an understanding of the economics of our free enterprise system. Career education should be perceived as a very viable component of all educational programs. It is a concept that is completely integrated with the existing educational structure—in all subjects, for all students, and involving all parents, teachers and the community at large."

I believe this concept, properly understood and thoroughly applied, will go a long way in guaranteeing this State's economic future. I must admit that I have held a lifelong curiosity and concern about the relationship between education, the world of work and life. And, as a Liberal Arts major, I am particularly sensitive to the "Ivory Tower" concept—sensitive because I have never believed that any learning should be separated from life. Let me hasten to add that the "Ivory Tower" concept is not confined to Liberal Arts; it is manifestly evident in schools of Business, Education and even professional schools. I, along with most of you, watched in amazement during the turbulent sixties as our schools and colleges, urgently called upon to deal with critical social and economic issues, answered by withdrawing to either exotic exploration, vague theories, or aloof disinterest. They offered no practical solutions. But, beyond the more visible social issues lay an even greater need which likewise was not adequately filled; that is, the preparation of the individual student for life in a dramatically changing world.

Ladies and gentlemen, we have met here to discuss ways of insuring the future of this State through economic growth. We have discussed many excellent programs and proposals. However, if you will recall, most of these have been institutional in nature. May I suggest rather strongly that activities involving only institutional relationships provide very limited solutions to the problem of developing our most precious economic resource. That resource is our people, particularly our young people. I believe that ultimately the answer to this problem is the one-on-one teacher-pupil relationship in a practical-minded learning environment.

No one asked me for a testimony on behalf of Career Education, but I believe that it may well be the salvation of the educational process in this State; perhaps, the entire country. And our turning to it is timely indeed. For many years now, perhaps even for decades, there has been an ever widening gap between the classroom and life. Not only do students graduate unprepared for life-careers, they graduate undecided upon life-careers.

Much has been said recently about the continuing erosion of scores made by students on standardized tests, about their inability to read, about their verbal semi-literacy and diminished powers of reasoning. Technical competence itself is generally accepted by educational institutions as something which will be taught by the employer in on-the-job training after graduation. To state it candidly, some observers feel that educational institutions seem either to be failing at what they are doing, do not know what they are doing, or have altogether relinquished responsibility for doing anything at all. Business accuses education of being inadequate or irrelevant; education condemns business because it does not follow the textbook.

So, the gap widens—and students, schools, business and society in general suffers irrevocable damage—mostly the student. I suspect that much of the student unrest of the sixties was a result of the frustration of students caught somewhere in the middle between book and life, classroom and office, laboratory and factory. Even now, we train them to disappoint them—but we do not train them for disappointments (like the recent college graduate in data processing who discovered his training was a generation out-of-date, or the young woman with a Ph.D. in literature from Yale who now works as a sales clerk in a department store and writes copy for a porno magazine). I understand injustice at this level more than any other. I do not mean that educational forces and business have not attempted to reconcile the difficulty.

For many years, secondary schools have attempted to provide a more practical relevant approach to education and later careers. Diversified Occupation courses (now Distributive Education), FFA, FHA, and a host of vocational programs are sometimes a clumsy attempt to deal with the problem. The major problem with this approach was

that it often fell victim to social snobbery within the school. Those programs became tagged as suited for those poor souls who weren't going to college. Sadly enough, the snobs didn't know why they were going to college in the first place. Actually, in many cases, they were merely postponing a decision to enter life. And, according to college attrition records, they would have better dealt with that reality earlier. Some of them learned, even before the schools, that education should not be designed to prepare one for more education—but for life. I am convinced that the basic philosophy of D. E. and all the others is correct; it merely needs acceptance in all disciplines—not in the isolation of consolation.

It would be impossible here to elaborate on the many other positive moves by education, or even to mention the recent commendable efforts in this State; the important thing is that the dominant trend in educational philosophy recent has tended toward the practical and the relevant. But have not these good intentions been thwarted at times by our expecting our schools to accomplish as primary missions what rightly are but peripheral to their basic original function. They have been charged with the responsibilities of the home, the church, the courts, the banks and God knows what else. I maintain that until the schools are allowed to return to their primary original function—that of education—that there will continue to be an annual crop of sorrowful, uninspired, unprepared, frustrated seekers.

Just recently I listened as one of the highest elected officials of this State spoke of the schools' rightful role in our society as that of "parent." I categorically and unequivocably reject such a foolish notion. Surely, he must realize that the term "In loco parentis" was never intended to imply either the familial relationships or the social responsibilities of the home. Now, I know that in human endeavors of this magnitude there is a certain amount of common ground; but that is all the more reason to exercise discipline within definite boundaries. Otherwise, goals, standards and accountability become blurred and society's orderly progress is impeded. I maintain that a school can be only one thing—a school.

Just as education leaders have moved toward reconciliation, so also have business and industry attempted to deal with the problem. We have not been selfish with our financial support—but perhaps we have too often unintentionally denied educational institutions our time and understanding. It is easy for us to provide a scholarship, build a library or hire a student intern, but what about the time-consuming process of developing and testing a curriculum; of reading to approve textbooks while respecting academic freedom; and of all the other demanding chores required for a thorough practical education for each individual student. In many instances, rather than attempting to influence existing educational systems; business, frequently as a last resort, has established its own educational programs. In fact, some of these programs now rival the most sophisticated educational institutions.

As much as I regret this situation, I understand it. Recently, I had the opportunity to hear the regional personnel director of a nationwide retail firm discuss the problems he faces in recruiting and training management for some thirty thousand employees. The major problem among his manager trainees is an appalling lack of motivation toward success or achievement and the lack of self-confidence in their ability to produce results and effect change. In addition, 1) They have little knowledge of the functioning of the free enterprise system; 2) They are unaware of basic management skills; 3) They are temperamentally unsuited for the pressures of profit and loss accountability and for the stress of the dynamics of corporation life.

I believe that today education is asking for help and the accountability they speak of is not financial, and those who have been quick to identify the problems must now be as quick in assisting to resolve them.

John Milton in his essay "On Education," written in 1644, formulated as well as anyone ever has a philosophy of education:

"I call therefore a complete and generous education that which fits (a person) to perform justly, skillfully, and magnanimously all the offices, both private and public, of peace and war."

Now, I know that Milton lived in the end of the Renaissance and that his definition, therefore, comes close to describing a "Renaissance man." However, I much prefer even today generalists who know something of all the world around them to specialists who talk only to themselves and one another.

What else can we say about education? That is, in simple terms, "Career Education." And, to my way of thinking, that is education—pure and simple. And that, as a businessman is what I expect from our schools and am willing to help them provide.

The first thing that impresses us about Milton's definition of education is its scope: "All the offices, both private and public, of peace and war." Career Education, therefore, is not merely a segment of education or another program. It is, rather, a comprehensive way of looking at the nature and purpose of the education process, an institutional strategy! It encompasses the total man and woman; it embraces all of life; it is performance-oriented, which indicates that it is aimed at goals which can be achieved with some certainty and finality. It is not education for education—but for *Life.*

Having thus discovered its scope and purpose, the standards by which it is to be judged now become the salient factor. And these standards are applied directly to the product of education, for that is the only manner in which the process can be judged.

First, he requires justice—broadly speaking, an ethical code or a morality—a sense of values—applied to both life and career. Milton perhaps lived in simpler times, when learning by-and-large was still controlled by the Church, and not only morality but also doctrine was a part of the curriculum. How different today when in our attempt to guard scholarly freedoms and to remain objective, our schools have forsworn any responsibility for instilling values. It is indeed a sad day when the President of Johns Hopkins University (the first real university in this country) publicly abdicates any responsibility for teaching values of any kind. It is sadly ironic to find institutions whose initial reason for being is the pursuit of truth denying the inherent values contained within that truth. But is it not true that any knowledge of science, literature, society, or the individual carries within it an awareness of order, permanence and reasonableness—or their opposites—all contributory to a system of human values. To overlook that is to transform education into merely expedient information without either substance or purpose. I expect justice to be taught by "Career Education."

Second, he speaks of skill. I do not think he means robot precision of an assembly line worker, who sacrifices his creativity—perhaps even his personality—to a monotonous habit. Rather, he is referring to that kind of skill which transcends mere mechanical aptitude or persistence; it is a skill which springs from within a person, a skill which is easily translated into work beyond the worker. The worker actually translates himself into the work. Consider the fine furniture craftsmen of the Nineteenth Century, for example. But ours is a society and ours an education which depersonalizes, and thus stifles individual pride in accomplishment. Furthermore, the emphasis tends to be upon group activities, committees and clubs; and anonymity breeds the loss of individual awareness and individual pride in achievement. Creative energy and individual assertion becomes threats to a system rather than welcomed spurs to progress. I expect Career Education to recognize the inherent value of each person and to emphasize the essentiality of his individual contribution to the rest of us.

Finally, Milton uses the word "magnanimously." That means simply "generous," "high-minded" and "noble"—motivated by high ideals, committed to the pursuit of excellence.

I admired Admiral Rickover a long time before it was fashionable. Not long ago, he was asked to testify before a congressional committee investigating a defense matter. At the end of the formal session, he was asked, off the record, his opinion as to the greatest malaise affecting our country. His reply was eloquent but sad. "Mediocrity" was his answer—our willingness to accept second best—being satisfied with selfish comforts—having no purpose beyond ourselves. When I view the watered-down curricula of some of our schools, the gradeless farce in which no one fails, teaching experiments designed to hide winners and protect losers, then I come fully to understand why we have deliberately taught ourselves how to salve our lethargy and inability with an appeal to the egalitarianism of mediocrity. Surely a noble failure is still eminently better than a mediocre success—and I expect Career Education to teach that.

And to the degree that Career Education teaches ethics (standards), personalization (individuality), and excellence (love of achievement) will it find relevance and practicality in information and experience; and to the degree that it finds relevance and practicality will it succeed in preparing our students for all of life.

CARRYOVER TAX BASIS SHOULD BE REPEALED

HON. J. J. PICKLE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Monday, March 21, 1977

Mr. PICKLE. Mr. Speaker, no provision of the very complex Tax Reform Act of 1976 is more complex than the problems resulting from the carryover basis provisions in the estate tax. At first glance the proposal that the basis of property acquired from a decedent dying after December 31, 1976, shall be the same in the hands of his executor and heirs as it was in the hands of the decedent immediately before his death sounds deceptively simple. Then we stop a minute and read, "However, for purposes of determining gain but not loss, the basis of all assets will be stepped up to their fair market value on December 31, 1976." But what if we do not know the fair market value on December 31, 1976, how will that be determined?

It is for this reason that I am cosponsoring H.R. 5206 introduced by my able colleague OMAR BURLESON that will repeal the carryover basis. I hope that this can be considered soon by the Ways and Means Committee.

I am not a lawyer, but many lawyers

in my district have written to me about the problems they face in trying to advise their clients about planning their estates. Every plan is now open to substantial revision. It is most difficult to plan a fair distribution of different assets that were acquired at different times and that will have varying appreciation. The amount of records that need to be amassed are staggering. At least this should keep our appraisers off the unemployment rolls this year! We can anticipate that the law suits that will result from these provisions will keep the next generation of lawyers busy.

An example of the complexity of these provisions is found in the 16 page letter of "Recommendations for Technical Amendments to the Estate and Gift Tax Provisions of 1976" compiled by the American College of Probate Counsel. Of particular interest is recommendation 11 to provide an alternative to determine basis and acquisition date for property where the decedent's basis is unknown. Another, is recommendation 14 to require information regarding the carryover basis of property acquired from a decedent only where the total value of the decedent's estate exceeds $60,000.

It appears to me obvious that the law is unnecessarily complex and will work an undue hardship on modest and small estates.

WHEAT CARTEL WITH CANADA OPPOSED

HON. PAUL FINDLEY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, March 21, 1977

Mr. FINDLEY. Mr. Speaker, Congress and the administration should be wary of bilateral cartels with Canada aimed at protecting the price of wheat in foreign markets.

On paper, an agreement with Canada not to sell wheat below a certain price in world markets may have superficial appeal to U.S. wheat growers, particularly at this time when wheat stocks are substantial, the price is unsatisfactory, and inventories have difficulty moving into foreign markets.

Such an agreement is, however, a serious threat to the U.S. interests and; moreover, a sharp departure from our trade traditions and principles.

It is, of course, a form of export control, the sort of limitation on markets which Agriculture Secretary Bergland has said he opposes, and against which many others have wisely warned. It obligates the United States not to sell until a certain price is reached. In the absence of that price our stocks would of course be withheld.

If an American grain firm were to sell more grain than the agreement provided, it could be disciplined by our Government. That is export control plain and simple.

The agreement also implies that the United States and Canada must agree on a sharing of the foreign market—a market-rigging concept which our country, with few exceptions, traditionally has avoided and opposed.

Canada handles all wheat exports through governmental authority. Based on past experience, this authority can be expected to find loopholes in any wheat deal that may be constructed. Our experience with the international wheat and grains agreements of recent years should be caution enough.

The United States will be wise to maintain its independent, competitive position in world markets. That is the best way to serve the income interests of U.S. wheat growers, as well as the broader foreign-exchange earnings needs of all U.S. citizens.

HOWARD SEELYE RETIRES

HON. ROBERT E. BADHAM

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 21, 1977

Mr. BADHAM. Mr. Speaker, I would like to call to the attention of my colleagues the distinguished career of Howard Seelye who has recently retired from the Orange County edition of the Los Angeles Times newspaper as a prominent political writer, concluding his career in the field of journalism to which he has made a significant contribution.

At the time of his retirement from the Los Angeles Times he swept the Orange County Press Club annual awards in essentially all of the top categories: Best article on the history of the American West—first place; best article on the status of women—first place; and best feature story on "A Day in the Life of an Air California Airplane"—first place Previous press club awards have included: Best front page, best typography, best news story, best special edition, and others.

Some of his previous professional positions have included: Managing editor of the San Gabriel Valley Tribune; executive vice president of the Palos Verdes Newspapers, Inc.; owner publisher of the Pismo Times and the Grover City Press; and managing editor of the El Centro Post-Press.

He has served as the State chairman of the California Editors' Conference and the southern California chairman of the Associated Press News Executive Council. Among other civic contributions, he has served as the president of the Whittier College Alumni Association, director of the Orange County Press Club, president of the Palos Verdes Peninsula Kiwanis Club, and coauthor of the political history of Orange County.

A man of extensive experience in the field of journalism and himself a former candidate for Congress, Howard Seelye has a thorough understanding of the political and governmental process. It is my pleasure to pay tribute to this man who has given so much to the constituents of the 40th Congressional District and those in both Orange and Los Angeles Counties during his tenure as a "member of the press."

AN INVENTOR'S STRUGGLE WITH BUREAUCRACY

HON. RONALD M. MOTTL

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, March 21, 1977

Mr. MOTTL. Mr. Speaker, I would like to bring to the attention of my colleagues an article written by Mr. Phil McCombs which appeared in the Washington Post of March 21, 1977. It brings to light the frustrations of redtape and bureaucracy faced by individual inventors and small firms seeking assistance from the Energy Research and Development Administration.

The many Americans of Hungarian descent should note with pride the inventiveness and enterpreneurial spirit of Mr. Csonka. To the many individual inventors and small firms who will read this story, the delays, redtape, and bureaucratic disregard will be just one of many such stories regarding inventions or unsolicited proposals submitted to ERDA.

The article follows:

NEW CARBURETOR STALLS: INVENTOR CANNOT GET U.S. ASSISTANCE

(By Phil McCombs

A man named Albert Csonka has invented a better carburetor that federal officials say could potentially save millions of gallons of gasoline in this energy-hungry nation.

Csonka, however, has run into frustrating bureaucratic roadblocks in getting assistance funds from a federal program created specifically by Congress to encourage nonnuclear energy research by tapping the vast incentive resources of individual Americans like Csonka.

His frustrations were such that they prompted the following candid self-criticism from one government official involved. "The government is not, literally, set up to deal directly with individuals as we deal with Boeing, or Douglas or someone with a Washington office," said Richard K. Sutz, director of the Energy Research and Development Administration's inventor program. "A guy from Boeing can come in twice a day. They know the words to use. It's a matter of grantsmanship."

"ERDA is not set up to deal with small people," he said.

Csonka says that the big auto manufacturers haven't been helpful either, although Ford and Chrysler at least say they're interested.

Csonka's tale has a classic appeal—the small individual with a bright idea working alone against great odds. The story also provides glimpses into an area of federal energy policy that may or may not be working as well as it might.

Csonka has been lucky in several respects. Of 4,278 inventions submitted to the National Bureau of Standards (NBS) Energy-Related Invention Evaluation Program since its inception in early 1975, Csonka's is one of only 22 that NBS has forwarded to the U.S. Energy Research and Development Administration for possible funding.

And the 77-year-old former Hungarian refugee has won, with his brilliance and considerable old-world charm, several supporters within the bureaucracy itself.

Sutz, who is in a position to approve funds for Csonka, described Csonka as "a winner" who with continued luck and pluck may emerge as "a major carburetor manufacturer" in the U.S.

ERDA has not yet decided to fund Csonka's project, however. The agency has asked the inventor for management and marketing plans to indicate how the new carburetors would reach the public.

The energy-related invention program was established under the Federal Non-nuclear Energy Research and Development Act of 1974—a comprehensive national program coordinated by ERDA.

If an invention passes muster with the NBS technical evaluators, ERDA can turn it down as economically unfeasible, or choose to fund it or aid the inventor in some other way such as by providing management or marketing advice.

Csonka, who has been working with his 79-year-old brother on a shoestring budget at home in Buffalo, N.Y., and in a college laboratory, applied for federal aid more than a year and a half ago.

Sutz conceded that Csonka's submission "just got lost" in the ERDA offices and has "taken more time than it should have."

Sutz, formerly an inventor himself and who has been in government only a year, said he is wrestling with the huge ERDA bureaucracy to speed things up.

Sutz said he has come under pressure from Congress to eliminate the delays for small inventors who are applying to ERDA and that all of this pressure has produced "a hell of a bureaucratic learning curve. We're improving, but not really as fast as the inventors or I would like."

Csonka, full of energy, came to Washington last week to confer with officials and see if he couldn't push his invention along a bit.

"For six months our papers were lying in the file," he said with a smile. "Eight copies, six pounds of papers! No one took it in their hands! I don't want to blame anybody, I just want to say to ERDA and to Mr. Schlesinger and Mr. Carter, "Gentlemen, you have lost half a year! By now we should have a carburetor that can be put on the car."

Csonka is no stranger to carburetors, the part of an engine that mixes gasoline with air and then sends the mixture into the cylinders for combustion.

His father, a university mechanical engineer, invented one of the world's first carburetors in Budapest in 1891 and went on to become one of the leading pioneers of the Hungarian engine and automobile industries.

Albert Csonka went into business in 1925 with his father and brother John. They set up a small machine shop in the basement of their apartment building in Budapest, which less than two decades later—as Albert Csonka tells it—had blossomed into a major engine and tool factory employing more than 1,000 persons.

The senior Csonka died in 1939 and when the company was nationalized in 1948 the two brothers fled Hungary on foot and without their families. Later they learned that officials had come to their homes to arrest them the day after they left, Albert Csonka said.

The Csonka brothers spent four years in Austria and finally immigrated to Buffalo where their wives and families joined them in the late 1950s.

Csonka said his net worth was $5 million when he fled his homeland. Since then he has worked as a mechanical design engineer for various U.S. companies until retiring in 1973. He was 73 at the time.

"It's a good age," he said. "You are ripe now. We said to each other, 'We have to make it better, the carburetor.' We said, 'This was our father's idea, the carburetor. Let's make a better carburetor!"

So they set to work. Csonka is living on a small retirement income and $309.50 in Social Security plus what his wife, a former opera singer, can earn giving piano lessons.

The brothers borrowed a few thousand dollars from friends and developed their new "micro-carburetor." As Albert Csonka explains it, they were able to make a revolutionary carburetor because they had the "spark of an idea" just as their father had had nearly 90 years ago. The father's idea came from casual daily observation of a flower stand girl on a streetcorner in Budapest who kept her flowers fresh by spraying them with a hand-held atomizer.

The atomizer's principle—a rush of air over a pool of liquid that picks up particles of liquid and sprays them out as a fog—is the same as that of the carburetor invented by the senior Csonka and other inventors and that is in use in most vehicles today according to published descriptions.

In most carburetors, there is a rushing air current into which a stream of gasoline is introduced. The gas is thus atomized into tiny droplets mixed with the air.

Csonka's new "micro-carburetor" differs in that the rush of air is much faster—nearly the speed of sound—and instead of one gasoline stream the gasoline is fed into the air stream through 720 tiny holes.

The result, according to the NBS evaluation, "insures optimum fuel vaporization and, evaporation. Consequently the air fuel mixture resulting is extremely uniform and the fuel is fully vaporized throughout the intake manifold and delivered uniformly to all cylinders."

The gasoline is burned more efficiently and less is spewed out in the form of undesirable emissions, according to the report.

In laymen's terms, as Csonka explained it, ordinary carburetors atomize the gasoline into big drops and little drops and some cylinders receive a lean mix and some a rich mix—all leading to wasteful operation. In his micro-carburetor, all cylinders receive a "perfectly uniform fog" of the air-gasoline mixture, he said.

In laboratory tests in Buffalo on a Buick engine, Csonka reported gasoline savings of 20 per cent or more.

The NBS evaluation, which leaned in part on the opinion of Professor David Naegeli of Princeton's Aerospace Propulsion Laboratories, concluded that the micro-carburetor "should in principle provide (20 percent) better fuel economy and reduce emissions." Dr. Naegeli wrote that in his opinion, "the micro-carburetor is an excellent device as it stands."

Sidney Weiser, the NBS staff man who evaluated the invention—although without conducting any direct tests on it—estimated an annual savings of 151 million gallons of gasoline should the micro-carburetor be installed on 1 per cent of the 107 million cars in the U.S. An additional 1.2 billion gallons would be saved, he estimated, if the carburetors were installed on the 8.5 million new cars made each year.

The micro-carburetor would cost $100, Weiser estimated.

Csonka said he approached major car manufacturers and was told by General Motors that "they were not interested in outside carburetors . . . They don't want to pay royalties." He said that Chrysler and Ford are "interested but they want to have it built and tested" before making any decisions.

GM spokesman Frank Faraone said the company, which manufacturers its own carburetors in Rochester, N.Y., reviewed Csonka's material and decided "We had no need to purchase any rights. . . . We had no use for any development work on it. I really can't say if we've done the same thing ourselves."

Chrysler spokesman Richard Muller said his company reviewed Csonka's material and has requested further test data. "Of course the corporation is interested in the design but would like to see some operational test data," he said.

Ford spokeswoman Barbara Mansfield said Ford officials have been talking with Csonka and "have told him that his carburetor may infringe on the Dresserator carburetor"—another type of carburetor. NBS officials discount that possibility, however.

Csonka said he has applied for a patent on his micro-carburetor but has not yet received it.

Sutz said the time required for NBS to test any invention is now down to six months and his own ERDA office, which makes final decisions on which inventions to fund, can make up its mind in 45 days.

Inventions are still being submitted to the NBS at the rate of 10 or 15 a day, officials said, and they range from haphazard ideas scribbled on brown paper bags to highly sophisticated and carefully thought-out innovations, like Csonka's carburetor.

So far, the ERDA officials said, they have provided $40,000 to a physicist who is developing a more efficient way of converting the sun's rays into electricity. Beyond that, they have given "management consultant help" to four other inventors and rejected two outright among the 22 inventions recommended to them by NBS.

Of the remaining inventions, four—including Csonka's—"look very positive," and the others are still being evaluated, officials said.

The 22 recommended inventions range from a "diesel engine conversion system for gasoline engines" to a "hydraulically powered waste disposal device." A good proportion of all inventions submitted have to do with automobiles, officials said.

Sutz said he believes his bureaucratic problems will be conquered and that the program will pay off for taxpayers at a rate of 6 to 1. "All I need is one more year and to pull out a couple of winners . . . that will pay for the whole program," he said.

While ERDA still hasn't made up its mind on Csonka and his carburetor, Sutz said there is "no question" that Csonka is a sound inventor and that his carburetor is "a winner."

Whether that will be translated into big money for Csonka and a vast energy saving for the American people may largely depend on fate.

"If he [Csonka] maintains that entrepreneurial disease, as I call it, and really works and pushes," said Sutz, "and on the condition that someone else isn't working on a parallel or identical system, Csonka has a damn good chance of becoming a major carburetor manufacturer . . ."

Sutz added the provision that nothing will be certain either, until a road-test proves that the carburetor will save 20 per cent of fuel consumption in actual driving as it did in laboratory tests.

Csonka said his next step will be to make a micro-carburetor that can be used on a road-test car. He said this will take six months, even working 10-hour days, seven days a week as he does.

"Of course we are not so young anymore," he added with a smile.

JOHN LIBI

HON. JOHN L. BURTON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 21, 1977

Mr. JOHN L. BURTON. Mr. Speaker, John Libi, a great humanitarian, who has spent his lifetime contributing to the benefit of poor and destitute children throughout the world, has sent his message that he would like me to share with

all of the Members of Congress. I am placing his communication in the CONGRESSIONAL RECORD so my colleagues in the House, as well as Members of the other body, will be able to share Mr. Libi's thoughts:

SAN FRANCISCO, CALIF.,
March 15, 1977.

Gentlemen of the Congress of the United States of America:

During my life, I have done a lot of traveling through our beautiful country of America. I have helped the poor and destitute children in many countries. I have observed many children as they grew up from kindergarten to grade schools. Children are quite human, some are slow in learning, some are very mischievous, so their teachers must teach them obedience. At the beginning of each school day, the children should be taught to respect their country by singing the song "America the Beautiful," and at the end of the school day they must be taught to pledge to the flag of the United States of America. In this way, they will become better citizens of the country. The teacher must remind the children that in order to become a good citizen of the United States, they must get a good education. America is a great and beautiful country, let us keep it this way.

Sincerely,

JOHN LIBI.

W. J. MICHAEL "MIKE" CODY

HON. HAROLD E. FORD

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Monday, March 21, 1977

Mr. FORD of Tennessee. Mr. Speaker, it is with a sense of great pride that I bring to the attention of my colleagues the distinguished record of W. J. Michael "Mike" Cody, whose accomplishments within the Memphis community and the South as a whole have prompted President Carter to nominate him U.S. attorney for western Tennessee.

Since his graduation from Southwestern at Memphis where he served as student body president, Mike has continuously pursued endeavors that reflect an unyielding commitment to unselfishly serve the community in which he resides. He joined the prestigious Memphis law firm of Burch, Porter, and Johnson following graduation from the University of Virginia Law School. His penchant for political activities has resulted in many diverse and substantive undertakings while his finely honed skills at practicing law have flourished in private practice.

Mike has applied his political acumen toward the management of many campaigns as well as initiating the LQC Lamar Society, a regional planning and development organization that addresses the needs and concerns of the South. Similarly, his work on behalf of the Democratic Party, including management of Jimmy Carter's Presidential campaign in Memphis, led to his selection to chair the Shelby County Democratic Executive Committee. In 1975, he successfully ran for a city council seat in Memphis. He has remained active in social and cultural community programs while teaching political science courses at Southwestern and LeMoyne-Owen College, and serving on the Board of Tennessee's Committee for the Humanities.

Mike is married to the former Nancy Phillips and blessed with four children. He is certainly a leader in the Memphis community and an inspiration for those of us fortunate enough to call him their friend. I am confident that the Senate Judiciary Committee in its wisdom will agree with President Carter that Mike Cody has unparalleled qualifications to run the demanding office of U.S. attorney for west Tennessee.

SMALL BUSINESS PROBLEMS OF EXPORT MARKET DEVELOPMENT

HON. JAMES H. SCHEUER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, March 21, 1977

Mr. SCHEUER. Mr. Speaker, on March 3 of this year, the Department of Commerce sponsored a conference of small manufacturers from all over the United States to consider their problems of export market development. For a long time, it has been a matter of national concern that more than 95 percent of small American manufacturers do not export. The March 3 conference was initiated last June by former Secretary of Commerce Elliot Richardson at the instigation of a prominent businessman, and distinguished civic leader Eugene M. Lang, president of REFAC Technology Development Corp. of New York.

For more than 25 years, Mr. Lang has by imaginative efforts, unique organizational capabilities and dynamic leadership helped small manufacturers gain access to foreign markets and foreign technology. His company was among the earliest to receive the Government's "E" award back in 1963 from President Kennedy. He has also received six official citations for his services as a consultant to the Department of Commerce.

When he met with Secretary Richardson last June, Mr. Lang presented a statement defining the need for focusing Government attention on small business on export problems and objectives. He also presented a series of innovative proposals for stimulating export efforts. These proposals, developed into a comprehensive program by Mr. Lang, were presented by the Department of Commerce to participants of the March 3 conference for consideration. The conference, which was keynoted by Undersecretary Sidney Harman, enthusiastically approved Mr. Lang's program in principle for action by the Department of Commerce and for legislative attention by the Congress.

We all recognize that small manufacturers must be encouraged to take a greater role in the expansion of our economy. In great measure, broader access of foreign markets will make this possible. I therefore urge my fellow Members to read Mr. Lang's export expansion program for small manufacturers, as follows:

AN EXPORT EXPANSION PROGRAM FOR SMALL BUSINESS, PRESENTED BY EUGENE M. LANG TO SMALL BUSINESS ASSISTANCE CONFERENCE MARCH 3, 1977

Below is outlined a program designed to bring small American manufacturers into the mainstream of world trade. In part, the mainstream relates to the development of export markets. No less important, it relates to the stimulation of product innovation and the utilization of new technology. These elements profoundly influence the role of small business in America's economic growth and the health of our competitive environment.

THE TARGETS

The program is directed to two primary targets:

1. To bring 30,000 more small American manufacturers into export markets within five to ten years. Figuring an average annual gross export revenue potential of $200,000, this target, involving about 10% of U.S. manufacturers, would add eventually $6 billion each year to U.S. exports of manufactured goods.

2. To enhance the capacity and opportunity of small business to acquire new technology, to utilize technological advances and to stimulate product innovation.

These targets are intertwined. They are particularly relevant in an era characterized by rapid technological change and increasingly integrated world markets. They should help counter two trends that are eroding the structure of our economy: (a) the increasing concentration of world trade in the hands of the largest companies and, (b) the correlated declining proportion of total U.S. product innovation generated by small business with the declining position of U.S. industry vis-a-vis other industrial nations in creating new and better products for world markets.

THE PRINCIPLES

The following principles have been considered in selecting and shaping program concepts and proposals:

1. For purposes of this presentation, "small business" is defined as an independent company having fewer than 250 employees whose assets are under $7.5 million, net worth under $5 million, with annual revenues during the latest three years averaging less than $10 million. Likewise "export" and "export expansion" are deemed to include all business activities that come within the economic interests and objectives of U.S. manufacturers in foreign markets.

2. The program must attract the entrepreneurial motivations of businessmen as its primary dynamics.

3. Economic proposals should be available without discrimination to all U.S. companies regardless of size. However, they must have particular relevance to the needs, interests and motivations of small business.

4. The statistics for measuring the success of the program are the number of additional companies brought into export. Increased revenues from foreign transactions, while important, are secondary except as they may reflect a broader base of U.S. participants.

5. Tax-related incentives are to be financed mainly out of income derived from new international business. They should not require substantial subsidy from existing tax revenues. They should not permit redirection of established export relationships for tax-saving purposes.

6. The unique ability to do something uniquely well—specialized know how, whether or not associated with patents and trademarks—is recognized as a primary tool of trade development for many manufacturers whose products cannot compete in foreign markets, or who place access to overseas technology and technological feedback as primary business objectives.

THE PROGRAM COMPONENTS

The program has four basic components:

1. Creation of a Presidents Small Business Council or equivalent.

2. A structure of program incentives.

3. Vehicle for program implementation: the Small Business Export Trade Corporation.

4. Review of Government services relevant to small business "export expansion."

I. PRESIDENT'S SMALL BUSINESS COUNCIL

The Problem: Small business has no effective agency for presenting its views and interests at top national levels concerning foreign trade policy and programs. By its make-up, the existing President's Export Council represents big business—only. While entitled to promote their purposes, large corporations can speak only for their own genera. They are unqualified to speak for small business—indeed, some have questioned the validity of small business' concern with export. Whether through PEC or any other agency, they should not be presumed to speak for business generally. In the past, their export-promotion proposals have often professed an intention to help small business. However, when such proposals have been adopted, the primary benefits invariably seem to have developed on themselves, with some overflow to the small but technologically elite.

Small business clearly must be in a position to speak up and promote policy and program in its own behalf.

The Proposal: Either within the existing PEC or as a separate peer group, create a facility through which small companies can provide knowledgeable, creative and effective "export expansion" input and initiatives at top executive and legislative levels in Washington. A President's Small Business Export Council must be carefully constituted and its functions adequately defined. It should have staff facilities appropriate to its purposes situated within a suitable executive branch of Government.

II. PROGRAM INCENTIVES

Most—perhaps 95%—of U.S. manufacturers make no effort to export. Many do not believe that their products, because of their nature or for competitive reasons, can be sold abroad. They are intimidated by real or fancied problems of foreign trade—credit and financing, currency, language barriers, duties, diverse consumer and industrial standards and preferences, complex paper work, product handling. Most do not know the techniques of export market development, are too busy to learn and are unwilling or unable to risk its costs. For those who visualize significant overseas potential, it is difficult to define opportunities and the means for developing them. Export agencies such as EMCs seldom undertake to represent the average small manufacturer. They seek out the high technology "stars" or the elite few in specialized industrial fields.

By eschewing export opportunities, small manufacturers not only shut off sources of profit but also substantially deny themselves access to overseas technology and innovation that can be meaningful to their competitive positions and growth.

It is therefore essential to establish an array of "export expansion" incentives (including government services) that are compellingly attractive to small manufacturers or their export-development surrogates. The incentives must take cognizance of problems and obstacles. They should relate to all types of trade techniques. The following incentives are addressed to these objectives.

A. The Problem.—Small manufacturers are not familiar with foreign markets. They cannot identify export trade opportunities and relate them to their "stock-in-trade" of products and/or knowhow.

The Proposal 1: Improve techniques for (1) Government agencies (the Department of Commerce in particular) to define, develop and disseminate trade opportunities to the business community; and for (2) service agencies such as banks, airlines and trade associations to direct trade opportunities to their clienteles.

The Proposal 2: Organize low-cost overseas business seminar tours and "make-a-deal" missions. Government and business executives should cooperate in creating, guiding and implementing this program, perhaps in association with overseas trade fairs. The initiative of enterprising travel agents might be harnessed. Within IATA regulations, work out airline "export expansion service packages".

The Proposal 3: Organize small business missions in cooperation with Governments of LDCs with view to creating manufacturing joint ventures geared to LDC industrial infrastructure needs. This could be combined with a program of bringing individuals with suitably qualified potential from LDCs to the U.S. for intensive project training. This could be further associated with an administrative liaison facility, perhaps under Government auspices, in the LDC.

The Proposal 4: Overseas Government commercial facilities should be amplified and administratively separated from embassy functions, perhaps under the authority of Trade Commissioners. A corps of "transaction service" officers could be constituted specifically to assist small companies in business development projects.

The Proposal 5: Establish a subsidized program, perhaps as Government fellowships or academic program grants, under which qualified MBA students or student teams could set up and initiate export programs for small manufacturers.

B. The Problem.—Small manufacturers are reluctant to risk the cost of finding, developing and servicing foreign markets and customers.

The Proposal: During the first year of a programmed export effort, a manufacturer could deduct twice the amount of out-of-pocket costs, up to a $7,500 total, incurred specifically to develop export sales. Such costs would exclude travel but would include items such as foreign language literature, overseas advertising, trade fair participation, supply of samples. In each succeeding year, the "double deduction" ceiling would be $5,000, but could be increased up to $15,000 by adding the amount by which 3% of total exports of the preceding year shall have exceeded $5,000. For calculating such additional deductions, foreign business travel expenses could be included.

C. The Problem.—It is too expensive to change or adapt U.S. products to the standards, specifications and preferences of foreign industries and consumers.

The Proposal: Permit "double deduction" of out-of-pocket engineering and tooling costs specifically incurred for adapting products to foreign market requirements, to a cumulative maximum of $25,000. This would include expenses such as conversion to metric dimensions.

D. The Problem.—It is often difficult and disproportionately costly to finance small export transactions.

The Proposal 1: Establish a non-profit facility, under direct or indirect Government auspices, to provide a properly qualified exporting manufacturer with a revolving credit of up to $100,000 to cover the financing of bona fide export orders having up to $5,000 F.O.B. value.

The Proposal 2: Permit accelerated 5-year depreciation (or a 20% investment tax credit) of the cost of U.S.-made capital equipment, specifically or to the extent specifically used for making products for export, to a cumulative total of $100,000.

E. The Problem.—The small company is often unable or unwilling to assume credit and other risks of selling to overseas customers. The tendency to insist on letter of credit dealing inhibits foreign sales relationships.

The Proposal 1: Each manufacturer may set up at the end of each fiscal year a reserve for bad debts equal to 50% of outstanding export receivables not covered by letter of credit to a maximum of $50,000.

The Proposal 2: Establish a non-profit "minimum red tape" facility under direct or Government auspices to provide low-cost insurance for specified risks. This possibly could be accomplished through modified FCIA and OPIC procedures and charges. Risks specified could include reasonable protection against cost increases in relation to quotation and supply commitments.

F. The Problem.—Many small manufacturers are unwilling or unable to risk the cost of protecting their products and processes abroad by patents and trademarks especially if there is little prospect of exploiting them. By the same token, failure to obtain patents and trademarks may foreclose opportunities for product export or for establishing technology transfer relationships.

The Proposal: To a cumulative maximum total of $10,000, permit manufacturers to take a double-deduction of out-of-pocket disbursements incurred in applying for and maintaining overseas patents and trademarks.

G. The Problem.—The exploitation of small business knowhow, as an avenue for penetrating foreign markets, poses some special problems. For example, equity in a foreign joint venture received as a consideration for knowhow supplied under a license or technology transfer agreement is subject to tax as ordinary income in the United States, even though cash income is not received. Few companies are willing to pay out U.S. taxes in order to receive speculative "paper values" of a foreign venture. This and other obstacles to technology transfer relationships are dealt with in the following incentive proposals.

The Proposal 1: Shares providing a minority equity and having a par value of up to $50,000, which are received as consideration for knowhow or for intangible property rights in a foreign manufacturing joint venture are to be deemed a tax-free exchange, and subject to tax as a capital gain only when liquidated on the basis of money constructively received. If the joint venture is established in LDCs, the tax-free exchange ceiling would be increased to $100,000. Each manufacturer would have an overall cumulative "tax-free exchange" ceiling of $250,000.

The Proposal 2: With respect to investments-in-kind (such as used machinery, special tools, etc.) in foreign manufacturing joint ventures, the excess between the par value of minority equity and the book value of the investment-in-kind, up to a maximum amount of $50,000 in each venture, would be deemed a tax-free exchange. For investments-in-kind in joint ventures in LDCs, the ceiling would be $100,000. Equities covered by this provision would be subject to tax as a capital gain and only when liquidated and money received.

The Proposal 3: Dividends, received or equity in earnings of foreign joint ventures would be subject to U.S. tax (with foreign tax credits) only if the dividends or earnings are received in or can legally and without penalty be converted into U.S. dollars. If dividends on earnings are reinvested in a foreign joint venture to maintain a constant equity position, they would not be subject to current U.S. tax, although the use of foreign tax credits would be correspondingly deferred.

The Proposal 4: Royalty and dividend income received from overseas licenses and joint ventures should be deemed ordinary earned income (not passive income) for U.S. tax purposes.

The Proposal 5: Cash income (including royalties, dividends and commissions), due from a licensee or joint venture in which a minority position is held, that is blocked abroad shall not be taxable in the United States unless and until repatriation is permitted under local regulations or until such income may be disbursed constructively for the account of or to the order of the U.S. company. Use of foreign tax credits would be correspondingly deferred.

H. The Problem.—U.S. antitrust regulations operate to restrict unfairly the access of small companies to overseas technology. Large corporations can readily capture the technology, knowhow, R&D and grant-back values of patents from foreign subsidiaries. They can often acquire foreign companies having patents, technology and products that are desired.

Small manufacturers cannot operate in this fashion. They must rely heavily on technology transfer arrangements with independent companies. However, the productivity of these arrangements—particularly the technological feedback and grant-back values they can generate—is inhibited by antitrust provisions. Thus, small companies are disadvantaged in competing with large companies, particularly in fields which are most subject to evolutionary and innovative changes.

This disparity is further accentuated by the ability of large corporations, who cover world markets through foreign subsidiaries, to defer U.S. taxes and to control their market: the de facto ability to protect sources of supply, pricing and profits. Antitrust regulations deny equivalent opportunities to small companies who operate through technology transfer. Moreover, they compound a fear of many small manufacturers: that export development through technology transfer works to set up foreign ventures, benefiting from U.S. know-how and lower overseas costs, as domestic competitors.

The Proposal 1: Permit small manufacturers to acquire exclusive grant-back rights to patentable developments of foreign licensees or joint ventures in which they have minority interests. Grant-backs should include the right to extend, through sub-licenses, grant-back rights to other licensees and joint venture associates in other countries.

The Proposal 2: Small manufacturers may legally exclude foreign licensees and joint ventures from competing in the U.S. market with respect to products covered by technology transfer agreements.

The Proposal 3: Small manufacturers can set themselves up as exclusive sources of supply for additives or specific components required by foreign licensees and joint ventures in connection with the fabrication of products under technology transfer agreements.

Note: Antitrust concessions to U.S. companies in connection with international technology transfer agreements must be subject to foreign laws that govern foreign parties to such agreements.

I. The Problem.—Small manufacturers do not regard the benefits to be anticipated from export markets as commensurate with the risks and problems involved.

The Proposal: The first $50,000 of profits on export sales and from technology transfer relationships shall be subject to a 25% U.S. income tax rate. The determination of such profits should be permitted by following prescribed procedures within the accounting operation of each manufacturer and need not require the formation of a separate export corporation.

III. SMALL BUSINESS EXPORT TRADE CORPORATION

Experience indicates that, for economic and psychological reasons, most small manufacturers do not respond to "naked" export incentives. There must be a mechanism for putting incentives to work—to neutralize the small manufacturer's concerns and inertia. To fill this need, legislation should be enacted to create a new kind of enterprise: a Small Business Export Trade Corporation (SBETC). The SBETC is conceived as an entrepreneurial facility that has the competence and motivation to assume the full burden of finding export markets for client manufacturers and for developing and servicing these markets.

The essential elements of SBETC, as a business for bringing small American manufacturers into world markets, are set forth as follows:

1. SBETC Functions: Acting essentially as the "foreign department" of its clients, the SBETC would coordinate overseas market conditions and opportunities with client capabilities, potential and objectives, by variously performing the following services:

(a) Export sales, directly to major end-users or through qualified distributors or sales representatives. The SBETC would normally purchase client products on standard client terms for resale and assume all responsibilities and risks, other than client product warranty, which export transactions may involve.

(b) Bulk export shipments with overseas repackaging.

(c) Overseas product assembly using U.S.-made components, wholly or in part.

(d) Technology transfer relationships: overseas manufacturing licenses and joint ventures.

(e) Consulting services or execution of specific export development assignments.

2. SBETC Organizational Requirements:

(a) Must have minimum paid-in capital of $100,000.

(b) Must initially represent not less than three qualified U.S. manufacturers (see below) for non-competing product lines for specified export territories.

(c) Must establish a bona fide business operating unit with essential facilities and staff.

(d) One or more U.S. resident persons or corporations can own an SBETC but no SBETC client can own more than 20% of the SBETC.

3. SBETC Clients: There would be two categories of SBETC client: qualified and unqualified. Income from services to qualified clients (QC) would be covered by tax incentives. Income from unqualified clients (UNC) would not.

(a) A qualified client (QC) would be any of the following:

(i) Any small U.S. manufacturer whose exports during the three years before becoming an SBETC client shall not have exceeded 2% of gross revenues. A small manufacturer which operates under its own identity would be deemed a qualified client even if it were a subsidiary of a large company.

(ii) Any U.S. party with an undeveloped product or invention that is not in production and which is to be offered for overseas development and licensed production.

(iii) Any U.S. manufacturer, regardless of size or general export sales, whose products are not being made or sold in any LDC markets and which are offered to an SBETC for promotion specifically with respect to such markets.

(iv) A party can have QC status with respect to only one SBETC relationship.

(b) An unqualified client (UNC) would be any client who does not fall within a QC definition.

(c) An SBETC client shall be deemed to retain its QC status, regardless of its growth, so long as it shall remain a client and the substance of its SBETC relationship shall not be diminished.

4. SBETC-Client Relationship: Each SBETC would contractually establish the conditions of its client relationships. However, the contract should provide the SBETC with the necessary authority, responsibility and security to justify a long-range market development effort. The following principles are recommended as bases for the formulation of contract provisions:

(a) Establish policies and business objectives which are to govern an SBETC-client relationship and actions of the parties thereunder.

(b) SBETC activities in behalf of a QC should be entirely at SBETC risk and expense. The client should be only obliged—but not limited—to supply (to sell) products as regularly manufactured, property rights as established, and knowhow as conveniently available.

(c) Encourage close SBETC-client working contact that can foster overseas sales, promote technology transfer relationships, stimulate the feedback to client of product, production and application R & D of foreign customers, sales agencies, licensees and joint ventures.

(d) Technology transfer arrangements negotiated by the SBETC should be subject to client approval.

(e) Specify the basis upon which program incentives are to be utilized and shared.

(f) Termination of the SBETC-client relationships should be possible if income and other objectives, contractually agreed upon, are not fulfilled within a reasonable time.

5. SBETC Sources of Income:

(a) Profits on the resale of exported products.

(b) Share of royalties and service fees from overseas licenses and joint ventures.

(c) Share of equities in overseas joint ventures and dividends therefrom.

(d) Fees from consulting or for carrying out specific overseas projects.

6. Client Sources of Income:

(a) Profits on products sold to the SBETC for export.

(b) Share of royalty income and service fees from overseas licenses and joint ventures.

(c) Share of equities in overseas joint ventures and dividends therefrom.

(d) Feedback values of commercial and technical data generated by overseas relationship, including grant-back rights to patentable product and process developments and improvements.

7. SBETC Incentives: Except as otherwise indicated or qualified, SBETC incentives would include all of the program incentives listed above in loco clientis. However, except for incentive II–I, the QC should have the right to take advantage of all program incentives to the extent that they are not utilized by the SBETC. Taking the foregoing into account, the following would apply as or with respect to SBETC incentives:

(a) Losses of the original SBETC paid-in capital investment should be deductible from ordinary income by SBETC investors.

(b) The SBETC could set up a bad debt reserve for each QC export account as provided in IIEI, but with an overall reserve ceiling for all QCs of $250,000'

(c) The SBETC would be permitted to take "double deduction" of expenses specified in II–B with respect to each QC. However, the QC would have prior right to utilize this incentive in connection with proper expense items as it may prefer to undertake directly.

(d) Incentives relative to equities and investments in kind in overseas joint venture as set forth above in II–G shall apply to the SBETC.

(e) Utilization of incentives by the SBETC

shall not be cumulative from year to year. Nor can they be transferred or improperly allocated among QCs.

(f) The following program incentives would be available only to QCs and not to SBETCs: II–C, II–F, II–D2, II–H. As to II–I, instead of the QC, the SBETC will pay a 25 percent U.S. income tax on the first $50,000 of SBETC profits each year from export activities for each QC. However, the 25 percent tax rate would apply up to an annual ceiling of $250,000 of SBETC profits for all QCs.

8. SBETC Qualification: in order to gain and retain the advantages of SBETC incentives each year, the SBETC must fulfill various qualifying conditions:

(a) Each year during the first three years, the SBETC must serve at least three QCs. Thereafter each year, it must serve at least five QCs.

(b) A QC will not qualify as such for SBETC "incentive" purposes if in any year after four years from the start of a QC relationship, the combined total of QC export sales plus other QC foreign income received by the SBETC shall be less than 10 percent of gross SBETC revenues or $100,000, whichever is less, unless, for the year in question, the SBETC shall have at least 5 other QCs whose sales-income total shall meet the "10 percent or $100,000" test.

(c) After five years, 75 percent of gross SBETC revenues must be generated by products of at least five QCs and the revenues attributable to each QC must be at least 10 percent of such revenues; provided, if exports of U.S.-made products of any QC in any year shall exceed an FOB value of $100,000, or if technology transfer relationships shall generate taxable U.S. income of at least $25,000, such client shall automatically be deemed qualified as a QC for SBETC incentive purposes.

(d) No more than 5 percent of gross SBETC revenues may relate to product imports (as distinct from technology imports) and in no event may import activity be conducted except to the orders of QCs.

(e) SBETC accounts must be set up so that the sales and incomes associated with each client shall be clearly and properly distinguishable for the purposes of administration and for determination of profits and compliance generally.

(f) With respect to each QC the SBETC shall be obliged to show each year that it shall have exercised due diligence in seeking to develop overseas business. Yardsticks of due diligence shall be administratively established.

9. SBETC Administration: Although other government agencies can be considered, the U.S. Department of Commerce seems best organized and prepared to administer the SBETC program. In any event, administrative responsibility and parameters for establishing regulations and controls must be clear and definite. Certification procedures for an SBETC would have to be fixed and compliance overseen.

IV. GOVERNMENT SERVICES

The Federal Government (the Department of Commerce in particular) maintains valuable facilities, services and programs to promote foreign trade development, and to assist established and prospective exporters. To much a lesser extent, so do various states and municipalities. These facilities and services altogether have fallen short of their potential for fostering small business exports.

In great measure, the export-inertia of small business itself is responsible for this. Government cannot and should not be expected to do for business what business must be motivated to do for itself.

Nevertheless, government facilities and services must function as a primary incentive in any small business export program. It would therefore be useful to make an audit of existing Federal Government facilities, programs and services that are relevant to small business export. An ad hoc audit committee composed of small business, professional and government executives could evaluate existing Federal activities with view to determining if and how they might be more effectively centralized, coordinated, and improved in content, accessibility and utility. The audit might extend further to include state and municipal export-promotion agencies and private service industries whose facilities might be harnessed to small business export objectives.

GEORGE MORTON LEVY—CITIZEN OF THE YEAR

HON. NORMAN F. LENT

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, March 21, 1977

Mr. LENT. Mr. Speaker, on Saturday, March 26, the Freeport, N.Y., Chamber of Commerce will honor George Morton Levy as its citizen of the year. At this time, I would like to pay tribute to Mr. Levy, a dear friend, outstanding sportsman and humanitarian, who is one of the most distinguished residents of my Fourth Congressional District.

George Morton Levy grew up in Freeport, N.Y., on the south shore of Long Island. After graduating from Freeport High School, where he was a star athlete, he graduated from the New York University Law School. In 1912, he was admitted to the New York bar, and he established himself as one of New York's outstanding trial attorneys, handling hundreds of civil and criminal cases.

Mr. Levy is best known for his accomplishments as a sportsman, especially in the field of harness racing. If George Morton Levy had not put his money, career, and reputation into the harness racing experiment, the sport may have faded into oblivion. In fact, he continues to head the trotting track he founded on Long Island, Roosevelt Raceway.

Mr. Levy's many acts of charity and service to his fellow man have long gone unpublicized. He has been honored literally hundreds of times by charitable and philanthropic groups for his efforts on their behalf. The prestigious list of awards which have come to him in a lifetime of service includes: Connie Mack, Babe Ruth, and Little Leagues of Westbury; Boy Scouts of America; several awards from the Boys' Towns of Italy; and special recognition from Pope Pius XII in the form of 12 gold medals given for his service to mankind.

Other representative awards include those from the Nassau Building and Construction Trades Council; a plaque from the National Conference of Christians and Jews; several awards from the State of Israel bonds; a special tribute from the Long Island Cerebral Palsy Association; a bronze plaque from the United Cerebral Palsy Association of Suffolk County; several awards and many citations from the United Jewish Appeal of New York; and the Norman F. Lent, Sr., Memorial Award of the Criminal Courts Bar Association of Nassau County. He was honored as the first person to be placed in the Living Hall of Fame of the Trotter, and for being instrumental in bringing the first law school to Nassau County at Hofstra University.

Even today, in his 88th year, Mr. Levy is best described as a fighter. Those who know him best say there are no causes lost to him. He puts his heart and energy into everything he does, whether it is business, law, or golf. Great men like George Morton Levy come along all too seldom. I join with the Freeport Chamber of Commerce in paying him a well-deserved tribute.

TRIBUTE TO S. JOSEPH HUNT

HON. WILLIAM M. KETCHUM

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 21, 1977

Mr. KETCHUM. Mr. Speaker, I would like to bring to the attention of my colleagues the distinguished career of S. Joseph Hunt, who has recently retired as a member of the board of directors of the Antelope Valley-East Kern Water Agency, Lancaster, Calif. Mr. Hunt will be honored for his achievements during his 17 years of service on the Water Agency Board at a community salute dinner to be held on April 2, 1977. I am pleased to have the opportunity to join in the many tributes offered to Mr. Hunt on this occasion.

Born in Virginia, Mr. Hunt has lived in California for over 50 years. He settled in the Antelope Valley in 1951 and soon became active in local efforts to obtain additional water. His concern for meeting the water needs of his community as well as his involvement in seeking solution to these problems led to his appointment in 1960 to the board of directors of the Antelope Valley-East Kern Water Agency. He remained a member of the board until his retirement from that position in January 1977.

Mr. Hunt's interest in his community's well-being extended beyond his concern for an adequate water supply. Other civic pursuits have included a leading role, along with his wife Ruth, in establishing a YMCA in the Antelope Valley. Through his generosity, land was made available on which to build the Palmdale YMCA and the First United Methodist Church of Palmdale. A building contractor by profession, he donated his valuable services in this area for the church's construction.

In addition, the Boy Scouts of the Antelope Valley have been fortunate to have had Mr. Hunt as a member of the advisory board and the Lancaster and Palmdale Chambers of Commerce have been able to depend upon Mr. Hunt's support for 25 years.

During the many years that S. Joseph Hunt has resided in the Antelope Valley, he has made numerous and valuable contributions to the quality of life for all the area's citizens. I know that he has earned the respect and admiration of

those with whom he has worked in his various endeavors and I am sure he will be sorely missed as a member of the board of directors of the Antelope Valley-East Kern Water Agency.

THE IMPORTANCE OF FOOD CO-OPERATIVES TO AMERICAN FAMILIES

HON. FRANK ANNUNZIO

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, March 21, 1977

Mr. ANNUNZIO. Mr. Speaker, in this era of huge multinational corporations and massive conglomerates, it is the simple generations-old food cooperatives that are helping feed an estimated 160,000 families every year at an annual volume of $87 million.

Food cooperatives are small groups of about 15 to 30 families who pool their orders for food items, especially fresh fruit and vegetables, and then order from a wholesaler or local produce market.

These food cooperatives represent to me the original spirit of the American settler who survived by helping his neighbor. Today it is the food cooperatives that continue to supply produce when prices have climbed beyond the range of many low as well as middle income families.

With the same spirit as the early American settlers who helped raise one another's barns, these contemporary settlers help one another to continue to feed their families well through organization, working together and pooling their financial resources.

The national consumer cooperative bank bill, H.R. 3692, of which I am one of many cosponsors, would greatly assist this grass roots effort where people in a community attempt to help one another by undertaking the problem themselves, and at the same time help to fight inflation.

Even here in Washington, D.C., Mrs. Walter Mondale, the wife of the Vice President, has also found that participation in a food cooperative is a viable and successful venture for beating the high cost of living without sacrificing the high standards of eating well.

Mr. Dan C. McCurry, director of the food cooperative project of the Chicago City Wide Institute, offers some interesting background on his efforts to provide membership training and technical assistance for some 250 neighborhood cooperatives in the Chicago area. Because of the widespread interest in this subject to many American consumers, I offer Mr. McCurry's article discussing food cooperatives:

CHICAGO FOOD CO-OPS AND THE NATIONAL CONSUMER COOPERATIVE BANK BILL

(By Dan C. McCurry)

I am the director of a community services program of the City Colleges of Chicago called the Food Co-operative Project. Our primary job is to provide membership training and technical assistance for the some two hundred and fifty neighborhood cooperatives in the Chicago-land area.

Food co-operatives are small groups of 15 to 30 families that pool their orders on a short list of food items, especially fresh fruits and vegetables, and take turns as volunteers going to the market or to a wholesaler. The Co-operative League estimates that there are some 4,000 buying clubs and 700 store-front food co-operatives in the nation with a combined membership of 160,000 families and an annual volume of $87 million.

Whenever hunger has intensified in the land, food cooperatives have emerged. During the 1930's there were tens-of-thousands of food cooperatives in our urban and rural communities. These cooperatives often became centers of community life around which grew community canneries, farmers markets, and other efforts to secure a safe, reliable food supply.

Two-thirds of new small businesses fail within the first four years. These emerging food cooperatives have probably had an equally high rate of failure. Yet out of the survivors has emerged a tough network of co-operatives, storefronts, trucking, baking, processing and other cooperative food ventures. As food prices continue to climb, and are especially beyond the reach of low-income families, we cannot afford to lose these co-operatives which with the timely assistance offered in this Consumer Cooperative Bank Legislation, we could have saved.

In Denver, for example, a small pre-order co-op called Common Market opened in 1970 and within 4 years had expanded into a number of neighborhood cooperatives all using a central warehouse distribution center with annual sales of $750,000. Common Market's search for larger quarters coincided with the decision of Safeway supermarket officials to close the last remaining supermarket in the downtown area. This supermarket was the major source of food for the majority of downtown residents especially a poorly mobile senior citizen population.

The suggestion that Common Market should move into the soon-to-be abandoned supermarket was first greeted with enthusiasm, by some members. But then the search for capital and technical assistance began. Co-operative members found that, despite their stable financial picture and solid growth, Denver area banks were adamant in their refusal to risk a loan to Common Market. Inquiries at other state and federal agencies brought equally discouraging responses. At the last minute, one local bank was convinced to make the loan and with the assistance of Safeway a smooth transition happened at the last remaining urban-core store.

Not only would a Consumer Co-op Bank have seen the great potential of Common Market, a potential often missed by commercial lending agencies unfamiliar with these emerging cooperatives; but such a Co-operative Bank could have offered the vital technical assistance for mastering the new skills of a greatly expanded operation.

Retail food chains are not going to return to our inner city areas; their capital crunch is pushing them farther into the suburbs. However a large population remains behind, and these citizens will eat. They will spend their meager resources at the small, high-priced low quality corner grocery. Or with the assistance of the Consumer Co-operative Bank Act a food co-operative network can expand and begin to fill that hungry void. This void is presently being filled by a proliferation of fast-food chains serving charcoal broiled hamburger at $4 per pound. And our inner-city citizens now have little choice but to get in line at the counter. This Consumer Co-operative Bank Act will begin to give them a choice.

Food cooperatives were created in the struggle of hungry communities to find a secure and nutritious food supply. This Consumer Co-op Bank legislation will offer the resources to greatly strengthen the food co-operative network. And in that strength to provide nutrition for ill-fed urban families; to provide markets for small farmer co-operatives; and to provide a center for the other activities of an organized community.

For if we cannot cooperatively control the food we eat how can we expect to regain control of the rest of our lives? The Consumer Cooperative Bank Act is an important step in that direction, and I am strongly urging its approval by the Congress.

AN ECONOMIC AGENDA FOR THE FUTURE

HON. JOHN M. ASHBROOK

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, March 21, 1977

Mr. ASHBROOK. Mr. Speaker, William Simon, former Secretary of the Treasury, recently gave a speech on his view of "The Future Agenda." He gave his remarks as part of a "Weekend for Freedom" at Hillsdale College, a private college which accepts no Federal grants.

At this point I insert my good friend William Simon's comments into the CONGRESSIONAL RECORD. I commend them to the attention of my colleagues:

AGENDA FOR THE FUTURE

Turning to your seminar topic, "The Current Condition of American Society and the Prospects for the Future," I will limit myself a brief review of the basic economic issues that will ultimately shape the future course of the United States. The American people must now decide what kind of economy they want for the foreseeable future. They must realize that their government's fiscal and monetary policies and the maze of government programs that increasingly intervene in their daily lives are the real issues that will determine their personal welfare:

Whether or not inflation will be effectively controlled or once again allowed to return to double-digit levels;

Whether or not capital investment will be adequate to create meaningful jobs for the growing labor force;

Whether or not government regulation and administrative controls will be changed to meet current economic realities to restore productivity and efficiency;

Whether or not the United States will provide effective leadership on international monetary, trade and investment issues.

In looking to the future the American people should ask this basic question each time the government comes up with a new economic policy initiative: Will this action contribute to sustained and orderly economic growth or will it merely perpetuate the familiar stop-and-go patterns of the past involving increased government spending without regard for the chronic deficits and economic and financial disruption created, excessive expansion of the money supply, even more government controls over the private economy and increased intervention in private wage and price decisions?

The proper role of government is to create an environment for sustained and orderly economic growth through its fiscal, monetary, and regulatory policies. The disappointing performance of the U.S. economy during much of the last decade emphasizes the basic need for move stable policies. In the mid-1960s the United States began an unfortunate series of exaggerated booms and recessions. Serious overheating of the economy

created severe price pressures; accelerating inflation caused recessions by restricting housing construction, personal spending and business investment; the recessions created unwanted unemployment which wasted resources and caused personal suffering; rising unemployment to often triggered poorly planned and ill-timed government fiscal and monetary policies setting off another round of excessive stimulus leading again to overheating—inflation—recession—unemployment—and more government intervention.

From these experiences there is one basic conclusion: our basic desire for economic progress, through improved living standards and employment opportunities, will be frustrated unless we better control the insidious inflation which has destroyed economic stability and today threatens not only our goal of sustained growth but the utlimate survival of all of our basic institutions. When inflation distorts the economic system and destroys the incentives for real improvement, the people will no longer support that system, and society disintegrates. I am convinced that our uniquely creative and productive society will also collapse if we permit inflation to dominate economic affairs. There is no tradeoff between the goals of price stability and low unemployment as some critics have erroneously claimed. To the contrary, the achievement of both goals is interdependent. If we are to increase the output of goods and services and reduce unemployment, we must make further progress in reducing inflation.

The intensity of my feelings about inflation has resulted in some critics labeling me as obsessed. However, I am not so much obsessed as I am downright antagonistic toward those who consistently vote for bigger deficits. We must always remember that it is inflation that causes the recessions that so cruelly waste our human and material resources and the tragic unemployment that leaves serious economic and psychological scars long after economic recovery occurs. It is inflation which destroys the purchasing power of our people as they strive—too often in a losing struggle—to provide the necessities of food, housing, clothing, transportation, and medical attention and those desirable things such as education, recreation and cultural opportunities. Inflation is not now, nor has it ever been, the grease that enables the economic machine to progress. Instead, it is the monkey wrench which disrupts the efficient functioning of the system. Inflation should be identified for what it is: the most vicious hoax ever perpetrated for the expedient purposes of a few at the cost of many. And there should be no uncertainty about its devastating impact, particularly for low income families, the elderly dependent upon accumulated financial resources, and the majority of working people who do not have the political or economic leverage to beat the system by keeping their incomes rising even mort rapidly than inflation. When inflation takes over an economy the people suffer and it is time that this basic point is emphasized by every responsible citizen and the full brunt is brought to bear on his elected officials.

In general there must be more widespread recognition of the fundamental importance of stable economic growth in the future as the only true foundation for maximum employment opportunities and lower unemployment rates, for more moderate rates of inflation which will protect the purchasing power of all Americans and encourage more capital investment that will provide the permanent and productive jobs that people desire, for more efficient use of human and material resources and protection of our environment, and for fulfillment of our international responsibilities in monetary, trade and investment policies. Naturally, there are disagreements about how best to achieve these basic goals but I am convinced that a longer-term time horizon must be used.

First, the diversity of problems must be recognized to avoid concentrating on a single issue. Inflation, unemployment, declining output, the availability of productive resources, international trade and investment all must be considered simultaneously to create a balanced program for stable economic growth. The beginning point for sustaining economic growth without the boom and recession distortions of the past is to avoid a return of destructive inflation pressures. From 1890 to 1970 prices in the United States increased at an annual rate of 1.8 percent. From December 1973 to December 1974 they jumped 12.2 percent. It seems so obvious that any long-term solution to our economic problems requires better control of inflation which has distorted the spending and savings decisions of all Americans. Inflation must be clearly recognized for what it is: the greatest threat to the sustained progress of our economy and the personal standard of living of most Americans.

Second, government policies must solve more probelms than they create. During a period of difficulty it is expedient to respond to strident calls "to do something—anything to demonstrate political leadership."

But this naively activist approach is too often the basic source of problems, not the solution. Courage and wisdom are always required to avoid actions offering the illusion of short-term benefits in exchange for further erosion of the free enterprise system that has served this nation so well in creating the premier economy of the world and providing the greatest degree of personal opportunities. The conventional wisdom that a few billion dollars of additional government spending somehow makes the difference between success or failure of the entire U.S. economy—which is rapidly approaching an annual level of output of two trillion dollars—has always amazed me. There is an important role for governments in protecting certain basic public interests but the claim that governments can or should control the economy is totally false. We would all be better off if government officials would recognize that the real creativity and productivity of America depends upon the private sector.

Third, and most important of all, there must be a proper balance in the shared responsibilities of the private and public sectors. This is a difficult assignment because of the confusion and pessimistic appraisals of the future caused by the political and economic shocks that have occurred. Maintaining and improving the creativity and productivity of the U.S. economic system against the attacks of critics who favor a big-government solution for the problems of society has become our greatest challenge. The simplistic cure of having government spend ever-increasing amounts of borrowed money has not solved many of our problems, but it has created serious economic distortions that will continue long into the future. We now have a federal government that is trying to do more than its resources will permit, to do many things that it cannot do very well, to do some things that it should never do at all, and to do all of these things at the same time. As a result, we now have more government than we want, more than we need, and more than we can afford. Nevertheless, much of the current political rhetoric continues to claim that we aren't spending enough, aren't creating enough new government programs, and aren't pushing enough panic buttons. Despite the unmatched accomplishments of the U.S. economy these critics attack the free enterprise system and demand comprehensive governmental control over economic planning for the allocation of our national resources, the rationing of capital to selected industries, guaranteed government jobs for all who want them, increased control over private economic activities, even a return to the counter-productive wage and price controls that have always failed. Although the American free enterprise system feeds, clothes and houses our people more effectively than any other system in the world, provides the real basis for all of our public services and most importantly is fundamental to our individual freedoms, it is increasingly subject to criticism from those who seem to favor turning to less efficient approaches which would waste our human and material resources and eventually erode our economic progress and political freedoms.

Part of the problem is a matter of image. Those who support increased government spending and pervasive controls over our daily lives are often perceived as being more concerned and socially progressive. Those who allegedly "care more" are given considerable attention when they call for more spending to solve the unmet needs of society, even though the growth of big government has become a large part of the problem and not the solution it is alleged to be. At the same time, those who favor the free enterprise system too often converse in simplistic slogans, that lack humane appeal. Worst of all, many businessmen who come to Washington seem to want to surrender their existing freedom in exchange for protection from the competition that has made our system so dynamic.

It is now time—in fact the need is long overdue—for those who believe in the free enterprise system to more effectively promote its basic values. America has become the world's premier economy because it provides basic incentives to its people to work hard and to be creative. To the individual family this approach leads to a higher standard of living. To the business firm it means increased markets and larger profits. To our government it means increased effectiveness and public support.

In short, too many Americans—especially those who have known only the affluent society—are unaware of the real source of economic growth in our country. The material abundance, the freedoms of choice, the opportunities for meaningful work are all largely the result of the creativity and productivity of our free and competitive economic system. This is the crucial theme that must be communicated to all Americans until they understand it. The American economy is the wellspring of our nation's basic strength in every sphere—political, social, military and economic. It is the source of our present abundance and the basis of our hopes for a better future. We can solve our recognized problems best by preserving and improving and strengthening rather than weakening our uniquely productive system. And in doing this we will preserve our other freedoms that have made America so great.

PERSONAL EXPLANATION

HON. TOM CORCORAN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, March 21, 1977

Mr. CORCORAN of Illinois. Mr. Speaker, because of a prior commitment in my district, I was unable to be present when the vote was taken on final passage of H.R. 4088, the National Aeronautics and Space Administration authorization for fiscal year 1978, on March 17, 1977. If I had been present, I would have voted "yea" on the final passage of the bill.

MY FATHER, HAMILTON FISH

HON. HAMILTON FISH, JR.

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, March 21, 1977

Mr. FISH. Mr. Speaker, I am frequently asked "how is your father, and what has he been doing in recent years," and I thought a short statement might be the appropriate way to respond to a larger audience interested in him and his activities.

A vigorous 88-year-old, he maintains his interest in public affairs, and in fact, on Wednesday, March 23, 1977, will testify before the House Armed Services Committee in room 2118, on our national defense posture. He frequently lectures on his books and enjoys interviews, particularly on the period of his 25 years in the Congress, 1920–45.

The most significant recent event in my father's life was his marriage on October 16, 1976, to Alice Curtis Desmond of Newburgh, N.Y., where they make their home.

For the last 15 years, he has been writing historical books, four of which have been published in the past year: "New York State, the Battleground of the Revolutionary War"; "F.D.R., the Other Side of the Coin"; "The American People Are Living on Top of a Nuclear Volcano"; and "Lafayette in America, During and After the Revolutionary War"; and finally, a monograph in answer to Karl Marx's manifesto entitled "An American Manifesto of Freedom." My father still has a way to go to catch up with his bride, however, who has two dozen published works to her credit.

As some of the Members of the Congress know, Hamilton Fish for 10 years was ranking Republican member on the Committee on Foreign Affairs and for 5 years, ranking Republican member on the Rules Committee. In addition, he was chairman of the first committee to investigate communism in 1930 to ascertain the principles and policies of communism, but not to investigate individuals. Nine out of the fourteen recommendations made by that committee were adopted, either by the Congress or implemented by Executive order. As many Legionnaire Members of Congress know, he was chairman of the Committee of Three that wrote the preamble to the American Legion constitution.

The first bill my father introduced in Congress authorized the return of the body of an American unknown soldier, which was the last bill signed by Woodrow Wilson. At the request of the War Department, he placed the only wreath, representing our Armed Forces, at the burial at Arlington of the Unknown Soldier, November 11, 1921. He also authored the bill to create a homeland for the Jews in Palestine, sometimes called the American Balfour Resolution.

Mr. Speaker, I am glad of the opportunity to place in the RECORD this report about some of my father's activities, and to congratulate him and Alice on their marriage.

COMMON SITUS PICKETING—INVITATION TO UNEMPLOYMENT

HON. DAVE STOCKMAN

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Monday, March 21, 1977

Mr. STOCKMAN. Mr. Speaker, I hope the extremely controversial common situs picketing issue, on which floor debate is scheduled Wednesday, will not be dismissed as simply another perennial labor-management battle whose outcome will have little effect on the Nation as a whole.

In the narrowest terms, this bill would greatly enhance the picketing and strike power of the building trades unions on construction sites. Construction, however, is intertwined with all significant economic activity in the Nation, providing jobs, directly or indirectly, for a substantial portion of the Nation's work force. For instance, in 1973, the construction industry employed more than 3 million construction workers and contributed an estimated $135.6 billion to the GNP, nearly 11 percent of the GNP. Since construction is a major purchaser of goods and supplies from many industries, any lengthy interruption in construction activity results in serious economic dislocations radiating far beyond the immediate strike area.

Mr. Speaker, I come from Michigan, a State with a high percentage of unionized workers. Yet, an overwhelming number of my constituents oppose this ill-conceived legislation. Many of these constituents are union members and all are consumers; they know that strikes in the construction industry would mean bad news for them.

I would like to insert in the RECORD an excellent editorial that appeared in the Sunday edition of the Detroit News on February 6, 1977. I invite my colleagues' close attention to this editorial:

COMMON-SITUS PICKETING REVIVED

Some issues never die; they just wait to be revived under a new administration.

Now that Jimmy Carter has taken up residence in the White House, the country's building trade unions feel they have a good chance of getting the ancient and controversial common-situs picketing bill, signed into law.

Of course, they felt that same way when former Labor Secretary John T. Dunlop championed their cause in the Ford administration. In the end, fortunately, President Ford changed his mind, rejected Dunlop's advice and vetoed the bill. Perhaps President Carter can be persuaded to see the light, too.

The picketing proposal would allow construction and building trades unions to picket an entire construction site during a dispute with but a single contractor. Thus, one small and irresponsible union could close down an entire construction project, throwing thousands of men and women out of work. The proposal also would restrict competition in the job market by virtually forcing contractors to hire union members.

These consequences are no fairer, no more desirable today than they were in 1951 when the U.S. Supreme Court rejected the common-situs picketing concept, holding that such a practice would constitute an illegal secondary boycott.

During the recent presidential campaign, Mr. Carter indicated he would sign a common-situs bill if it came to his desk. However, this is one of those issues on which his remarks were somewhat ambiguous. In one interview he stated that he didn't know enough about the issue, that he probably would support a common-situs bill, that everything depended on the wording of the bill.

The President seems to have left himself ample room for squirming out of supporting common-situs picketing. And when he considers fully not only the injustices but also the potential economic evils of major construction-site shutdowns, he may well want to squirm out of that thoughtless commitment.

ACETONE

HON. RAYMOND F. LEDERER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 21, 1977

Mr. LEDERER. Mr. Speaker, I am introducing a bill to provide legislative action to correct a Bureau of Customs interpretation of tariff schedules which incorrectly classifies acetone based on the chemical derivation rather than on the chemical itself.

Acetone is an essential ingredient in the manufacture of acrylic products. Historically, acetone was imported under its own category, item 427.60 TSUS, and was properly assessed at 4-percent ad valorem based on the foreign market price. However, in December 1974, the U.S. Customs Service ruled that because of the particular chemical derivation of acetone, it should appropriately be imported under item 403.80 TSUS and assessed at 1.7 cents per pound plus 12½ percent ad valorem based on the U.S. market price. Our imported acetone is derived from cumene-phenol—a coal tar derivative—but it is, nevertheless, acetone. There is a specific tariff classification for products derived from coal tar. This is a basket clause. There is and has been for years a specific tariff classification—427.60—for acetone. We believe that the Customs Service erred in placing a compound that is specifically provided for in a general basket clause.

The effect of this decision was to move acetone derived from cumene-phenol to a higher rate and to increase the duty eightfold per ton. This increase has made it very difficult for U.S. producers to compete against imported acrylic products which contain acetone purchased abroad at lower prices.

Neither Congress nor the Tariff Commission intended that acetone derived from the cumene-phenol process be

classified under the higher rate. However, the Customs Service, without a hearing, made an arbitrary decision which clearly resulted in a significant rate change. The appeal to the Treasury Department was denied on October 9, 1975, and further administrative procedures are unavailable.

CONGRESSIONAL RURAL CAUCUS BUDGETARY PROPOSALS FOR FISCAL YEAR 1978

HON. JAMES R. JONES

OF OKLAHOMA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 21, 1977

Mr. JONES of Oklahoma. Mr. Speaker, it has been my privilege to be a member of the Congressional Rural Caucus for the past 4 years. During this time, I have observed the caucus become one of the focal points of action on behalf of the citizens who live and work in rural America.

In the decade of the 1960's, the focus of national attention was on the city, and the vast urban problems that confronted our Nation. The question of the quality of life in rural areas of America took a back seat to the more pressing problems of urban decay and crime. Because of the increasing awareness of our national interdependence, and the realization that no segment of our society can be ignored without the country paying a terrible price, the slighting of rural America is not in reversal, and the area that produces our food and harbors much of historical heritage is once again receiving the attention it deserves. Certainly the efforts of the Congressional Rural Caucus have contributed in no small part to the renewed Federal attention given to the problems and needs of rural Americans.

During the past few days, the budget proposals of the Congressional Rural Caucus have been described in detail. I will not attempt to plow the same ground with my comments today. Rather, I want to emphasize to my colleagues the cost-benefit ratio that exists in the budget proposals presented by the Congressional Rural Caucus.

As a member of the House Ways and Means Committee, I have sat through hours of hearings and testimony on the economic stimulus program of President Carter, a program recently passed by the Congress. A consistent standard I applied to the President's proposal was one of the cost of the Federal expenditure versus the benefits that would accrue to our country. For the most part, most of the proposals of the administration satisfied my own personal test of cost-benefit. Nonetheless, if the President's program could have matched the program of the Congressional Rural Caucus in providing the maximum benefit for the most minimum of costs. I would have had far less trouble with the economic stimulus plan as passed.

We have embarked on an expenditure of some $4 billion in public works job creating programs for the coming year. I supported this proposal, because I believe the country will reap many benefits from the expenditure of this money. Likewise, the Congressional Rural Caucus proposal to spend $16.4 billion will produce new wealth for the Nation. As an example, one of my colleagues points out that by increasing the current loan averages for the Small Business Administration from $100,000 to $1 million, we could increase jobs created by these loans tenfold, with no additional administrative costs. And this would be relying on programs already in place, tried and proven methods to stimulate growth in our private sector economy.

The proposals of the Congressional Rural Caucus require no additional legislation that complicates planning. They rely on experienced administrators and in-place plans. They will greatly stimulate the private sector of the economy, and will provide long-term jobs in place of make work. More importantly, the enactment of these proposals will insure the continued growth and viability of our rural areas. I urge my colleagues to support the budgetary proposals as presented by the Congressional Rural Caucus, and I thank you, Mr. Speaker, for this opportunity to speak out on a most worthwhile organization within the House of Representatives.

CANCER/A CONSTITUENT VIEWPOINT

HON. KENNETH L. HOLLAND

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 21, 1977

Mr. HOLLAND. Mr. Speaker, I would like to share with my colleagues a touching piece of correspondence that I recently received from a constituent relative to a promise he made to his son who died last year from cancer. The following letter and poem from the aggrieved father has fueled my desire as a parent, as a member of society, and as a legislator to do all I can to promote and enhance our national effort to find a cure for this killer disease:

DECEMBER 18, 1976.

GENTLEMEN: My son died this week from cancer. I promised him that I'd try to find a prevention, a cause, and a cure for this killer of mankind.

You gentlemen singular, or collectively could help me keep my promise to my dying son. In a sense, when it comes to cancer, you are in a rut. This is a shame when we did the seemingly impossible and put a man on the Moon. We did the seemingly impossible and put a "Thing" on Mars. Cancer was last, but should have received first priority. Why gentlemen, is it because we don't have sense enough, is it because of ignorance and stupidity, or is it because of greed for the all mightly dollar since billions of dollars are involved when the cancer problem is solved? I don't wish anyone to get cancer, but if it has to be, then I wish it to be those that could and should have done more, to solve this deadly disease. Many people think it will have to be solved by the Medical or Allied Professions. This is not necessarily true, it could be solved by anyone regardless of profession.

I sincerely believe the greatest waste of resources the world has ever known is the brain power of those of you in this medium of circulation. There must be an individual incentive to solve this cancer problem. Just try offering a "million tax free" dollars to the individual that comes up with the prevention, cause and cure and see what happens.

Approximately 300,000 people in the U.S. will die from cancer in 1977 and it's your fault because you don't "CARE".

Sincerely and Respectfully,

CARLON C. SAWYER,
(An angry father).

DO SOMETHING DAD

I sat in a lonely hospital
The hour of mid-night had passed
By the bed side of my dying son
Whose life was fading fast.

Holding my hand he looked at me
Out of pain racked face
And said oh Dad please promise
You'll help the Human race.

Do something Dad, I know you can
if only you will try.
Promise me that no one else
of cancer must suffer as I.

With all the knowledge in the world
Surely someone can find
A way to stop this dreaded disease
This killer of mankind.

Must my son have died in vain
his anguished plea unheard
or is there one among you
to carry on the work.

To probe and search and test and then
if necessary do it over again
until at last a way is found
To drive this killer underground.

By the grace of God
I'll find a way
Though they'll give me the run around
Sleep in peace my boy
Society won't let you down.

CARLON C. SAWYER,
(An angry father).

UNEMPLOYMENT IN THIS COUNTRY

HON. GUS YATRON

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 21, 1977

Mr. YATRON. Mr. Speaker, I would like to address myself today to the serious problem of unemployment in this country. It is often far too easy for many of us to lose sight of and become insensitive to the tremendous difficulties faced by those less fortunate. In particular, I am referring to the millions of Americans who are presently unemployed through no fault of their own.

On January 19, I introduced H.R. 2235, a bill to extend the emergency unemployment compensation program for an additional year. I felt then as I do now. The full 65-week unemployment compensation system is every bit as necessary today as it was when it was initiated in 1975.

During the next 12 months, approximately 200,000 Pennsylvanians will be left without a source of income because of the proposed reduction in unemployment benefits. These are people with pride, who want to work but cannot find employment because of the state of the economy. It is because of these Pennsylvanians, and all unemployed Ameri-

cans, that I feel obligated to urge the Congress to recognize that while we continue to seek solutions to the many economic problems which confront our country, we should not turn our backs on the very Americans who are in trouble because of these conditions.

SALTZMAN URGES ENERGY POLICY

HON. CHARLES ROSE III

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 21, 1977

Mr. ROSE. Mr. Speaker, in the March 9 New York Times, Arnold A. Saltzman authored an article entitled "The Need for a Comprehensive Energy Policy." I am inserting this thought-provoking article in today's RECORD because I believe it is worth our time and our consideration.

Mr. Saltzman has just completed a most important task for the Congress as chairman of the Advisory Committee on National Growth Policy Processes. This committee has produced its final report, "Forging America's Future" and included several recommendations which are outlined in this New York Times article.

Mr. Speaker, Mr. Saltzman's insistence that we need to monitor our Nation's growth and economic development, especially as related to energy, seems important to me as we search for ways to cope with rapid change and an uncertain future. I offer his thoughts for my colleagues to consider:

THE NEED FOR A COMPREHENSIVE ENERGY POLICY

(By Arnold A. Saltzman)

The economic and social distress resulting from the natural-gas shortage is merely a sample of the trouble our nation faces unless it confronts its potential problems. Since natural gas constitutes a minor portion of our energy usage, additional probable dislocations caused by our nonpolicy on energy could dwarf our present pain.

The only important remedy so far enacted, or fostered by inaction, is a price increase for gas and oil, with a hoped-for increase in supply. There has been, and will be, no near-term meaningful increased supply except for the oil imported at prices 400 percent higher than just four years ago. What has been meaningful is the increased unemployment, increased inflation, decreased economic growth rate, increasingly adverse balance of payments and decrease in the dollar's value.

Now, ten years after our policymakers could have known that our nation was using energy faster than we were replacing it, we are again reacting to a mess instead of anticipating the event and proposing strategies for permanent solutions.

In the recently enacted natural gas bill, we are once more creating policy in bits and pieces, fiving up one problem but with negative impacts on other economic areas. What is required is a coordinated attack on the much-larger, and soon to prove more-devastating, issue of our entire energy crisis. Eleven different Government agencies, and even more Congressional committees, each with a piece of the action on energy, have predictably produced no clear policy to use our enormous coal reserves, conserve energy, and develop new technologies while preserving the environment and the economy. No plan or czar will succeed that does not address and coordinate all of the above.

Here is a list of some of the unsolved problems flowing from our nonpolicy on energy.

1. Our balance of payments in 1975–76 was acceptable because huge United States exports of grains and armaments tended to hide the fact that, three years after Project Independence, we are importing 40 percent more oil, rather than less. In 1977 and 1978 if the recent good harvests abroad continue, and armaments exports decrease as expected in 1978, unfavorable trade balances of $20 billion and $30 billion could result. Who has thought through what that means to our dollar and our economy?

2. The underdeveloped nations, burdened additionally by quadrupled energy costs, cannot pay their external debts and keep borrowing. Many billions of dollars are owed to United States commercial banks, who are carrying them as good loans, while the likelihood of default intensifies and the World Bank says repayment of our loans comes first. What happens to our banks or the underdeveloped nations when the event occurs?

3. The Arabs' successful intransigence with oil has triggered similar alliances by other nations exporting other commodities, such as coffee. When do we create a policy of defense or counterattack, or must each American consumer fend for himself.

4. How do we deal with the unemployment-plus-inflation these price dislocations and supply shortages have promoted? The previously accepted overall economic solutions of tightening or relaxing the money supply, increasing or decreasing taxes raising or lowering interest rates are no interest rates are no longer adequate for the enormously changed conditions America faces today.

Economic improvement will reflect Government policies that recognize that the different regions of our nation and varying industries require individual and varying treatment. We need to aim for remedies with a rifle not a shotgun. We need to become a "planning nation" but not a planned nation.

We need to create a National Growth and Development Commission as a small nonpolitical government agency of "wise men" to look ahead isolate major problems lay out alternative solutions, the cost each of them, inform the President, the Congress and the public, provoke national awareness of issues, act as an early-warning-system, and thus help counteract the "firefighter" syndrome inevitably characteristic of elected officials.

Government will change only as it reflects a corresponding change in the attitude of its citizens. The American people still have in their consciousness the legend of a land of infinite size and riches where "every man could be king." Today's reality demands that we conserve, husband our resources, define more sharply our objectives at home, use our strength more selectively abroad with heightened reliance on economic solutions. Crossing psychological divide between the dream and the reality is our nation's most difficult obstacle.

TV AND CONGRESS

HON. JOHN P. MURTHA

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 21, 1977

Mr. MURTHA. Mr. Speaker, as the House experiments with television coverage of floor debates, one reason I hear this is important is because the people want this coverage of their Congress.

To help answer this question I want to bring to the attention of the Members the results from the Harris poll on Congress commissioned by the Obey Commission.

While 60 percent strongly agreed that Congress should do more to inform the public about its activities, support for TV coverage fell from that level, casting doubt in my mind about the effectiveness of this move.

The Harris poll results follows:

Q. Important committee hearings of Congress should be televised to the public—

(In percent)

Strongly agree	36
Agree somewhat	28
Disagree somewhat	19
Disagree strongly	8
Not sure	8

Q. Debates in Congress about major pieces of legislation should be televised to the public—

(In percent)

Agree strongly	38
Agree somewhat	30
Disagree somewhat	17
Disagree strongly	7
Not sure	7

This is in addition to information I reported to the Members last year on a poll I took of the 12 congressional districts. I asked the 7,000 people in my "Instant Poll" project: "Do you favor or oppose the U.S. House televising its sessions?" The results showed that 30 percent favored it; 66 percent opposed it; and 4 percent were undecided.

Televising the sessions may or may not be a good idea, Mr. Speaker, but I bring these facts before the Members to emphasize that the action should not be taken on the mistaken assumption that there is overwhelming public demand for the move.

TOM E. MORAN INDUCTED INTO FOOTBALL HALL OF FAME

HON. JAMES A. BURKE

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Monday, March 21, 1977

Mr. BURKE of Massachusetts. Mr. Speaker, I submit the following article from Tim Prendiville's Veterans Voice column, appearing in several Boston papers, in tribute to Mr. Tom E. Moran of Hyde Park, Mass.

Mr. Moran was recently inducted into the Football Hall of Fame and I offer my sincere congratulations. He is the father of Lt. Paul Moran, one of my former nominees to the U.S. Military Academy at West Point. The article follows:

Veteran of the week award goes to Hyde Parker Tom E. Moran. He was inducted into the Football "Hall of Fame" at the Sheraton Pru, with former Boston School dept. assistant supt. Joseph McKenney doing the honors. Present at the ceremony also included: the great Ralph E. Colson, former commisisoner of phys-ed for the state of Mass. Boston school dept. deputy supt. John Kelly, Boston Latin coach Paul Costello and Msgr. John Carroll, the former CYO director. Moran served in the U.S. Navy during WW II as a

PT boat skipper of Squadron #7, and saw combat in New Britain, New Guinea and New Hebrides as a Commander. He is a member of the Doyle Post VFW, past commander of the Joyce Kilmer Post #316 American Legion, AAPHER, MAAPER, MSSPA, Gridiron Club, BoSox Club, Mass. Baseball Coaches Association, and is the East district director of physical education.

He now holds the title of phys-ed director for the Boston Public Schools. He married Dorothy Barry and has five sons: Tom Jr., a teacher for the Boston Public Schools, Lt. Paul, a West Point graduate, now with the 2nd Armored Div. at Ft. Hood, Texas, Gerard, who runs an Air Freight line, Francis, a computer expert with the 1st National Bank of Boston, and Richard, a Sr. at Curry College. The whole family is a Cathedral family, as Tom, wife and 5 sons all graduated from there. Tom Sr. graduated from Boston College and was on the sugarbowl squad. He coached football for 23 years . . . and the decision of the Mass. Football Coaches Ass'n. was that Tom Moran was their man for honors . . . I congratulate them on their fine taste, as Moran is a man of high caliber.

FANNIE LOU HAMER

HON. SHIRLEY CHISHOLM

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, March 21, 1977

Mrs. CHISHOLM. Mr. Speaker, on March 14, Fannie Lou Hamer, a great warrior in the civil rights struggle, passed away. She was born in 1917 in Ruleville, Miss., the youngest of 20 children in a poverty-stricken family. The lot of poor blacks was hers until well beyond childhood. In the early 1960's, her efforts at voter registration brought arrests, evictions, threatening phone calls, abusive letters, and beatings. Though the delegation she led to the 1964 Decocratic Convention failed in its efforts to be seated, she was one of 22 blacks in the 44-member group that unseated the regular—white—Mississippi delegation at the 1968 convention in Chicago.

Fannie Lou Hamer was a major contributor in the movement of the 1960's toward political enfranchisement and equality for all Americans. The Congressional Black Caucus recognized the magnitude of her contribution when it awarded the George W. Collins Memorial Award to her last year. Recently, an article appeared in the Washington Post about the legacy left to all of us by Fannie Lou Hamer. Its author, Austin Scott, has made an eloquent and moving statement and I would like to bring it to the attention of my colleagues:

THE LEGACY OF FANNIE LOU HAMER

(By Austin Scott)

One by one they move on—those great figures whose hard work and suffering and love for common people and faith in the future helped sustain "The Movement" of the 1960s.

Some, like the Rev. Andrew Young, move on up to positions of power in the system they challenged for so long, with such pain and determination, to see justice done. Others, like Fannie Lou Hamer, die quietly, still very much a part of the places they were trying so hard to change.

The pace of change brought by the civil rights movement has always been uneven. We have a Southern President, elected with overwhelming black support on promises to make blacks and other minorities a more meaningful part of his administration's decision-making process than ever before.

But even after 15 years of civil rights efforts, there are no black elected officials in Fannie Lou Hamer's home town of Ruleville, Miss. And there are no black county supervisors in her home county of Sunflower, where she used to sharecrop 300 to 400 pounds of cotton a day.

That county, then and now, is majority black, one of many pockets in the South and the North where the pace of change seems glacial, where many whites remain determined, and many blacks remain convinced, that the old ways will not die.

From the time she joined a very young and very scared but very determined group of civil rights workers in 1961, Fannie Lou Hamer was a fighter and a teacher. She fought fear. She taught perseverance. And she sustained herself and those around her with faith in God, faith in simple people, and faith in the ability of the system to deliver justice when officials in power were slammed up against the wall hard enough.

She knew that the long road to better days was open only to those willing to shake off setbacks and, as she sang over and over again at mass meetings, "Keep on a-walkin', keep on a-talkin', trying to get to Freedom Land." The media that covered her activities called her a civil rights leader, but she was really an organizer, in the best sense of that difficult and timeless tradition. The organizers of today, who are spread all over the country and devote their lives to shaking up the system in an attempt to make it work for the little people, owe her a great debt.

"One of the great ladies of the '60s in The Movement," Vernon Jordan of the National Urban League called her. What made her so was a deep understanding of the efforts necessary to move poor, uneducated Southern blacks who knew they could be killed for breaching the customs of segregation, but wouldn't be free until they risked their lives trying.

Those efforts are best defined in the stories that people who knew her well are telling in the wake of her death.

Jordan remembers her on stage at the Mississippi Freedom Democratic Party convention in Jackson in 1963, right around the time the bodies of three slain civil rights workers were found in Neshoba County, leading everyone in a chorus of "Ain't gonna let nobody turn me 'round. . . ."

There is still a tinge of wonder in Jordan's voice as he recalls, "I remember driving that same day from Jackson to Memphis, Tenn., *alone*, and under her influence. I wasn't scared, you know what I mean?"

Not being scared in Mississippi in those days was one hell of an accomplishment. But Fannie Lou Hamer didn't seem to be scared.

Born the granddaughter of a slave, she used to tell stories of what she had endured as she traveled from church to church, from mass meeting, trying to inspire people to "keep on keepin' on. . . ."

She told about being thrown out of her home on a plantation the first time she tried to exercise her right to register and vote.

She told about going into a hospital for what she thought was removal of a lump in her stomach, and waking up to find she'd been sterilized with a hysterectomy.

She told of how her home had been shot into too many times to count, and of being called "nigger bitch" by local police, and of being beaten so badly in jail that she lived with the after-effects for the rest of her life.

"We could hear her screaming and hollering, just calling God for help," recalls a woman who was jailed with her. "On the way back she fell out at our cell, just lay there crying. All night we could hear her crying. . . ."

"I've never seen somebody who had been as persecuted and harassed as much as she had been and she just refused to be intimidated," said Carl Holman, president of the Urban Coalition:

"She had a kind of inner serenity and sureness about herself. She didn't scream and yell, but she stood up. . . . Some people get toughened by the battles and their spirit seems to get a little harsh, but not Fannie."

Her spirit was fundamental to the main focus of her life, organizing poor black people to change the system that kept them powerless and ashamed.

She understood something that is often overlooked: Children of the poor, unlike children of the middle and upper classes, usually cannot learn from their parents that they have a right to stand up and be counted. She taught that it was their duty to stand up.

"They respect people who respect themselves," she once said of local whites.

One of Fannie Lou Hamer's most important accomplishments was serving as a living example to people born of that dirt-poor Mississippi soil that someone similarly born, through faith and love and incredible perseverance, could "keep on keepin' on. . . ."

She lived to see the Mississippi Freedom Democratic Party, which she helped found, become a real force in state and national politics.

She was an example of the best of bonds that young and old can form as they work together for change. "I'm sick and tired of being sick and tired,"she used to tell the young people who seemed to flock to her for spiritual strength and strategic advice.

One of those who worked with her said the song that most typified her was one she used to sing at mass meetings: "I woke up this morning with my mind set on freedom. . . ."

HISTORY OF CLIFTON, OHIO

HON. THOMAS A. LUKEN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, March 21, 1977

Mr. LUKEN. Mr. Speaker, I would like to call my colleagues' attention to a brief, but very valuable publication, "Clifton: Neighborhood and Community in an Urban Setting, A Brief History," by Henry D. Shapiro and Zane L. Miller.

This book is scholarly, entertaining and informative. I will not attempt to define for my colleagues the meaning the term "Clifton" has to both its residents and the residents of the surrounding area, Cincinnati, Ohio. The authors do this eloquently.

Clifton is certainly one of the most beautiful suburbs of Cincinnati. It is verdant, hilly, the home of our university and some of our most gracious residences, many of which are over 100 years old. Its citizens are a cosmopolitan group, many are professional people and all are dedicated to their community.

The theme of this book is elaborated throughout. What kind of place is Clifton? The authors are both historians, both professors at the University of Cincinnati, both Clifton residents. It is not surprising, then, to find that the story of Clifton is told in a very scholarly manner, placing it against the backdrop of urban history and American civilization.

The authors trace Clifton from its in-

ception in the 1800's, follow its history as a village and through its annexation to the city of Cincinnati in 1870. The treatment of the modern history of Clifton will be of great interest to all students of urban American life—how this community has planned and reacted to the changing lifestyle in American cities.

I recommend this book, which is really a treatise, to all my colleagues.

SICK PAY EXCLUSION

HON. C. W. BILL YOUNG

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 21, 1977

Mr. YOUNG of Florida. Mr. Speaker, today the House Ways and Means Committee is holding hearings on H.R. 318, legislation which would postpone for 1 year the effective date of changes made to the sick pay exclusion via the 1976 Tax Reform Act. As one of the sponsors of this proposal, I was pleased to have the opportunity to submit the following testimony on behalf of my bill:

TESTIMONY OF C. W. YOUNG

Mr. Chairman, I am here in support of H.R. 318, a bill I cosponsored, to postpone the effective date in the changes to the "sick pay exclusion" of the Tax Reform Act of 1976. The purpose of the exclusion was to eliminate a sizeable tax deduction for people who retired from Government service originally on a disability, but have recovered sufficiently to go back to work and support themselves. Now, in order to qualify for the deduction, disability (permanent) must be sufficiently documented and proven before a deduction is permissible, and eligible disabled must be under the mandatory retirement age of 65. For those who do not qualify, the deduction was disallowed for the taxable year 1976.

The exclusion of people over 65, plus the provision that the deduction not be allowed for the taxable year 1976, has placed a very large and very unexpected burden on many residents of my District of Florida. Some have written to ask for my help because they are over 65, on fixed incomes, and feel they need their deduction now more than ever; but most, by far, have written simply to ask for a one year delay in the implementation of the sick pay exclusion, so that they can plan ahead for what constitutes a much larger cash layout for taxes than they had expected to have to pay.

One constituent told me: "I do not mind paying the tax, but do not understand why they made it retroactive to January 1, 1976. I had no way of planning for this additional tax of $689." Another reported that: "The retroactive clause in the new tax revision is killing me. I have made arrangements with Civil Service to withhold funds for the future, but I need help now." A third added, "Needless to say, taxes on the $5,200 previously allowable had not been anticipated or budgeted for, and will have to be taken out of our small savings."

The intention of Congress in imposing this retroactive clause was not malicious, and it is a fact that it will provide an estimated $300 million in additional revenue for the United States Treasury for the calendar year 1976. That is a substantial figure, but one that I submit to you will come virtually out of the food budgets and living expenses and savings accounts of a majority of the 1.2 million people on which it is imposed. People, I remind you, who have already suffered serious setbacks in their personal and professional lives because of physical disabilities that most of us have been spared. I can't really believe that it was the intention of Congress to impose this heavy burden on this single group of Americans so unexpectedly, and it seems to me that their cries for help, their attitude that "we'll pay our share, but give us a chance to prepare for it", should be heard and heeded. Surely the financial survival of our country is not dependent on this single tax increase this specific year, and the "financial" survival of many Americans may very well depend on our agreeing to manage without their additional tax dollars for another 12 months.

Today is the 21st of March, and taxes for the calendar year of 1976 must be in the mail by midnight, April 15th. Unless this committee reacts quickly, and refers this matter for a vote without delay, many Americans will have to dip into their already diminishing savings accounts, or borrow money to meet this arbitrary obligation; or face the assessment of penalties by the IRS for failure to pay their taxes. In other words, there are only 25 days of hope for a "reprieve" for the 1.2 million people who are waiting for our verdict.

The interest and concern of the public on this matter is documented by the fact that 240 Members of Congress have sponsored or cosponsored legislation on this issue.

I urge this committee to act today, to bring this bill to a vote before the full House of Representatives.

TULSA DEDICATES NEW PERFORMING ARTS CENTER

HON. JAMES R. JONES

OF OKLAHOMA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 21, 1977

Mr. JONES of Oklahoma. Mr. Speaker, the opening of the Tulsa Performing Arts Center on Saturday, March 19, marked an important chapter in the story of Tulsa's unique public-private partnership.

The community-oriented, multipurpose performing arts center is one of the most sizable examples of the city's public-private cooperation. It results from a pledge of $3.5 million by private citizen Leta M. Chapman and her family, another $3.5 million raised by Chairman John H. Williams of the Williams Cos., and approval of a $7 million bond issue by Tulsa's voters.

In the past 16 years, three-fourths of the $1 billion spent on Tulsa's urban renewal has been private capital. Planning for the downtown pedestrian circulation System now under construction was done by a joint task force of the chamber of commerce and Downtown Tulsa Unlimited, which also financed 50 percent of this study. Federal urban renewal funds are paying for its construction but it will be maintained by the private sector. This is a monumental enterprise that will provide safe pedestrian walkways for 3 miles from Williams Center to the end of the river-parks complex.

The Williams Center itself is a result of cooperation between the city and the Williams Cos. When that company began to outgrow its corporate headquarters, the Tulsa Urban Renewal Authority cleared the way to keep this major employer in Tulsa by excavating a nine-block downtown area for this $200 million complex. It is the site of the Tulsa Performing Arts Center, the Bank of Oklahoma, specialty shops, restaurants, and a luxury hotel under construction.

The $20 million river-parks complex will turn the banks of the Arkansas River into a cultural and recreational showcase. Urban renewal moneys funded the start of this project. Future bond issues will finance the public phase of the beautification project along 2 miles of the river. KRMG radio in Tulsa was the catalyst for this project. The station's Annual Great Raft Race inspired widespread citizen interest in the program that ultimately led to the formation of the Tulsa River Parks Authority, composed mostly of citizens from the private sector. It is anticipated that within the next 5 years the private sector will fill space in the complex made available through urban renewal clearing.

Not all of Tulsa's public-private projects are of brick and mortar. Both the Tulsa Junior College and the University of Oklahoma Medical School were envisioned by the private sector through the chamber of commerce, which raised funds for feasibility studies on both projects. Although both are realities, the private sector continues to help fund the two State institutions as well as the tax-supported Oklahoma Osteopathic College of Medicine and Surgery.

The public sector recently made significant contributions to Tulsa's health care delivery system. Although all hospitals in Tulsa County are privately owned and controlled, two hospitals received large loans for expansion through the Tulsa Industrial Authority, an entity of the city. The private sector was responsible for the city commission's creation of this lending vehicle.

The private sector—through the chamber, the League of Women Voters, and other organizations—joined with the Tulsa public schools in planning and implementing a successful voluntary school integration program. This averted forced busing and set a model for the rest of the country.

In the mid-1960's, the chamber urged approval of a hotel-motel room tax to fund national promotion of Tulsa. As a result, the city created the Economic Development Commission, staffed by the chamber. The EDC promotes Tulsa as the city that "has it now"—for industry, conventions, tourists, and families. It has a supporting role in the promotion of the Tulsa Performing Arts Center and most other public-private partnership projects.

When Ella Fitzgerald appeared at the Performing Arts Center's inaugural performance, she was the first of many fine artists who will grace the stage of an institution made possible by Tulsa's unique public-private partnership.

AN UNSEEN DANGER

HON. CHARLES B. RANGEL
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES

Monday, March 21, 1977

Mr. RANGEL. Mr. Speaker, methadone has long been praised as a cure for heroin-addicted drug addicts. It was first used in treatment services in New York City's Beth-Israel Medical Center in 1965 and has since come into wide use in facilities across the Nation. As a member of the Select Committee on Narcotics Abuse and Control I am very concerned about the potentially harmful effects recently discovered concerning methadone usage on pregnant women.

Babies born to mothers on methadone were once said to be healthier than those born to mothers on heroin. Clinical studies have indicated that this is not true, that there are serious physiological effects associated with maternal methadone treatment and childbirth.

To adequately present the situation I would like to share with my colleagues the following article by Jeanne Schinto entitled, "Methadone and Motherhood." The article appeared in the March issue of the Progressive. I think my colleagues will find this article very informative.

It follows:

METHADONE AND MOTHERHOOD

(By Jeanne Schinto)

Only those who considered heroin the problem ever thought that methadone would be the answer. "Now—a drug that 'cures' drug addicts!" and "Heroin Cure Works!" the newsweeklies and popular science pulps proclaimed in 1965, shortly after the first methadone maintenance technique had been developed and a flock of volunteers had been trundled off to a inaugural program at New York City's Beth-Israel Medical Center. Even one of the medical journals used the word "cure" in the article it ran to introduce the discovery of the new use for the twenty-year-old drug.

Methadone's opponents, however, looking beyond the needle tracks to the treadmill that heroin addicts inevitably ride, questioned the program's good-drug versus bad-drug logic, and reminded its backers that heroin had once been touted as a "cure" for Nineteenth Century morphine addiction—and that morphine had been trumpeted as an end-all to opium-eating before that.

Further protests came from Federal narcotics agents and black activists, who railed against the methadone programs on moral grounds—the one group because they thought addicts should kick their habit by means of abstinence and self-control instead of a Government-funded crutch, the other because they reasoned that the crutch was actually a brace. "Hell, man, when we was just plain junkies, they only knew who we were when we got busted," a former addict told the author of *Heroin: The Myths and the Facts* (1973). "Now they got your number as long as you need that shit, which is forever. The man's a real dog handler, you see? The program's a leash with a thousand leads, you dig? And guess who's the dog?"

Right from the start, the drug generated these storms of controversy. Lately, though, the methadone debate has settled, not only in political and evangelical terrain, but in psysiological as well. Moving past such side effects as constipation, insomnia, sweating, nausea, vomiting, anorexia, and sexual impotence, especially in older men (the first medical problems associated with methadone maintenance in the mid-1960s), more recent studies have aroused suspicions about a whole string of other adverse effects of prolonged use of the drug. Methadone-induced pulmonary edema, adult respiratory distress syndrome, liver malfunctions, chronic hypercapnia, and fecal impaction are some of the complications which have been diagnosed in the last five years among those in methadone maintenance programs, according to medical journal articles.

Not surprisingly, other reports have been generated by those seeking to dispel fears about the drug. The majority of these, however, are short on conclusive evidence that would counter the medical arguments against methadone, and are, instead, long on suggestions that methadone, despite all its physiological mysteries, is the lesser of the evils from which the heroin addict has to choose. These reports often compare methadone to insulin for diabetics, digitalis for cardiac patients, or cortisone for arthritics—as if it were as easy as all that. In the meantime, uncertainties about methadone's safety mount, especially in one area which has yet to receive the attention it deserves even from the medical community, much less from the general public: the effects of daily use of the drug by pregnant women.

Since the maternal-fetal unit, for the most part, still baffles science, drugs administered to pregnant women have usually been carefully screened beforehand. Methadone, however, is regularly dispersed in massive doses to future mothers without the data sufficient to predict the risks to their offspring. The consent form that pregnant women who enroll in methadone maintenance programs must sign says, in part: ". . . I understand that, at present, there have not been enough studies conducted on the long-term use of the drug to assure complete safety to my child."

Witness the sad results of some other past experiments that mixed untested drugs and procedures with motherhood—thalidomide and pelvic x-rays, for example—and the methadone program policy seems medically indefensible, especially when it is noted that between 80 and 85 per cent of the women eligible to enroll in methadone programs are of child-bearing age, and that methadone seems to regulate the menses of previously irregular women (heroin tends to make menstrual periods irregular), thus increasing their chances of pregnancy.

When the methadone maintenance technique was first being tested in the early 1960s, Dr. Vincent P. Dole, one of its developers, reported that "babies born to patients were not adversely affected" by the drug. Further, in a widely publicized statement made in 1969 to the Senate Subcommittee on Crime in the Nation's Capital, Dr. George Blinick and others maintained that babies born to mothers on methadone were in much better shape than those born to mothers on heroin.

The Dole and Blinick studies' findings became mainstays in the argument propounded by methadone's partisans. Report after report since then, however, has challenged their findings.

Doctors at New York City's Metropolitan Hospital, for example, who compared forty-six infants of mothers on methadone with forty-five born to mothers on heroin during an eighteen-month study begun in July 1971, concluded that a withdrawal syndrome (tremors, a shrill cry, watery stools, and irritability) occurred with equal frequency in both groups, but that it was more severe among methadone-exposed infants. In addition, they found, convulsive seizures and severe hyperbilirubinemia (a blood disorder) occurred more frequently among the methadone mothers' infants, and that hyaline membrane disease (a condition characterized by the onset of difficulty in breathing a few hours after birth, and often death before the third day), absent among the heroin-exposed newborns, struck two of the methadone-exposed.

Similarly conclusive was a comparison of forty-nine methadone mothers' babies with those of twenty-one heroin mothers conducted at Washington, D.C., hospitals by doctors at that city's Narcotics Treatment Administration. "Not only does withdrawal tend to be more frequent, pronounced, and prolonged, especially in high methadone dosage," the Washington doctors wrote, "but incidence of low birth-weight is more than twice as common as in the overall population drawn from the same hospitals." Low birth-weight babies (under five-and-a-half pounds) begin life with major handicaps: Breathing is difficult; nursing is impossible, as is maintenance of correct body temperature without artificial aid; limbs are underdeveloped; the skin is wrinkled; the flesh is flabby; development and functioning of kidneys, liver, and other organs are inadequate, and resistance to infection is low.

But withdrawal syndrome and low birth-weight complications aside, doctors at La Llave Drug Treatment Program and the University of New Mexico in Albuquerque reported to the Fifth National Conference on Methadone Treatment held in Washington, D.C., in March 1973, "A clinical view of twenty-four pregnant methadone-maintained patients and their infants outlines hazardous obstetrical and neonatal complications not given sufficient previous attention." Because of these, they noted, "the time period of labor was accelerated," nearly half experienced respiratory depression, and all exhibited signs of other types of "intrauterine fetal distress."

All of the studies cited here as well as many others like them give cause for immediate concern, but several more studies of a different nature have tipped the scales even farther against methadone and have pushed the synthetic opiate into an even more mysterious physiological realm. These studies have found an alarmingly high incidence of Sudden Infant Death Syndrome (SIDS) among the offspring of mothers on methadone.

Only recently recognized and defined as a specific disease, SIDS or "crib death" or "cot death" can be related to no known cause. "This is a disease which does not make sense," observed K. J. and K. G. Kadlub in a 1974 Michigan medical journal article. "The very first symptom is death." Suddenly and entirely unexpectedly, it takes the lives of apparently healthy babies, usually before their first birthday, and almost always while they sleep.

The incidence of SIDS among the general population of newborns is about 2.5 to 3 per 1,000 live births. According, when three out of fourteen babies born to mothers in a New Haven methadone maintenance program were claimed by the disease, doctors there alerted their colleagues to the anomaly. In a June 1972 *Journal of the American Medical Association* article, they wrote, "In a small population such as this, these deaths could be due to an unfortunate chance distribution. However, these incidents cannot be ignored, and we must give consideration to the possibility that methadone may have played a role in the deaths."

At first glance, they conceded, it might seem that the addicts' way of life and subsequent infant neglect would be the primary cause of these deaths, yet, they advised, other infants born of heroin-addicted mothers are subject to the same or worse conditions and no mention has yet been made of any unusually high incidence of SIDS in heroin mothers' babies. (Indeed, after a ten-year study of 384 infants born to 382 heroin addicts at New York Medical College-Metropolitan Hospital in New York City, no deaths due to SIDS were reported.)

Meanwhile, evidence supporting the New

Haven doctors' supposition has slowly been mounting. For example, doctors at Albert Einstein College of Medicine in the Bronx, who monitored the babies of 182 mothers on methadone, 95 babies whose mothers used heroin during pregnancy, and 106 babies whose mothers combined the drugs, reported after completion of the two-year study begun in 1972 that eight infants born to seven mothers died of SIDS. Five of the mothers were in methadone programs; the remaining two took both heroin and methadone while pregnant. "The incidence of SIDS in our study population was eight to nine times that in the general population," the doctors wrote for *Pediatric Research* in April 1976. "In those in whom only methadone use was confirmed, the incidence was thirteen times the expected number."

SIDS most often strikes babies with low birth-weight, low gestational age, low-income or unemployed parents, unusually young mothers, and abbreviated or total lack of prenatal care. Additionally, more non-white than white and more bottle-fed than breast-fed babies fall victim to the disease.

Because of the high incidence of all of these factors among methadone-exposed babies and their parents, methadone's backers tend to discount the possibility of a direct link between the disease and the drug. But, as the New Haven doctors advised, the incidence of the very same factors among heroin-exposed babies and their parents is just as great, if not greater, and no statistical connection between heroin and SIDS has ever been made.

The same set of overlapping sociological factors works to impede either confirmation or cancellation of the link between methadone and the other infant diseases and conditions mentioned. Low birth-weight, for example, is associated not only with heroin, methadone, and SIDS, but with low income as well.

The research that might help untangle the web of confusion is further slowed by an apparent lack of interest among medical professionals. Interest without funding, however, is of little use to anyone, and, since both public and private money flies largely in the direction of prevailing political winds, the real impediment to the methadone-and-motherhood studies, as well as all other studies which might be designed to test methadone's physiological side effects, is the political nature of the drug.

From the outset, methadone maintenance received the full support and attendant good graces of the President's Special Action Office for Drug Abuse Prevention. In early 1970, however, the Justice Department's Bureau of Narcotics and Dangerous Drugs and the Food and Drug Administration (FDA) noted that the drug had never been declared "safe and effective" for its new use. (Although it was synthesized by the Bayer Company in Germany in 1944 and subsequently used in the United States as a painkiller and cough medicine in small doses, methadone was never approved in its large-dose capacity as a heroin substitute.) These agencies, therefore, began to insist that methadone was "legally experimental," thus falling under the strict requirements of Federal law written after the thalidomide scandal. It became an Investigational New Drug (IND). In June 1970, however, the Administration convinced the FDA that methadone could hardly be called "investigational" any longer since 50,000 or more were already being treated with it, and looser regulations were proposed. The FDA filed an exemption and more flexible guidelines became effective on April 2, 1971.

Under the new set of regulations, it became easier than ever for pregnant women to enroll in methadone maintenance programs—in spite of the Government's own statement that the safe use of the drug during pregnancy had not been established and despite the myriad risks to the offspring being documented daily. In fact, since the FDA dropped methadone's investigational status entirely and it became simply a New Drug in March 1973, enrollment of pregnant heroin addicts is at the moment actually being encouraged, even in preference to detoxification. Methadone's supposed ability to alter an addict's "drug-seeking behavior" and its "stabilization of the social environment" are the phraseological plus signs rung up to justify the policy in the face of the medical questions.

But even these are imaginary assets. Methadone, the "good" drug, has fast become a street drug. In 1965 the Drug Enforcement Administration (DEA) reported that sixteen people were abusing methadone. In 1973 the number was 2,933. Methadone was held accountable for some 800 deaths in 1975. And, all along, it has been statistically linked with a grim array of other fallout usually associated with illegal narcotics. So when we add to the societal liabilities the physiological dangers threatening pregnant women and their offspring, and perhaps everyone else daily administered a massive dose of the drug in a cup of fruit juice, the total picture looks bleak indeed.

Why, then, would anyone persist in encouraging continuation of the methadone maintenance programs? The drug's most intense critics, black activists' groups among them, point to the profits scooped up by Eli Lilly, S. B. Penick, Vitarine, and Mallinckrondt—the four companies that manufacture methadone—and by the many privately owned methadone clinics as well.

Even if there were no money to be made, however, methadone's pushers might still persist, because of the way society has lately been programmed to react in crisis situations. In a drug culture such as ours (where, the U.S. Census Bureau says, $9,300,000,000 was spent on "drugs and sundries" in 1974 alone), we are told time and again to take a pill, get a shot, find a fix when faced with hopeless cases. We have been well conditioned, because in many instances—polio and syphilis, for instance—drugs and sciences have prevailed. But the combination has never worked when used to treat the symptoms instead of the disease, and since heroin is only one sign of a host of social ills, it follows that methadone will never become a suitable cure for it—no matter how "safe and effective" methadone is somehow made or proven to be.

As long as the drug's proponents are the ones who keep the records, however, methadone maintenance will likely turn up looking like the perfect remedy—as well as a good investment for the future—every time.

BAN ON SACCHARIN

HON. THOMAS L. ASHLEY

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, March 21, 1977

Mr. ASHLEY. Mr. Speaker, I am pleased to be joining Representative MARTIN in introducing H.R. 5166, a bill to ease the impact of the Food and Drug Administration ban on saccharin and to prevent ill-advised or ill-timed removals of other food additives from the marketplace in the future.

The need for such legislation has been made painfully obvious in the wake of the FDA's announced intention to ban saccharin, based upon Canadian testing of that product. Ten million diabetics in this country are justifiably frightened at the prospect of having to function without the only artificial sweetener legally available today. And, millions of other Americans whose dietary restrictions call for a lowered intake of sugar are likewise incensed over what they perceive to be a precipitate ban based on insufficient evidence.

The problem confronting those contemplating corrective legislation has been to solve the immediate crisis situation regarding saccharin, while also providing the legislative mechanism for reasoned and measured consideration of scientific data in future tests to determine the safety of a given additive. I am persuaded that H.R. 5166 is just such a bill. It is the collective product of FDA personnel, food chemists, legal scholars, representatives of those afflicted with diabetes, and congressional sources. That balance is reflected in the bill itself.

This legislation does not encroach on the functions and methods of food chemists and researchers. That is neither the province nor the expertise of Congress. In fact, many of the strict provisions of the prior application of what has come to be known as the Delaney clause are maintained by the legislation I join in introducing today. The triggering method of the Delaney clause remains wholly intact; that is, upon a showing that a given food additive causes cancer in humans or animals, regardless of the dosages administered, an impending FDA ban is announced. I am convinced that there is a continuing need for extreme caution in treating the results of these studies—a caution that H.R. 5166 preserves.

But, once there has been a determination sufficient to trigger the Delaney mechanism, it is then incumbent upon the Secretary of Health, Education, and Welfare, under the provisions of this bill, to consider adverse reaction and evaluate test results with particular attention to balancing public health risks against public health benefits that would inure from continued use of the additive in question. In this evaluation process—appeal, if you will—the Secretary will have the advice and assistance of an FDA panel, as well as access to both scientific and public opinion. Should he find that the public health benefits clearly outweight the public health risks, he is empowered to prevent the final banning stage contemplated by the Delaney clause. The test is one where health considerations are not only paramount, but exclusive.

In a given case, for example, the Secretary might determine that the chances of a challenged additive inducing cancer in humans, assuming normal consumption, would be remote. He might also find that the ongoing use of the product in question serves a significant health need. From all available data I have seen, this appears to be the case with saccharin beyond question. H.R. 5166 specifically mandates such a review in the case of saccharin, as well as future testings, and it is safe to predict that under the sound dictates of this bill the impending ban on saccharin would be prevented.

The bill I am introducing today maintains the premise that questions of health are exclusive. Moreover, it recognizes the

continual advances being made in research techniques. When the Delaney clause was added to existing legislation almost 20 years ago, graduations of risk were not so easily isolated or predicted as they are today, and as they are to be in the years ahead. H.R. 5166 is a thoughtful piece of legislation that not only considers the current state of medical research, but provides for future developments.

Most importantly, however, is the fact that this bill is predicated on furthering the public interest—the public health interest. I urge its prompt passage. It will go a long way toward restoring public confidence in administrative health decisions which so directly affect millions of lives.

OIL IMPORTS IN U.S.-FLAG SHIPS, A CONSTITUENTS VIEW

HON. GLENN M. ANDERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 21, 1977

Mr. ANDERSON of California. Mr. Speaker, recently I received a letter from Mr. Joe Goren, port agent for the Marine Cooks and Stewards Union in Wilmington, Calif. His views on the proposal that a percentage of U.S. oil imports be transported in ships that are built in American shipyards and operated under U.S. flag is well worth the few minutes it takes to read them.

Mr. Speaker, on March 2, 1977, when I submitted my bill to mandate that a percentage of U.S. oil imports be carried in American bottom ships, I stated that the United States imports 51 percent of its oil from foreign sources. Only 4 percent of this crude oil, however, is carried on American owned and operated vessels. This policy allows flags-of-convenience vessels—principally Liberian and Panamanian registry ships—to operate outside U.S. control. While calling for domestic energy independence, the Congress is perpetuating a program of dependence upon foreign oil transported in foreign ships for U.S. needs. Thus, we expose ourself to the very real possibility of a shipping boycott of our ports.

Hearings on the proposal are underway before the Subcommittee on Merchant Marine, chaired by Representative MURPHY of New York. I hope my colleagues on the committee, and in Congress, will consider Mr. Goren's opinions when they consider this measure.

The following is Mr. Goren's letter:

WILMINGTON, CALIF.,
March 11, 1977.

Congressman GLENN ANDERSON,
Longworth House Office Building,
Washington, D.C.

DEAR GLENN: The Maritime Unions have been concerned for many years about the increase of Run Away Flag Vessels described as Running away from paying taxes, Running away from American safety standards, and Running away from hiring American trained seamen. The abuse appears more in the area of the oil companies.

They claim the cost of the American seamen is their basis for putting these ships under flags of convenience, yet when the flags of convenience ships are in trouble either off the coast or in the harbors, they enjoy the use of American public servants to safeguard their vessels and the cargo that they carry. As example, the Sansinena explosion in the Harbor of Los Angeles on December 17, 1976. Police, United States Coast Guard and Firemen jeopardized their lives in an attempt to save the lives of the crew members aboard the vessel and to stop the spread of further damage caused by the explosion. Many of the government employees worked overtime and the burden of the costs was paid by the American taxpayer.

I took the time to contact the Pacific Maritime Association which represents the employer to find out what the Liberian ships are saving in the area of tax contributions to the American economy or to place it in a better perspective, to offset the high taxes of the American citizens who are willing to contribute to the safety, security and good life of living in the United States.

The information I received was astounding. The average contribution of the American seamen per month in State Unemployment, Federal Insurance Contribution Act, withholding taxes, amounts to $845.70 per man per month. This means his contribution to the economy for a year is $10,148.40. What is more astounding is that the contributions of one single vessel per month is $38,902.20. Add the contributions from vacation pay of $15,926.00 per single vessel per month and the total monthly contribution for each vessel is $54,828.20. Multiply this by 12 months and the total is $657,938.40. The vessel used in this survey was the S. S. President McKinley with a crew of 46 men and in many cases the tanker could have less men or could use men but I would assume that the President McKinley's manning scale is a good average of a manning scale on an oil tanker. Let's look at the Liberian Run Away flag situation. There are approximately 2,000 flags of convenience vessels and taking the average of a vessel's contribution in seamen taxes using the figures in the attached letter, the total contribution of the Liberian flag vessels would be $1,254,00,000.00 a year Surprised?

I see the new Administration is attempting to lower the unemployment rate by a recent passing of a law placing the unemployed youth in meaningful jobs and again it is the American taxpayer who will carry the burden. I am not condemning the program as I think the most degrading feeling a human being could have is to be unemployed when he is willing to work to support himself and his family.

President Carter stated the program would cost approximately 1½ billion dollars so even if it looks like the American seaman is appearing selfish by asking for those jobs, if they crewed the Run Away Flag Vessels, the American seamen, by paying their taxes, would contribute enough to handle the President's youth program.

Another contribution is that the ships carrying 100,000 barrels of oil would contribute to the economy of the nation by business taxes. The cost of putting youth to work appears astronomical whereas if we could just resolve one loophole and request that American owned steam ship companies fly the American flag and use American seamen we would be resolving the efforts of the Administration to employ our youth. We would be able to take them off the streets, give them meaningful jobs and get them into the flow of the American economy.

To Resolve:

1. Every Liberian Flag Company that is American owned should be required to pay American taxes.

2. 30% of all oil and cargo carried on American flag bottoms.

3. All energy or cargo destined to be used by City, State and Federal to be carried on American flag vessels. (Canada has this law.)

Fraternally and sincerely,

JOE GOREN,
Port Agent.

(The attached document is supplied by steam ship employer's records.)

MARCH 2, 1977.

Mr. JOSEPH GOREN,
Marine Cooks and Stewards Union,
Wilmington, Calif.

DEAR MR. GOREN: You asked me for information about taxes paid in connection with shipboard employment. For the voyage of the SS PRESIDENT McKINLEY from January 6, 1977 to February 15, 1977 the total of State Unemployment, Federal Insurance Contributions Act, and Withholding Tax amounted to $53,162.61 for a crew of forty-six men.

This is an average of $845.70 per man per month, and $38,902.20 per vessel per month. This does not include the payroll taxes which would be paid on vacation wages accrued by reason of employment on the vessel, which taxes it is estimated would amount to about $15,926.00 per vessel per month additional.

P. LANCASTER,
Director, Negotiations Research.

PUBLIC DISCLOSURE OF LOBBYING ACT

HON. C. W. BILL YOUNG

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 21, 1977

Mr. YOUNG of Florida. Mr. Speaker, today I have introduced the Public Disclosure of Lobbying Act of 1977. Most of us will remember the interesting consideration of the Public Disclosure of Lobbying Act of 1976, which was approved by the House in the final days of the 94th Congress. Unfortunately that bill never became law, and I feel it deserves a second consideration by this body.

It is the opinion of a large segment of the public, that lobbyists have a great deal of influence on legislation that affects their everyday lives. People are very much under the impression that as legislators, we are "sold," figuratively speaking, by those interests that can afford the best "hucksters" to present their point of view. A constituent called me yesterday to urge me to take a stand on the banning of products containing saccharin from public sale, and asked:

If tobacco products can be sold with a warning that they are dangerous to our health, why not also saccharin products?

She then answered her own question by stating:

I know, because the tobacco companies have better lobbyists than those of us who need saccharin products to make our daily diets palatable.

The right to petition Congress, by individuals or through professional lobbyists, is guaranteed by the Constitution; however, professional lobbying organizations have become very structured and organized, and there is a definite need for an accounting procedure for those lobbyists who make their living trying to influence Congress.

The Public Disclosure of Lobbying Act of 1977 includes the following provisions:

(1) A clear definition of what constitutes a Lobbying Organization.

(2) A clear definition of what a Lobbyist does.

(3) A requirement that each Lobbying Organization register with the office of the Comptroller General no later than 15 days after it becomes active, and identify its representatives, and methods of operation.

(4) A requirement that each Lobbying Organization file a report with the Comptroller General within 30 days after each quarter, identifying the organization, its representatives, its expenditures, sources of income, primary issues within which it is concerned, and other permanent data.

(5) A prohibition of lobbying activity within 50 feet of either Chamber of Congress.

(6) Identification of some State and Local Government employees as lobbyists.

(7) Requirement for lobbyists engaged in lobbying activities within 100 feet of any entrance of either Chamber of Congress while the body is in session to wear nametags stating in clear print their names and the organization they represent.

(8) Identification, by registration with the Comptroller General's office, as a lobbyist, anyone who has contributed $2,500 to a lobbying organization, or will spend 20% or more of his time, in any filing quarter, engaged in activities of the organization required to register under this bill.

(9) Imposition of a civil penalty against any former Member of the House, Parliamentarians, former elected officers and elected Minority employees of the House, who, during consideration of a measure in which they have a direct interest, appear on the Floor of the House or in adjacent rooms as a representative of an organization required to register under this bill.

(10) Requirement of individuals lobbying within 100 feet of either Chamber of Congress to report their hours and the purpose of their activities.

(11) Requirement to register the names of Federal officials or employees contacted by lobbyists.

The public is demanding some sensible accountability of lobbyists and their activities, and they have a right to it. Disclosure of the activities of these groups and their income and expenditures is justified, and so are the requirements that their physical proximity to the Members of this body, when it is in session, be limited. We cannot afford to continue the "circus-like" atmosphere that we are sometimes subjected to when we enter this Chamber past throngs of lobbyists, attempting to inform us of what we are doing and how we should do it. I am not suggesting that they be "barred" from the building, only from the doorway. I am not suggesting that they be "branded," just clearly identified. I am suggesting that the privileged few who have access to these Chambers, by reason of their former association with it, should not be allowed to abuse that privilege by gaining entry with a "product to sell" or an "ax to grind" for personal or professional profit. And I am suggesting that the public is entitled to full disclosure of the identity of professional lobbyists, and the identity of the people they try to influence.

I urge my colleagues to act toward the expedient passage of this Public Disclosure of Lobbying Act of 1977.

BAN ON SACCHARIN

HON. CHARLES H. WILSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 21, 1977

Mr. CHARLES H. WILSON of California. Mr. Speaker, the fundamental problem with the recent action taken by the Food and Drug Administration—FDA—to ban the use of saccharin lies not in the ban itself—although I have serious reservations about the wisdom of this decision—but in the law.

The FDA took this action based on a 1958 amendment to the Food, Drug, and Cosmetic Act—commonly referred to as the Delaney clause—which states that a ban may be placed on any food or substance if it is found to produce cancer in man or animals. Unfortunately, the law does not allow the agency to determine just exactly how much of the additive will cause cancer in a person or if, in fact, the additive does benefit consumers. The FDA ban on saccharin, in the words of a Los Angeles Times editorial, provides "an ironic illustration of how a law, enacted with the presumed intention of protecting the public welfare, can in fact be applied in a way that unintentionally threatens hardship for millions."

There are currently 10 million diabetics in this country who rely on saccharin to cut down their sugar intake. They do not use the additive, because they want to lose weight or cut down on calories—they do so, because they have to and cannot have normal sugar. Of course, the absolutist proscription of the Delaney clause does not take this into consideration nor does it consider the millions of Americans who use saccharin to cut down on calories. Saccharin is the only legal alternative diabetics and dieters have to sugar intake.

Furthermore, I was disturbed to learn the ban was based on a Canadian study wherein 100 rats were fed large quantities of the sweetener. While I do not presume to question the expertise of the study, I do question the fact that according to the FDA the "large quantities" given to the rats was equal to one person consuming 800 bottles of dietetic soda a day. In the first place, I cannot imagine anyone being able to drink 800 bottles of soda in one day and then continuing to do so day in and day out. Second, I would like to point out that statistics indicate drinking 50 cans of water a day can be fatal. While it sounds humorous to envision a FDA ban on excessive water consumption, it does indicate the extreme lengths to which the FDA has gone with the saccharin ban.

In all fairness, it would be correct to say that this controversy truly is not the FDA's fault, but rather the unfairness in the law and the absolute approach of the Delaney clause. Several bills have been introduced to correct inequities in the Food, Drug, and Cosmetic Act. Representative WILLIAM WHITEHURST, my colleague from Virginia, has introduced a bill that would amend the language of the clause to allow for a ban only if the substance was ingested in "reasonable quantities," and then proved to be a cancer-causing agent. To date, there has been no indication that a normal intake of saccharin has caused cancer in any human. The inclusion of the "reasonable quantities" language would alleviate bans resulting from abnormal or extreme circumstances.

I have also cosponsored legislation, introduced by Representative JAMES G. MARTIN, that would halt the FDA action on this official ban until Congress has held hearings and found that normal consumption of saccharine is unsafe. If the findings prove that it is, then a ban would be in the best interest of everyone.

I strongly believe the Federal Government has a responsibility to protect people from potentially carcinogenic substances. However, in this case, the elimination of saccharin would give rise to severe problems for diabetics and dieters and those Americans who must limit their sugar intake.

The FDA does have a legitimate responsibility in this area but as is evidenced by this case, it has overstepped its bounds to "protect" the public from a useful and perhaps beneficial product.

I urge my colleagues to adopt measures that will alleviate future problems with the Delaney clause and reverse the FDA ban on saccharin until studies prove it is a harmful substance when taken normally.

COLLUSION IN THE TIMBER INDUSTRY

HON. JOHN KREBS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 21, 1977

Mr. KREBS. Mr. Speaker, in the National Forest Management Act, signed into law last October 22, 1976, the Congress included provisions dealing with the sale of timber from the national forests, a half-billion dollar annual business. These were designed to assure fair competition and prevent collusion among bidders in buying timber and also prevent freezeout bidding practices. This was done by seeking to make the climate for collusion a little less comfortable. The law gives a preference to the use of sealed bidding in selling timber, rather than the oral bidding that has been used almost exclusively in the West.

In convictions rendered on bid-rigging cases tried, and in pending reviews that may lead to additional indictments, the evidence shows that oral bidding in selling timber was the exclusive method of selling that timber.

The Washington Post for March 15, 1977, carried an article stating that eight major Western plywood manufacturers, which regularly purchase forest service timber, have had a suit filed against them by the Commonwealth of Virginia on the charge of conspiring to fix the price for finished plywood. Of course, the determination of whether the charges are cor-

rect will have to await the judicial finding. However, it is interesting to note that, in December, the Federal Trade Commission found five of these eight defendants guilty of maintaining artificially high prices. I invite my colleagues and constituents to read this article, the text of which follows:

AREA: VIRGINIA CHARGES PLYWOOD FIX

The State of Virginia has accused eight of the nation's leading plywood manufacturers of conspiring to fix prices.

In a suit filed in United States District Court in Richmond, the state alleged that plywood prices are kept artificially high by the companies through a pricing scheme which applies freight costs from the Pacific Northwest to lumber actually shipped from mills in the South.

The state has asked the court to award triple damages from the accused Boise-Cascade Corp., Champion International Corp., Georgia-Pacific Corp., International Paper Co., Vancouver Plywood Co,. Vanply Inc., Weyerhaeuser Co., and Williamette Industries, Inc.

In a similar case, a Federal Trade Commission administrative law judge in December ruled in an initial decision that five big plywood companies—among eight named in the Virginia suit—had kept their prices artificially high by the pricing scheme.

The companies in the FTC case have appealed, and the commission has scheduled an oral argument for May 11.

In recent hearings held by the Subcommittee on Forests of the House Committee on Agriculture regarding the desirability of greater use of sealed bidding for timber in order to reduce the incidence of collusion, major spokespeople for the forest products industry argued against sealed bidding. Despite convictions to date, they contended that there are no problems in this respect and thus no need for preventive actions designed to foster open competition.

The Secretary of Agriculture is presently considering the action he should take on draft regulations to implement requirements in the 1976 act concerning sealed bidding. Some are urging the Secretary to revert to past oral bidding techniques in the West.

I would object strongly to such action, in view of the fact that there have been several investigations and convictions involving bid-rigging in connection with Federal timber sales carried out by oral bidding. The U.S. Justice Department, in a letter to me dated February 3, 1977, states:

There is good reason to believe that the practice of collusive bidding exists in sales of federal timber.

The letter goes on to say that, on the basis of investigations which are either ongoing or have been recently conducted:

We are not dealing with isolated, rare situations.

The full text of the letter in question, which has been made a part of the hearing record for the Subcommittee on Forests, follows:

WASHINGTON, D.C.,
February 3, 1977.

Hon. JOHN KREBS,
House of Representatives,
Washington, D.C.

DEAR CONGRESSMAN KREBS: This is in response to your letter of February 2, 1977, requesting information concerning collusive bidding practices in the sale of timber. Specifically, you request our opinion as to the extent of collusive bidding on federal timber; the number of investigations of such practices undertaken by the Department in the last twenty-five years, including the number of investigations currently pending; the number of investigations which have resulted in litigation; the number of grand jury investigations being undertaken apart from those instituted by the Department; and our views as to whether it is difficult to obtain hard evidence of collusive bidding.

On the basis of information available to the Department, there is good reason to believe that the practice of collusive bidding exists in sales of federal timber. Moreover, the number of investigations that we have recently conducted or are in the process of conducting into such behavior suggests that we are not dealing with isolated, rare situations.

At present, the Department is engaged in three major investigations of possible collusive bidding involving various federal forests located in Northern California, Arizona and New Mexico, and Oregon and Washington. Several different grand juries have been and are continuing to inquire into these matters.

Available records do not permit us to go back a full twenty-five years, as you have requested. However, over the last fifteen years the Department has undertaken, including those currently pending, at least ten separately identifiable investigations of alleged collusive bidding on the sale of federal timber. To date, two of these have resulted in litigation. In *United States* v. *Cascadia Lumber,* Cr. 64–173 (D. Ore. 1964), the trial court granted the defendant's motion for acquittal after the completion of the government's case. In *United States* v. *Champion International Corp.,* Cr. 74–698 (D. Ore. 1974), five corporations and two individuals were convicted of collusive bidding in violation of the Sherman Act. One corporation and two individual defendants were acquitted. The defendants who were found guilty have appealed, and that appeal is still pending. We have no knowledge of other criminal proceedings involving collusive bidding on federal timber apart from those instituted by the Department.

It has generally been our experience that collusive bidding is one of the more difficult antitrust violations to discover and prove in court. Unless there is an informer or other direct evidence of an agreement, which is particularly hard to obtain in a tightly knit industry such as the timber industry, it is very difficult to show that the absence of competitive bids is due to concerted behavior. In this connection, we have found that when bidding is done in the open rather than by a sealed bidding process, it is both easier to coordinate and to enforce a conspiratorial agreement and also more difficult to prove that an absence of competitive bidding is due to collusion among the actual or potential bidders.

I hope this is responsive to your specific questions.

Sincerely yours,

DONALD I. BAKER,
Assistant Attorney General, Antitrust Division.

I do not wish to suggest that an indictment is equal to a conviction in price-fixing charges. However, there have been past convictions on timber bidding and it is worthwhile to note that one of the indicted firms, Champion International, was convicted in 1974, in the Federal District Court in Oregon, of collusion in bidding involving the sale of Federal timber.

I would hope that the Secretary of Agriculture, in devising final regulations on timber bidding, will assure that the spirit of the 1976 law is met—improving the free, competitive enterprise system and minimizing opportunities for collusive or preclusive bidding on timber.

STATEMENT ON SACCHARIN BAN

HON. ANTONIO BORJA WON PAT

OF GUAM

IN THE HOUSE OF REPRESENTATIVES

Monday, March 21, 1977

Mr. WON PAT. Mr. Speaker, I wish to go on record as opposing the impending FDA action to prohibit the use of saccharin by the Food and Drug Administration.

This action, based on the results of a Canadian study in which rats were fed extremely high doses of saccharin, strikes me as falling into a category similar to the FDA's ban on the importation of betel nuts into the United States, a ban which I have long opposed. In both cases, the actions are based on highly questionable research findings, and in both cases these bans entail a severe hardship to significant numbers of people.

In the case of saccharin, the ban will be felt most severely by diabetics in this country who have a very real need for this artificial sweetener. In the case of betel nut, the sufferers are the people of Guam and Micronesia who enter the U.S. customs zone and who are prohibited from carrying with them betel nuts for their personal consumption.

With saccharin we are talking about a substance that has been used by the American people for nearly 80 years and in the case of betel nut we are dealing with a natural substance which is currently used by some 200 million people throughout the world and which has been used since earliest recorded time and almost certainly before.

In both cases the FDA is basing its action on the Delaney clause of the Food, Drug, and Cosmetics Act which prohibits the use in food of any ingredient shown to cause cancer in animals or man. It is not the Delaney clause that I am taking issue with, although I do feel that it should be reassessed. What I am primarily concerned with at this time is the means by which the FDA concludes that a substance is carcinogenic or cancer causing. There is much criticism being voiced over the study which led to the current saccharin ruling. According to FDA:

The dosages of saccharin fed the rats in the Canadian study were in excess of the amount that a consumer would receive from drinking eight hundred (800) 12 oz. diet sodas daily over a life time. (HEW News p. 77–12, March 9, 1977, p. 3.)

In this context, it is interesting to note that 3 days after this ruling was made UPI carried a story about a woman in Florida whose death was traced to her habit of drinking up to 4 gallons of water a day. Since 4 gallons of water is considerably less than 800 12-ounce cans of soft drink, perhaps it is water that the FDA should investigate next.

The basis for the ban on betel nut is even more questionable. The only evi-

dence of carcinogenesis where betel nut is concerned is found in experiments where betel nuts have been used with other additives—usually tobacco and lime in a quid. In fact, in experiments conducted with baboons, while there was evidence of mouth cancer in those baboons exposed to heavy doses of betel nuts with tobacco and lime additives, there was no evidence at all of cancer in a control group of baboons exposed to similar doses of betel nut without any additives. The researchers concluded that—

Chewing the betel nut without the tobacco leaf wrapper obviously does not lead to cancer. (V. Hammer and O. Reed, "Betel Quid Carcinogenesis in the Baboon" med, Prim. I:75–85 (1972).

It seems clear, then, that there is no evidence that the use of betel nut—which is de facto banned in the United States—leads to cancer; the same cannot be said of tobacco—which is perfectly legal. Incidentally, the people of Guam characteristically chew their betel nuts without any additives.

I have reraised the issue of the betel nut ban in this statement because while I feel that the findings and conclusions which led to the decision in the case of saccharin are suspect, I feel even more strongly that such is the case where the betel nut ban is concerned. What bothers me even more is that I am becoming increasingly convinced that in the case of the latter we are dealing with a decision produced in part by a cultural bias toward the strange.

I have little doubt but that diabetics, diet drink advocates, and the other users and producers of saccharin will have no trouble getting their case heard. I am less confident that travelers from Guam and Micronesia who come to the United States and wish to bring with them their small bags of betel nuts for their own personal consumption, will ever get a fair hearing on their complaint. This anticipated injustice does not make me less eager to see the supporters of saccharin have their arguments heard—for I count myself among them —but I will have a hard time making my constituents on Guam understand why their complaints cannot get a similar hearing. They have neither the number nor the resources of such groups as the Calorie Control Council, yet they have a complaint which is equally if not more valid. So that their concerns may also be heard, I urge that any investigation into the saccharin decision should reexamine the betel nut decision as well.

On this same subject, I would like to have introduced into the RECORD excerpts from an article by Dr. Arthur Sackler, international editor of Medical Tribune. Dr. Sackler made his comments in an article entitled "On Betel Nuts, HEW and the Surgeon General":

[From the Medical Tribune, Feb. 9, 1977]

ON BETEL NUTS, HEW AND THE SURGEON GENERAL

While circling the globe, I learned that Micronesians are "spitting mad" at HEW. It would appear that, as in the case of the Whitefish War, HEW has ventured where angels fear to tread. The betel nut chewers of Micronesia, we learned from Saipan, are furious at a proposed U.S. ban on the import of betel nuts. Placing a "dangerous" label on betel nut chewing was an action, according to Palau District Administrator Thomas O. Remengesau of "sun-crazed officials."

The administrative action in Washington has triggered off a political protest as well as an economic action. Guam Congressman Antonio Won Pat has joined the fight to stop the ban. Reporter Valentine Sengebau, a betel nut chewer for half his 36 years, has recorded that betel nut chewing is "better than hard liquor"; betel nuts "have been chewed all over the world for hundreds of years." He makes the telling point that "the only danger involved is that you're liable to get your white shirt stained when spitting."

The *Mainichi Daily News* reports that betel nuts are carried in over-the-shoulder bags by Pacific islanders "who would feel undressed without their betel nut bags." District Administrator Remengesau says, "When some sun-crazed officials at HEW say the betel nut may be dangerous, the entire department goes on the warpath about an issue they know nothing about and a practice they themselves have never tried" (a situation not dissimilar from the continuing prosecution of smoked whitefish processing; see MEDICAL TRIBUNE, Nov. 10, 1976.)

Remengesau points out that the Surgeon General's office has labeled cigarette smoking as "dangerous to your health [but] HEW officials are allowing tobacco manufacturers to continue their shipments of their deadly commodities over state lines and into foreign countries." Congressman Antonio Won Pat had asked former HEW Secretary Mathews to overturn the ban, saying "A resonable person could only conclude that the ban has been imposed because it is 'strange' or 'different.' "

Without regard to our laws on lobbying, it would appear that Yap district officials, in an area growing some of Micronesia's finest betel nuts, have offered a lifetime supply of betel nuts to Congressman Won Pat if the ban is successfully contested.

And so as one notes the world's major causes of preventable morbidity and mortality and the major problems facing this wild and wacky world, one also sadly notes the nonsense which rules.

We hold no brief for betel nuts. However, we have been and continue to be deeply concerned by the all too pervasive attitude which snidely treats the customs and the folk uses of other peoples as "inferior" or "unacceptable" while perpetuating as socially acceptable our polluting, carcinogenic, cardiotoxic habits of cigarette smoking and alcohol use. One wonders, "Who is civilized?" What constitutes civilized action? How should one view the incredible inconsistency of our drug regulatory legislative actions and our inaction and "tolerance" in respect to two of the most toxic substances known to man? While one may make out a case for moderate use of alcohol, we know of no clinical or other indication for the use of tobacco.

A SUGGESTED STUDY

We would not be surprised if there are more dangers involved in chewing betel nuts than just getting white shirts stained with spit. But, perhaps, before HEW clamps down further on the betel nut chewers of Micronesia, we should get some hard data from the National Institutes of Health or the Surgeon General's office—such as a double blind study comparing the toxicity of tobacco with that of betel nuts.

ESTONIA: SACRIFICIAL LAMB

HON. EDWARD I. KOCH
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES

Monday, March 21, 1977

Mr. KOCH. Mr. Speaker, on February 24 of this year those people of Estonian heritage who are fortunate enough to live in the free world celebrated the 59th anniversary of the declaration of independence of the Republic of Estonia. Having struggled for autonomy from Russia since 1905, Estonia finally attained its independence in 1918, but that independence was to be short lived. The Nazi-Soviet collaboration in 1939 and 1940, which is frequently remembered only for the partition of Poland, also resulted in the forcible incorporation of Estonia and its fellow Baltic States into the Soviet Union.

Perhaps the greatest tragedy for the Estonian people came, however, at the end of the war when the United States and Britain quietly decided that, in the interests of preserving the Big Three Alliance as the foundation of future peace, no protest would be made over Stalin's intention to keep Estonia and its two sister nations within the Soviet Union. The bankruptcy of that policy soon became evident as cooperation turned into cold war confrontation, and the world's two great democracies were left with nothing but shame at the memory of their silent complicity in the subversion of the Baltic States.

The United States has not been quick to learn the lesson in this experience, and it has subsequently stumbled through several troubled periods, the darkest hours coming with our misguided involvement in Vietnam. Many persons well-versed in foreign affairs have berated the United States for naivete in diplomatic relations, but our experiments in callous diplomacy over the last 30 years have repeatedly ended in tragedy. The American people must not revert to the isolationism of a former age, but neither must we tolerate the betrayal of our dearest democratic principles in our external dealings.

The bleeding body of Estonia struggles on tenuously under the brutal rule of the Kremlin. The American people must never forget, nor can we permit any action by this country that gives one particle of recognition to the Soviet-imposed status quo in Eastern Europe. Moscow hailed the Helsinki accord as a great victory in its quest for legitimacy. Our denouncement of that interpretation must never falter or diminish.

In recent weeks, the Carter administration has spoken out about the rampant violations of basic human rights in many parts of the world. On several occasions I have praised this new policy; truly it promises the beginning of one of America's brightest hours. It would be foolish to deny, however, that the American challenge continually threatens to reveal the wretchedness of the Soviet system to the people over whom it rules.

It comes as no surprise, then, that Moscow has reacted to the President's statements by predicting dire consequences for the future of Soviet-American cooperation and by stepping up its campaign against internal dissent.

Nevertheless, the Soviet Union has repeatedly demonstrated an acute sensitivity to world opinion. In several instances, unrelenting Western protest has secured the release of individual political prisoners who would otherwise have suffered a slow death in obscurity. Under the Soviet system, whole peoples and cultures can face the same alternatives. If the West becomes silent and forgets, nations like Estonia will die in time under the pall of Soviet communism. If, on the other hand, the Western democracies continue to speak out tirelessly, the Soviet system will one day fade, and the Estonian people and many other peoples will regain their freedom.

BRUNSWICK HIGH SCHOOL RAILROADERS BASKETBALL TEAM

HON. GOODLOE E. BYRON

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Monday, March 21, 1977

Mr. BYRON. Mr. Speaker, the Brunswick High School Railroaders basketball team has brought honor to the town of Brunswick, and the entire county of Frederick, Md. They have returned home as the Class C Basketball Champions of Maryland.

These athletes and their coaches deserve credit for their diligent training and dedication. The cheerleaders, students, faculty, and loyal fans deserve credit for their unwavering support in this outstanding year of basketball.

Brunskick, Md. has had many great athletic teams in the past. Today I ask my colleagues in the House of Representatives to join me in honoring Maryland's 1977 Class C Basketball Champions, the Brunswick High Railroaders. For this reason, I include the following article which appeared in the Frederick Post newspaper following the Railroaders' victory:

HAIL, BRUNSWICK!

With honor for themselves and their coaches, and credit to their families, schools and communities, the Brunswick High School Railroaders basketball team has returned home victorious as the Class C Champions of Maryland.

All residents of Frederick County join in applauding this outstanding achievement by the Brunswick High athletes and their coaches, and certainly the cheerleaders and the host of loyal fans who supported them in this superlative year of basketball.

Under head coach Bill Kubat—who understandably couldn't find words to describe the moment—the Brunswick Railroaders got up a big head of steam during the playoffs and tournament, and no opponent could untrack them.

It is a great feat that will live forever in the annals of Brunswick High and its feeder communities and schools. Each young man, each student, each cheerleader, each educator, each fan, and the families of these victorious warriors have something special to be proud of.

More than the Class C Basketball Championship of Maryland, the 1977 Railroaders have demonstrated that as combatants under the thrilling pressures that mount during such a tournament, they remained a team, were able to work and play together, and above all, able to inculcate in their victory that one indispensable ingredient that marks a real champion—good sportsmanship.

This Railroader aggregation in winning the championship also takes upon itself—as a group and each member individually—the added lifetime responsibility of circumscribing its conduct with in the bounds expected of a real champion, and of lifting its horizons for still greater accomplishments—not always as champions, perhaps, but as men trying to do their very best in whatever they decide to do in life.

We salute Brunswick's Railroaders, and list them as follows, according to the official roster of the State Basketball Tournament held at Cole Fieldhouse, University of Maryland, March 10, 11 and 12, under auspices of the Maryland Public Secondary Schools Athletic Association:

Pat O'Hara, senior; Steve Dustin, senior; Robert James, senior; Bernie Lipscomb, junior; David Morris, junior; Tim Jackson, junior.

Daryl Huffer, junior; Pat Campbell, junior; Eddie Eddle, junior; Mike Ryland, junior; Danny McLane, sophomore.

Principal, Dale Gangawere; Coach, Bill Kubat; Asst. Coach, Bill Turney; Mitch Butler, manager; Mike Price, manager; Jeff Deener, manager.

The Railroaders won 19 games during the regular season and lost six, winding up after the tournament with a 21-6 record for the 1976–77 season with tournament victories over Colonel Richardson High School and Beall High School, two fine teams.

Beside them with enthusiasm throughout the season were the Brunswick Cheerleaders: Varsity—Lisa Bollinger (captain), Judi Rowe, Cindy Cuzak, Cheryl Beachley, Sandy Deener, Karen Smallwood and Debbie Huffer. Junior Varsity—JoAnne Herber (captain), Julie Herber, Lisa Koogle, Thomda Remsbumg, Paula Weitzel, Cleta Pontillo and Cathy Pontillo. The adviser for cheerleeders is Denise Davis.

Brunswick has had many great athletic teams in the past, and it will have champions in the future, but today we salute the 1977 Brunswick High Railroaders basketball team—Maryland's Class C Champions.

LONG-TERM NATURAL GAS ISSUES

HON. JOHN D. DINGELL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Monday, March 21, 1977

Mr. DINGELL. Mr. Speaker, the issue of long-term natural gas policy is complex, largely because it affects all of us. Forty million households burn natural gas, and roughly 30 percent of all primary energy consumed in the United States is natural gas. Long-term natural gas policy is an issue that the Congress will be compelled to address early this session. For these reasons, I feel it appropriate to briefly outline my views and concerns on this important subject as the Subcommittee on Energy and Power, of which I am chairman, begins general background hearings, March 24, 1977, on the long-term natural gas issues:

One of the coldest winters on record has demonstrated this Nation's over-reliance upon dwindling supplies of natural gas. A powerful temptation exists to look for simple answers to the natural gas problem: The Congress has been criticized for improperly regulating natural gas prices; producers have been accused of holding back supplies of natural gas to force higher prices. Neither charge is likely to produce a solution to the complex natural gas problems we face.

A great deal of misunderstanding exists regarding the origins of natural gas price controls. Wellhead natural gas price regulation originated with a 1954 U.S. Supreme Court decision, *Phillips Petroleum Co.* v. *Wisconsin*, 347 U.S. 672. Prior to that time, the Federal Power Commission, under the authority of the Natural Gas Act of 1938, had regulated only the operation of interstate natural gas pipelines. The wellhead price of gas produced and sold within a state (intrastate gas) has never been subject to Federal regulation.

Each year since 1967 we have been using natural gas faster than new supplies (excluding recent discoveries in Alaska) have been added to our inventory of reserves. In 1974, for example, 21.72 trillion cubic feet (tcf) of natural gas was produced, while new reserve additions were only 8.9 tcf. This trend cannot be sustained indefinitely.

A number of proposals have been advanced to bring demand and supply back into balance. These include curbing excessive natural gas demand by restricting the non-essential use of natural gas and increasing price incentives to encourage increased exploration and production.

Currently the most widely discussed natural gas policy issue is price deregulation. Advocates of deregulation argue that higher prices will discourage wasteful consumption and increase supply. In the past, I have opposed deregulation for reasons I will explain below. However, if it were clear to me that deregulation is favored by a majority of my colleagues, I would do my best to focus debate on the questions of what categories of natural gas should be freed from controls and under what circumstances. For example, I see no justification for permitting producers to charge unregulated prices for natural gas they have already discovered. Higher prices for that gas would simply create windfall profits for producers. Such higher prices would not increase the amount of gas available. In my opinion, the only category of natural gas that could possibly warrant higher prices would be new natural gas: natural gas produced from previously undiscovered reservoirs.

My historical opposition to deregulation has been based upon several concerns. First, no one knows what prices producers will charge for natural gas following deregulation. Currently, the average interstate wellhead price is around $.60 per thousand cubic feet (mcf). Many people believe that in the long-run, unregulated natural gas prices would seek rough equivalency with the price of oil. At present crude oil price of $13.00 per barrel, this works out to around $2.00 per mcf for natural gas at the wellhead. But this is a price forecast based only on theoretical and long-run considerations.

In the short run, during the three to five year period following deregulation, I would not be surprised if wellhead prices were to equal or exceed the cost of synthetic gas produced from coal—presently $4.00 to $5.00 per mcf. New natural gas prices of this magnitude are in no way related to the costs of producing new natural gas supplies. Such prices would be driven by the price-inflating effects of excessive demand.

The legitimacy of this concern has been amply demonstrated by the experience of interstate pipeline purchases of emergency supplies of natural gas this winter. Prior to enactment of the Emergency Natural Gas Act of 1977, interstate pipelines petitioned the Federal Power Commission for approval of emergency purchases of natural gas for periods of up to 60 days. Such purchases are exempted from FPC wellhead price controls but are subject to FPC review on the basis of whether they represent a "prudent" purchase by the pipeline in comparison to "prevailing field prices." In January, under this procedure, an interstate pipeline sought approval of an emergency purchase of $2.75/mcf. This sale was not approved. The very next day the same pipeline sought approval of a purchase of the same quantity of natural gas from the same seller at $2.25/mcf. This price was much closer to historical price levels and was approved. Such events demonstrate the lack of incentive on the part of interstate pipelines to bargain aggressively with producers of natural gas prices. It also confirms the ability of producers to extract higher than justified prices from interstate pipelines who are willing to pay the asking price and pass it on to their customers. More recently, additional emergency purchases of natural gas were authorized under the Emergency Natural Gas Act of 1977. These purchases were subject to Federal review based upon whether the price was "fair and equitable." Under this standard purchase of emergency supplies of natural gas have been approved at prices exceeding $3.25/mcf. The $2.00 to $2.25 ceiling, which deregulation proponents had claimed would not be exceeded based upon experience with unregulated intrastate markets, has been broken and the price of synthetic natural gas substitutes appears to be the only short run constraint upon natural gas prices which natural gas deficient interstate pipelines will pay.

My concern that deregulation will lead to high and unprecedented price levels in the short run is attributable in part to doubts that deregulation will elicit significant volumes of new natural gas supplies beyond those which would be available without deregulation. Natural gas producers admit that any supply response to higher prices will take at least 3 or 4 years before exploration for, and development of, new natural gas supplies can result in increased natural gas production. So long as there is no increase in supply, the effect of deregulation will be purely inflationary—we will be paying more for the same amount of natural gas.

On the basis of the experience of this winter, one must also question the optimistic view proffered by deregulation advocates that deregulation will solve our natural gas supply shortfall. Even the unregulated intrastate market experienced shortages of natural gas this winter as unprecedented cold weather greatly increased demand for natural gas beyond the supply capability of producers. The result has been sharp price increases accompanying curtailment of intrastate consumers. I believe it fair to conclude that even if natural gas prices had been deregulated in the last Congress, this winter's shortages would not have been any less severe.

The price and supply concerns underly my greatest concern—the potential economic disclocation which may result from natural gas deregulation. A recent study by the General Accounting Office assesses the potential effects of deregulation and concludes that within five years, deregulation would raise the cost of energy to natural gas consumers by $27 billion per year. This would amount to an increase of approximately $200 per year over 1975 levels in residential natural gas bills.

An increase in natural gas prices of this magnitude might reduce real GNP by as much as $12–$15 billion and add .5% to the prevailing inflation rate. Total consumer disposable income for purchasing goods and services, other than natural gas, would be adversely affected. Higher operating costs for many industries and lower consumer demand for their products would raise the unemployment rate to roughly 0.4 percentage points above the unemployment rate that would otherwise prevail. This represents a potential loss of 400,000 jobs.

Against the certain price increases and resultant economic costs, advocates of deregulation can promise only the hope of increased supplies of natural gas. Will higher prices in fact elicit more gas? If price regulation were significantly discouraging exploration and development, the answer would probably be yes. But I see little evidence that price regulation is discouraging producer efforts to that extent. At present, drilling rigs are operating at a rate that has not been achieved since 1962. Some offshore rigs are idle, but this may be attributable as much to the slow rate of offshore leasing as to any alleged price disincentives. Moreover, the Federal Power Commission attempts to set regulated prices at levels which provide a fair rate of return on the basis of actual producer cost. There is, in effect, a mechanism built into the present system designed to provide sufficient incentive for production while also balancing consumer interests.

If producers, who are already receiving as much as $2.00 per mcf on some intrastate contracts, are in favor of deregulation, doesn't this indicate a belief on their part that deregulated prices would go above $2.00? In the short run the supply response cannot be great enough to meet demand. In the longer run, no one knows for sure. But the words and actions of natural gas producers prompt skepticism and the belief that deregulated prices will be demand-driven, rather than cost-justified, and will shoot far above $2.00 per mcf.

Therefore, I believe that Congressionally established natural gas policy must include measures to reduce our present consumption. Large industrial and utility users of natural gas as a boiler fuel, who have the capability to burn oil or coal, must be prohibited from burning natural gas. Natural gas should not be taken away from residential or small commercial users, but the efficiency with which they use gas can be greatly improved. One simple device, currently being tested in Michigan, costs just $35 yet can reduce the natural gas consumed in residential space heating as much as 25 percent. Such devices, installed nationwide, would reduce substantially total natural gas consumption.

It is true that wellhead natural gas price controls may have contributed to the present artificially high demand for this premium fuel. However, alternatives to deregulate can restore proper price signals to the marketplace. Incremental, or marginal cost, pricing to industrial consumers would be a major step toward using the price system to discourage wasteful consumption. Measures designed to facilitate an orderly transition from wasteful consumption of natural gas—especially when applied to the industrial and utility sectors where alternate fuel capabilities can and do exist—make far more sense to me than exclusive reliance upon deregulation to increase supply so that we can briefly extend our wasteful natural gas practices.

In summary, long-term natural gas policy must address the competing goals of natural gas supply-demand balance and economic stabilization. An overcommitment to either goal alone is not in the Nation's long-term interest. These are the considerations that I and my colleagues must weigh when the important issue of long-term natural gas policy comes before the 85th Congress.

DISABILITY AND SICK PAY EXCLUSION DELAY

HON. SHIRLEY N. PETTIS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 21, 1977

Mrs. PETTIS. Mr. Speaker, today I had the honor of providing testimony to the House Ways and Means Committee on a matter of importance to the many retired people within the 37th Congressional District.

I would like to include my testimony for the RECORD and to urge my colleagues to support the delay of the sick and disability pay tax exclusion until tax year 1977:

TESTIMONY BY CONGRESSWOMAN SHIRLEY N. PETTIS ON H.R. 2036—RELATING TO A POSTPONEMENT OF THE EFFECTIVE DATE OF THE CHANGES TO THE SICK PAY EXCLUSION—MARCH 21, 1977

Mr. Chairman, elected officials have lately been accused by the people they represent of being insensitive and unresponsive to their concerns. Though I seriously doubt any one of us in the House of Representatives would consciously vote for legislation which could be termed as insensitive, I would have to say that our eliminating—retroactive to January 1, 1976—the maximum $100 a week sick and disability pay tax exclusion, comes very close.

Though this provision—which was contained in the Tax Reform Act of 1976—does not affect those who are permanently and totally disabled and whose family income is less than $15,000 a year—I strongly feel that it was adopted without adequate consideration being given to the precise results on those it does affect.

I could, Mr. Chairman, provide you with a lengthy summation on why I have cosponsored H.R. 2096 (identical to H.R. 318) to delay the effective date of this tax provision until tax year 1977, but if we are ever to restore the sensitivity and responsiveness of this body to the people we represent, then we must demonstrate our willingness to listen to their individual concerns; and for this reason, I would like to share with you and the Ways and Means Committee the following excerpts from the many letters I have received protesting the implementation of the disability/sick pay provision for tax year 1976:

"I planned my budget on the basis of this exclusion and paid insufficient funds to cover my estimated tax. This law is retroactive to January 1, 1976 income and places me and others in like circumstances, in an apparent unfair position this year.

"The first year one of us goes down and is unable to be a wage earner, the law changes . . . Needless to say, we are hurt deeply, and feeling there must be a mistake in the printing (of the bill), or a misunderstanding when the law was passed.

"This change, voted in October, was retroactive to January 1, 1976, and full facts were not made public until late December. There was absolutely no time to plan or arrange installment payments for this sudden deficit, which will be penalized.

"To start taxing annuity income which has previously been exempt creates quite a hardship to me and many others in the same situation. An additional blow is the fact that without this is made retroactive to January 1, 1976.

"If I have to pay an additional tax for last year due to the new 1976 tax law it will create a hardship of my family.

"There are thousands of others more seriously affected than myself. There are persons

on disability retirement who are faced with increased tax liabilities and possible penalties because they had insufficient time to plan for this law that was enacted 10 months after its effective date.

"Particularly devastating is the sudden nature of this tax change causing us to become liable in late December for tax and penalties retroactive to the previous January. Can you help?"

Mr. Chairman, we can help by delaying implementation of a provision of which the general public was not aware and for which it did not have sufficient time to prepare.

VFW LEGISLATIVE PROGRAM

HON. RAY ROBERTS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Monday, March 21, 1977

Mr. ROBERTS. Mr. Speaker, the Veterans of Foreign Wars of the United States recently held its annual conference of national officers and department commanders here in Washington. R. D. "Bulldog" Smith of Atlanta, Ga., has served as commander-in-chief of the Veterans of Foreign Wars since his election last August at the VFW National Convention in New York.

On March 8, 1977, Commander Smith, accompanied by national and State officers of the VFW, appeared before the House Veterans' Affairs Committee. Commander Smith set forth in his statement the VFW priority legislative program for the first session of the 95th Congress. His testimony touched on those VA-administered benefits and programs affecting this Nation's war veterans and their families whose sacrifices for our country's freedom must never be forgotton.

At this time I would like to share with my colleagues the text of Commander Smith's statement before the Veterans' Affairs Committee:

STATEMENT OF R. D. SMITH, COMMANDER-IN-CHIEF, VETERANS OF FOREIGN WARS OF THE UNITED STATES BEFORE THE COMMITTEE ON VETERANS' AFFAIRS

Mr. Chairman and members of the committee: I am pleased to appear before you this morning on behalf of the membership of the Veterans of Foreign Wars of the United States. I congratulate you, Mr. Roberts, upon your re-election as Chairman of this vital Committee and welcome your new members: Messrs. Douglas Applegate of Ohio, D. Douglas Barnard, Jr. of my own state of Georgia and, on the minority side, Harold S. Sawyer of Michigan. I would be remiss, indeed, in not calling to your attention the fine cooperation extended my Executive and Legislative Directors by your staff and, in particular, A. M. "Monk" Willis, Jr., your Staff Director and Mack G. Fleming, your Counsel.

Accompanying me today are the national and state officers who comprise the leadership of our great organization and who are directly responsible for the twenty-fourth consecutive year of increased membership which has passed the 1.8 million mark this year.

My purpose here today is to present our priority legislative program for this First Session of the 95th Congress. The voting delegates to our 77th National Convention held in New York City last August passed more than 200 resolutions, the preponderance of which address improving veterans' benefits, enforcing those laws enunciated in the United States Code, and rejecting proposed administration, negative legislation to reduce and erode existing benefits. The most important of those coming within the jurisdiction of this Committee have been included in our pamphlet entitled "VFW Priority Goals Legislative and Security for 1977" and are appended to my testimony. Without objection, it is requested such be printed in its entirety, as a portion of the official transcript of this hearing.

The bread and butter issues, of course, merit our first consideration. Our greatest debt is to those veterans who made a special sacrifice and have suffered disabling disabilities defending our nation during periods of war and hostility and to the survivors of those who made the supreme sacrifice. Therefore, and based on current inflation, we recommend an increase of not less than six percent, which could be higher by the time hearings are held and legislation passed, to benefits those in receipt of compensation and dependency and indemnity compensation.

I wish to commend this Committee for including in legislation which became Public Law 94–581, the Veterans Omnibus Health Care Act of 1976, a provision to extend CHAMPVA coverage to the widow or surviving children of a veteran who, at death, suffered from a permanent and total service-connected disability regardless of the cause of death, fulfilling another of our priority goals. However, I sincerely hope this Congress will see fit to go the one step further to fulfill another of our priority goals and grant dependency and indemnity compensation to the survivors of veterans in this same category. As you are aware, there are some 122,000 such veterans for whom their spouses have had to constantly care, restricting employment opportunities and, upon the death of the veteran and the termination of compensation payments, are often left in dire financial straits and devoid of marketable skills.

The inadequacies of the pension program for our comrades in need due to their non-service-connected disabilities and their widows has been of growing concern to the V.F.W., as you well know. We believe the pension program should be so restructured as to permit those who answered the nation's call to duty and served in uniform during times of peril, and their widows, to live in dignity well above the poverty level afforded welfare recipients. Our priority goals include supporting restructuring of the pension program to benefit all recipients and not be more restrictive than present law. However, it is our opinion, at this time, that action on pending pension legislation other than granting a cost-of-living increase of at least six percent should be deferred until after the study by the Veterans Administration, mandated by Public Law 94–432, has been submitted to Congress and sufficient time elapsed for a thorough study thereof.

With respect to educational benefits we were gratified Public Law 94–502, the Veterans Education and Employment Assistance Act of 1976, removed the restriction to undergraduate work imposed on the nine month extension granted by Public Law 93–508, fulfilling another of our priority goals. As you are aware, the V.F.W. fought this restriction for Vietnam veterans when H.R. 12628 was being considered by Congress and, again, when the Congress resoundingly spoke in behalf of veterans and overrode the Presidential veto of the Vietnam Era Veterans Readjustment Assistance Act of 1974. Likewise, we have repeatedly opposed the Administration's attempt to reduce from ten years to eight years the time allowed for completion of education for Vietnam era veterans. While on the subject of education, we also recommend a cost-of-living increase for those pursuing educational programs under the GI bill, of at least six percent.

One of our continuing priority goals calls for the establishment of a national cemetery in every state so that our honored veterans may be interred near their survivors. Our veterans were called to the colors by the federal government and the federal government should assume this responsibility and should not shunt it off on the various states.

The quality and availability of medical care for our veterans has historically been of prime concern to the Veterans of Foreign Wars. The Veterans Administration has over the years in general acquitted itself well in carrying out its responsibilities in this area. However, there presently exists on the one hand impediments in existing law, and on the other, the need of new legislative initiatives if care provided in Veterans Administration hospitals and medical facilities is to be, in fact, second to none.

One provision of Public Law 94–581 has caused extreme hardship to veterans with nonservice-connected disabilities entitled to aid and attendance and housebound benefits, and has subjected the Veterans Administration to considerable criticism. This is the interpretation of out-patient care by the General Counsel and the Medical Administrative Service of the Veterans Administration requiring such disabled veterans to utilize Veterans Administration health care facilities and to surrender their contract fee cards previously honored by private physicians and facilities. Most of these veterans are aged and infirm, their health has deteriorated and they often lack both the physical stamina and necessary ready finances to travel to VA facilities. Additionally, many permitted their health insurance policies to expire as they felt secure with their government issued contract fee card to obtain local medical attention. We do not believe such was the intent of the law, but if the Veterans Administration interpretation is permitted to stand, we surely need timely remedial legislation. I understand this Committee will soon consider and, hopefully, advance H.R. 3696 deleting the restrictive words from Section 612(g), Title 38 United States Code. I trust the Senate will act upon this measure quickly when it is referred to that body, so that the contract fee cards will soon be returned to these needy disabled veterans.

Legislation which will expire this Fiscal Year, the Veterans Administration Physician and Dentist Pay Comparability Act of 1975, Public Law 94–123, as amended by Public Law 94–581, although supported by the Veterans of Foreign Wars, is at best stop-gap legislation which due to continuing inequities falls short of its intended goal. Another of our priority goals is to seek enactment of permanent legislation to establish salary levels more attractive to VA health care personnel.

There is no doubt the "Bonus Bill," as it is commonly known, has had a desirable effect upon the recruiting and, in particular, the retention of VA physicians and dentists. However, not everyone is in agreement with respect to the extent of success of the program. While according to Senate Report 94–1206, VA full-time physician strength reached an all time high of 5,815, Senate Committee Print No. 66 states the largest employment increase, 87 percent, has been in part-time physicians. Of great concern to the V.F.W. is the fact that 31 percent of all physicians within the Veterans Administration are foreign medical graduates. This growing trend toward dependence upon foreign medical graduates is disturbing. Their formal qualifications are definitely less than those of American-educated physicians and too often a language barrier exists which must be a detriment to the treatment and well-being of the patient.

In view of the foregoing, steps must be taken to authorize pay scales to motivate graduates of American medical schools to

eagerly seek permanent full-time employment within the Veterans Administration. Recent federal pay increases raising top salaries for VA physicians to $47,500 per annum should nearly eradicate retention problems. However, some form of permanent additional incentive plan must be forthcoming for recruiting purposes and retention within critical specialties. Perhaps waiver of the Dual Compensation Act for retired Armed Forces physicians permitted within the Department of Defense might be the answer. As a comparison, permit me to quote from an article in the October 18, 1976 edition of Medical Economics by its Senior Editor, Arthur Owens; namely, ". . . a majority of office based M.D.'s now pull down at least $58,000 annually, after professional expenses. . . ." Mr. Owens obviously refers to general practitioners; not specialists, or surgeons, whose special skills rightly cost more.

Notwithstanding the high quality professional care rendered by the vast majority of dedicated Veterans Administration health care personnel, serious nagging problems continue to exist throughout the hospital and medical care system. For example, the concerted effort to phase-out of the VA system care for our nonservice-connected disabled veterans, understaffed and underfunded ambulatory care programs, undue affiliated medical school influence in VA hospitals and the continuing untenable bed occupancy rate of 83 percent throughout the 172 VA hospital system. With 17 percent of the beds constantly unoccupied it is the same as having closed down 29 hospitals each and every month while veterans in need of care are turned away by admitting physicians—even dropping dead shortly thereafter. Compounding this dilemma, seven new and one replacement hospital are scheduled to be constructed. For whom? The veterans now denied care, or are we to have instead of 29 empty hospitals, 36 empty hospitals to care for welfare recipients under a national health insurance program? We believe many veterans in need of hospitalization are turned away by admitting physicians. If not, why the following acceptance rates? Albany, N.Y. 55.2%, Cleveland, Ohio 58.6%, Huntington, W. Va. 59.7%, Jackson, Miss. 44.9%, Kansas City, Mo. 58.7%, New York, N.Y. 59.9%, West Haven, Conn. 41.5%—seven hospitals below 60%. Obviously, one reason is that the revision of bed designations; i.e., general medical, surgical and psychiatric is long overdue. We have no position regarding the various national health insurance programs before Congress other than they shall not invade the VA hospital and medical care facilities. If all empty beds within the system are not filled by veterans who need and apply for hospitalization, then those beds should be allocated to the dependents of 100% permanently and totally disabled veterans—those with the most need and most deserving.

The elderly veteran is a fast-growing quandary, now spoken of as the "graying of America." The average age of all American veterans is 47 years. Almost half of our 29.7 million veterans, 13.3 million, are between 50 and 60, 2.3 million are over 65, and 123,000 are 85 and over. Many are widowers with no close kin or, most unfortunately, children who do not want the responsibility of caring for those who reared them and cannot afford placing them even in substandard nursing homes.

Needless to say, the 18.5 thousand VA, community and state nursing home beds and the 18.4 thousand VA, and state home domiciliary accommodations will not meet the growing need. I commend this Committee for having advanced legislation to increase combined grants to state nursing homes and domiciliaries from $10 million to $15 million per annum, but this is only a small step in the right direction. Unfortunately, we have entered an "enlightened" age wherein people abandon their senile parents in the emergency rooms of community hospitals. No law can make these people properly care for their aged parents even if the "children" can be identified. In such an atmosphere, alien to most of us, we cannot let our honored veterns be cast aside. We must now make provisions for them. It is, indeed, a sad commentary that the government must now make provisions for our heretofore honored and aged heroes who are too much burden for their children whom they reared and nurtured; but such is the case.

While on this subject, I congratulate this Committee for having shepherded through the House legislation which became Public Law 94–417, increasing payments to state veterans homes. The per diem rate increases, from $4.50 to $5.50 for domiciliary care, $6.00 to $10.50 for nursing home care, and from $10.00 to $11.50 for hospital care retroactive to January 1, 1976, was both welcome and needed.

The Third Concurrent Budget Resolution reduced to $18.1 billion the $19.5 billion authorized for the Veterans Administration in the Second Concurrent Resolution for the Fiscal Year 1977 ending September 30, 1977. Most of this reduction is attributable to the over-estimate in GI bill participation. However, President Carter's proposed VA Budget for the Fiscal Year 1978, commencing October 1, 1977, is $19.1 billion. We believe this proposed budget understates the need by at least $1.5 billion and should be approximately $20.6 billion. The President's recommended compensation increase of 4.9 percent effective October 1, 1977 and pension increase of 5.3 percent effective January 1, 1978, both fall short of a realistic six percent. No provision has been made for a cost-of-living increase for our Vietnam veterans availing themselves of the GI bill and it is needed. These shortages represent another $229 million to be added to the budget. The budget also contains a false savings of $266 million in proposed negative legislation to take away benefits which this Committee has repeatedly refused to do. In addition, the budget contains no funds for either new legislative initiatives or a meaningful restructuring of the pension program. We will include these items in our testimony before the Appropriations Committee.

Another area of deep concern to the V.F.W. is the President's request for an extension of the Reorganization Act of 1949, which lapsed for the fourth time in 1973. Under the authority requested the President could transfer all or any part of an agency or its functions to another agency; abolish all or part of the functions of an agency; consolidate all or part of an agency; or change the name of an agency or the title of its head, among other measures, unless either House of Congress adopts a resolution opposing the plan before Congress has been in continuous session for 60 calendar days. Inasmuch as the Veterans Administration is an agency, we would much prefer that the President be required to submit legislation to Congress to be voted up or down following appropriate hearings. Our fears in this area are not unfounded since when the President was Governor of Georgia his reorganization bill to the state legislature called for combining the Georgia State Department of Veterans' Services with Human Resources. Only an outpouring of protest from the veterans' organizations in Georgia prevented this from happening. To be forewarned is to be forearmed and we must be vigilant and prepared to act quickly, if such dehumanizing of our veterans is proposed.

We would hope this Committee will hold oversight hearings during the 95th Congress with respect to the failure of the Department of Labor to carry out the mandates of Congress with respect to veterans' unemployment; particularly so in view of the new Help Through Industrial Retraining and Employment Program (HIRE).

I trust that each of you will be with us tonight at our annual Congressional Banquet at the Sheraton-Park Hotel. We will be honoring the Honorable Herman E. Talmadge of Georgia, Chairman of the Agriculture and Forestry Committee of the United States Senate and also an outstanding member of the Senate Veterans' Affairs Committee. The reception will begin at 6:00 P.M. with dinner promptly at 7:00 P.M. I want to assure you our program will conclude around 9:15 P.M.

FOOD ADDITIVES AMENDMENTS OF 1977

HON. CLARENCE J. BROWN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, March 21, 1977

Mr. BROWN of Ohio. Mr. Speaker, on March 17, 1977, I introduced H.R. 5173, the Food Additives Amendment of 1977 which will address the problems experienced as a result of the inflexibility of the Delaney clause.

While I support the Delaney clause, which requires the FDA to ban cancer-causing food additives, I have long been critical of the absolute nature of the law which allows no governmental discretion and has now led to the banning of saccharin. Such judgment of the validity of tests and balancing risks with benefits is now permitted and exercised by FDA in its review of medicines and drugs.

I made these very points in my additional views to a 1972 House Government Operations Committee report, in which I stated:

As a matter of fact, the Delaney clause does not provide the latitude with reference to additives in the food supply which our laws permit in the case of medicinal drugs. And a crisis may be brewing as a result, for those in our nation afflicted with a specific disease: diabetes. An increasing number of prohibitions under the Delaney clause of artificial sweetener food additives will gradually reduce the options of those who suffer from diabetes. In their case, the Delaney clause does not allow for the medicinal advantages of a food additive.

The Food Additives Amendment of 1977 adds an additional anticancer clause. It does not change one word in the present clause. Rather, it authorizes approval of a food additive that is found to induce cancer only in test animals if it is determined that there is no significant risk to human health.

The bill establishes six criteria for determining the potential to human health. Four of these criteria relate to scientific issues—the totality of the available scientific data and information, the levels at which the additive was tested in animals as compared with the levels at which humans would ingest the additive, the scientific validity of the animal tests, and current knowledge about the reliability of the animal test in predicting human cancer. The remaining two criteria relate to the availability and safety of alternative ingredients to serve the same function, and the usefulness of that function in terms of human nutrition, dietary management of disease, and the cost, availability, and acceptability of food.

The bill is therefore a very carefully drawn, narrow exception to the Delaney clause. It would allow important food ingredients which have been found to induce cancer in animals but not in man, such as vitamins and artificial sweeteners, to continue to be used. But it would not undermine the basic protection of the Delaney clause against approval of food additives which have been shown to induce cancer in animals and which are not at all important to the food supply. It follows the lead of all recent Federal safety statutes by permittting the balancing of benefits and risks and requiring consideration of comparative risks before action is taken.

No one anticipated, when the Delaney clause was enacted in 1958, that it might later result in the banning of essential vitamins and minerals and other food ingredients that are extremely important in the daily diet. It is time to make sure that the Delaney clause is modernized so that it will continue to achieve the admirable purposes for which it was enacted.

The bill follows:

H.R. —

A Bill To Amend the Federal Food, Drug, and Cosmetic Act with respect to food additives

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act be cited as the "Food Additives Amendment of 1977."

SEC. 2. Section 409(c)(3)(A) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 348(c)(3)(A)) is amended by striking the word "or" at the end thereof and inserting in lieu thereof:

"and *Provided Further,* That the Secretary shall establish a regulation pursuant to subsection (c)(1)(A) for any additive found to induce cancer in animals if he determines that such additive does not present a significant risk to human health, taking into account (i) the totality of all scientific data and information available on the additive, including human experience, (ii) the relationship between the amounts of the additive found to induce cancer in animals and the amounts which humans can reasonably be expected to ingest, (iii) the scientific validity of the animal test in which the additive was found to induce cancer, including consideration of the design and execution of the protocol, the analysis of the test results, and other conditions of testing, (iv) current knowledge about the reliability in predicting human cancer of the animal test in which the additive was found to induce cancer, (v) the availability and safety of alternative ingredients to serve the same function in food, and (vi) the usefulness of the function performed by the additive in food in terms of nutrition, dietary management of disease, and the cost, availability, and acceptability of food; or"

AN UNCOMMONLY BAD BILL

HON. JOHN N. ERLENBORN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, March 21, 1977

Mr. ERLENBORN. Mr. Speaker, on Wednesday, this House is once more scheduled to consider a bill to legalize common situs picketing. The criticisms of this proposal are many, but two prominent newspapers, the New York Times and the Wall Street Journal, recently editorialized succinctly as to why Congress should reject it. I commend these editorials to my colleagues:

[From the New York Times, Mar. 12, 1977]

AN UNCOMMONLY BAD BILL

The "common situs" picketing bill is back again in Congress, not as an Administration bill this year but with strong support from the A.F.L.-C.I.O. leadership and, not surprisingly, from legislators with ties to organized labor. Though altered in committee to provide certain moderating exemptions, the present bill, like the one President Ford vetoed in 1976, would permit the employees of one contractor on a building project to set up picket lines to keep members of other unions from working anywhere on the site.

The bill would accomplish this objective by making secondary labor boycotts legal in the construction industry. In 1976, then Secretary of Labor John Dunlop strongly supported the measure because it was coupled with a bill that advanced labor stabilization in the industry. Mr. Dunlop, in fact, resigned to protest the Presidential veto. The present bill lacks even the attraction it had for Mr. Dunlop and we hope it will not pass. A common situs law would make construction labor even more volatile than in the past; and increase building costs.

Proponents of the bill argue that if the building trades constituted a single union, a picket line would inevitably keep all its members off a struck site. Thus, they say, the common situs bill merely gives these workers the protection they would have if they chose to organize on an industry-wide basis.

This point is not persuasive. If all the building workers on a site were members of the same local, its leaders would surely hesitate before throwing up a picket line that would inconvenience all of its members for the benefit of a few. In any event, the building trades unions have had the same opportunity as other workers to coalesce into a single union. Since they have chosen to continue their separateness, why bless them legally with the benefits of the togetherness which they have rejected?

Shrinkage in the share of construction work now done by union labor has stimulated the demand for common situs picketing. The reason for the shrinkage, however, arises not from the lack of such a bill, but rather from the great differential between the cost of union and nonunion construction labor. By threatening to raise the cost of union labor still higher, the common situs bill would only invite builders to use more nonunion workers. The Congress and the President will, in this case, be helping labor best by ignoring the counsels of its leadership.

[From the Wall Street Journal, Mar. 17, 1977]

COMMON SITUS AND IOU'S

Last year President Ford vetoed the "common situs" picketing bill, but it is back again and President Carter said he will sign it if it is passed by Congress. The likelihood of that is generally considered excellent because a good many Congressmen feel dependent on organized labor for their election victories.

Common situs is only one of the AFL–CIO's IOUs. Among the other items on its list are repeal of section 14-b of Taft-Hartley, which allows states to enact right-to-work laws prohibiting compulsory union membership as a condition of employment; raising the minimum wage from $2.30 an hour to $3, and revising the Hatch Act, which prohibits federal workers from partisan politics.

Most of the changes would enhance organized labor's existing privileged position within the U.S. economy, and common situs is a case in point. What the bill would do is legalize secondary boycotts in the construction industry, something that has been illegal since 1951 when the Supreme Court ruled that "unoffending secondary employers should be shielded from pressures and controversies not their own."

Advocates claim that the bill would merely put construction workers on a par with all other unionists, who can shut down projects during strikes. In fact, however, the construction industry is unique in that upwards of 20 different unions often work on the same projects, each having a contract with a different employer. If one union walks out in a dispute now, others continue working. But with the common situs bill, those "unoffending" innocent third parties would be drawn into the line of fire for no purpose other than to strengthen the construction unions.

The net effect of this bill, of course, will be to hike the already high cost of construction union labor, which will be passed on in increased building price tags. A Congress that professes to be concerned about the skyrocketing costs of home construction might consider what this would do to raise them even higher. It might also consider what the growing trend toward nonunion construction labor, which would be accelerated by this bill, would do to minority unionists who are generally low in seniority.

It would seem that construction unions are intent on slitting their own throats in pressing for passage of this bill. Such suicidal impulses are not entirely unknown—recall how New York newspaper unions forced through unreasonable work rules and mammoth pay hikes even as one newspaper after another folded beneath them. But the unions no doubt feel they can avoid this fate if they can also win repeal of right-to-work from Congress. That is, they hope to dispose of the problem of nonunion labor by forcing all workers into unions.

None of this is likely to help minority workers or middle class families struggling not to be priced out of the housing market. But it does show how easy it is for legislators beholden to organized labor to define the public interest in terms of the interests of their benefactors.

KASTEN INTRODUCES SIX-POINT AGRICULTURE PROGRAMS

HON. ROBERT W. KASTEN, JR.

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Monday, March 21, 1977

Mr. KASTEN. Mr. Speaker, today, March 21, people across this Nation are celebrating Agriculture Day. In Wisconsin, the entire week has been set aside to recognize the key role of the American farmer in our society and his contributions to our economic well-being.

Farming is the Nation's oldest business, and certainly one of its most successful. Agriculture nurtured the colonies and provided the basis for a national economy. The lure of the land drew early settlers West to build and expand a nation. Agriculture developed into a full-fledged industry, capable of feeding not only this Nation's citizens, but millions around the world.

Throughout that process the American farmer stood strong, honest, hard-working, and independent. He survived hardships which other businessmen have never had to face: the vagaries of the weather; wide fluctuations in market prices, and the misconceptions of a large block of consumers.

AGRICULTURE SUCCESS

Much of our success as a nation can be tied to the success of American agriculture. The accomplishments of our agricultural system during the 1970's are significant:

Total acreage for major crops has risen from 291 million acres in 1969 to 355 million estimated for 1976.

Farm exports have risen from $6.7 billion in 1970 to well over $20 billion in 1976.

The proportion of farm income resulting from Government payment has dropped from 27 percent in 1969 to just 2 percent in 1975.

Because of the dedication and perseverance of the farmer, American consumers spend a lower percentage of their disposable income on food than any other people in the world. At the same time, Americans are able to improve their diets and satisfy their appetites with a wide variety of high quality meats, vegetables, fruits, and dairy products.

While agriculture is important to the economic well-being of the Nation, it is absolutely essential to the economic health of Wisconsin. Statistics supplied by the U.S. Department of Agriculture show that in 1976, Wisconsin had 103,000 farms containing 19.4 million acres. In 1975, Wisconsin farmers earned over $2.66 billion. The five leading commodities for cash receipts in 1975 were dairy products, calves, hogs, corn, and potatoes.

While the farmer's life has never been easy, it has become increasingly difficult in recent years for reasons largely beyond his control. Today he confronts one of the most severe economic crises in history. He is caught in double jeopardy by escalating production costs and declining prices. Drought conditions throughout much of the farm belt have compounded the difficulties. Unless remedial action is taken soon, many farmers will be forced to abandon their business, and our Nation's food supply will be dangerously threatened.

The dairy farmer in particular faces the threat of unfair competition with low-priced dairy imports. And all farmers are hampered by the burdens of the Federal Government—namely, the paperwork burden of the Agriculture Census, the cumbersome regulatory process, and inequities in the new estate tax bill.

As part of a continuing effort to avert such a tragedy, I am today introducing a six-part legislative program which I believe will bring much needed assistance to the farmer without further tying his hands with unnecessary Government regulations.

I. DAIRY PRICE SUPPORTS

A healthy, viable dairy industry is essential to the farm economy and that of the Nation. Few, if any, farm commodities are more widely used and more widely produced than milk.

The dairy industry is one of Wisconsin's largest industries. When it suffers, so does the State and indeed every consumer in America. Several years ago the industry was caught in a severe cost-price squeeze, forcing many Wisconsin dairymen out of business. One of the first bills I introduced as a freshman Congressman was designed to assist the dairymen by increasing the dairy price support level and by providing for quarterly adjustments of price support levels.

While the urgency which prompted my original sponsorship of the bill has subsided, the need for legislation remains.

The bill I am introducing today would require by law quarterly adjustments of the support price of milk to reflect any change in the index of prices paid by farmers for production items. While quarterly adjustments are occurring because of an administrative decision of former Secretary Butz, I believe such adjustments should be required by law and not left to the discretion of the Secretary.

I am also pleased to note that the Department of Agriculture will soon be recommending an increase in milk price supports. I am pleased that the new administration recognizes the importance of this issue to the dairy industry.

The requirement for quarterly price adjustments assures dairy farmers that the milk support price, which serves as a floor for the milk price, reflects costs on a more current basis. Farmers are able to estimate the minimum level of purchasing power that the milk they produce will give them over the next year. It serves to stabilize the production of milk and alleviates some of the farmer's uncertainty. It also alleviates the shocks created by large yearly adjustments in the support level and helps avoid milk shortages which cause sharp increases in consumer prices.

II. UNIFORM CONSUMER DAIRY SANITATION ACT

The second major part of my legislative program is a bill forbidding the importation into the United States of dairy products that are manufactured under unsanitary conditions.

A definite threat to the health of the consumer is posed by the importation of unsanitary dairy products. Also, there is an increased danger of unfair competition due to the generally lower prices of imported dairy products. This low cost is at least partially attributable to the fact that many foreign manufacturers do not have to meet the expensive sanitary procedures required of domestic producers and dairymen.

The Uniform Consumer Dairy Sanitation Act would require foreign dairy products sold in the United States to meet sanitation standards equal to the minimum requirements now in effect for domestic producers in each of the States.

The bill establishes a licensing system to monitor any foreign milk products entering this country. A foreign milk processing plant wishing to export milk products to the United States would apply for a license from the Department of Agriculture. Granting of the license would be conditioned on the plant's meeting the same sanitary conditions applied in domestic plants selling goods in interstate commerce.

The plants would be inspected as well as their products upon their entry into the United States.

Passage of this legislation would insure greater protection to the American consumer and equalize competition between domestic and foreign producers.

III. AGRICULTURE CENSUS

While farmers can meet the challenges of weather or adverse market conditions, they have little tolerance for the burdens imposed by the Federal Government. A good example is the agriculture census which every 5 years imposes on the time and energy of the Nation's farmers. Under threat of criminal prosecution, farmers are forced to complete long and complicated forms.

The third part of my farm program would eliminate this cumbersome, time-consuming paperwork burden by streamlining the agricultural census.

My bill would require the Commerce Department to conduct the 5-year census by means of a statistical sample, similar to the present 10-year population census. Farmers would be required to provide limited information with the major portion collected by sample.

Certainly, there is a need to compile vital agricultural information, but by streamlining the agricultural census we would be able to increase governmental efficiency, save tax dollars, and reduce the burden placed upon the farmer.

IV. FEDERAL-STATE MEAT INSPECTION

Another important issue of concern to the agricultural community relates to the status of meat inspection programs now administered by the States.

The Wholesale Meat Act which originally passed in 1906 gives the Federal Government responsibility for inspection of meat suppliers engaging in interstate commerce. Currently the Government's meat inspection programs are administered by the Department of Agriculture. Under amendments added to the act in 1967 the USDA Meat Inspection Service can enter into cooperative programs with States whereby a State is permitted to administer its own program and be reimbursed by the Federal Government up to 50 percent of the program's cost.

In order to have its own program, a State must assure USDA that it has developed rules and regulations which are at least equal to minimum Federal requirements. A State-administered program is superior because it can be more responsive to the needs and problems within individual communities. By its very nature, a Federal program, designed to cover all situations, will be less attuned to the requirements of communities and individual suppliers.

Unfortunately, in recent years, many States have abandoned their own programs, thus leaving the task to the Federal Government. The reason for this is purely economic—State budgets have been squeezed to the point where it becomes necessary to abandon programs. The result is that 100 percent of the costs must be paid by the Feedral Government.

I would not want to see this situation develop in Wisconsin, which currently has a State-administered meat inspection program. This would place the entire burden upon the Federal Government, and would leave plant owners to contend with an unknown bureaucracy.

To prevent this situation from occurring in Wisconsin or in other States, I

am introducing legislation which would increase the Federal share of the meat inspection program from 50 to 80 percent. Enactment of this bill would not only encourage States to retain their programs; in the long run, it would save Federal funds.

For the current fiscal year, the State of Wisconsin has budgeted $1.2 million for its meat inspection program. Fifty percent of this total will be reimbursed by the Federal Government. Under my proposal for 80–20 funding, the Federal share would increase from $600,000 to $960,000. Such a short-range increase would provide much greater assurance that the State could continue the long-range support of its own program.

V. ESTATE TAX

The Tax Reform Act of 1976 brought about the first major changes in almost 30 years to the Federal estate tax laws. To the family farmer and small businessman, these changes were long overdue.

I would hope, however, that Congress is not content with its past actions and will seek further improvements in our Federal estate tax laws. I am introducing two bills which I believe will improve the application of the estate tax.

The first bill would repeal section 2005 of Public Law 94–455, the so-called carry-over basis provision. In its place, my bill would reinstate the provisions of the tax code which existed prior to enactment of the Tax Reform Act of 1976. This would require that the capital gains tax on inherited property be based on the value of the property when it was transferred to an heir, not when bought by the deceased.

The "carry-over basis provision" is a step away from tax reform, not toward it. If the present law remains, its impact will be most seriously felt by the small farmer or family owned business. I believe my bill to repeal section 2005 and return to the former law is a necessary step toward a more equitable estate tax law.

My second bill is patterned after an amendment I had hoped to offer to last year's tax bill, but the parliamentary situation at the time prohibited my doing so.

One of my original concerns with Federal estate tax reform was the failure of the law to recognize joint tenancies by allowing a wife to exclude her share of the property from the value of her husband's estate. While the Tax Reform Act partially addressed this inequity by allowing half of a jointly held property to be excluded from the estate tax law, it did so by offering a tradeoff that could be worse than the original illness.

Under provisions of the new law, the allowance for exclusion of the wife's half of the property is only under the condition that after December 31, 1976, the husband and wife elect to create a joint tenancy, and elect to take the tax liability of transferring a gift to each other. They are subject to the gift tax liability even if they already have established joint tenancy under State law.

In other words, even if the property is already jointly owned, we are saying, "You have a choice; the Federal Government will tax your joint property now; or we will tax it twice later, once when your husband dies and again when you die."

It is patently unfair to impose a gift tax on that which is not a gift, but is joint property owned half by each.

My bill would eliminate the gift tax election and redefine a "qualified joint interest" as any joint tenancy between a husband and wife applicable to all estate after December 31, 1976.

It is not my intention to establish Federal guidelines as to what kind of interests can qualify as jointly held property. That is a legal question that varies widely from State to State. I believe the Federal role should be to give recognition to State laws in this regard by allowing exclusion of the spouse's interest where a joint tenancy exists in accordance with State law.

CONCLUSION

Mr. Speaker, enactment of the program I have just outlined would make a significant contribution to the agricultural community of this Nation. Anything we do to support the farmer and enhance his productivity will greatly benefit the interests of all Americans, and indeed the millions of people around the world who depend on American agriculture to feed their families.

The American farmer has contributed so much to America's growth, often under adverse circumstances, that it seems only right for our Government to adopt programs which will make that task a little easier.

CHEMICAL WEAPONS ARMS CONTROL

HON. RICHARD T. SCHULZE

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 21, 1977

Mr. SCHULZE. Mr. Speaker, on February 8 I submitted for the RECORD a statement on chemical weapons arms control and a resolution which was intended to urge the destruction of chemical weapons stockpiles and the banning of future production of chemical weapons on a worldwide scale. I urge my colleagues to read that statement.

Because of the importance I place in the accomplishment of this proposal to reduce chemical weapons, I am today, along with Senator WEICKER, reintroducing that resolution.

The good of mankind cannot be served by the continuation of an uncontrollable arms race. Something must be done, however slight, to begin to turn words into action in the area of arms control and disarmament. I believe this resolution will be a positive step toward meaningful arms control.

The text of our joint statement is as follows:

JOINT STATEMENT OF SENATOR LOWELL WEICKER REPUBLICAN OF CONNECTICUT AND REPRESENTATIVE RICHARD T. SCHULZE REPUBLICAN OF PENNSYLVANIA

The new Administration has energetically committed itself to a very noble purpose—the elimination of all nuclear weapons from the earth. Although the intent of the Administration is admirable, we feel it is unrealistic in the foreseeable future. Instead, we urge the President to direct initial disarmament at a level where success is attainable and hopefully will act as a stepping stone to resolving the overall issue of world nuclear disarmament.

Today we are introducing a joint resolution urging the destruction of chemical weapons stockpiles and the banning of future production of chemical weapons by all nations of the world.

This is the first major congressional initiative calling for the reduction of chemical weapons stockpiles. It places Congress on record as favoring an international treaty to control these weapons and challenges the Soviets to initiate similar weapons reduction. The Schulze-Weicker proposal sets as the highest priority for the nations of the world the question of weapons control and disarmament.

In discussions with Pentagon officials, a number of points were conceded:

1. The Soviet Union has expended substantial time, energy, and money in development of an extensive chemical capability.

2. The tactical advantages of chemical weapons are minimal.

3. Planning for the defense against chemical weapon attack on civilian population has become a nightmare.

Beyond the capabilities of the two super powers, one must consider the third world nations. In many smaller nations where a nuclear capability is nonexistent, chemical weapons, present an attractive alternative to threaten neighboring nations whose chemical and medical defenses are inadequate or do not exist.

Chemical weapons are easier to produce, hide and use, than other weapons. The details of the chemistry of chemical agents is common knowledge. The technology for producing chemical weapons is available. This available technology along with existing chemical weapons stockpiles, poses the danger of chemical weapon proliferation throughout the non-nuclear world community. And, the frightening possibility exists that politically motivated, well-financed terrorists organizations can secure lethal chemical weapons and create global havoc. The importance of this pending threat cannot be under estimated.

Chemical weapons have no limits. They can be used any time, any where, under any circumstances. They do not discriminate between soldiers or civilians—innocent men, women, or children.

The United States must take the leadership role in seeking an arms control agreement on chemical weapons and force the Soviet Union to reveal its true position. Currently in Geneva, the Conference of the Committee on Disarmament (CCD), is discussing an international treaty to ban chemical weapons. At the Conference, several proposals for the control of chemical weapons have been made. But due to a number of problems, including Third-World distrust of big power deals and verification of the destruction of stockpiled chemicals the talks have not produced meaningful results. We believe that our resolution can set an example for the world that will demonstrate that the United States is indeed concerned with the future of chemical weapons control and willing to take a positive step to demonstrate the importance we place on an intended treaty banning chemical weapons.

A thousand mile journey begins with one step. We believe that the destruction of chemical weapons will be that one positive step towards meaningful arms control and a peaceful world.

The text of our resolution is as follows:

H. CON. RES. —

CONCURRENT RESOLUTION TO URGE THE PRESIDENT TO REDUCE THE RISK OF CHEMICAL WARFARE

Resolved by the House of Representatives (the Senate concurring), That the Congress finds that—

(1) the policy of the United States is not to make first use of lethal and incapacitating chemical weapons in war;

(2) in 1972 the United States signed the Convention on the Prohibition of the Development, Production, and Stockpiling of Bacteriological (Biological) and Toxin Weapons and on their Destruction, and such Convention declared that "each State Party to the Convention affirms the recognized objective of effective prohibition of chemical weapons and, to this end, undertakes to continue negotiations in good faith with a view to reaching early agreement on effective measures for the prohibition of their development, production, and stockpiling and for their destruction";

(3) in 1975 the United States ratified the Geneva protocol prohibiting the use of chemical and biological weapons in warfare; and

(4) the United States supports the continuing negotiations being conducted by the Conference of the Committee on Disarmament toward this end of an effective chemical weapons treaty.

SEC. 2. It is the sense of the Congress that—

(1) the President should declare a moratorium of three years on the further United States manufacture of lethal and incapacitating nerve and mustard agents and the so-called binary agents;

(2) the President, as a sign of good faith to the world, should order the destruction of three thousand tons of lethal chemical mustard agents from existing U.S. stockpiles over the three years of such moratorium, and invite interested international organizations, such as the Conference of the Committee on Disarmament to send delegations to view the destruction process;

(3) the President should invite the Union of Soviet Socialist Republics and other nations which possess quantities of lethal chemical weapons to indicate their sincerity in seeking a chemical weapons treaty by following the example of the United States, and should urge the Third World Nations to refrain from seeking the introduction of chemical weapons into their arsenals; and

(4) the President should urge the participants of the Conference of the Committee on Disarmament to rapidly conclude an international treaty banning the manufacture and possession of lethal chemical weapons. Such a treaty, in order to be meaningful, should provide for the destruction of existing stocks and production facilities over a specified period of time. Such a treaty must also provide verifying the disposal of stocks and facilities, investigating and challenging suspect activities, and establishing on-site inspections.

DNA OR PLUTONIUM—NAME YOUR POISON

HON. RICHARD L. OTTINGER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, March 21, 1977

Mr. OTTINGER. Mr. Speaker, George F. Will wrote an extremely interesting article which appeared in the Washington Post of Sunday, March 20, entitled "DNA-Splicing, AKA Progress."

In his very thoughtful article Mr. Will discusses the public policy questions raised by recombinant DNA research, that genetic engineering which has aroused so much interest of late. Indeed, legislation which I introduced along with bills sponsored by numerous of my colleagues were the cause of hearings held last week before Chairman ROGERS' Subcommittee on Health and the Environment.

As Mr. Will points out:

Whether, or under what conditions, molecular biologists should intervene in the evolutionary process is, properly, a political, not a biological, question.

I agree, wholeheartedly.

Toward the end of his article, Mr. Will moves to another subject of great importance: nuclear waste. Here he very concisely suggests that we may well be presuming a stable society well beyond history's ability. He asks, "Can mankind rest assured that it will be immune until 251,976 A.D.?"—the length of time plutonium we are now generating will remain toxic.

The only connection between DNA research and plutonium disposal which Mr. Will fails to recognize, I think, is that if we had had a public, political discussion of nuclear development such as is now going on regarding recombinant DNA, we might not be in the nuclear pickle in which we now find ourselves.

Mr. Will's article is thought provoking, and deserves the attention of my colleagues:

[From the Washington Post, Mar. 20, 1977]

DNA-SPLICING, AKA PROGRESS

(By George F. Will)

The pace of scientific achievement is accelerating, and government's ability to cope with it is not. Today recombinant DNA research—the recombining of genetic materials to create new forms of life—raises the question posed by the poet Valery: "Can the human mind master what the human mind has made?"

DNA is the material by which heredity is programed in all living things. Gene-splicing, or "genetic engineering," transplanting selected genes from one organism into another, began less than a decade ago. It is occurring at approximately 100 U.S. locations, and many more worldwide. George Wald, a Nobel Prize winner who opposes such research, calls it, not without reason, "the biggest break with nature that has occurred in human history."

Such research may produce great benefits or injuries, or both. Benefits could include progress against genetic diseases or viral cancer. There could be new forms of life useful in agriculture (a "superwheat," or plants that produce their own fertilizer) and in combating pollution (an organism that "eats" oil spills). Injuries could include the devastation of the planet by new microbes that cause new diseases in people or plants.

Man can now play Creator, but when he begins "engineering" new life he cannot know exactly what his creation will be. He may be inventing a new cure or a new disease. Nevertheless, some scientists feel that it is impudent for government to scrutinize as well as subsidize their enterprises.

But whether, or under what conditions, molecular biologists should intervene in the evolutionary process is, properly, a political, not a biological, question. It involves society's safety and values. Professor Stephen Toulmin, a philosopher of science, says:

"I can think of no prior case in which the actual conduct of experiments in a basic natural science itself directly posed a threat of general public harm. . . . The very heart of the DNA problem is the fact that any 'rogue' agents produced artificially . . . will have the power to multiply themselves and spread throughout the population at large."

Last June, the National Institute of Health issued guidelines governing the DNA research it funds. Researchers have shown responsibility about self-regulation, including a moratorium on certain kinds of projects. But it is reasonable to expect this nation, which has so much to gain or lose from recombinant DNA, to adopt national regulation of it. Without national regulation, there will be a quilt-work of local regulations, including some prohibitions.

Government regulation provokes opposition in the name of "academic freedom" or "the autonomy of science." But civilization will not be dashed on the rocks if some scientific enterprises are regulated to prevent damage—physical or moral—to the community. (Some serious persons argue that various experiments, including some on fetuses, damage society's moral sensibility.) The scientist's crucial freedom is to pursue and publish the truth without restrictions based on narrow ideological reasons.

Unfortunately, chances for calamitous human errors are increasing exponentially: a bright high school student can practice gene-splicing. And biology is not the only source of staggering new problems.

On my desk is a court opinion in an environmental case. It concerns the disposal of waste from nuclear power plants. Of special concern is plutonium, a microscopic particle of which, inhaled, may cause cancer. The half-life of plutonium is 25,000 years and it is not harmless for 250,000 years.

Even the most sophisticated technology for storing plutonium would require some surveillance and maintenance. The court notes, rather drolly, that Neanderthal man appeared "only" 75,000 years ago, and that when we talk about a 250,000-year commitment for storing plutonium, "the problems involved are not merely technical, but involve basic philosophical issues concerning man's ability to make commitments which will require stable social structures for unprecedented periods."

Unprecedented? "Institutional arrangements do not exist and never have existed to guarantee the monitoring or attendance upon storage facilities over a millenium." A millenium? That falls 249,000 years short.

Suppose wastes were stored in those salt beds in Lyons, Kansas. Meaning no offense to Lyons, which has been immune to modern turbulence, we must wonder: Can mankind rest assured that it will be immune until 251,976 A.D.? It is enough to make you think progress has gone on too long.

BILL TO AMEND TARIFF SCHEDULES OF THE UNITED STATES

HON. RAYMOND F. LEDERER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 21, 1977

Mr. LEDERER. Mr. Speaker, I am introducing today a bill to amend the tariff schedules of the United States with respect to the tariff treatment accorded to rectangular plastic sheets manufactured from acrylic resins. I am motivated to do so in order that an artificial practice of tariff classification condoned and sanctioned by the U.S. Customs Service will not be permitted to continue unabated in contravention of what I believe to be the intent of the Congress.

The practice of the U.S. Customs Service in classifying acrylic sheet under existing tariff schedules places U.S. manufacturers of acrylic sheet in an intolerable position and subjects these manufacturers to unfair and destructive competition.

A relatively small amount of acrylic

sheet has been imported into the United States with duty properly assessed under item 771.45, TSUS at 8½ cents per pound.

Large quantities of acrylic sheets with one or more holes drilled along the edge of each sheet are now and have for some years been imported under basket item 774.60, TSUS with duty assessed at 8½ percent ad valorem. The bulk of imported sheet is entering the United States on this basis. This favorable classification is accorded imported drilled sheets of acrylic plastic notwithstanding the fact that the holes, which are drilled to bring the sheet under basket item 774.60, TSUS, serve no purpose and are not part of a finishing operation. This classification of drilled acrylic sheet is made under the authority of an interpretation of the U.S. Customs Tariff Schedules issued by Salvatore E. Caramagno, for Leonard Lehman, Assistant Commissioner, Office of Regulations and Rulings, Department of the Treasury, Office of the Commissioner of Customs, January 11, 1973. Mr. Caramagno stated in his decision—

> There is a uniform and established practice . . . to classify acrylic sheets with holes drilled along the edge, no matter what the purpose of the holes, in item 774.60, Tariff Schedules of the United States.

The significance of this rather remarkable ruling can be appreciated when it is understood that acrylic sheet is manufactured and shipped with an untrimmed border. A sheet of acrylic which will ultimately yield a useful 4-by-8 feet sheet is, so to speak, contained within an untrimmed sheet which measures from 50 inches in width and 98 inches to 100 inches in length. It is as though a 4-by-8-foot sheet of plywood were sold with untrimmed edges from 1 to 2 inches in width. This untrimmed border of the acrylic sheet, called "overage" in the trade, can be drilled or otherwise worked in a manner which neither impairs the use of the 4-by-8-foot sheet nor adds any value to that sheet.

In adopting the practice of drilling holes in the perimeter of untrimmed acrylic sheet, importers asserted that headnote 2(iv)(D) of subpart B, part 12 of schedule 7, justified the practice and required that drilled sheets not be classified in item 771.45, TSUS, but in the basket clause item 774.60, TSUS. The Treasury Department accepted this scheme despite the fact that the commodity specialists of the Customs Bureau had earlier rejected it on the ground that the drilling of the holes served no useful purpose and did not contribute to the finishing of the sheet.

In reviewing the 1960 Tariff Classification Study prepared by the U.S. Tariff Commission, I note that the following commentary appears with respect to this headnote:

> The provisions of headnotes 1 and 2 of this subpart treat objectively with the existing problem of differentiating between plastic products which have and have not "been made into finished or partly finished articles."

It should be apparent from this comment that the Congress intended to set forth in headnote 2(iv)(D) the types of processing that would permit an article to be made or transformed into a finished or partly finished article. In the instant case, the drilling is not a stage in processing nor a contribution to end use. It does not serve to advance the sheet to the status of even a partly finished article. It is, in short, a useless as having no useful purpose.

It should be noted that the fringe around the perimeter of acrylic sheet is left on the sheet to enable the fabricator to clamp the sheet in place during forming operations. This protects the useful surface of the sheet from the markoff from the clamp. The utilization of the border of the sheet for this purpose is in part a factor of uniformity and continuity of the border. Drill holes in this border, if they have any effect whatsoever, may contribute to a weakness of the sheet at the drill point and possibly contribute tc failure and accidental release of the sheet when it is clamped in place in the forming operation. Thus the holes drilled in the primeter of the untrimmed acrylic sheet not only do not contribute to the usefulness of the sheet but may actually detract from the usefulness of the untrimmed edge in the fabrication operation.

As if competition through lower rates for sheets drilled with useless holes were not enough of a cross for the American acrylic industry to bear, additional foreign competition in the American market is provided by the U.S. Customs Service practice of classifying acrylic sheet as "flexiblesheet" under item 771.42, TSUS, and by accepting a misdescription of acrylic sheet under item 771.55 TSUS.

In view of the nonspecific descriptions that will be accepted by Customs in clearing acrylic sheet through the U.S. ports, it is not surprising that no exact figures on total imports of acrylic sheet are available. It is estimated that imports of acrylic sheet into the United States amounted to 18 million pounds in 1974—double the amount imported in 1972. It is estimated that of the amount imported in 1974, approximately 11 million pounds entered the United States under improper classifications.

The nonspecificity of the classifications under which the bulk of acrylic sheet is being imported into the United States—classifications other than item 771.45, TSUS—makes it impossible for U.S. manufacturers to ascertain the extent or character of acrylic sheet imports into the United States or to predict what future imports may be. At the same time, this situation permits large quantities of unidentified acrylic sheet to enter the United States from countries enjoying generalized system of preference status. The resulting market situation can only be described as chaotic with the U.S. manufacturers unable to gage the nature or economic base of their foreign competition. It is not surprising that under these conditions large-scale dumping of acrylic sheet emanating from Japan has until recently been prevalent and that such dumping may be continuing.

I submit that an administrative practice which makes it impossible for persons vitally affected by it to determine or predict the status of commercial products governed by it is not acceptable under a constitutional system based on the rule of law. The most elementary considerations of due process require that the laws of trade affecting vital interests of American citizens be understandable, certain and predictable. Those responsible for interpreting the tariff schedules applicable to acrylic sheet had a path clearly marked for them in item 771.45, TSUS. Only by ignoring the clear meaning of words and the clear intent of Congress have they been able to place acrylic sheet in obscure "basket" categories. As a result of this emasculation of congressional intent, foreign producers of acrylic sheet are able to exploit a U.S. market which has been developed slowly, responsibly, and at great expense by American producers.

These essentially opportunistic foreign producers have borne none of the expense for the development of these markets and assume no responsibility for the proper use of acrylic sheet in buildings, mass transit, aircraft, motor vehicles, and other regulated end uses in the United States. Such competition has already resulted in serious manufacturing cutbacks in the acrylic industry in the United States and has reduced employment in acrylic facilities located in my district and in acrylic facilities located in New England, Kentucky, and Tennessee. These unfair competitive conditions will inevitably lead to reduced investment by American manufacturers in research and development of both acrylic technology and of responsible, safe end uses for acrylic products in the American market.

The bill which I offer today will not provide a new tariff classification for acrylic sheet or result in a lower rate for acrylic sheet properly classified under item 771.45, TSUS. This bill will simply rescue the original intent of Congress from the administrative interpretations and practices which have produced intolerable confusion and disastrous consequences in total derogation of the clear intent of the Congress. American industry cannot meet the costs of basic research, of the development of safety standards for appropriate end uses, and of compliance with environmental standards if it cannot know what its competition is and will be, and if it is denied the margin of protection which Congress has clearly and explicitly endeavored to provide.

INTRODUCING A BILL ENTITLED "THE FULL OPPORTUNITY AND SOCIAL ACCOUNTING ACT OF 1977"

HON. EDWARD P. BEARD

OF RHODE ISLAND

IN THE HOUSE OF REPRESENTATIVES

Monday, March 21, 1977

Mr. BEARD of Rhode Island. Mr. Speaker, today I am introducing a bill which I have titled "The Full Opportunity and Social Accounting Act of

1977." This legislation is designed to give us an indepth and clear look at how well we are doing in our efforts to provide a decent life and full opportunity for all our people.

This bill would establish a Council of Social Advisers which would compile the information we must have from all levels of Government, and advise the President on setting national social policies.

Also, it would require the President to submit to Congress an annual report on the state of the Nation's social health, outlining progress made, listing goals for the future, and laying out policies for achieving those objectives.

I point to the success of the Council of Economic Advisers which was established in 1946 as a result of the passage of the Employment Act of 1946 by the Congress. In the 20 years of its existence, the Council of Economic Advisers has been able to respond to every change in the business and industrial climate, no matter how small, and this responsiveness is what I think is needed in the area of social change.

I am indebted to the work of Vice President WALTER F. MONDALE who, as a Senator from Minnesota, pioneered the concept of a social report in 1967.

I present a copy of this bill for the RECORD:

H.R. 2354

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Full Opportunity and Social Accounting Act".

DECLARATION OF POLICY

SEC. 2. In order to promote the general welfare, the Congress declares that it is the continuing policy and responsibility of the Federal Government, consistent with the primary responsibilities of State and local governments and the private sector, to promote and encourage such conditions as will give every American the opportunity to live in decency and dignity, and to provide a clear and precise picture of whether such conditions are promoted and encouraged in such areas as health, education, and training, rehabilitation, housing, vocational opportunities, the arts and humanities, and special assistance for the mentally ill and retarded, the deprived, the abandoned, and the criminal, and by measuring progress in meeting such needs.

SOCIAL REPORT OF THE PRESIDENT

SEC. 3. (a) The President shall transmit to the Congress not later than March 20 of each year a report to be known as the "social report," setting forth (1) the overall progress and effectiveness of Federal efforts designed to carry out the policy declared in section 2 with particular emphasis upon the manner in which such efforts serve to meet national social needs in such areas as health, education and training, rehabilitation, housing, vocational opportunities, the arts and humanities, and special assistance for the mentally ill and retarded, the deprived, the abandoned, and the criminal; (2) a review of State, local and private efforts designed to create the conditions specified in section 2; (3) current and foreseeable needs in the areas served by such efforts and the progress of development of plans to meet such needs; (4) programs and policies for carrying out the policy declared in section 2, together with such recommendations for legislation as he may deem necessary or desirable; and (5) a comprehensive profile of the social, economic and demographic condition of the American people, contrasting these conditions on a small area basis and targeting the most pressing problems in terms of kind of need, magnitude of people affected, severity of the problem and geographic locations of the most heavily impacted areas. This profile shall be presented in formats usable not only by professionals, but comprehensible to nontechnical persons.

(b) The President may transmit from time to time to the Congress reports and supplementary to the social report, each of which shall include such supplementary or revised recommendations as he may deem necessary or desirable to achieve the policy declared in section 2.

(c) The social report, and all supplementary reports transmitted under subsection (b) of this section shall be transmitted to Congress.

COUNCIL OF SOCIAL ADVISERS TO THE PRESIDENT

SEC. 4(a). There is created in the Executive Office of the President a Council of Social Advisers (hereinafter called the Council). The Council shall be composed of five members, four of which shall be appointed by the President, by and with the advice and consent of the Senate, and each of whom shall be a person who as a result of his training, experience, and attainments, is exceptionally qualified to appraise programs and activities of the Government in the light of the policy declared in section 2, and to formulate and recommend programs to carry out such policy. Each member of the Council, other than the Chairman, shall receive compensation at the rate prescribed for level IV of the Executive Schedule by section 5315 of title 5 of the United States Code. The Vice President shall serve as Chairman.

(b) The Chairman of the Council is authorized to employ, and fix the compensation of, such specialists and other experts as may be necessary for the carrying out of its functions under this Act, without regard to the provisions of title 5, United States Code, governing appointments in the competitive service, and without regard to the provisions of chapter 51 and subchapter III of chapter 53 of such title relating to classification and General Schedule pay rates, and is authorized, subject to such provisions, to employ such other officers and employees as may be necessary for carrying out its functions under this Act and fix their compensation in accordance with the provisions of such chapter 51 and subchapter III of chapter 53.

(c) It shall be the duty and function of the Council—

(1) to assist and advise the President in the preparation of the social report;

(2) to gather timely and authoritative information and statistical data concerning developments and programs designed to carry out the policy declared in section 2, both current and prospective, to analyze and interpret such information and data in the light of the policy declared in section 2 and to compile and submit to the President studies relating to such developments and programs;

(3) to appraise the various programs and activities of the Federal Government in the light of the policy declared in section 2 of this Act for the purpose of determining the extent to which such programs and activities contribute to the achievement of such policy, and to make recommendations to the President with respect thereto;

(4) to develop priorities for programs designed to carry out the policy declared in section 2 and recommend to the President the most efficient way to allocate Federal resources and the level of government—Federal, State, or local—best suited to carry out such programs;

(5) to make and furnish such studies, reports thereon, and recommendations with respect to programs, activities, and legislation to carry out the policy declared in section 2 as the President may request; and

(6) to establish an ongoing information system and data center which collects, coordinates and collates data from any and all sources available to the Federal Government which measure the social condition of the United States population at the smallest geographical unit currently available.

(d) Whenever the President determines that information or data developed by the Council pursuant to subsection (c) of this section should be made available to the States and localities he shall provide for the timely dissemination of such information and data to such States and localities.

(e) The Council shall make an annual report to the President in February of each year.

(f) In exercising its powers, functions, and duties under this Act—

(1) The Council may constitute such advisory committees and may consult with such representatives of industry, agriculture, labor consumers, State and local governments, and other groups, organizations, and individuals as it deems advisable; and

(2) The Council shall, to the fullest extent possible, use the information (including statistical information) of other Government agencies as well as private research agencies, in order that duplication of effort and expenses may be avoided.

(g) To enable the Council to exercise its powers, functions, and duties under this Act, there are authorized to be appropriated (except for the salaries of the members and officers and employees of the Council) such sums as may be necessary. For the salaries of the members and salaries of officers and employees of the Council, there is authorized to be appropriated not exceeding $ in the aggregate for each fiscal year.

SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of all meetings when scheduled, and any cancellations or changes in meetings as they occur.

As an interim procedure until the computerization of this information becomes operational, the office of the Senate Daily Digest will prepare such information daily for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD.

Any changes in committee scheduling will be indicated by placement of an asterisk to the left of the name of the unit conducting such meetings.

Meetings scheduled for Tuesday, March 22, may be found in the Daily Digest section of today's RECORD.

The schedule follows:

MEETINGS SCHEDULED

MARCH 23

9:00 a.m.

Armed Services

Research and Development Subcommittee

To resume closed hearings on proposed military procurement authorizations for fiscal year 1978 for weapons systems.

224 Russell Building

Finance
To hold hearings on pending nominations for various positions in the Departments of the Treasury and HEW.
2221 Dirksen Building

Human Resources
Labor Subcommittee
To consider S. 924, to provide for equal treatment of craft and industrial workers, and to establish a national framework for collective bargaining in the construction industry.
Until 2 p.m. 4232 Dirksen Building

9:30 a.m.
Appropriations
Interior Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1978 for the Bureau of Land Management.
1114 Dirksen Building

Commerce, Science, and Transportation
Communications Subcommittee
To hold hearings to inquire into domestic communication common carrier policies (i.e., telephone, computer, etc.).

Commerce, Science, and Transportation
Subcommittee on Aviation
To hold hearings on bills proposing regulatory reform in the air transportation industry, including S. 292 and S. 689.
5110 Dirksen Building

Select Intelligence
To hold a closed business meeting.
S-407 Capitol

10:00 a.m.
Agriculture, Nutrition, and Forestry
To continue hearings on proposed legislation, to amend and extend the Agriculture and Consumer Protection Act, to hear Secretary of Agriculture Bergland.
Until: noon 322 Russell Building

Appropriations
Defense Subcommittee
To hold closed hearings on certain proposed reprogramming of funds for fiscal year 1977.
1223 Dirksen Building

Appropriations
Labor-HEW Subcommittee
To continue hearings on proposal budget estimates for fiscal year 1978 for elementary and secondary education programs.
S-128, Capitol

Banking, Housing, and Urban Affairs
To hold hearings on S. 406, the proposed Community Reinvestment Act.
5902 Dirksen Building

Energy and Natural Resources
Subcommittee on Energy Research and Water Resources
To hold hearings on proposed authorizations for fiscal year 1978 for the Energy Research and Development Administration.
3110 Dirksen Building

Foreign Relations
Foreign Assistance Subcommittee
To hold hearings on proposed legislation to authorize funds for development assistance and contributions to international organizations.
4221 Dirksen Building

Governmental Affairs
Subcommittee on Intergovernmental Relations.
To hold hearings on S. 2, to require reauthorization of Government programs at least every five years (proposed Sunset Act).
6226 Dirksen Building

Governmental Affairs
Energy Subcommittee
To hold hearings on S. 897, to strengthen U.S. policies on nuclear nonproliferation and to reorganize certain nuclear export functions.
3302 Dirksen Building

Select Intelligence
Subcommittee on Budget Authorization
To resume closed hearings on proposed fiscal year 1978 authorizations for Government intelligence activities.
S-407, Capitol

Select Small Business
To hold hearings on S. 972, authorizing the Small Business Administration to make grants to support the development and operation of small business development centers.
Until: 1 p.m. 424 Russell Building

1:30 p.m.
Environment and Public Works
To consider the nominations of James Gustave Speth, of the District of Columbia, to be a Member of the Council on Environmental Quality; and Robert L. Herbst, of Minnesota, to be Assistant Secretary of the Interior for Fish and Wildlife; and to resume consideration of bills proposing amendments to the Clean Air Act (S. 251, 252, 253).
4200 Dirksen Building

2:00 p.m.
Appropriations
Labor-HEW Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1978 for school assistance in Federally affected areas and for emergency school aid.
S-128, Capitol

MARCH 24

9:30 a.m.
Human Resources
Alcoholism and Narcotics Subcommittee
To hold oversight hearings on existing alcohol and drug abuse education programs, and proposed legislation to extend such programs.
Until: 12:30 p.m. 4232 Dirksen Building

Appropriations
Interior Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1978 for the Smithsonian Institution.
1114 Dirksen Building

Commerce, Science, and Transportation
Subcommittee on Aviation
To hold hearings on bills proposing regulatory reform in the air transportation industry, including S. 292 and S. 689.

Select Nutrition and Human Needs
To resume hearings to examine the relationship between diet and health, to receive testimony on beef consumption.
457 Russell Building

10:00 a.m.
Appropriations
Foreign Operations Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1978 for foreign aid programs, to hear officials of AID.
1318 Dirksen Building

Banking, Housing, and Urban Affairs
To hold hearings on S. 406, the proposed Community Reinvestment Act.
5302 Dirksen Building

Commerce, Science, and Transportation
Surface Transportation Subcommittee
To hold hearings on S. 922 authorizing funds for fiscal year 1978 for the U.S. Railway Association, and on funds for the Office of Rail Public Counsel within the Interstate Commerce Commission.
235 Russell Building

Energy and Natural Resources
To hold oversight hearings on proposal for an international petroleum transshipment port and storage center to be located on the Palau District, Western Caroline Islands, Trust Territory of the Pacific Islands.
3110 Dirksen Building

Energy and Natural Resources
Subcommittee on Energy Research and Water Resources
To hold hearings on proposed authorization for fiscal year 1976 for Energy Research and Development Administration.
4200 Dirksen Building

Governmental Affairs
To continue hearings on S. 591 and 826 to establish a Department of Energy in the Federal Government to direct a coordinated national energy policy.
3302 Dirksen Building

Governmental Affairs
Subcommittee on Intergovernmental Relations
To hold hearings on S. 2, to require reauthorization of Government programs at least every five years (proposed Sunset Act).
6226 Dirksen Building

Human Resources
Health and Scientific Research Subcommittee
To meet with officials of the Office of Technology Assessment to discuss proposed evaluation by OTA of the Food and Drug Administration ban on Saccharin.
Until: 12 noon 4232 Dirksen Building

11:00 a.m.
Foreign Relations
Foreign Assistance Subcommittee
To hold hearings on proposed legislation to authorize funds for bilateral development assistance.
4221 Dirksen Building

2:00 p.m.
Appropriations
Foreign Operation Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1978 for foreign aid programs, to hear officials of AID.
1318 Dirksen Building

Appropriations
Labor-HEW Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1978 for higher education, welfare programs, and for library resources.
S-128, Capitol

3:30 p.m.
Banking, Housing, and Urban Affairs
To resume consideration of S. 69 and 92, to amend and extend the Export Administration Act.
5302 Dirksen Building

MARCH 25

9:00 a.m.
Agriculture, Nutrition, and Forestry
Subcommittee on Nutrition
To hold oversight hearings on the food stamp program.
322 Russell Building

Foreign Relations
Foreign Assistance Subcommittee
To hold hearings on proposed legislation to authorize funds for bilateral development assistance.
4221 Dirksen Building

9:30 a.m.
Commerce, Science, and Transportation
Subcommittee on Aviation
To hold hearings on bills proposing regulatory reform in the air transportation industry, including S. 292 and S. 689.
5110 Dirksen Building

Human Resources
Alcoholism and Narcotics Subcommittee
To continue oversight hearings on existing alcohol and drug abuse education programs, and proposed legislation to extend such programs.
Until 12:30 p.m. 1224 Dirksen Building

10:00 a.m.
Appropriations
Defense Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1978 for the Defense Establishment, to hear congressional witnesses.
1223 Dirksen Building

Appropriations
Labor-HEW Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1978 for programs for education of the handicapped, and for occupational, vocational, and audit education programs.
S-128, Capitol

Banking, Housing, and Urban Affairs
To hold hearings on S. 406, the proposed Community Reinvestment Act.
5302 Dirksen Building

Commerce, Science, and Transportation
Merchant Marine and Tourism Subcommittees
To hold oversight hearings on ocean shipping practices.
235 Russell Building

Energy and Natural Resources
Subcommittee on Energy Research and Water Resources
To hold hearings on proposed authorizations for fiscal year 1978 for Energy Research and Development Administration.
3110 Dirksen Building

Government Affairs
To continue hearings on S. 591 and 826, to establish a Department of Energy in the Federal Government to direct a coordinated national energy policy.
3302 Dirksen Building

Human Resources
To hold hearings on the nominations of Mary Berry of Colorado, to be Assistant Secretary of HEW for Education, and Ernest L. Boyer, of New York, to be Commissioner of Education.
Until 12 noon 4232 Dirksen Building

11:00 a.m.
Veterans' Affairs
To hold hearings to receive legislative recommendations for 1977 from officials of Amvets.
Until Noon. 1202 Dirksen Building

MARCH 28

9:00 a.m.
Appropriations
Agriculture Subcommittee
To resume hearings on proposed budget estimates for fiscal year 1978 for the Department of Agriculture, to hear public witnesses.
6202 Dirksen Building

9:30 a.m.
Commerce, Science, and Transportation
Subcommittee on Aviation
To hold hearings on bills proposing regulatory reform in the air transportation industry, including S. 292 and S. 689.
5110 Dirksen Building

10:00 a.m.
Appropriation
HUD-Independent Agencies Subcommittee
To resume hearings on proposed budget estimates for fiscal year 1978 for the Department of Housing and Urban Development.
1318 Dirksen Building

Appropriations
Public Works Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1978 for public works projects, to hear Members of Congress and public witnesses.
Room to be announced

Appropriations
Transportation Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1978 for the Federal Aviation Administration.
1224 Dirksen Building

Commerce, Science, and Transportation
Communications Subcommittee
To resume hearings to inquire into domestic communications common carrier policies (i.e., telephone, computer, etc.).
1202 Dirksen Building

Energy and Natural Resources
To hold hearings on proposed legislation dealing with utilization of coal resources.
3110 Dirksen Building

Governmental Affairs
Energy Subcommittee
To hold hearings on S. 897, to strengthen U.S. policies on nuclear nonproliferation, and to reorganize certain nuclear export functions.
3302 Dirksen Building

Governmental Affairs
Subcommittee on Intergovernmental Relations
To hold hearings on S. 2, to require reauthorization of Government programs at least every 5 years (proposed Sunset Act).
6226 Dirksen Building

1:30 p.m.
Appropriations
Agriculture Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1978 for the Department of Agriculture, to hear public witnesses.
6202 Dirksen Building

2:00 p.m.
Appropriations
Public Works Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1978 for public works projects, to hear Members of Congress and public witnesses.
Room to be announced

MARCH 29

9:00 a.m.
Appropriations
Agriculture Subcommittee
To resume hearings on proposed budget estimates for fiscal year 1978 for the Department of Agriculture, to hear public witnesses.
6202 Dirksen Building

9:30 a.m.
Agriculture, Nutrition, and Forestry
Subcommittee on Rural Development
To hold hearings on medicare reimbursements for rural-health care clinics.
322 Russell Building

Commerce, Science, and Transportation
Subcommittee on Aviation
To hold hearings on bills proposing regulatory reform in the air transportation industry, including S. 292 and S. 689.
5110 Dirksen Building

10:00 a.m.
Appropriations
Defense Subcommittee
To resume hearings on proposed budget estimates for fiscal year 1978 for the Defense Establishment, to hear congressional witnesses.
1223 Dirksen Building

Appropriations
HUD-Independent Agencies Subcommittee
To resume hearings on proposed budget estimates for fiscal year 1978 for the Department of Housing and Urban Development.
1318 Dirksen Building

Appropriations
Labor-HEW Subcommittee
To resume hearings on proposed budget estimates for fiscal year 1978 for the Office of Human Development.
S-128, Capitol

Appropriations
Public Works Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1978 for public works projects, to hear Members of Congress and public witnesses.
Room to be announced

Commerce, Science, and Transportation
To hold hearings on the nominations of Charles Linn Haslam, of North Carolina, to be general counsel, Department of Commerce, Elsa Allgood Porter, of Virginia, and Frank Alan Weil, of New York, each to be an Assistant Secretary of Commerce, and Joan Buckler Claybrook, of Maryland, to be Administrator of the National Highway Traffic Safety Administration.
235 Russell Building

Energy and Natural Resources
To hold hearings on proposed legislation dealing with utilization of coal resources.
3110 Dirksen Building

Governmental Affairs
To continue hearings on S. 591 and S. 826, to establish a Department of Energy in the Federal Government to direct a coordinated national energy policy.
3302 Dirksen Building

Governmental Affairs
Subcommittee on Intergovernmental Relations
To hold hearings on S. 2, to require authorization of Government programs at least every 5 years (proposed Sunset Act).
6226 Dirksen Building

Select Intelligence
Subcommittee on Budget Authorization
To resume closed hearings on proposed fiscal year 1978 authorizations for Government intelligence activities.
S-407, Capitol

1:30 p.m.
Appropriations
Agriculture Subcommittee
To resume hearings on proposed budget estimates for fiscal year 1978 for the Department of Agriculture, to hear public witnesses.
6202 Dirksen Building

2:00 p.m.
Appropriations
Labor-HEW Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1978 for the National Technical Institute for the Deaf; the American Printing House for the Blind; Gallaudet College, and Howard University.
S-128, Capitol

Appropriations
Public Works Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1978 for public works projects, to hear Members of Congress and public witnesses.
Room to be announced

MARCH 30

9:00 a.m.
Appropriations
Agriculture Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1978 for the Department of Agriculture, to hear Secretary Bergland.
1224 Dirksen Building

HOUSE OF REPRESENTATIVES—*Tuesday, March 22, 1977*

The House met at 12 o'clock noon.

Rev. Edward C. Raffetto, St. Thomas Episcopal Church, Croom, Md., offered the following prayer:

O God, the protector of all that trust in Thee, without whom nothing is strong, nothing is holy; increase and multiply upon us Thy mercy, that, Thou being our ruler and guide, we may so pass through things temporal, that we finally lose not the things eternal; through Jesus Christ our Lord, who liveth and reigneth with Thee and the Holy Spirit, one God, for ever and ever. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Without objection, the Journal stands approved.

There was no objection.

MESSAGES FROM THE PRESIDENT

Sundry messages in writing from the President of the United States were communicated to the House by Mr. Chirdon, one of his secretaries, who also informed the House that on March 18, 1977, the President approved and signed a bill of the House of the following title:

H.R. 1746. An act to amend the United Nations Participation Act of 1945 to halt the importation of Rhodesian chrome.

REV. EDWARD C. RAFFETTO

(Mrs. HOLT asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. HOLT. Mr. Speaker, It is a privilege to have my good friend and constituent, Father Edward C. Raffetto, with us today to deliver the prayer.

Father Raffetto has served since 1970 as rector of St. Thomas' parish in Prince Georges County, Md. This historical parish has offered worship according to the Book of Common Prayer continuously since 1674. It encompasses 90 miles of rural country and has buildings both in Croom, Md., which was built in 1732, and Brandywine which was begun as a mission in 1916.

Father Raffetto graduated from Georgetown University, attended the University of Virginia Law School, and graduated from the Episcopal Theological School in Cambridge, Mass. He is married to the former Elizabeth Dixon Purnell of Owings Mills, Md. Father Raffetto and Lisa are deeply concerned with their parishioners and are very active in their community.

I am sure my colleagues have received a great blessing from his words. I welcome Father Raffetto and his family and thank him for his inspiring invocation.

PAY AND OTHER INCREASES SHOULD BE SUBJECT TO VOTE OF HOUSE

(Mr. FRENZEL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FRENZEL. Mr. Speaker, most Members will not know, until it is called to their attention by their aides, that the House Administration Committee last week raised the allowable salary limit for our 438 administrative assistants to about $47,500. The reason they will not know is that they will not, as usual, have a chance to vote on it.

This, of course, is perfectly consistent with our current House standards which have produced a $13,000 pay raise without a vote, an unjustified $5,000 increase in House accounts without a separate vote, and soaring committee budgets.

The American public does not have confidence in us. It does not understand our callous disregard for the niceties of allowing House Members to vote on these various adventures which may be warranted, but are popularly perceived as rapes of the taxpayer.

I believe the committee's decision reflects discredit on all of us. As long as we allow the committee to act for us without a vote of the House, it will exercise that privilege. And we will continue to be embarrassed.

COMMUNICATION FROM CHAIRMAN OF COMMITTEE ON PUBLIC WORKS AND TRANSPORTATION APPROVING CERTAIN PROSPECTUSES

The SPEAKER laid before the House the following communication from the chairman of the Committee on Public Works and Transportation which was referred to the Committee on Appropriations:

MARCH 15, 1977.

Hon. THOMAS P. O'NEILL, Jr.,
Speaker of the House,
Washington, D.C.

DEAR MR. SPEAKER: Pursuant to the provisions of the Public Buildings Act of 1959, as amended, the House Committee on Public Works and Transportation approved the following prospectuses on Febraury 9, 1977:

LEASE RENEWALS

1833 Kalakaua Avenue, Honolulu, Hawaii.
4040 North Fairfax Drive, Arlington, Virginia.
1621 North Kent Street, Arlington, Virginia.

11(b) RESOLUTIONS

San Jose, California.

The original and one copy of the authorizing resolutions are enclosed.

Sincerely,
HAROLD T. "BIZZ" JOHNSON,
Chairman.

RECOMMENDATIONS FOR REFORMS IN U.S. ELECTION SYSTEM—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 95–106)

The SPEAKER laid before the House the following message from the President, which was read and, together with the accompanying papers, referred to the Committees on House Administration, on the Judiciary, and on Post Office and Civil Service and ordered to be printed:

To the Congress of the United States:

I hereby transmit to the Congress my recommendations for reforms in our Nation's election system.

The Vice President and I have developed these proposals in order to meet our commitment to the American people to work toward an electoral process which is open to the participation of all our citizens, which meets high ethical standards, and which operates in an efficient and responsive manner. I know that you in the Congress share these goals, and I applaud your efforts which are already underway to achieve them.

VOTER REGISTRATION

My first proposal, and the one on which I am proposing a specific bill to the Congress, is designed to open up our system of voter registration.

The basis of our democratic system is the right of every eligible citizen to vote. In the 200 years of its history, this Na-

tion has greatly expanded the opportunity to vote to wider and wider groups of citizens.

Despite this progress, we have in recent years witnessed a disturbing trend toward lower and lower levels of voting by our citizens. I am deeply concerned that our country ranks behind at least twenty other democracies in its level of voter participation.

Our country's disappointing record cannot be remedied by any one solution or any single piece of legislation. But, millions of Americans are prevented or discouraged from voting in every election by antiquated and overly restrictive voter registration laws. We can take one immediate step toward solving this serious problem by removing antiquated and unnecessary obstacles which prevent voters from participating in the electoral process.

I am proposing to remove the unnecessary and unfair barriers by creating a method of universal voter registration. Under the legislation I will propose to the Congress, citizens qualified to vote under state laws could go to their polling places on the day of a Federal election and register there after proving their eligibility. The states would be encouraged to adopt a similar system of registration for state and local elections.

Under this plan, state and local officials will continue to administer voter registration and elections, and will still register as many voters as possible prior to election day in the usual manner, in order to avoid congestion at the polls.

We would offer financial assistance to the states to employ additional registrars and to help pay the cost of registration by mail, traveling registrars, or any other pre-election day registration efforts the state might choose.

State and local officials would also have the option of using the money they receive under the plan to modernize what are often outmoded and poorly equipped systems of election administration. A new office within the Federal Election Commission would distribute the Federal funds and oversee the program.

I also propose that we enact very strong safeguards to protect the integrity of the election process. Willful fraud in registering to vote should bear the strong criminal penalties of five years imprisonment and a $10,000 fine already found in the Voting Rights Act. Any person who takes part in a scheme to falsely identify or register voters should be similarly punished, and multiple convictions should lead to even stiffer penalties. The government should seek injunctive relief in Federal court to stop any patterns of fraudulent activity which might arise.

States should be allowed to require all persons registering at the polls to prove their identity and place of residence by approved forms of identification. All registrants should be informed of the State's qualifications for voting and be required to sign a statement, under oath and criminal penalty, that they meet those qualifications.

While these safeguards are important and necessary, I am optimistic that they will rarely be tested and the record suggests that they will rarely be needed.

This system of election-day registration is already employed in a number of States, and the record shows that it has usually increased voter participation without increasing voter fraud. Four out of five States with the highest voter turnout rates in the 1976 election permitted citizens to register and vote on election day.

CAMPAIGN FINANCING

My second recommendation deals with the way in which we pay the costs of Congressional campaigns.

In 1974, Congress took the historic step of establishing a system of public financing for Presidential primary and general elections. I urge the Congress to extend this important reform to campaigns for both the House and the Senate.

The record of the first publicly financed Presidential campaign has demonstrated that public financing is workable and widely accepted by the American people. Public financing of candidates not only minimizes even the appearance of obligation to special interest contributors, but also provides an opportunity for qualified persons who lack funds to seek public office. It would be a tragic irony if the 1974 law, which reduced the pressure special interests could place on Presidential candidates, increased the pressures on candidates for Congress as the large contributors look for new means of gaining influence with their political funds.

The method we select should allow each American the option of deciding whether to participate in public funding. The check-off provision on the income tax form accomplishes this goal for Presidential campaign financing. The check-off method should also be used to raise the funds necessary to support Congressional candidates.

Congress is best suited to decide on an exact formula for financing campaigns. However, I believe there are several features which should be part of any plan:

First, the plan should require that candidates demonstrate substantial public support before they get public funds to help finance their campaigns. This would guard against frivolous candidates depleting the limited public funds available. The matching formula in the Presidential primaries provided a successful link between total public funds received and a candidate's ability to demonstrate citizen support through small private donations.

Second, the limit on overall expenditures should not be excessively low so as to prevent an adequate presentation of candidates and their platforms to the people.

Third, we should ensure that candidates who accept public financing are not placed at a serious disadvantage in competing with opponents who have extraordinarily abundant private funds. Under the recent Supreme Court ruling, if a candidate refuses to accept public financing, then no limitation can be imposed on the amount of personal or other private funds which may be spent on the campaign. But if a less wealthy opponent does accept public financing, stricter spending limits would be imposed on him than on his opponent. I hope Congress will address this problem.

Fourth, I favor the broadest possible application of public financing. It should apply to primaries as well as general elections. I hope the Congress will act soon to pass legislation so that public financing can be available for the 1978 Congressional campaigns. It is important to begin now with public financing for general elections, even if a plan for primaries cannot be adopted this year.

STRENGTHENING THE FEDERAL ELECTION CAMPAIGN ACT

While public financing of the last Presidential election was highly successful, my third suggestion is for certain modifications which our experience has shown could make the system work even better.

We noticed, for example, that there was less activity than in the past at the state and local level during the general election campaign. Opportunities should be available for more grass-roots participation on Presidential races. This could be accomplished by allowing Presidential candidates to designate one committee in each state to raise and spend a limited amount of money for campaign activities within the state. A reasonable limit for this activity might be 2¢ per eligible voter. Such committees could be allowed to delegate spending authority to local committees, but they should still be responsible for reporting contributions and expenditures. Also, when Congressional candidates mention in their advertising the Presidential nominee of their party, the expenditure should not have to be reported by the Presidential candidate.

Another useful change would be to grant Presidential candidates an additional amount to cover the great costs of complying with election laws—for example, filing the many necessary financial reports. We should prohibit the private raising of funds for this purpose.

We could also simplify the reporting of contributions and expenditures by directing the Federal Election Commission to establish common reporting and accounting systems to be used by all candidates.

Finally, we must clarify the law as it applies to the financial aspects of the delegate selection process. Contributions to delegates, or candidates for delegate, should be charged against a Presidential candidate only when such delegates are pledged to the specific candidate. Also, a delegate's expenses for attending a convention should not be considered as contributions or expenditures for the candidate he or she supports.

DIRECT POPULAR ELECTION OF THE PRESIDENT

My fourth recommendation is that the Congress adopt a Constitutional amendment to provide for direct popular election of the President.

Such an amendment, which would abolish the Electoral College, will insure that the candidate chosen by the voters actually becomes President. Under the Electoral College, it is always possible that the winner of the popular vote will not be elected. This has already happened in three elections, 1824, 1876, and

1888. In the last election, the result could have been changed by a small shift of votes in Ohio and Hawaii, despite a popular vote difference of 1.7 million.

I do not recommend a Constitutional amendment lightly. I think the amendment process must be reserved for an issue of overriding governmental significance. But the method by which we elect our President is such an issue.

I will not be proposing a specific direct election amendment. I prefer to allow the Congress to proceed with its work without the interruption of a new proposal.

POLITICAL RIGHTS OF FEDERAL EMPLOYEES

My fifth and final recommendation concerns the political rights of federal employees.

Over 2.8 million federal employees, including postal workers and workers for the District of Columbia, are now denied a full opportunity to participate in the electoral process. Unlike other Americans, they cannot run as a partisan candidate for any public office, cannot hold party office, and cannot even do volunteer work in a partisan political campaign.

I favor revising the Hatch Act to free those federal employees not in sensitive positions from these restrictions. There should be exceptions for those employees who must retain both the appearance and the substance of impartiality. For employees in such sensitive positions who are not subject to Senate confirmation, restrictions on political activity are necessary. Acting on standards prescribed by Congress, the Civil Service Commission should determine which positions should be treated as sensitive in all relevant government agencies.

Under such a Hatch Act revision, the vast majority of federal employees would be able to participate in federal, state and local elections and other political functions. But, federal employees have a special obligation not to abuse their public service responsibility. I favor strong penalties for any federal employee who attempts to influence or coerce another federal employee into political activity, or who engages in political activity while on the job. I also favor maximum reliance on a strong Civil Service Commission to vigorously prosecute employees who violate regulations against this kind of behavior.

JIMMY CARTER.

THE WHITE HOUSE, *March 22, 1977.*

INTERNATIONAL BROADCASTING—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 95–107)

The SPEAKER laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, referred to the Committee on International Relations and ordered to be printed:

To the Congress of the United States:

In my letters to the Speaker and to the President of the Senate of January 31, I stated that my advisers were reviewing a report on international broadcasting in compliance with Section 403 of the Foreign Relations Authorization Act, Fiscal Year 1977. That review is now finished.

This Administration firmly supports U.S. international broadcasting as part of our commitment to the freer flow of information and ideas. Among the most valuable instruments we have for this purpose are our international radios—the Voice of America (VOA) and Radio Free Europe/Radio Liberty (RFE/RL)—which for many years have been a vital part of the lives of the peoples of Eastern Europe and the Soviet Union. My review of the U.S. international broadcasting effort has led me to the following conclusions, which are reflected in the attached report:

(1) Present U.S. international broadcast transmission facilities are inadequate; 16 additional 250 kilowatt transmitters for broadcasts to the Soviet Union and Eastern Europe are needed by VOA and RFE/RL and can be installed in a period of 3 to 5 years;

(2) There is no significant unused transmitter capacity available for sharing among U.S. broadcasters or between U.S. and other Western broadcasters;

(3) A comprehensive outline of U.S. worldwide broadcasting needs indicates a requirement for 12 additional VOA transmitters for broadcast to Asia and Africa, beyond those required for European broadcasts;

(4) Extending Board for International Broadcasting-type transmissions to other nations where access to information is restricted would be highly impractical for a variety of reasons.

This report is transmitted pursuant to the requirements of P.L. 94–350, and I believe that implementation of its recommendations can assure the United States of effective broadcasting programs in the years ahead.

JIMMY CARTER.

THE WHITE HOUSE, *March 22, 1977.*

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 4250, COLLECTIVE BARGAINING AND SITUS PICKETING PROTECTION FOR CRAFT AND INDUSTRIAL WORKERS

Mr. MOAKLEY, from the Committee on Rules, submitted a privileged report (Rept. 95–102), on the resolution (H. Res. 423) providing for consideration of H.R. 4250, collective bargaining and situs picketing protection for craft and industrial workers, which was referred to the House Calendar and ordered to be printed.

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 5040, AUTHORIZING ADDITIONAL APPROPRIATIONS FOR DEPARTMENT OF STATE FOR FISCAL YEAR 1977

Mr. MOAKLEY, from the Committee on Rules, submitted a privileged report (Rept. 95–103), on the resolution (H Res. 424) providing for consideration of H.R. 5040, to authorize additional appropriations for the Department of State for fiscal year 1977, which was referred to the House Calendar and ordered to be printed.

CALL OF THE HOUSE

Mr. WRIGHT. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The call was taken by electronic device, and the following Members failed to respond:

[Roll No. 88]

Andrews, N.C.	Foley	Pike
Andrews, N. Dak.	Fountain	Quillen
	Giaimo	Robinson
Beilenson	Harsha	Roe
Biaggi	Heckler	Roncalio
Brodhead	Heftel	Ruppe
Burton, John	Hubbard	Scheuer
Cederberg	Jeffords	Sisk
Clay	Kemp	Staggers
Cornwell	Leggett	Stokes
Coughlin	Luken	Teague
Dent	Milford	Tucker
Derwinski	Moffett	Udall
Diggs	Moorhead, Pa.	Ullman
Drinan	Murphy, N.Y.	Wiggins
English	Ottinger	Young, Alaska

The SPEAKER. On this rollcall 385 Members have recorded their presence by electronic device, a quorum.

By unanimous consent, further proceedings under the call were dispensed with.

PERMISSION FOR COMMITTEE ON GOVERNMENT OPERATIONS TO FILE REPORT ON H.R. 5045, REORGANIZATION ACT OF 1977

Mr. BROOKS. Mr. Speaker, I ask unanimous consent that the Committee on Government Operations may have until midnight tonight to file a report on H.R. 5045, the Reorganization Act of 1977.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

ANNOUNCEMENT BY THE SPEAKER

The SPEAKER. Pursuant to the provisions of clause 3(b) of rule XXVII, the Chair announces that he will postpone further proceedings today on each motion to suspend the rules on which a recorded vote or the yeas and nays are ordered, or on which the vote is objected to under clause 4 of rule 15.

After all motions to suspend the rules have been entertained and debated and after those motions, to be determined by "nonrecord" votes have been disposed of, the Chair will then put the question on each motion on which the further proceedings were postponed.

VOCATIONAL EDUCATION TECHNICAL AMENDMENTS

Mr. PERKINS. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 3437) to make certain technical and miscellaneous amendments to provisions relating to vocational education contained in the Education Amendments of 1976, as amended.

The clerk read as follows:

H.R. 3437

A bill to make certain technical and miscellaneous amendments to provisions relating to vocational education contained in the Education Amendments of 1976

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Vocational Education Act of 1963 is amended as follows:

(1) Section 102(a) of the Vocational Education Act of 1963 is amended by striking out "$1,325,000' and inserting in lieu thereof "$1,325,000,000", and by striking out "$1,-485,000" and inserting in lieu thereof "$1,-485,000,000".

(2) Section 102(d) of such Act is amended by inserting "and" after paragraph (2) and by striking out "; and, (4) State administration of vocational educational programs assisted under this Act".

(3) Section 103(a)(1)(A) (as in effect on October 12, 1976, pursuant to section 204 (a)(2)(B) of the Education Amendments of 1976) of such Act is amended by inserting "(b)(1)" immediately after "161".

(4)(A) Section 103(a)(1)(B)(iii) of such Act is amended by striking out the last sentence and inserting in lieu thereof: "Beginning in the fiscal year 1979, the Bureau of Indian Affairs shall expend an amount equal to the amount made available under this subparagraph to pay a part of the costs of programs funded under this subparagraph. During each of the fiscal years covered by this subparagraph, the Bureau of Indian Affairs shall expend no less than the amount expended during the prior fiscal year on vocational education programs, services, and activities. The Commissioner and the Commissioner of Indian Affairs shall jointly prepare a plan for the expenditure of funds made available and for the evaluation of programs assisted under this subparagraph. Upon the completion of a joint plan for the expenditure of these funds and the evaluation of the programs, the Commissioner shall assume responsibility for the administration of the program, with the assistance and consultation of the Bureau of Indian Affairs.".

(B) Section 103(a)(1)(B)(iii) of such Act is further amended by striking out "which has contracted" in the first sentence and inserting in lieu thereof "which is eligible to contract".

(C) Section 103(c)(1)(B) of such Act is amended by inserting "the Northern Mariana Islands," immediately after "the Virgin Islands," in both places where that term occurs.

(5)(A) Section 105(a)(20) of such Act is amended by striking out "clauses of this paragraph" and inserting in lieu thereof "clauses of this sentence".

(B) Section 105(d)(4)(A) of such Act is amended by inserting "special education," after "vocational rehabilitation,".

(6)(A) The first sentence of section 105 (f)(1) of such Act is amended by striking out "$8,000,000 for fiscal year 1982" and by inserting in lieu thereof "$10,000,000 for fiscal year 1982".

(B) The second sentence of section 105 (f)(1) of such Act is amended by inserting immediately after "State advisory councils" the following: "from amounts allotted to such advisory councils in accordance with the method for allotment contained in section 103(a)(2),".

(C) The third sentence of section 105(f) (1) of such Act is amended by inserting "the Northern Mariana Islands," immediately after "American Samoa,".

(7) Section 106(a)(8) of such Act is amended by inserting ")" after "under subpart 5 of this part".

(8) Section 107(a)(1) (as in effect on October 12, 1976, pursuant to section 204(a)(2)(A) of the Education Amendments of 1976) of such Act is amended by inserting immediately before the period at the end of the first sentence thereof "in which the plan is submitted", and in the fifth sentence thereof by striking out "(a)" and inserting in lieu thereof "(A)", by striking out "(b)" and inserting in lieu thereof "(B)", and by striking out "(c)" and inserting in lieu thereof "(C)".

(9) Sections 110(a) and 110(b)(1) of such Act are amended to read as follows:

"Sec. 110. (a) For each fiscal year, at least 10 per centum of each State's allotment under section 103 from appropriations made under section 102(a) shall be used to pay up to 50 per centum of the cost of programs, services, and activities under subpart 2 and of program improvement and supportive services under subpart 3 for handicapped persons.

"(b)(1) For each fiscal year, at least 20 per centum of each State's allotment under section 103 from appropriations made under section 102(a) shall be used to pay up to 50 per centum of the cost of programs, services, and activities under subpart 2 and of program improvement and supportive services under subpart 3 for disadvantaged persons (other than handicapped persons), for persons who have limited English-speaking ability, and for providing stipends authorized under section 120(b)(1)(G).".

(10) Section 110(c) of such Act is amended to read as follows:

"(c) For each fiscal year, at least 15 per centum of each State's allotment under section 103 from appropriations made under section 102(a) shall be used to pay up to 50 per centum of the cost of programs, services, and activities under subpart 2 and of program improvement and supportive services under subpart 3 for (1) persons who have completed or left high school and who are enrolled in organized programs of study for which credit is given toward an associate or other degree, but which programs are not designed as baccalaureate or higher degree programs, and (2) persons who have already entered the labor market, or are unemployed, or who have completed or left high school and who are not described in paragraph (1).".

(11) Section 111(a)(1) of such Act is amended by striking out "equal to" in the first place where that term occurs and inserting in lieu thereof "not to exceed" and by inserting immediately after "Islands" the following: ", the Northern Mariana Islands, Guam, the Virgin Islands,".

(12) Section 111(a)(1)(B) of such Act is amended by striking out "section" and inserting in lieu thereof "sections" and by striking out "vocational education programs" and by inserting in lieu thereof "programs, services, and activities under subpart 2 and program improvement and supportive services under subpart 3".

(13) Section 111(a)(1)(C) of such Act is amended by striking out "described in sections 122(f), 133(b), and 140" and inserting in lieu thereof "provided in accordance with sections 122(f), 132(b), and 140(b)(2)".

(14) Section 111(a)(1) of such Act is further amended by redesignating clause (C) as clause (D), by striking out "and" after clause (B), and by inserting immediately below clause (B) the following new clause:

"(C) a part of the costs of supervision and administration of vocational education programs by an eligible recipient, except that such payment shall not exceed a percentage of such costs equal to the percentage of the total costs of the vocational education program of such eligible recipient paid for from this section; and"

(15) Section 111(a)(2)(A) of such Act is amended to read as follows:

"(2)(A) In addition, the Commissioner shall pay, from each State's allotment under section 103 from appropriations made under section 102(a), an amount not to exceed the Federal share of the cost of State administration of such plans.".

(16)(A) Section 111(a)(2)(B) is amended by striking out "for the fiscal year preceding fiscal year 1978" and by inserting in lieu thereof "for the latest fiscal year for which reliable data is available preceding fiscal year 1978".

(B) Section 120(a) of such Act is amended by inserting immediately after "vocational education programs" the following: "and other programs, services, and activities operated".

(17)(A) Section 120(b)(1) of such Act is amended by striking out "and" at the end of clause (L), by striking out the period at the end of clause (M) and inserting in lieu thereof a semicolon, and by adding at the end thereof the following new clauses:

"(N) provision of vocational training through arrangements with private vocational training institutions where such private institutions can make a significant contribution to attaining the objectives of the State plan, and can provide substantially equivalent training at a lesser cost, or can provide equipment or services not available in public institutions; and

"(O) subject to the provisions of section 111, the costs of supervision and administration of vocational education programs by eligible recipients, and State administration of the five-year plan submitted pursuant to section 107 and of the annual program plan submitted pursuant to section 108, except that not more than 80 per centum of the amount of payments determined under section 111 for such purposes shall be made from grants under this subpart."

(B) Section 122 (g) of such Act is amended by striking out "used for purposes of this section" and inserting in lieu thereof "made available under this section to accommodate students in nonprofit private schools".

(C) Section 130(b) of such Act is amended by striking out "and" after paragraph (5), by striking out the period at the end of such section and inserting in lieu thereof "; and", and by inserting immediately below paragraph (6) of such section the following new paragraph:

"(7) subect to the provisions of section 111, the costs of supervision and administration of vocational education programs by eligible recipients, and State administration of the five-year plan submitted pursuant to section 107 and of the annual program plan submitted pursuant to section 108, except that not more than 20 per centum of the amount of payments determined under section 111 for such purposes shall be made from grants under this subpart.".

(18)(A) Section 131(a) of such Act is amended by striking out "coordination" and inserting in lieu thereof "coordinating".

(B) That portion of section 132(a) of such Act preceding paragraph (1) is amended to read as follows:

"Sec. 132. (a) Funds available to the States under section 130(a) may be used for contracts by State research coordinating units pursuant to comprehensive plans of program improvement for the support of exemplary and innovative programs, including—".

(C) Section 132(b) of such Act is amended by inserting immediately after "Federal funds" the following: "made available under this section to accommodate students in nonprofit private schools".

(19) That portion of section 133(a) of such Act preceding paragraph (1) is amended to read as follows:

"Sec. 133. (a) Funds available to the States under section 130(a) may be used for contracts by State research coordinating units pursuant to comprehensive plans of program improvement for the support of curriculum development projects, including—".

(20) Section 134(a) of such Act is

amended by striking out "shall include" and by inserting in lieu thereof "shall include one or more of the following activities".

(21) Section 161(a)(1) of such Act is amended by striking out "section 112" and by inserting in lieu thereof "section 112(b)".

(22) Section 161(a)(3)(A) of such Act is amended by striking out "October 1, 1977" and by inserting in lieu thereof "October 1, 1978".

(23) Section 161(b)(1) (as in effect on October 12, 1976, pursuant to section 204(a)(2)(B) of the Education Amendments of 1976) of such Act is amended by inserting immediately after "in effect" in the second sentence the following: "on the date of the enactment of the Education Amendments of 1976 and", and in clause (B) by striking out "September 30, 1977" and by inserting in lieu thereof "September 30, 1978".

(24)(A) Section 162(b)(4)(A) of such Act is amended by inserting "special education," after "vocational rehabilitation,".

(B) Section 162(c) of such Act is amended by striking out "paragraph" in the first sentence thereof and inserting in lieu thereof "subsection", and by adding at the end of such section the following new sentence: "The National Council may accept gifts if the acceptance of such gifts will better enable it to carry out its functions under this section.".

(25) Sections 191 and 192 of such Act are each amended by striking out "part" and inserting in lieu thereof "subpart", and such section 191 is further amended by striking out "August 2" and inserting in lieu thereof "August 12".

(26)(A) Section 195(7) of such Act is amended by striking out "crippled" and inserting in lieu thereof "orthopedically impaired" and by inserting immediately after "impaired persons" the following: ", or persons with specific learning disabilities,".

(B) Section 195(8) of such Act is amended by inserting "the Northern Mariana Islands," immediately after "American Samoa,".

(27) Section 195(15) of such Act is amended by striking out "designating" and inserting in lieu thereof "designing".

(28)(A) Section 107(b)(4) of the Comprehensive Employment and Training Act of 1973 is amended by inserting "special education," after "vocational rehabilitation,".

(B) Section 503(5) of the Comprehensive Employment and Training Act of 1973 is amended by inserting "special education," after "vocational rehabilitation,".

(29) Section 203 of the Education Amendments of 1976 is amended by adding at the end thereof the following:

"(c)(1) Section 104 of the Vocational Education Amendments of 1968 is amended by adding before the period at the end thereof the following: '(as such Act will be in effect on October 1, 1977)'.

"(2) The amendment made by this section shall be effective on and after October 1, 1977.".

(30) The first sentence of section 523(b)(2) of the Education Amendments of 1976 is amended by striking out "September 30, 1979" and by inserting in lieu thereof "September 30, 1980" and by striking out "September 30, 1980" and by inserting in lieu thereof "September 30, 1981". The first sentence of such section 523(b)(2) is further amended by striking out everything which appears after "under this section".

(31)(A) Section 523(b)(3) of the Education Amendments of 1976 is amended by striking "section" at the end of the first sentence and by inserting in lieu thereof "subsection concerning the National Institute of Education", and the second sentence of such section is amended by striking "October 1, 1979" and by inserting in lieu thereof "October 1, 1981".

(B) The amendments made by subparagraph (A) shall take effect on and after October 1, 1977.

SEC. 2. Except where otherwise specifically indicated, any reference in the first section of this Act to the Vocational Education Act of 1963 means such Act as in effect on October 1, 1977.

The SPEAKER. Is a second demanded?

Mr. QUIE. Mr. Speaker, I demand a second.

The SPEAKER. Without objection, a second will be considered as ordered.

There was no objection.

Mr. PERKINS. Mr. Speaker, I yield myself 7 minutes.

Mr. Speaker, H.R. 3437 contains technical amendments and some minor substantive amendments to the Public Law we passed last year amending the Vocational Education Act of 1963.

Almost all of the amendments contained in the bill correct printing or clerical errors which appear in the public law, or delay the submission date for reports to the Congress.

The one susbtantive area which the bill deals with is the question of how much in Federal funds ought to be used for paying for State and local administration of vocational education programs.

The 1976 amendments to the Vocational Education Act are scheduled to go into effect October 1, 1977. These amendments require States to match with State funds any Federal funds which are used for State administration of the program. They also limit the use of Federal funds for this purpose to no more than $25 million a year.

H.R. 3437 removes the $25 million limitation, but continues the requirement that the States must match these Federal funds. This will mean that by 1980 each Federal dollar used for State administration will have to be matched by a State dollar. We believe that this matching requirement will serve as a sufficient check on States which want to use unduly large amounts of Federal funds for this purpose.

Regarding local administration, the 1976 amendments would have repealed the authority for Federal funds to be used for this purpose. The bill before us today restores that authority, but forbids any local school district or community college from using more in Federal funds for local administration than it is receiving in Federal funds for the total support of its program.

This means that if a school district received 10 percet of its vocational education funds from the Federal Government, it can pay for up to 10 percent of its cost of local administration from these Federal funds.

To summarize, the bill increases the flexibility States will have in using Federal funds for administration, but it contains sufficient safeguards against an undue use of these funds for that purpose.

Mr. Speaker, I would like to insert in the RECORD at this point a few tables showing the percentages of their total Federal vocational education expenditures and their total State and local vocational expenditures States are using to support State and local administration. Table I shows the amounts and percentages used for State administration. Table II shows the amounts and percentages for local administration.

The tables follow:

TABLE I.—EXPENDITURES FOR STATE ADMINISTRATION IN VOCATIONAL EDUCATION, FISCAL YEAR 1976

State	Expenditures for State administration from State/local funds	Percent of total State/local vocational education expenditures	Expenditures for State administration from Federal funds	Percent of total Federal vocational education expenditures	Total expenditures for State administration	Percent of total vocational education expenditures
Alabama	$1,063,357	2.8	$1,399,501	12.3	$2,462,858	5.0

H.R. 3437 also proposes several minor substantive amendments to the new vocational education amendments which are to go into effect October 1, 1977. We delayed the implementing of these amendments for 1 year from their enactment date because we wanted State and local people to review them and to suggest improvements. Most of these minor amendments are based on such suggestions. These amendments, in general, make clear what we originally intended.

The minor amendments are the following:

First. Beginning in fiscal 1979, the Bureau of Indian Affairs must match on a dollar-for-dollar basis the funds the Commissioner of Education uses to contract with Indian tribes for vocational programs and the BIA must also maintain its own vocational programs at the same level of expenditure;

Second. The Northern Mariana Islands are treated as a separate entity for receipt of funds;

Third. Special education programs must be reviewed by the State and national advisory councils;

Fourth. The authorization of appropriation for the State advisory councils is increased by $2 million in fiscal 1982;

Fifth. The 50 percent matching requirement is removed for the Northern Mariana Islands, Guam, and the Virgin Islands;

Sixth. The waiver for fiscal 1978 of the State matching requirement for State administration is to be made on the basis of the best data from the most recent preceding fiscal year instead of fiscal 1977;

Seventh. The contracting authority for private trade schools is restored;

Eighth. The State research coordinating units are to coordinate all research, demonstration, and curriculum development programs;

Ninth. The implementation date for the new data systems is delayed for 1 year;

Tenth. The National Advisory Council on Vocational Education is allowed to accept gifts;

Eleventh. The definition of "handicapped" is expanded to include the learning disabled; and

Twelfth. The submission date is delayed for 1 year for the reports on vocational education by the National Institute of Education.

Therefore, Mr. Speaker, I urge the House to suspend the rules and pass H.R. 3437.

Mr. CORNELL. Mr. Speaker, will the gentleman yield?

Mr. PERKINS. I yield to the gentleman from Wisconsin (Mr. CORNELL).

Mr. CORNELL. I thank the gentleman for yielding.

Mr. Speaker, I would like to call the Chairman's attention to page 4 of the committee report, at the bottom of the page. It states:

Some concern has been expressed about the committee's proposed technical amendment in H.R. 3437 to require that State research coordinating units make all contracts within State for research, exemplary programs, and curriculum development. The committee proposes this amendment . . . because it believes that research, demonstration, and curriculum development must be tied together into one coherent strategy of program improvement within each State if we are to achieve the most efficient and effective use of these Federal funds . . . We wish to emphasize, however, that funds used for these purposes must be governed by the State plan for vocational education, the same as any other Federal funds received under the act are governed within the State.

The question I would like to ask the chairman is:

Does this amendment mean that the research coordinating units and the funds they spend will be under the jurisdiction of a sole State agency?

Mr. PERKINS. Mr. Speaker, let me thank the gentleman from Wisconsin for asking this question. I think it is very important for us to realize that all of these vocational education programs in the States are carried out through State plans, and the coordinating research units which will fund the research, demonstration, and curriculum development

programs that the gentleman from Wisconsin is inquiring about have to carry out these programs in the same way under a State plan as all other agencies involved in the State. There is nothing contrary, it will not operate in any other way except as the other programs operate, through the State plan.

Mr. CORNELL. I thank the gentleman.

Mr. QUIE. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, so far as I know there are no major controversies with respect to this legislation. Some members of our committee unsuccessfully sought additional changes to the 1976 act which would alter the scheme for allocation of Federal funds between supportive services, such as counseling and guidance; and vocational programs, such as the regular instructional program, cooperative education, et cetera, but the bill was reported unanimously.

This bill for the most part makes necessary technical amendments, most of which are to correct typographical errors. There are a few substantive amendments which have been described by Chairman PERKINS. I would like to discuss two of those briefly.

In the new Vocational Education Act up to 1 percent of the funds appropriated under section 102(a), which is the main authorization for the act, are reserved for the Commissioner of Education for the improvement of vocational education for Indians. It is anticipated that most, perhaps all, of the reserved funds would be used to contract with tribal organizations of tribes which are eligible to contract for the administration of programs under the Indian Self-Determination Act. Any remaining reserved funds would be transferred to the Bureau of Indian Affairs, pursuant to an agreement with the Commissioner of Education, for the support of vocational programs in BIA schools.

However, the Bureau of Indian Affairs would be required to match all of the funds made available under this provision to pay part of the costs of the programs assisted by such funds. The amendment in H.R. 3437 makes this matching requirement effective for fiscal year 1979 and succeeding years in order to assure time for additional appropriations to be requested by the Bureau and made by the Congress. Otherwise, such funds might have to come from existing program funds, which was not our intent. H.R. 3437 also clarifies the relationship between the Commissioner of Education and the Commissioner of the Bureau of Indian Affairs. They are to jointly prepare a plan for the expenditure of funds made available under this provision and the evaluation of programs assisted thereby. Having done so, the Commissioner of Education would assume responsibility for administration of the program, but with the assistance of and consultation with the Bureau of Indian Affairs.

Finally, the original provision is amended to make clear that tribes which are eligible to contract under the Indian Self-Determination Act may participate even if they have not made such contracts. These clarifying and perfecting amendments were worked out with the assistance and suggestions of my colleague, Mr. BLOUIN, who heads our new full Committee Task Force on Indian Education. I greatly appreciate his assistance in making this a much better and clearer provision.

At this point, I submit for the RECORD a condensed version of the report issued by the Task Force on Native American Vocational Education, which task force was established by the National Advisory Committee on Vocational Education:

OBSERVATIONS ON THE CURRENT STATUS OF VOCATIONAL EDUCATION FOR NATIVE AMERICANS

With few notable exceptions, there are virtually no adequate secondary-level vocational education programs available on or near Indian reservations.

It should be noted that several witnesses did state that they believed Indian students to be enrolled in some high school vocational courses; however, states are often unable to identify Indian students. It is the interpretation of this Task Force that if a state cannot determine how many Indian students are enrolled and identify the programs in which they are enrolled, it is difficult to believe that the students are enrolled in programs which are truly planned to meet the needs and priorities of the tribes.

Even in the exceptional cases where programming was designed to meet Indian needs, it should be noted that considerable void in certain occupational areas and localities was identified by tribes. Tribal representatives frequently documented current and potential jobs available on or near their reservations which their people are not trained to fill. In several situations, the Ft. Mojave and San Carlos, for example, tribes will have to hire non-Indians to fill tribally funded positions and occupations. Even the Navajo Nation, largest of the Indian populations in the country, must hire non-Indians to fill some tribal staff positions. Several Tribal Chairmen stated that they may not be able to implement tribal economic development plans and/or attract outside industry to reservation areas because there is a lack of trained personnel. Yet unemployment figures of 40–90% were cited by most witnesses.

United Tribes of North Dakota Educational Technical Center and the educational programs of the Minnesota Chippewa Tribe are two of the rare examples of Indian controlled vocational education spanning the secondary and postsecondary levels. Both employ a majority of Indian personnel and are located near the residences of the majority of their students. The Minnesota Chippewas have utilized a variety of funding sources to combine vocational education funds, manpower, BIA, and other sources to develop and implement education and training supported by additional and supplemental services. United Tribes of North Dakota is residential, combines funding and provides concentrated support services, as well as curriculum development. The testimony texts of these two exemplary projects are included in the Rapid City Hearing section of this report.

Postsecondary vocational education is improving through the addition of the Indian Community Colleges to the existing BIA-supported schools. Funded through Higher Education Act Title III monies for developing Institutions, the Indian Community Colleges hold promise of being able to provide a variety of certificate and associate degree programs for Indian students. Witnesses representing American Indian Satellite Community College in Winnebago, Nebraska; Oglala Sioux Community College, Pine Ridge, South Dakota; Turtle Mountain, Standing Rock, and Little Hoop Community Colleges in North Dakota, and Miles City Community College, Montana provided testimony regarding the progress of their institutions and the effective coordination and assistance being maintained with existing community colleges in their respective states. . . .

Flexibility in regulations will be extremely important. Not only the culture of each tribe, but also the size and location will have considerable influence upon the priorities each will assign to vocational education. Some tribes, the Yakima Nation for example, placed high priority on the need for Indian teachers and counselors, and less emphasis on the location of the facility. Those tribes which were more isolated, e.g., in the Southwest and Mountain Plains area, stated a priority consideration to be the location of the institution. A multi-tribal and/or regional approach appears to be an alternative for some of the tribes with large urban populations, and may well serve the needs of their rural and/or reservation people also. . . .

The funding authorized through the Education Amendments of 1976 is inadequate alone to meet the needs of American Indians. Although the Indian population is approximately 1% in the category specified in the legislation, Indian youth have an unemployment rate significantly higher than the majority of the population. (The exact figure is unknown, but may easily double that of unemployed Black youth, the group usually stated as having the nation's highest rate of unemployment.) Furthermore, the median unemployment rate among Indians may also be considerably higher, necessitating an expansion of the population considered in the formula for determining level of authorization. . . .

SUMMARY OF FINDINGS

Although there were many philosophical differences evident among the presentations of the witnesses, there were central issues common among those who testified. Some of these issues are conceptual, some methodological, some procedural, and all reflect complex constructs. The most frequently stated concerns are noted below.

Community involvement

The involvement of Indian people in the determination of their needs and priorities is mandatory to assure program success. Definitions of "involvement" ranged from parental and/or student advisory committees to tribal decision on all matters related to education. Most of the witnesses felt that "involvement" should mean that Indians representing the local people should participate at all stages of the planning, implementation, and evaluation process.

Economic development

Each tribe's economic development plan should serve as the basis for determining vocational education program needs. In non-Indian vocational education in the State Plan utilizes state manpower needs projections as a data base. Considering the frequent lack of employment now present on or near reservation areas and the need to develop an employment base for economic stability, as well as the documented fact of Indian preference for reservation life, the relationship between education and employment must be closely aligned.

Facility location

The best interests of Indian students will be served if there are two types of facilities available—(1) schools on or very near the reservation for reservations with populations large enough to justify a variety of course offerings and (2) area schools to serve small tribes or a group of tribes needing skill train-

ing in a specific occupational area. Witnesses felt that, in most cases, attempts should be made to provide as many educational options as possible on or near reservations. It was frequently stated that many students have families and cannot afford to move; neither do they have adequate transportation or the accessibility to transportation. In the case of small tribes or the need to provide only a small number of students with specialized training, it may be necessary to develop area schools and provide living and/or transportation stipends.

Career awareness, counseling and guidance

Beginning with the elementary level and continuing through adult education programs, there is a critical need to provide information regarding options in employment and in assisting students to examine their interests and aptitudes. Several witnesses added that there is frequently little understanding of the concept of employment and that short-term "training" programs come to be considered as jobs themselves.

Curriculum

Until other segments of education are improved, vocational education programs will have to include components of remedial reading, writing and computation. Curriculum and materials should be adapted to reflect and to meet the needs of local Indian culture.

RECOMMENDATIONS

Based upon documentation and testimony received during hearings and presented in this report, the Task Force on Native American Vocational Education of the National Advisory Council on Vocational Education recommends the following:

1. That the legislation be amended to require the Bureau of Indian Affairs to match vocational education funds appropriated through the U.S. Office of Education;

2. That the Bureau of Indian Affairs and the U.S. Office of Education share the responsibility for administering and monitoring these funds . . .

3. That the U.S. Office of Education and Bureau of Indian Affairs should provide technical assistance to tribes desiring to submit proposals under this legislation, including:

a. assistance in planning for the ulitization of vocational education funds under this legislation with other existing Education and Bureau authorizations and entitlements;

b. providing awareness of potential for development of curriculum materials, provision of training for teachers and administrators, and development of guidance and counesling programs.

4. That criteria for evaluating proposals submitted under this Section be developed to consider the special needs of the diverse populations to be served, including:

a. That there be an emphasis on the correlation of proposed training to tribal economic development plans and use of tribal economic development and tribal manpower needs, rather than state or other aggregate data, as the basis for documenting need and providing programmatic justification;

b. That planning phases be encouraged;

c. That there be emphasis on coordination of vocational educational funds and programming with other available sources and entitlements, e.g., B.I.A. Employment Assistance and Adult Vocational Education authorizations, Title III of the Elementary and Secondary Education Act, and Title II of the Higher Education Act.

5. That tribes must determine their own education priorities. Although this report and other sources identify areas which appear to be priority concerns, no attempt should be made to establish "national Indian priorities" for funds appropriated under this legislation, or to give preferential consideration to proposals addressing issues determined by Federal, Regional or State Agencies.

A second amendment involves the use of Federal funds for program administration and supervision by local school districts and postsecondary institutions, which would not be an allowable use under the 1976 act. When Chairman PERKINS introduced this bill for he and myself, the bill was silent on this matter because while we did want to permit the use of Federal vocational funds for local administrative costs, we did not want to do so without limitation, and we had not worked out the kind of limitation we wanted. During the subcommittee markup we adopted an amendment offered by me which would tie the percentage of Federal funds used for local administration and supervision to the percentage of such funds used for the total local vocational program. Thus, if a local school district supports 20 percent of its total vocational costs from Federal funds, it could pay for 20 percent of the supervisory and administrative costs of the program from Federal funds. This makes sense for several reasons. The main one is that the Federal funds are supposed to be distributed on the basis of need factors, so that this would mean that poorer districts should receive proportionately more Federal help, and of course would need proportionately more outside support for administration.

We recognize that the quality of local instructional programs is due in no small part to the quality of supervision they receive. At the same time, in some instances we are aware that a disproportionate amount of Federal dollars is used for administrative purposes. Over a 3-year period, the new act phases in 50–50 matching for State-level administrative expenditures from paid Federal funds. However, such an arrangement would not be meaningful at the local level, where some 12 States have no local administrative costs paid from Federal funds and where the national average percentage of such costs is 10.5 percent Federal. This compares with a national average of about 15 percent Federal for total Federal-State-local costs of vocational education. So we felt that the best governor on such use of funds at the local level would be that of the percent of the overall program paid out of the Federal funds, which in turn has a relationship to need factors.

Mr. Speaker, we anticipate continued progress in vocational education at all levels of instruction and in all parts of the Nation under the 1976 act. With its emphasis on comprehensive Statewide planning and program evaluation we should be able to trace this progress State by State in the years ahead, and far more accurately than in the past. I regard vocational education as our most important single weapon in our continuous fight against unemployment and dependency. H.R. 3437 corrects errors and makes substantive improvements in the 1976 act, and I urge its adoption.

Mr. PERKINS. Mr. Speaker, I have no further requests for time.

The SPEAKER. The question is on the motion offered by the gentleman from Kentucky (Mr. PERKINS) that the House suspend the rules and pass the bill H.R. 3437, as amended.

The question was taken.

Mr. ROUSSELOT. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Pursuant to the provisions of clause 3 of rule XXVII and the prior announcement of the Chair, further proceedings on this motion will be postponed.

Does the gentleman from California (Mr. ROUSSELOT) withdraw his point of order of no quorum?

Mr. ROUSSELOT. I do, Mr. Speaker.

GENERAL LEAVE

Mr. PERKINS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on H.R. 3437, the bill just under consideration.

The SPEAKER. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

HARASSMENT OF SOVIET JEWS AND OTHER MINORITIES

Mr. ZABLOCKI. Mr. Speaker, I move to suspend the rules and concur in the Senate concurrent resolution (S. Con. Res. 7) relating to the freedom of emigration.

The Clerk read as follows:

S. CON. RES. 7

Whereas the obstruction and harassment of Soviet Jews and other minorities trying to obtain emigration visas to reunite with their families profoundly offends the conscience of a free people; and

Whereas these incidents of Soviet Government-sanctioned ethnic and religious discrimination violate internationally agreed-upon principles of human rights: Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That the sustained interest of the American people be conveyed to the Soviet Government regarding adherence to the Helsinki Declaration, including their pledge to facilitate freer movement of people, expedite the reunification of families, and uphold the general freedom to leave one's country.

The SPEAKER. Is a second demanded?

Mr. BROOMFIELD. Mr. Speaker, I demand a second.

The SPEAKER. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER. The Chair recognizes the gentleman from Wisconsin (Mr. ZABLOCKI).

Mr. ZABLOCKI. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of Senate Concurrent Resolution 7, expressing the concern of Congress with respect to the harassment of Soviet Jews and other minorities in the Soviet Union.

The resolution was passed by the other body on March 2 by a vote of 91 to 0 and sent to the House.

A similar resolution, House Concurrent Resolution 97, introduced by our colleague, the Honorable ANTHONY TOBY MOFFETT, and 23 cosponsors on February 1 of this year, was considered in open session by the Committee on International Relations on March 15 and ordered favorably reported, with an amendment, by voice vote.

The purpose of the committee's amendment is to conform the resolution to Senate Concurrent Resolution 7.

The committee's amendment in no way alters the original purpose or intent of the House concurrent resolution.

Specifically, the resolution calls attention to the obstruction and harassment of Soviet Jews and other minorities in the Soviet Union who are trying to obtain emigration visas to reunite with their families and to the fact that such Soviet Government-sanctioned ethnic and religious discriminatory acts violate internationally agreed upon principles of human rights.

In view of these discriminatory acts, the resolution expresses the desire of the Congress that the sustained interest of the American people be conveyed to the Soviet Government regarding adherence to the Helsinki Declaration, including that Government's pledge to facilitate freer movement of people, expedite the reunification of families, and uphold the general freedom to leave one's country.

Mr. Speaker, as the committee's report on the resolution notes, the concern of Congress with respect to the harrassment of various ethnic minorities in the Soviet Union applies equally to all such minorities.

The report further explains that it is the intent of the resolution that the singling out of the Soviet Government should not infer that Congress either endorses or condemns the treatment of minorities in other countries which have signed the Helsinki Declaration. Indeed, Congress is concerned with the status of the human rights of minority groups in all countries both within and outside the scope of the Helsinki accord.

Senate Concurrent Resolution 7 is both consistent with and supportive of President Carter's initiative with respect to human rights around the world.

Mr. Speaker, I urge the adoption of the resolution.

Mr. DODD. Mr. Speaker, will the gentleman yield?

Mr. ZABLOCKI. I yield to the gentleman from Connecticut.

Mr. DODD. Mr. Speaker, as a cosponsor of House Concurrent Resolution 97, similar to Senate Concurrent Resolution 7, I rise to urge all of my colleagues in the House to support this expression of our commitment to the principles of the Helsinki accord, and our disapproval of continued Soviet abuse of Jews, dissidents, and all others whose rights are severely and repeatedly violated.

Unanimous passage of this resolution today is all the more important in the light of recent events. As we are all aware, the Soviet Union has shown an increasing irreverence for the human rights provisions of the international agreement which it signed, and has initiated a fierce new wave of repression in reaction to our own Government's reaffirmation of its support for international human rights.

In the last 6 weeks, Soviet authorities have arrested four leading dissenters—all of whom were active participants in a group whose cause it is to monitor Soviet compliance with the Helsinki accord. And now, in their most recent act of barbarism, Soviet officials have detained Anatoly Scharansky—a leading spokesman for Soviet Jews seeking to emigrate freely to Israel—after a period of sustained harassment. As an indication of their seriousness, Soviet officials, in what appears to be an unprecedented act, have accused Scharansky of treason—a crime punishable by death in the Soviet Union.

And finally, just yesterday, General Secretary Brezhnev assailed the Carter administration's determined support of human rights struggles in the Soviet Union. Calling the President's foreign policy "interference in our internal affairs," Brezhnev warned that such interference will not be tolerated and that the current crackdown on dissidents will continue.

Thus, it is clear that we must urgently convey once again to the Soviet Government that neither its words nor its acts will convince us to abandon our support for universal human rights. Indeed, as our President eloquently stated before the United Nations last week, such support cannot be construed as interference in the internal political affairs of a foreign country. What it means, simply and straightforwardly, is that we fully intend to defend the principles to which we are committed—through our own Constitution and through the United Nations and the Helsinki accord—as is the Soviet Union.

As members of an international organization and as adherents to an international agreement, we have a responsibility to live up to. Senate Concurrent Resolution 7 reaffirms our firm intentions in this respect. A unified endorsement of this resolution, which was already overwhelmingly approved by the Senate, will bring home to the Soviet authorities that the U.S. Congress and the American people will continue to condemn their violations and to lend full support to all oppressed members of Soviet society.

Mr. MOFFETT. Mr. Speaker, will the gentleman yield?

Mr. ZABLOCKI. I am delighted to yield to the gentleman from Connecticut (Mr. MOFFETT), the sponsor of the resolution in the House.

Mr. MOFFETT. Mr. Speaker, I thank the distinguished chairman; I thank him not only for yielding, but for his assistance in this matter. He considered this resolution as quickly as possible.

Mr. Speaker, I also would like to thank the distinguished chairman of the subcommittee, the gentleman from Minnesota (Mr. FRASER), who assisted me in getting the resolution considered promptly.

Mr. Speaker and my distinguished colleagues in the House of Representatives, I am before you today to ask your favorable consideration of Senate Concurrent Resolution 7. This resolution is identical to the one introduced by myself and 141 of my colleagues who cosponsored the resolution with me.

Although it is still early in this session of Congress, it is not a moment too soon to reaffirm our commitment to human rights in the Soviet Union and elsewhere in the world. Human rights is not a problem to be solved; it is a cause that has been evolving for 20 centuries. As the noted historian, Arthur Schlesinger, Jr., recently wrote:

> Human rights is replacing self-determination as the guiding value of American foreign policy . . . Human rights is a way of reaching the deeper principle of individual self-determination.

Such a policy has been taking shape quite rapidly during the still nascent term of President Carter. The President is providing extraordinary leadership in this area and it is fitting and necessary that Congress should seek every opportunity to support him. A letter from Acting Secretary of State for Congressional Relations Kempton B. Jenkins to Senator JOHN SPARKMAN, chairman of the Senate Foreign Relations Committee, states in part:

> The Administration fully supports the aims of the resolution and is committed to advancing the cause of human rights in all countries, including the Soviet Union. The United States Government has consistently urged the Soviet Government toward greater progress in the area of family reunification and emigration and toward concrete implementation of the provisions of the Final Act of the Conference on Security and Cooperation in Europe. . . .

The distinguished Members of this House do not need me to explain the human rights situation in the Soviet Union. Soviet Jews continue to be denied equal rights guaranteed to all other nationalities by Soviet law. The Jewish educational system has been dismantled, centers of Jewish culture closed, the teaching of Hebrew and Yiddish banned, the training of rabbis barred, the sale of Jewish books prohibited, Jewish cemeteries desecrated. The government, moreover, has institutionalized anti-Semitism through systematic job discrimination, denial of due process and use of State-owned media.

In recent months, it has been increasingly dangerous for the Jews who have expressed a desire to emigrate, to survive in the Soviet Union. The government has begun a severe crackdown on "refuseniks"—linking these people who only seek to leave their country with dissidents who are fighting for changes within the system.

The repression seems especially aimed at an unofficial group monitoring the Soviet violations of human rights provisions of the Helsinki accords. Many of you may be aware that on March 4, 1977, the Soviet Government newspaper, Izvestia, accused leading refusniks of working for the CIA. Since this accusa-

tion, on March 15, 1977, refusnik Anatoly Shcharansky has been accosted by KGB agents who took him away to Lefortovo prison, the investigative prison for political prisoners. On March 20, 1977, the apartment of Vladimir Slepak, also a refusnik, was entered by a group of so-called drunks who demolished his apartment beyond inhabitation. These trumped up charges, reminiscent of the 1950's "Doctor's Plot" where Jewish doctors were accused of being poisoners, have even linked these men with our own Al Friendly, counsel to the Helsinki Commission, who was also reported to be an agent of the CIA.

It is no wonder that more than 140,000 Jews are now seeking to leave the Soviet Union—and this number only represents those courageous enough to apply. For those who somehow survive the burdensome emigration procedure and reach the brink of freedom, there is a heavy "exit fee." Most Soviet Jews cannot afford the fee and are discouraged or prohibited from raising the money to pay for it.

One cannot discuss Soviet Jewry without discussing Helsinki. As Members of this Congress, I am certain you are aware of the nuances of the Helsinki accords. We are all familiar enough with its provisions, to recall that its preamble speaks of the collective desire for the "spiritual enrichment of the human personality" and the "broader dissemination of knowledge."

Although Helsinki is not a treaty, it is full of language indicating the determination of nations involved to carry out its promises. Approval of the concurrent resolution today would again reaffirm our country's commitment to Helsinki's human rights provisions.

This resolution does not suggest that the United States has any intent or the ability to guarantee the freedom of all people anywhere on the globe. Nor does it indicate a desire on our part to meddle in the internal affairs of other countries.

But in the words of Arakady Rabinov, a Soviet refusnik:

> Human rights cannot be the internal affairs of any one state . . . they concern all people.

As usual, the Soviets are hoping this issue will somehow go away, especially in view of the upcoming June Belgrade conference to assess the progress of the Helsinki agreement. They have witnessed the passage of the Church resolution and are hoping the House version will become lost in the legislative shuffle as we become more occupied with other matters.

The Soviet press has attacked this resolution with the contention that we, too, have human rights problems in our own country; that perhaps we, too, are in violation of some portion of the Helsinki accords. The difference, of course, is that we are constantly striving to correct such problems.

In a major speech yesterday, Soviet Communist party leader Leonid Brezhnev attacked Carter administration support for Soviet dissidents. He talked about those who "criticize erroneously" the Soviet system. He talked about people in Russia who "come out against the Socialist system, embark on the road of anti-Soviet activity, violate laws, and having no support inside the country, turn for support abroad, to imperialist subversive centers."

This kind of language is all part of the continuing attempt by the Soviet Government to obliterate any distinction between Soviet dissidents and Soviet Jews seeking to leave the country. Many of us believe, of course, that the dissidents should be encouraged too. But that is not the matter addressed by this resolution. Nor is it the issue most important to Soviet Jewry. The activities of Soviet Jews and groups supporting them over the years have been directed almost exclusively toward obtaining the possibility of emigration from the U.S.S.R. to Israel. These groups have strictly limited their activity so that everything they have done has been entirely within the framework of Soviet law. They have informed Western public opinion about their plight through open letters and open telephone calls. They have not hidden from Soviet authorities these facts.

So Mr. Brezhnev is once again leading a significant Soviet evasion of the real issue here. They are not by any means living up to the Helsinki agreements. We know how badly they want to preserve the territorial provisions of Helsinki. It is important that our representatives to the June Belgrade conference insist that the human rights provisions be followed as well. And this resolution will assist in that end.

"It is unthinkable," said Mr. Brezhnev, that Soviet-American relations could develop normally if the current criticism of Soviet human rights policies by "official American bodies," continues. By our action today, we should let the Soviet Union know that we believe it is "unthinkable" for this Congress to be silent in the face of a mounting anti-Semitic and antihuman rights campaign which goes directly against the principles on which our system was founded.

Mr. Speaker, again I want to thank the gentleman from Wisconsin (Mr. ZABLOCKI) and I know that all of the people, not only those in this Chamber but all over the world, thank the gentleman from Wisconsin for his leadership in this matter.

Mr. ZABLOCKI. Mr. Speaker, I wish to thank the gentleman from Connecticut (Mr. MOFFETT) upon his eloquent further explanation of the purpose and intent of the resolution which he so ably prepared and sponsored.

Mr. Speaker, I reserve the balance of my time.

Mr. BROOMFIELD. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the distinguished committee chairman, the gentleman from Wisconsin (Mr. ZABLOCKI) has done an excellent job of explaining the meaning and intent of Senate Concurrent Resolution 7. I join him in commending the sponsors of this resolution and in urging support for it.

The United States is a nation of immigrants; we have preserved the principle of freedom of religion for over two centuries; we live by the rule of law and we honor our international commitments.

For all of these reasons, we are deeply offended when we see a nation such as the Soviet Union consciously develop policies to restrict the freedom of movement of its citizens. When this harassment and obstruction is directed against a small segment of Soviet society, it is particularly repugnant.

When Soviet Jews and other minorities are discriminated against in blatant disregard of binding international agreements, such as the Helsinki declaration, one must seriously question the extent to which the Soviet Union can be a trustworthy partner in any effort to reduce international tension.

Perhaps there is little we can do to influence the Soviet Government in its treatment of minorities. Perhaps the Soviet leaders are so callous and insensitive to international public opinion that they will take little note of initiatives such as Senate Concurrent Resolution 7. But we who can travel freely, we who can worship as we choose, we have an obligation to do everything in our power to call attention to acts of discrimination and harassment. The Soviet Union is a party to the Helsinki declaration, and Basket III is an integral part of that agreement. If the Soviet Union is prepared to trample on the Helsinki accords and the basic human rights of its own citizens, what guarantee is there that they are prepared to cooperate with us in other areas vital to our national security and world peace?

The legislation before us puts the Soviet Union on notice that the people and Government of the United States demand scrupulous compliance with the Helsinki declaration. It merits the wholehearted, enthusiastic support of every Member of Congress.

Mr. FINDLEY. Mr. Speaker, will the gentleman yield?

Mr. BROOMFIELD. I yield to the gentleman from Illinois.

Mr. FINDLEY. Mr. Speaker, as the gentleman from Michigan knows, during consideration of this matter in the committee there was discussion of the status of human rights in other countries, not just those in the Soviet Union. However, instead of amending the resolution to deal with the status of human rights in other countries, the committee saw fit to put that expression in the committee report. I think it is significant that the committee report does contain this language:

> In recommending H. Con. Res. 97 to the House, it is the Committee's intent that the concern of Congress with respect to the harassment of various ethnic minorities in the Soviet Union applies equally to all such minorities.
>
> Further, it is the Committee's intent that the singling out of the Soviet Government in this Resolution not infer that the Congress either endorses or condemns the treatment of minorities in other countries which are signatories to the Helsinki Declaration. Indeed, the Committee is concerned with the

status of the human rights of minorities in all countries both within and outside the scope of the Helsinki Declaration.

Mr. BAUMAN. Mr. Speaker, will the gentleman yield?

Mr. BROOMFIELD. I yield to the gentleman from Maryland.

Mr. BAUMAN. Mr. Speaker, I want to rise in support of the concurrent resolution. I also want, with the indulgence of the gentleman from Michigan (Mr. BROOMFIELD) to call the attention of the House to the fact that the gentleman from Maryland offered an amendment to the Rhodesian chrome bill last week seeking to bring about a reaffirmation of human rights in the Soviet Union upon whom we now will be largely dependent for our chrome.

The House by a vote of 152 to 246 voted down that human rights amendment. It would have had teeth; it would have hurt the Soviet Union; it would have prevented them from profitmaking, because of our international position on the Rhodesian issue. But the resolution before us today does nothing more than express the sense of the House and does not really disturb the Soviet Union very much at all. I just did not want the occasion to pass without it being noted that some of us are for human rights all of the time, not just when it is politically convenient.

Mr. BROOMFIELD. Mr. Speaker, I yield 2 minutes to the gentlewoman from New Jersey (Mrs. FENWICK).

Mrs. FENWICK. Mr. Speaker, I, too, would like to thank the chairman of the committee and subcommittee, and our ranking members for the speed and the attention which they have given to this very important resolution, of which I believe I am cosponsor.

We speak so often in this House, and we read in the papers, of the numbers of those refused exit visas. We speak of the reunification of families; we speak of all of these things and of the numbers. What we forget so often is the human tragedies behind every single one of those digits. We on the Helsinki Commission listen day after day to people who are separated—husband from wife, wife from husband, parents from children. It is enough to make one weep. We hardly know, sitting on that Commission, how to express the sorrow and sympathy and indignation that their stories make us feel.

Here is a professor—right down here at the University of Virginia at Charlottesville—separated from his beautiful young wife. Here is a woman in this country separated from her husband who cannot get out, with no reason given. These are the tragedies that we listen to day after day, and that is what this resolution is addressed to—human beings and how do we feel about them. That is what we are trying to say here.

I thank the Speaker.

Mr. BROOMFIELD. Mr. Speaker, I reserve the remainder of my time.

Mr. ZABLOCKI. Mr. Speaker, I yield 3 minutes to the gentleman from Florida (Mr. FASCELL).

Mr. FASCELL. Mr. Speaker, last week the Commission on Security and Cooperation in Europe, which I chair, heard moving testimony from people who are the innocent victims of the Soviet policies this resolution justifiably protests. The Commission, which the Congress created to monitor and encourage compliance with the Helsinki accords, held 2 days of hearings last week on the issue of emigration for family reunification. One day was devoted to cases involving American citizens or residents with family members in the Warsaw Pact nations, and 1 day was concerned entirely with the problem of Jewish emigration from the Soviet Union.

At both hearings the testimony was heart rending. The Commission heard a Soviet engineer, now a very successful scientist in America, talk about his 21 years of effort to be reunited with his wife and daughter. It heard a professor from the University of Virginia tell of the 3 years he has been fighting in vain just to see his wife in Moscow, much less to win permission for her to join him here. And it heard a writer from Czechoslovakia describe what it means to be parted since 1969 from his two children.

There is no scale on which human tragedy can be measured and some pain judged to be greater or less than some other. For all the individuals who testified and for the thousands in whose name, directly or indirectly, they spoke, the anguish of separation from their family is too acute, too immediate, and too enduring to be set aside and weighed on a scale of relative heartache.

Nevertheless, there is no question that the plight of some 2,000 Soviet Jews facing longstanding and usually unexplained denials of permission to emigrate is among the worst human tragedies of recent years. What makes it so devastating—and what made the testimony of their relatives to the Commission so powerful—is the memory we all have of the near-extermination of Jews in Europe under Hitler. And what makes the tragedy excruciating is the expectation created in the last half dozen years—after decades when no such hopes could be sustained—that the Soviet Union would permit reasonably free emigration for the purposes of family reunification.

The testimony the Commission heard and the research the Commission staff has done indicate that that expectation, while being rewarded in many cases, is being arbitrarily and capriciously frustrated in many other instances. There has been an unparalleled exodus of some 130,000 Soviet Jews since 1971, and Commission questioning of 630 of those who left the U.S.S.R. since the Helsinki accords were signed August 1, 1975, revealed that 76 percent obtained their exit visas within 6 months of applying for them. But in 1975 and 1976 the total number of emigrants each year has been less than half what it was in 1973, and the National Conference on Soviet Jewry reports that some 180,000 invitations from relatives—55,000 in 1976 alone—have been sent to Jews in the U.S.S.R. at their request but not yet transformed into successful emigration applications. In fact, the Commission survey found that 40 percent of the successful emigres interviewed had friends or relatives still in the Soviet Union wanting to leave but either refused permission or too intimidated to apply for it.

What those statistics mean is that the resolution we are considering today is a well-considered, I would even say moderate, response to a situation which cries out for remedy. Of course there has been "obstruction and harassment" of Soviet Jews seeking to emigrate; 35 percent of those recent emigres the Commission surveyed said they had lost their jobs when they applied to leave, 9 percent said their studies had been terminated, 8 percent said they had been forced out of their homes, and 6 percent had been required to get divorces before they could leave. Of course, such "discrimination" violates international human rights agreements; it even violates Soviet law, for the International Covenants on Civil and Political Rights which the U.S.S.R. has ratified provided that emigration can be denied only if domestic law establishes the grounds for such denial in the interests of public order or national security. The Soviet Union has not enacted such laws, and the very absence of those definitions permit local officials to deny emigration applications arbitrarily and, it would seem, primarily for the purpose of discouraging other would-be applicants.

And, of course, the "sustained interest" of Americans in seeing the Helsinki accords implemented should be conveyed to the Soviet Union. We do that by this debate today. President Carter has done it repeatedly and eloquently. It will be done again when all the signatories convene before the year ends in Belgrade to review the progress that has or has not been made in fulfilling the pledges given at Helsinki.

But one joint resolution does not absolve the Congress of its responsibility and the responsibility of individual Members to go on expressing that interest of all our people in justice for the Jews of the Soviet Union. This is going to be a long fight, one in which we must match our endurance, our patience, and our commitment to decency against the obduracy and fears of the Soviet leadership and system. If you doubt that you have the stomach for such a lengthy struggle, consider for a moment the testimony the Commission heard last week—in a tape recording—from Arkady Rabinov, a Leningrad Jew who applied to emigrate 4 years ago, saw his parents leave in 1976, and who is still denied permission to emigrate ostensibly because his wife had done secret work.

At the end of his statement to the Commission, Mr. Rabinov said:

> In April I will again be eligible to apply for a visa, and I hope that this time humaneness will triumph. I believe that human rights cannot be the internal affairs of any one state, but that they concern all people.

I share his hope and his belief and I am proud to give my support to the resolution before the House today as a partial confirmation that Americans of all backgrounds are committed to the advance of human rights everywhere.

Mr. FRASER. Mr. Speaker, will the gentleman yield?

Mr. FASCELL. I am delighted to yield to the distinguished gentleman from Minnesota (Mr. FRASER), the chairman of the Subcommittee on International Relations who started the struggle for awareness of human rights as a major factor in the foreign policy considerations of the United States.

Mr. FRASER. I thank the gentleman for his kind words. I wanted to address a specific question to the gentleman. Some recent commentators and writers have argued that when President Carter spoke out on human rights violations in the Soviet Union, we were interfering in their internal affairs.

They seemed to take the same line of argument that the Soviet Union itself has taken with respect to their responsibilities under the Final Act of Helsinki I wonder if the gentleman has a view on this?

Mr. FASCELL. I certainly do. That line of reasoning is weak and self-serving. The whole thrust of the Helsinki accords is toward what we are talking about today—the freedom of people, their ability to leave their country, and be reunited with their families. The act incorporates by reference the U.N. Charter and the universal Declaration of Human Rights and the International Covenants on Human Rights. It is using a shallow argument to say, as the Soviet Union does that the rights of people anywhere are nobody's business except the government which denies those human rights.

Mr. FRASER. I concur with the gentleman. I would say that there would be no reason to have international agreements dealing with human rights if a country could turn around and say: "We have no obligation to respond to that agreement and there is no right on the part of another country to comment on our treatment of our citizens."

Mr. FASCELL. The gentleman is correct. The discussion of human rights was made a matter of proper international discourse by all signatory participating nations to those agreements.

Mrs. FENWICK. Mr. Speaker, will the gentleman yield?

Mr. FASCELL. I yield to the gentlewoman from New Jersey.

Mrs. FENWICK. Mr. Speaker, I want to say that anything which is signed into a document by 35 nations and mentioned specifically is no longer a matter of internal affairs.

Mr. DOWNEY. Mr. Speaker, will the gentleman yield?

Mr. FASCELL. I yield to the gentleman from New York.

Mr. DOWNEY. Mr. Speaker, I rise in support of this concurrent resolution. Mikhard Shtern who is a Soviet prisoner wanted only to leave the Soviet Union. This resolution is most specific and addresses a problem at a time when the Soviet Union is sensitized to this matter. I rise certainly in strong support of the concurrent resolution.

Mr. LEACH. Mr. Speaker, I am pleased to be a cosponsor of identical language to that of the resolution under discussion.

The continued repression of minorities within the Soviet Union, especially those of the Jewish faith, makes it imperative that the 95th Congress express the concern of the American people. Human rights are of importance to all people, regardless of national boundary or language or cultural heritage.

Especially offensive to the conscience of the American people is the decision of the Soviet Government to subject its citizens to beatings, imprisonment and other harassment if they indicate a desire to obtain emigration visas.

The principle of free emigration has wide sanction under international law. In article 13 of the Declaration of Human Rights—unanimously adopted in 1948—the right to leave any country, including one's own is affirmed. That declaration was reaffirmed in the International Convention on the Elimination of All Forms of Racial Discrimination of 1965 and the International Covenant on Civil and Political Rights of 1966, each of which was ratified by the Soviet Union. Most recently, in the Helsinki Final Act, the 35 signatories, including the Soviet Union, agreed to act in conformity with the Universal Declaration of Human Rights.

In short, Mr. Speaker, the governments of the world have made the right to emigrate a matter of justified international concern and of recognized international responsibility.

The Congress has particularly emphasized this right to free emigration because the freedom to leave a country is the traditional final lifeline for victims of racial, religious, and political persecution.

Freedom is less meaningful in our own country when it is denied in any others. The Soviet Union is not alone in trampling on the rights of its citizens. In Korea, in Latin America, in Africa, we have witnessed abridgements of individual rights and mass violations of traditional value systems.

Last week, I had the honor to spend an hour with the Russian human rights leader, Vladimir Bukovsky. Bukovsky has only recently reached the West after suffering repeated imprisonments in Soviet jails and insane asylums because of his persistent refusal to backdown from the values he believed in.

I was very moved and impressed when this young man urged that we must continue to press the Soviet authorities on human rights issues. His example is one which demands respect.

We have no choice but to register our feelings and convictions, as individuals and as a Congress of people. I urge unanimous adoption of this concurrent resolution.

Mr. KOCH. Mr. Speaker, I am proud to be able to vote for Senate Concurrent Resolution 7 which reaffirms the commitment of the people and the Congress of the United States to the principles of human rights and free emigration of Soviet Jews and other minorities, as enunciated in the Helsinki accords. I think it is particularly fitting that the Congress has a chance to act publicly today. Leonid Brezhnev has responded truculently to President Carter's inspiring speech before the United Nations. Brezhnev has stated that easing of tensions between the United States and the Soviet Union is unthinkable if President Carter continues his campaign for human rights, and he has again called the expression of concern about human rights "an interference in our internal affairs." This is the shallowest and most hypocritical of arguments. While engaging in the same sort of practices, the Soviet Union has bellowed about violations of human rights in right-wing dictatorships such as Chile. The Soviet Union has also signed the Helsinki accords which legally binds that country to the principles which President Carter is espousing.

As President Carter has stated in his U.N. speech, we should take human rights covenants such as the Helsinki accords as seriously as we take commercial treaties. If we do not hold the Soviet Union to the terms of the Helsinki accords, how can we expect compliance from the Soviets on arms control or commercial treaties? This resolution is yet another example of the full support the Congress is giving the President on the issue of human rights, and the Soviet Union should be now well aware that we are not going to back down on this issue.

Mr. EILBERG. Mr. Speaker, today, thousands of Soviet Jews are being denied the basic human right of emigration. The harassment and persecution of these people continues unabated. They have been labeled by their fellow countrymen as traitors and have been imprisoned in the harshest Soviet jails, fired from their jobs, ostracized or exiled to Siberia. Yet, their only "crime" is that of wanting to leave the Soviet Union to start life anew in a nation that is willing to accept them.

Less than 2 years ago, representatives of 35 nations met in Helsinki, Finland, and signed the now famous Helsinki Declaration. This agreement stated that the signatory nations "will deal in a positive and humanitarian spirit with the applications of persons who wish to be reunited with members of their family." The Soviet Union has continuously abridged the rights of her citizens and as such has not complied with the provisions of the aforementioned treaty.

As all of us are aware, the Soviet Union has recently intensified its campaign against its Jews so as to stifle any potential dissident movement in her country prior to the forthcoming Belgrade Conference. On January 22, 1977, the Soviet Government aired the movie "The Traders of Soul," a blatant anti-Zionist film, on prime time television so as to discourage Jews from seeking exit visas. She also has banned the baking and importation of the ritual Passover matzoh—the unleavened bread which symbolizes the rapidity with which the Jews were forced to leave from Egypt, the land of slavery, to Israel, the land of freedom.

Last week, Soviet security police seized and are still detaining Anatoly Scharan-

sky, who I met on my trip to the Soviet Union 2 years ago. His only real "crime" is that of desiring to leave the Soviet Union to join his wife in Israel. This past Sunday, the apartment of Vladimir Slepak, Scharansky's good friend, was ransacked by 20 drunks and damage to his home was considerable. It is obvious that this most recent anti-Semitic act was organized by the Soviet Government as a mini-program so as to silence Slepak. The Jews of the Soviet Union will never again be silent. They have and will continue to speak out demanding that they be allowed to emigrate in accordance with the Helsinki provisions.

I am very proud to be a cosponsor of House Concurrent Resolution 97 which declares that the U.S. Congress will convey to the Soviet leaders the interest of the American people regarding strict adherence to the Helsinki Declaration and all that this document stands for.

My fellow Members of the Congress, I ask you to join me in voting for this resolution. The lives of thousands are at stake, and if we turn our backs on these people, then all hope for their survival is lost.

Mr. OTTINGER. Mr. Speaker, I want to commend my colleague, Mr. MOFFETT, for introducing a resolution similar to Senate Concurrent Resolution 7, and for providing a means under which those of us who share his deep concern over the plight of Soviet Jews can express our feelings

We are here today to remind the Soviet Government of a pledge it made 19 months ago when it joined 34 other countries in signing the Helsinki Final Act, and to bear witness to the strong support of the United States and of the American people for restoring human rights around the world.

Today, there are fewer Soviet Jews leaving the U.S.S.R. than there were before the signing of the Helsinki accord. Soviet Jews who file for exit visas to join their families in Israel are harassed, humiliated, and imprisoned. Not one week goes by that the media does not report another horror story involving Jewish dissidents in the Soviet Union.

In direct contradiction of the Helsinki accords, the Soviet Government is cracking down on its postal regulations, restricting the amount of mail and the number of packages received by Soviet Jews. Last week, I joined my colleagues in sending a letter to President Carter urging him to take a strong stand against the recently imposed Soviet ban on the importation of flour and foods containing flour—items necessary for the celebration of the Jewish religion.

Leonid Brezhnev, upon addressing the gathering at Helsinki, urged that the principles of the final act be "put to practical use and made a law of international life not to be breached by anyone." The resolution before the House today reiterates his thoughtful and well-conceived words.

President Carter has made it clear that the issue of human rights is an integral part of U.S. foreign policy. Several weeks ago the Senate passed this resolution by a vote of 91 to 0. I hope that the House also acts with unanimity.

I have no illusion about the possibility of a constructive Soviet response. Secretary Brezhnev's comments of yesterday—condemning the recent pronouncements of the Carter administration—indicate discomfort with the commitment we are echoing today, and change will come slowly. But for myself, it is very exciting to stand forth with pride in the ideals that have made this Nation great, recognized as the bastion of freedom in a world where freedom is dearly won and sustained.

Mr. ANDERSON of California. Mr. Speaker, today I address my colleagues on a subject I have spoken of several times in the past. Many of us, individually, have remarked on this topic. I am speaking of freedom for Soviet Jews. Freedom from imprisonment; freedom from harassment; freedom from the many subtle forms of discrimination that this minority faces daily in the Soviet Union. These people have committed no crimes, yet they face the start of each day not knowing what new obstacles will be placed in their path. The path on which they walk is dictated by a brave collective conscience started thousands of years ago. Everyday during these years, Jews somewhere on this globe have been discriminated against.

Today, we in the House of Representatives have the opportunity to attack this discrimination as a collective unit. Senate Concurrent Resolution 7 makes clear that the American people abhor this treatment for any citizen of the Soviet Union; just as we do in our own country, or anywhere in the world. I respect the fact that sovereign nations may have laws and policies with which we should not interfere. I would posit, though, that before there were any nations with their man-made boundaries, there was the dignity of man, which was given by God.

If there be some in the Soviet Union who do not recognize this, than let us direct them to the Helsinki Declaration, which they themselves ratified, allowing for freer movement of people, and the general freedom to leave one's country.

It is ironic that this resolution nearly coincides with the Jewish holiday of Passover. Jewish families the world over will observe, beginning April 2, the flight of their ancestors from the bonds of slavery in ancient Egypt.

Jews are not today slaves in the Soviet Union, but is a man free who cannot travel where he wants? Or a man who cannot worship as he pleases because his holy books have been taken away from him, and he is not allowed to congregate with others of the same belief? And if against these odds, he still insists on following his conscience, he may lose his job, or see his children expelled from school. Or he may find himself in a mental institution or jail. Is he free?

Perhaps this Passover, all Americans should consider this question. And with the passage of this resolution, let us hope that the Soviet leaders consider it as well.

Mr. SARASIN. Mr. Speaker, we have seen in recent months how the Soviet Union reacts to any mention of human rights. On paper, they would seem to be very strong supporters of human rights, even stronger than the United States. For they have signed the U.N. Declaration of Human Rights, the 1969 International Convention on the Elimination of All Forms of Racial Discrimination, and the 1975 Helsinki Agreement. Particularly, with their most recent signing of the Helsinki agreement, the Soviets are surprised and alarmed that the world expects them to live up to their commitments. For if it is one thing that the Soviets are, it is that they are very cynical about such things as principles. They really do not expect that world public opinion would care enough about human rights to make demands upon them to observe such things as basic human dignity and freedom of choice

I think it very important at this point in time that we live up to the moral commitments and principles that we make and that our foreign policy be consistent with our beliefs about the conduct of human affairs. What is often lacking in government and politics is a basic sense of what is right: what is humanly right and just. There is no absolute about this: as common elements in this huge family called mankind, we share some basic frailties and potentialities. Human potential and freedom must be protected by governments to insure that we all can lead free and decent lives.

I really do not believe that people anywhere in the world demand a great deal of the government that they live under. All that most people want is to live their lives in accordance with their values and to exercise their rights to worship freely, to emigrate freely, to maintain their family ties and see their loved ones. Under oppressive governments, even these simple basics of human living are denied. This is what we protest, and what we must continue to protest in the name of human decency.

The Soviets charge us with interference in their internal affairs. But how can this be when they have freely signed international agreements in regards to human rights? Human rights is a matter that transcends governments. When there is a disaster in any part of the world, we do not hesitate to send relief aid. We cannot ignore human suffering no matter what government is in charge and so we help. It can be no different with human rights issues, particularly when these offenses so challenge our basic perception of what is right and decent.

We clearly cannot impose our values upon other governments, however, we are free to make our views known to them. Particularly in regards to the Soviet Union, the harassment and persecution of the Soviet Jews have been so prolonged and amply documented, that there can be no mistaking our opposition to this oppressive treatment.

I recently learned that the Soviets began this January to prohibit the importation of baked goods into the country. What will be affected is imports of matzoh, unleavened bread, that is necessary for Soviet Jews to observe the Passover.

Thousands of packages of matzoh have been waylaid in the mails. Clearly, this is an outrageous attempt by the Soviet Government to prevent the Soviet Jews from peaceably carrying out their religious observances. It strikes at the very heart of the Soviet policy to deny the vitality of Jewish life in the modern day Russia.

To many, this resolution will appear to be an exercise in rhetoric. Nevertheless, we are serving notice on the Soviet Government that we take very seriously this matter of human rights, and that we will not be silent about transgressions that we learn of.

Mr. THONE. Mr. Speaker, it is surely our duty, as Americans and as cosigners of the Helsinki Final Act to protest the recent increase in government authorized ethnic and religious discrimination in the Soviet Union. Events of recent weeks, including the arrests of prominent Soviet Jews and the ban on the importation by mail of flour and flour products are alarming. In the interests of human dignity and freedom, I would urge my colleagues to join with me in ardent protest of these actions and the treatment of other minorities by the Soviet Government.

The United States has long been recognized as a bastion of freedom and supporter of human rights. In keeping with this, we can do no less than protest Soviet actions and let the Soviet Government know that we do see what they are doing. They must not succeed in masking their actions by labeling human beings seeking religious freedom and demanding their right to emigrate freely as "political dissidents." I cannot condone the actions that have separated families and refused to reunite them. That is punishment more cruel than any prison. We must remind the Soviet Union of the commitment they made when they signed the Helsinki declaration. In addition, this should serve as a reminder to all Americans of the principles that our great Nation was founded upon.

Mr. LEDERER. Mr. Speaker, I ask the unanimous support of my colleagues for Senate Concurrent Resolution 7, on behalf of the Jews and other repressed minorities throughout the Soviet Union.

The Helsinki agreement incorporates by reference and affirmation the Universal Declaration of Human Rights and the Covenant on Political and Civil Rights. The Soviet Union has flagrantly disregarded and flouted the undertakings to which these agreements commit her. She has attempted to silence her critics by charging that they are interfering in the internal affairs of the Soviet Union. I urge the Members of this great body not to be so silenced. Senate Concurrent Resolution 7 demonstrates the conviction of the House of Representatives that political and religious freedom know no sovereign boundary. I ask that all Members of Congress demonstrate this conviction by supporting this resolution.

Mr. HARRIS. Mr. Speaker, I am glad to speak today on behalf of this resolution—Senate Concurrent Resolution 7—which conveys Congress sustained interest and the interest of all Americans in the Soviet Government's adherence to the Helsinki declaration, including the pledge to facilitate freer movement of people, expedite the reunification of families, and uphold the general freedom to leave one's country.

My commitment grows deeper by the day and I will continue to speak out on behalf of Soviet Jewish families and individuals who are being forcibly detained in the U.S.S.R. as a result of the Soviet Government's repressive emigration policy which clearly violates the human rights provisions of the Helsinki final act.

An example of the Soviet's restrictive emigration policy is the case of Eugene and Sophia Reinberg who have been separated from their only son, Yuri, for 19 months. Their attempts to join him and leave for Israel have been denied time and time again. This is just one case, but there are literally hundreds of families whose reunion has been prevented by the arbitrary refusal of Soviet exit visas. In my book, the Reinberg case represents a clear violation in the basket three area of the Helsinki agreement.

The resolution we are speaking about today is a great step in showing the Soviet Government that we will not sit back and accept its violations. As a signatory of the Final Act, they must conform to the spirit and letter of the basket three provisions.

Mr. STARK. Mr. Speaker, I rise in support of Senate Concurrent Resolution 7 which expresses the concern of Congress regarding the harassment of Soviet Jews.

Adoption of this resolution comes at a critical period in our relations with the Soviet Union. Yesterday, Soviet leader Brezhnev accused the United States of using the human rights issue to interfere in Soviet internal affairs and sternly warned that such interference will affect relations between the United States and the U.S.S.R.

Since January President Carter has spoken out strongly for the cause of human rights. Last week in his speech before the U.N., the President said:

> No member of the U.N. can claim that mistreatment of its citizens is solely its own business.

The Soviet record clearly shows that it has failed to comply with the Helsinki accords by allowing its citizens to emigrate freely; from a high of 34,000 in 1973, the number of emigrees has dropped dramatically to 14,000 in 1976. In addition, the Soviet Government has undertaken a new campaign to crack down on dissidents.

As a cosigner of the Helsinki Declaration, the United States must continue to press the Soviet Government for compliance with the accords. This new Congress must let the Soviets know that when President Carter speaks out on human rights, he speaks not only for his administration, but for the overwhelming majority of Americans who want to see the U.S.S.R. live up to the provisions they signed in Helsinki. Moreover, passage of Senate Concurrent Resolution 7 would also clearly demonstrate that the United States will not be intimidated into retreating from its strong stance in favor of human rights and will continue to speak out when gross violations of internationally accepted provisions on human rights are shown. I urge support for the resolution.

Mr. WOLFF. Mr. Speaker, I would like to thank my distinguished colleague from Connecticut (Mr. MOFFETT), the sponsor of a resolution in the House similar to Senate Concurrent Resolution 7.

In many ways, we can perceive a change coming over this country, and projecting across the seas to other nations. This new administration has already taken positions, and indicated commitments, far different from those of the two administrations before it. Many Americans may disagree with some of these positions, or may disapprove of some of the commitments, as is natural and healthy.

Yet underlying the positions and commitments, I believe, is a compassion, a human quality which most of our constituents have sensed. And this underlying compassion, with its positive moral force, represents a significant change from recent years, and a highly welcome one.

However, much has not changed in the moral arena, and my colleague has arranged for this time so that we may again assert this body's determination, and the determination of the American people as a whole, to do all we can to bring a change in the repressive situation still faced by Soviet Jews and other minorities.

As we know too well, tens of thousands in that nation have sought for years to emigrate and be reunited with their families in Israel, or in the United States. Many have been extremely vocal in their dissent—often paying a very high price for such opposition—while others have simply continued their struggles, quietly yet persistently.

Many of us in this House have adopted so-called "prisoners of conscience"—mine is Boris Penson—who are imprisoned in the Soviet Union for a variety of political crimes. So in many ways, things have not changed very much.

It is clear, nevertheless, that we must continue to press the Soviet Union to comply with the human rights provisions of the Helsinki Declaration. We must present to that government a united front, solidly opposed to ethnic and religious repression in Russia and all over the world, regardless of the progress on SALT or discussions on trade. We must pull away from the old and destructive, amoral notion of linkage, for our citizens, and the western world, has longed for the moral glow of American ideals to appear once again.

Mr. Speaker, I wish to affirm here my commitment to aiding wherever possible the repressed and harassed Jews forced to remain in the Soviet Union, and to once again notify that Government of the determination felt by all Americans to achieve respect for human rights and dignity the world over.

Mr. ROSENTHAL. Mr. Speaker, I rise in support of Senate Concurrent Reso-

lution 7, a resolution expressing the concern of Congress regarding the treatment of Jews and other minorities in the Soviet Union.

Mr. Speaker, I wish to commend our colleague, Mr. MOFFETT, for his leadership in drafting a similar resolution in the House.

As the Secretary of State prepares for his first trip to Moscow, it is timely for us once again to affirm the continued interest of the American people regarding Soviet observance of the Helsinki declaration, particularly that Government's pledge to facilitate freer movement of people, to expedite reunification of families and to uphold the general freedom to leave one's country.

The importance of this resolution before us today is heightened in light of increased Soviet harassment of various ethnic minorities.

America's resolve to stand up for human rights principles is being tested by the Soviet Union. Stepped up attacks on Soviet ethnic minorities, dissidents, and even foreign leaders who speak out for freedom mark the Russian reaction.

In a chilling reminder of the cold war, leading Jewish activists are being accused of acting in behalf of the CIA and are thrown in jail. Russian anti-Semitism appears on the rise again.

Just a few weeks ago, the KGB searched the apartments of at least five Soviet Jews, threatening four and arresting one, Iosif Begun. Begun was jailed on the Catch-22 charge of "parasitism," the Soviet euphemism for unemployment. Of course he was unemployed—he had been fired for applying for an exit visa. This is a common result when Jews seek to emigrate from the Soviet Union. They also frequently lose their apartments, their children may be ejected from their schools, and the family is subjected to Government harassment.

I applaud President Carter's vigorous support of human rights around the globe. It is a welcome relief from the pragmatism of some of his predecessors. He and Secretary Vance will be subjected to intense pressure from the Soviets to soften that position. I hope Senate Concurrent Resolution 7 will strengthen their resolve to remain firm in the defense of human rights.

Mr. WIRTH. Mr. Speaker, the action taken by Congress today, Senate Concurrent Resolution 7, harassment of Soviet Jews and other minorities, is the latest in the series of efforts by the American people to compel the Soviet Union to live up to its agreements. Last week at the United Nations, President Carter addressed the question of the denial of human rights by all nations, friend and foe alike. The Congress action today supports the President's efforts, and should make crystal clear to the Soviets that future good relations between our two countries depends on their willingness to implement those agreements already signed.

As the chief architect of our foreign policy, President Carter's recent statements serve notice that the Federal Government has ordered its priorities to better reflect the humanistic concerns of the American people. In case any nation had any doubt, today's vote by the House of Representatives—the elected officials closest to the people—confirms the President's course and demonstrates that the United States is dead serious about the rights of individuals in every hemisphere.

We cannot, in the name of pragmatism, forever avoid standing up for those ideals upon which our Government was founded. If we can turn our backs on the persecution, on the complete subjugation of citizens abroad, our own constitutional guarantees are meaningless. For, if we declare that human rights are the exclusive prerogative of the American people, we are defying 200 years of history.

It is my firm conviction that today's vote will have a positive effect on Americans and on the world community. It will have a positive effect on our own people, because we can again hold our heads high, proud in the knowledge that we are once again siding with the right and the just. It will have a positive effect on those in other lands, because the American beacon of freedom and human dignity has begun to shine once again after many years of darkness.

Mr. MARKS. Mr. Speaker, I rise in support of Senate Concurrent Resolution 7. As the cosponsor of a similar House resolution, I believe it clearly expresses the concern of the United States for freedom and human rights.

The continued harassment by Soviet authorities of Soviet Jews, various minority groups, and dissidents violates the principles of international law, particularly the Helsinki accords.

The Soviet Union must understand that we do not accept this behavior. We must make it clear that we oppose Soviet actions which prohibit freedom of movement, discourage the reunification of families, and refuse emigration visas to those wishing to leave the Soviet Union.

I believe it is essential that the sense of Congress be expressed concerning Soviet adherence to the principles of freedom of personal movement and the reunification of families. Both of these precepts were included in the Helsinki Declaration.

Therefore, I strongly urge my colleagues to vote in favor of this resolution.

Mr. DRINAN. Mr. Speaker, I rise in support of Senate Concurrent Resolution 7. I am proud to be a cosponsor of a similar House concurrent resolution protesting the Soviet Government's violations of internationally agreed upon principles of human rights for its Jewish minority, as well as its other citizens.

The Helsinki Final Act places high among the humanitarian issues the reunification of families. The language is clear:

"The participating States will deal in a positive and humanitarian spirit with the applications of persons who wish to be reunited with members of their family . . ." (emphasis added).

It goes on to stipulate that:

Everyone shall be free to leave any country including his own. (Article 12/2)

The Soviet Union has blatantly ignored these provisions, and in recent weeks has ominously increased its campaign of harassment of Soviet Jews. Only forceful international protests, such as that represented by Senate Concurrent Resolution 7, can prevent mounting repression.

I therefore call upon the Soviet Union to respect its own Constitution and laws, to fulfill its obligations set forth in international declarations and agreements, and to fully carry out the provisions of the Final Act of the Helsinki Conference on Security and Cooperation in Europe. I implore the Soviet Union to cease at once its campaign of anti-Semitism and repression against thousands of Jews whose sole crime has been to make known their desire to be reunited with their families.

The Soviet Government has chosen to step up its discrimination against Jews who have applied for visas at a crucial juncture in the life of the Helsinki Agreement, as the Belgrade Conference to review compliance with the agreement approaches. Typical of this recent campaign is the arrest of Anatoly Scharansky, a leading Jewish refusenik. Mr. Scharansky, whom I have had the opportunity to meet and whom I admire greatly, has been charged with espionage, and now faces not only the struggle for freedom, but also the struggle to stay alive. As I am greatly disturbed about the plight of Mr. Scharansky and other recently arrested Soviet Jews, I have sent the following letters to Chairman Brezhnev and President Carter:

MARCH 16, 1977.

HON. LEONID I. BREZHNEV,
General Secretary, Communist Party of the Soviet Union, The Kremlin, Moscow, R.S.F.S.R., U.S.S.R.

DEAR MR. SECRETARY: I write to protest in the strongest terms the detention on March 15 of Mr. Anatoly Scharansky of Moscow.

Since filing his application for permission to emigrate to Israel in 1973, Mr. Scharansky has been the object of continuing harassment by government officials. On March 4, 1977, Izvestia published a scurrilous letter accusing Mr. Schransky, two other prominent Soviet Jews who have been denied permission to emigrate to Israel, and two American diplomats, also Jewish, of engaging in espionage activities for the United States. These charges are patently false and contain unmistakable overtones of anti-Semitism.

Mr. Scharansky is the fourth human rights activist taken into custody in the past six weeks. Each of these individuals participated in an effort to monitor the U.S.S.R.'s compliance with the Helsinki Final Act. Their arrest, and the systematic denial of human rights represented thereby, constitute the most serious violations of the Helsinki Agreement. In the spirit of that agreement, I urge you to bring about the immediate release of Mr. Scharansky and the other detainees. Failure to release Mr. Scharansky and the others will surely engender widespread protests among the American people and their elected representatives in Congress and will retard the progress toward improved Soviet-American relations which we all desire.

With appreciation for your attention to this matter, I am

Cordially yours,

ROBERT F. DRINAN,
Member of Congress.

MARCH 17, 1977.

HON. JIMMY CARTER,
The President, The White House, Washington, D.C.

DEAR MR. PRESIDENT: We would like to take this opportunity to express our total sup-

port of your courageous and moral stand on the issue of human rights and to bring to your attention the plight of Mr. Anatoly Scharansky.

Mr. Scharansky is a Soviet Jew who has been waiting for three years to emigrate to Israel where his wife lives. Mr. Scharansky was arrested on March 15, 1977, following the publication of a news article on March 4, 1977, in Izvestia which falsely accused him and other Soviet Jews, Vladimir Slepak and Dr. Alexander Lerner, of collaborating with the C.I.A.

Anatoly Scharansky is currently being held at the KGB interrogation prison, Lefertovo. Mr. Scharansky has been charged with treason and espionage which are capital crimes in the Soviet Union.

Anatoly Scharansky has been an outspoken critic of human rights violations in the USSR and is now in grave danger because of his staunch defense of human rights in the Soviet Union.

We respectfully ask you to use your good offices to come to the assistance of Anatoly Scharansky in any way you deem appropriate.

With best wishes,

Sincerely,

ROBERT F. DRINAN,
PHILLIP BURTON,
Members of Congress.

I hope that letters such as these, the adoption of Senate Concurrent Resolution 7, and the continuation of the Carter administration's forceful human rights policy will bring about a swift reversal of the Soviet Government's escalating attacks on Soviet Jews.

Mr. HOLLENBECK. Mr. Speaker, I rise in support of Senate Concurrent Resolution 7. As a cosponsor of a similar House concurrent resolution, I welcome the opportunity to speak in support of it today.

The Government-sanctioned ethnic and religious discrimination which face Soviet Jews and other minorities trying to emigrate are in clear violation of internationally accepted principles of human rights. It is true that the number of Jews allowed to emigrate from the Soviet Union has increased in recent months. However, we should not let that isolated statistic obscure reality.

There continue to be reports of imprisonment of Jews whose only real crime is the expression of a desire to leave the Soviet Union, in many instances to be reunited with their families. Others are dismissed from their jobs, subjected to religious and ethnic propaganda and persecution, or denied permission without explanation.

As a signatory of the Helsinki Agreement the Soviet Union has pledged to uphold the freedom to leave one's country. It has also pledged to expedite the reunification of families which have been separated by national boundaries. The beatings, imprisonment, and harassment of Soviet Jews and other minorities cited in the findings of this resolution are in clear violation of those pledges.

As a signatory of the Helsinki Agreement the United States also has an obligation. That obligation is to continue to urge the Soviet Government to comply with these accords. We must express the continuing concern of the American people with the promises made by the Soviet Government on several occasions, including the final act of the Conference on Security and Cooperation in Europe.

Mr. Speaker, there has been a great deal of speculation as to whether the Soviet Government expected to comply with the Helsinki declaration when it signed that agreement a year and a half ago. Some have even argued that our own Government dismissed the importance of that agreement.

Whether the Soviet Government expected to be held to those promises is irrelevant. The fact is they made those promises, that they signed those agreements, and that they are violating those promises. In passing this concurrent resolution we are calling attention to those violations. It is in this context that I urge the House to call the Soviet to account for these violations, to send a message which states that we are concerned with violations of human rights regardless of where they occur.

Mr. LE FANTE. Mr. Speaker, the Government of the Soviet Union has repeatedly failed to abide by the internationally agreed upon principles of human rights as set forth in the Helsinki declaration of last year.

Despite their pledge to adhere to both the letter and the spirit of that historic document, the Soviets have chosen to continue unabated their policy of religious and ethnic discrimination.

As a cosponsor of House Concurrent Resolution 97, similar to Senate Concurrent Resolution 7, I deplore the lack of sensitivity on the part of the Soviet Government and the indifferent attitude which they have taken toward the expressed will of those nations and peoples who have sought to realize the principles expounded at Helsinki.

In the face of this disinterest, however, the American people—and all people who value their liberty—will strive to urge the Soviet Government to end its harassment of Jews, its persecution of Christian denominations, both Eastern and Western, and its jailings of so-called dissidents, those who would stand up and speak out for their freedom and the freedom of their fellow citizens.

We in the United States, and especially those of us in New Jersey, are proud to have the support in this effort of many concerned ethnic and political organizations, including the Committee for the Defense of Valentyn Moroz, the imprisoned Ukrainian historian.

Mr. Speaker, the Congress and President Carter are keenly aware of the importance of human rights in all parts of the world, and both have taken steps to rectify the intolerable conditions under which so many must suffer. Accordingly, I urge my colleagues and the American people to continue their efforts in this direction until all Russian citizens have been guaranteed the freedom and basic human rights to which all people, in all lands, are entitled.

Mr. AMBRO. Mr. Speaker, I rise in support of this legislation, similar to House Concurrent Resolution 97, of which I am proud to be a cosponsor, because I feel that this great country of ours—one of the few democracies left in our troubled world—must conduct its foreign policy with an awareness of the importance of certain basic human rights to which all peoples are entitled. Certainly President Carter has set the tone in this respect, and the U.S. Congress, if it aspires to be an equal partner in the field of foreign policy, must make its voice heard.

Some of us were quite concerned when the Ford administration decided to attend the Helsinki Conference and to sign the resultant accords which included, among other things, an apparent recognition of the boundaries of the Soviet satellies in Eastern Europe. We were somewhat reassured, however, when the final Helsinki agreement contained some strong language regarding human rights including liberalized traveling privileges and emigration with an emphasis on the reuniting of families. Because of widespread reports of continued Soviet nonadherence to these provisions, we set up a legislative administration commission, under the able chairmanship of our colleague DANTE FASCELL, to monitor compliance.

Unfortunately it appears that the Soviet Union, in its eagerness for recognition of its sphere of influence in Eastern Europe agreed to the human rights provisions—the so-called basket three—with little or no intention of taking them seriously, and no appreciation for the fact that we would do so. The result has been a continuing—and even increasing—oppression of Soviet Jews and other minorities and continued and increased reluctance to allow free emigration. Indeed, almost every day, our newspapers carry stories of the denial of these basic rights, sometimes in the most heartbreaking cases. I personally have signed at least a dozen letters to Secretary Brezhnev and Ambassador Dobrynin since the convening of the 95th Congress to protest specific acts of persecution and arbitrary treatment of Soviet Jews and of the so-called dissidents. Just last week, I joined with over 25 of my colleagues in this House in a letter to President Carter to call his attention to the fact that the Soviet Union has again banned the importation by mail of flour and foods containing flour necessary for the celebration of the upcoming passover holiday. As the letter pointed out, this rather vindictive act is not only "reprehensible from a humanistic point of view, but it is also in direct violation of the Helsinki Accord, which grants the right of religious freedom to the Soviet people."

Obviously, the Soviet Union does not intend to adhere to the human rights provisions that it agreed to in the Helsinki accords. While we cannot force them to do so, we can, and we must, Mr. Speaker, continually inform them of our knowledge of their noncompliance and of our displeasure at their actions and our refusal to sit quietly by.

I urge all of my colleagues to support this resolution, so that we send a message to Moscow that is loud, clear, and insistent.

Mr. WAXMAN. Mr. Speaker, the resolution before us this afternoon expresses the pronounced concern of the Congress over the continued harassment of Jews and other minorities in the Soviet Union. It reaffirms the interest of the

American people in the degree of Soviet adherence to the Helsinki Declaration especially the Soviet Government's pledge to facilitate the freer movement of people and the right to emigration. I am proud to be a cosponsor of this document.

Adoption of this resolution could not be more timely. The very lives of dozens of Soviet citizens, and the rights of thousands more to emigrate, are in the balance.

In the past few weeks, the Soviet Government has chosen to crack down hard against those who simply wish to practice their religion, and against those who continue to speak out for reform.

In January, the Soviet Government banned the importation of matzoths, which are essential to the observation of passover.

In mid-February, the Soviet Government arrested four prominent dissidents, Alexander Ginzburg, Uri Orlov, Mikola Rudenko, and Oleksiy Tykhy, even though no formal charges have yet been filed against them.

On March 5, the government accused several leading dissidents, all of them Jews, of working for the Central Intelligence Agency. Ten days later, one Soviet Jew, Anatoly Scharansky, was arrested for espionage.

In mid-March, the Soviet Government sponsored a prime-time television program, "Buyers of Souls," which accused Israel and its "Zionist sympathizers" of duping Jews into emigrating.

For years, the Soviet Government has systematically persecuted its Jews as an ethnic group, as a religious group, as Zionists, and as emigres. But it is now engaged in an effort to portray, in the most insidious manner, those Jews who wish to leave the Soviet Union or practice their religion as traitors.

It is an ugly and utterly irresponsible campaign.

Yesterday, Secretary Brezhnev warned the United States not to meddle in the Soviet Union's "internal affairs." But the denial of basic human rights in the Soviet Union is not solely a matter of their internal concern. It is a priority shared by people throughout the world. It is an integral component of our Nation's foreign policy.

No nation can remain indifferent, or look the other way, or refuse to take some responsibility upon itself when another country violates its solemn pledge to protect basic human rights.

The Soviet Union made such a pledge in Helsinki, and has violated that pledge in the months which have passed. The American people and this administration are not indifferent to what has occurred. And we cannot—and will not be intimidated into—setting aside these concerns in our relationship with the Soviet Union.

Particularly as we near this Passover season, with its message of freedom and redemption from tyranny, we are reminded of the compelling nature of this endless human struggle. During the Seder—or order of service at the traditional Passover meal—we are asked to address these issues in our lives today as if we ourselves had once been slaves in Egypt. And so we are inspired to view the present, with all its dilemmas, through the lenses of past persecutions. Only in such a manner can we remember how precious is the freedom which all peoples seek.

There are those, however, who ask us to lower our voices, and exercise instead quiet persuasion. They claim that pressing the Soviet Union in this regard—that only leads to increasingly severe retributions against the very people about whom we are concerned, to the detriment of détente generally.

The fact remains, however, that negotiations on a broad range of issues is proceeding, and have a reasonable chance of success, precisely because it is in the best interest of both nations that agreements on weapons and an expansion of trade be reached.

It would be wrong for us to assume that setting aside the moral dimension of our foreign policy can lead to diplomatic success and keep the respect of the American people or those around the world who view the United States as the beacon of freedom.

But most importantly, it is the Soviet Jews and Soviet dissidents themselves who have so desperately reiterated their desire that our voice be strong. Those whose lives are most threatened are the ones who are most anxious for us to continue our efforts—wherever they occur—gross violations of basic human rights.

Mr. Speaker, we are bound by our consciences, we are bound by our solemn ratification of the Helsinki accord, to continue our efforts to insure compliance with those principles.

I urge the overwhelming adoption of this resolution.

Mr. BADILLO. Mr. Speaker, on April 2, Jews around the world will celebrate the holiday of Passover, a time of joy that celebrates the going out from Egypt and the return to the homeland in Israel. The service for Passover ends with the words "Next year in Jerusalem." The symbolic significance of those words, meaningful to Jews throughout history, take on added significance this year as the reports of harassment against Soviet Jews increases, and the government of that country becomes increasingly blatant in its disregard of the simplest freedoms—freedom of religion, freedom of movement. And it is a capricious disregard of rights—one member of a family will leave the country unhindered, another will be promptly arrested as a draft evader as he seeks to leave. One will wait for months and months to go, only to have his papers confiscated at the border. And others, too many others, as we have learned, have been taken to jail or hospitals or just disappeared.

There is another Passover ritual that has new and bitter significance this year. Traditionaly, three matzohs, the unleavened bread of the holiday, are placed on the table to symbolize the struggle of the Jewish people for freedom. In recent years, many American families have added a fourth piece, as a reminder that Russian Jews are not free. This year that matzoh must represent a piece of this essential ingredient to the observance of Passover that a Russian citizen will not be able to eat. The Soviet Government has this year banned the importation of 25,000 individual packages of matzoh, and only limited amounts will be available from synagogues in large cities such as Kiev and Leningrad. However, even to avail themselves of this limited opportunity Jews will be forced to register their names and addresses in exchange for the matzoh.

At this season, I would like to speak of my adopted prisoner, a person whose life I know only because he is not free, a person I learn about only by communications from the Greater New York Council on Soviet Jewry, and from official communiques from the State Department; Alexandr Slinin is 21 years old. He was a student from Kharkov. After simply submitting an application for a visa to emigrate to Israel, he was expelled from Kharkov University, and summoned to his local military registration board. Slinin refused to serve in the Soviet Army knowing that his departure to Israel would be delayed by 7 years, and he was sentenced to a 3-year term on charges of draft evasion. About 6 months ago, I learned that Alexandr Slinin, because he had been found with literature printed in Yiddish in his cell, was transferred to a mental hospital, and I have learned nothing of him since.

The great tragedy of Alexandr Slinin's case is that it is not isolated. It is not only the great artists and scientists and critics who are being imprisoned and harassed, but it is the young, it is the voiceless as well. And this, my colleagues, is continuing daily in a country whose representatives, 18 months ago, became signatories to the Helsinki Agreement, an agreement that mandated for humanity a "mutual respect for fundamental rights and freedoms," Those same accords that mandate that people should be allowed to be reunited with their families—as expeditiously as possible, to allow freedom of thought, conscience, religion or belief for all, to practice their religious beliefs freely, to respect the rights of national minorities before the law, to facilitate wider travel for personal or professional reasons, to facilitate the freer and wider dissemination of "information of all kinds."

I could go on listing those policies incorporated in the Agreement that are not being adhered to. The Soviet Union has flagrantly disregarded and flouted those instruments, claiming that there are also provisions against interference by any of the signatories in the internal affairs of any other. We cannot, therefore, relax for one instant, our public vigilance, and our continual public declarations against these injustices and gross violations of international law.

The Helsinki Agreement can be of major force in the quest for international peace, but in order for it to be effective, it must be adhered to—yes, by all participants. And it is my hope that, under the initatives taken by our new administration in the area of international human rights, for many of those who wish to emigrate, this will be the last Passover it will be necessary to say "Next year in Jerusalem."

Mr. ANNUNZIO. Mr. Speaker, I rise in strong support of Senate Concurrent

Resolution 7, I am proud to have cosponsored a similar House concurrent resolution resolving "that the sustained interest of the American people be conveyed to the Soviet Government regarding adherence to the Helsinki Declaration, including their pledge to facilitate freer movement of people, expedite the reunification of families and uphold the general freedom to leave one's country."

Personally, I was opposed to the signing of the final act of the Conference on Security and Cooperation in Europe because it was interpreted to mean official U.S. endorsement of the absorption of the three Baltic States and other territories into the Soviet Union. Moreover, the Soviets considerably watered down their original promise to include in the Helsinki document strong guarantees for wider dissemination of information and freer movement of peoples.

However, the key language of the August 1, 1975, agreement states:

The participating States . . . make it their aim to facilitate freer movement and contacts . . . will deal in a positive and humanitarian spirit with the applications of persons who wish to be reunited with members of their family . . . will examine favourably . . . requests for exit or entry permits from persons who have decided to marry a citizen from another participating State. . . .

I am delighted that Congress passed legislation last year, which I cosponsored, to create a Commission on Security and Cooperation in Europe to strictly monitor Soviet compliance with their weak promises to allow the freer movement of peoples and the wider dissemination of information. Congress also passed my resolution on December 2, 1975, to put the House of Representatives on record that "there has been no change in the longstanding policy of the United States on nonrecognition of the illegal seizure and annexation by the Soviet Union of the three Baltic nations of Estonia, Latvia, and Lithuania, and that it will continue to be the policy of the United States not to recognize in any way the annexation of the Baltic nations by the Soviet Union."

Mr. Speaker, with his inauguration on January 20, President Carter placed a strong, new emphasis on the American commitment to the extension of human rights around the world. In his inaugural address, the new President said:

We are a proudly idealistic Nation, but let no one confuse our idealism with weakness. Because we are free we can never be indifferent to the fate of freedom elsewhere. Our moral sense dictates a clearcut preference for those societies which share with us an abiding respect for individual human rights.

In a recent statement before the Congressional Commission on Security and Cooperation in Europe, Mr. Leonard Garment, a former U.S. representative to the Human Rights Commission of the United Nations, reviewed the implications of this new direction in U.S. foreign policy. He concluded his remarks by saying:

Because of the truly embattled position we hold in the world, it is most important that we do not permit the setbacks we will almost certainly suffer to erode our confidence in ourselves. It is absurd to think that because the Soviets decide to toughen in a particular set of negotiations, or because they begin resisting our human rights importunings, our policy must have been ill-conceived. We have a very basic interest in the pursuit of human rights, and it is an interest that far outweighs the temporary costs and unpleasantness that we are going to meet in pursuit of this interest. There cannot be much doubt that in addition to its worthiness for its own sake, the idea of human rights is one of the chief and most persuasive points of superiority that we present to the world; it is precisely to protect our long-term interests that we should put this point of superiority before the world, and have human rights on the world's mind, as much as possible. Of course one is going to have to bear costs for this; but it would be suicide to begin thinking that each cost is a sign of the futility of our whole enterprise.

With Helsinki, we achieved more than we had expected. We must not allow those gains to be abandoned because of some lack of understanding on our part of the fact that we will have to pay a certain price for them, we will have to choose our targets carefully, we will have to organize ourselves and our allies for a systematic effort, and we will have to remember to make our case as strongly and as clearly as possible wherever we choose to act. I am sure that this Commission does not contemplate any such abandonment of gains or slackening of effort. I am sure this Commission knows that as it prepares for Belgrade it is moving toward what could well be the most important opportunity to advance the universal observance of human rights since the end of World War II. And I am sure that in your hearings you are going to seek ways to make the most of this historic opportunity.

Mr. Speaker, over the years during my service in Congress, I have introduced countless resolutions and bills to further human rights around the world, and have written many letters, both on my own and in concert with other Members of Congress, appealing to Soviet leaders to respect the human dignity of individuals in their country who are exiled, imprisoned, in mental asylums, denied employment, or are suffering other types of harassment because of their attempts to exercise their freedom of religion, or to emigrate, or to speak out and notify the world of the sufferings of their friends and loved ones. Therefore, I am delighted by the increasing emphasis by Congress and the President on human rights issues around the world.

Unfortunately, the policies of "détente" practiced by our country in recent years has been interpreted as paying at least tacit homage to the totalitarian aggressor and has eroded the spirit and dedication of our allies and of individuals all over the world who are valiantly trying to attain the democratic ideal of freedom and justice for all their people.

The power of our military might is indeed important, but in the unremitting clash of interests and ideas between systems of mass slavery and individual freedom, will and morale are of prime importance, not only to the American people themselves but also to the peoples of the world, regardless of the form of their government. Unless belief in the ideals of freedom is maintained, combined with the determination to resist Communist guile, no amount of weaponry will prevail. Sacrifices, both national and personal on the part of freedom-loving peoples everywhere, are always necessary to the defense of freedom and idealistic determination is a prerequisite for those sacrifices.

We find ourselves in continuing confrontation with the Communists for the minds of the peoples of the world, and although no one would disagree that all efforts should be made to stop the nuclear arms race, the spiritual struggle between freedom and communism can never cease. Because this contest will eventually decide the fate of the world, far more emphasis should be placed by the United States on strengthening the will to resist, and Senate Concurrent Resolution 7 is a strong step in this direction. The spiritual values of democracy and free will on which our own Nation was founded and which our allies are striving to emulate are at stake, and I strongly urge the support of my colleagues in the Congress for this legislation.

Mrs. SPELLMAN. Mr. Speaker, I rise today in support of those many Soviet Jews who have suffered untold terrors at the hands of their Soviet oppressors. Yesterday, the head of the Soviet Communist Party strongly criticized this Nation and its President for interfering in domestic matters of the Soviet Union in our defense of human rights.

There are certain human rights which extend beyond internal jurisdictions. These internal rights were confirmed in the Helsinki Agreements, and they are so basic to the very existence of humanity that this Congress must retain its determination to assure these rights.

Today, I wish to bring to your attention just one example of the many, many which occur each day in the U.S.S.R. Esther and Vladimir Lazaris were married in Moscow in 1970. Vladimir was a law student at the time. They had a child 2 years later, and shortly after that the family applied for visas to Israel.

Visas were issued to Esther and her son Raphael. However, Vladimir's was denied on the basis that he had no approval from his parents. When Vladimir received written permission from his parents, his visa was denied on the pretext that although he was not in a classified position, someone, at some time, might have given him classified information. At this point, he also lost his job.

I ask now to consider Vladimir's plight. He has been threatened with prosecution by Soviet authorities for participating as an editor of an unofficial magazine. He has been separated from his wife and son for 4 years, during which time he has lost nearly all hope of reuniting with them, and he has been persecuted out of his job and any career in the Soviet Union—all because he had the audacity to want to emigrate with his wife and child.

If there were nothing further to add to this example of a personal tragedy, Vladimir's story would be like that of countless other harassed Soviet Jews. There is one sad fact that makes this case especially heart rending. Vladimir's and Esther's son, Raphael, was born with asphyxia. This is a developmental disability which can be overcome with special family attention while a child is young. It demands a family environment.

And it demands that one parent may be with the child constantly, leaving the other time to help support a family.

Any chance of even distant support was removed when Vladimir lost his job. That action by the Soviet Union drastically affected at least three lives in two nations. It went well beyond an internal matter. It is something which I bear with grief; it is a burden which we all bear, and which we should all seek to alleviate.

Mr. QUAYLE. Mr. Speaker, I rise in strong support of Senate Concurrent Resolution 7 which once again sends a message from the Members of the House of Representatives to the leaders of the Soviet Government underscoring our commitment to this matter of human rights. I was pleased to join as a cosponsor of a similar House concurrent resolution with my colleague the gentleman from Connecticut (Mr. MOFFETT).

This resolution clearly states that the sustained interest of the American people be conveyed to the Soviet Government regarding adherence to the Helsinki Declaration, including their pledge to facilitate freer movement of people, expedite the reunification of families, and uphold the general freedom to leave one's country.

It is interesting to note, Mr. Speaker, that Soviet Communist Party leader Leonid Brezhnev only yesterday strongly assailed President Carter's support for Soviet dissidents. The Soviet leader has warned against so-called interference in our internal affairs. Perhaps the pressure now being exerted by our Government is beginning to hurt. So be it.

This resolution recites again and condemns the recent beatings, imprisonment, and harassment of Soviet Jews and other minorities trying to obtain emigration visas to reunite with their families.

The harassment of the Jewish minority manifests itself in many ways: an attempt to reunite with one's family is controlled by the whim of the state and party bureaucrats; a person's home is ransacked late at night, or perhaps the family loses its "privileged" Moscow address; anti-Semitic films are fed as propaganda to the people; in more severe cases the people suddenly lose their ability to think clearly and require the free medical and psychiatric health care provided by the state; or finally some grow so tired of the constant harassment that they are forced to leave their homeland.

It is reassuring that the President and the Congress have taken forthright stands in recent weeks on human rights. It is our responsibility to continue this effort because the people who speak the truth about the Soviet Union depend upon our vigilance and our voices to protect them from the worst.

We have taken the first steps to support them in their cause, let us not fail to offer at least our voices in support of their struggle.

Mr. LENT. Mr. Speaker, I rise today to condemn in the strongest possible terms the Soviet Union's utter disregard for the human rights of its Jewish minority, and I commend the House leadership for bringing to the floor a resolution condemning the Soviet Government's record on human rights.

Soviet party leader Brezhnev has criticized the United States for its undue interest in human rights within the Soviet Union. He even goes so far as to say that this interference threatens better relations between our nations. It is my own view that our interest, far from being unwarranted, is required. The Soviet Union is a party to innumerable international conventions on the subject of human rights, most recently the Helsinki accord. So far, the Soviet Government has shown no inclination to comply with the terms of those agreements. I fear the Soviets would forget they signed those agreements, were it not for our continued pressure.

Soviet harassment of its minorities takes many forms, some subtle and some blatant. Obviously, imprisonment for one's religious or political beliefs is one form. Loss of employment is another. Two which have recently been instituted by the Soviet Government include placing a limit on the size and value of parcels which can be sent to citizens of the Soviet Union, and prohibiting the importation of flour or flour products. The latter move was clearly aimed at Soviet Jews, who are now preparing to celebrate Passover, and who will be unable to obtain matzoh unless they register with the Soviet Government.

For the last 3 years, I have been writing to an "adopted" prisoner of conscience, Hillel Butman. His only crime was expressing a desire to emigrate to Israel. Unfortunately, his case is not unique. Those of us who have been participating in the prisoner of conscience program know that international pressure does make a difference. There are probably some prisoners of conscience who are alive today because of the concern we have expressed to the Soviet Government. It is because of the possibility of success that we must redouble our efforts, and I am pleased that the House has today gone on record in favor of human rights. I hope the message will be clear to the Soviet Government that we will tolerate no less than sincere compliance with international human rights convention.

Mr. EVANS of Delaware. Mr. Speaker, I rise in strong support of the resolution now being considered by the House regarding the harassment of Jews and other minorities in the Soviet Union.

This resolution will make absolutely clear to the Kremlin that the American people are profoundly committed to freedom for all people in the world, regardless of nationality.

And it will also make it clear that this Congress holds the Soviet leadership strictly accountable to the agreements they made in the Helsinki Declaration with respect to facilitating freer movement of people, expediting the reunification of families, and upholding the general freedom to leave one's country.

Mr. Speaker, despite differences of party, I strongly support President Carter in his campaign for human rights in the Soviet Union. I commend him for focusing world opinion on the oppressive tactics of the Soviet Union, tactics which I am sure the Russian leadership would just as soon keep in the dark. The only protection that Soviet dissidents or those wishing to emigrate is world opinion. I earnestly hope that this Nation, as the leader of the free world, will continue to speak out on the infringements of personal liberty which occur in the Communistic bloc countries.

In a few days, Secretary of State Vance will journey to Moscow. I urge hm to convey to Soviet leaders the unflagging determination of this Congress and the American people to see that the letter and the spirit of the Helsinki Declaration and the United Nations Charter are fulfilled.

This Nation must continue to be a beacon of hope to minorities in the Soviet Union and other Iron Curtain countries. This resolution reaffirms that responsibility, and I urge its overwhelming passage.

Mr. KEMP. Mr. Speaker, I have monitored recent trends in Soviet compliance with the provisions of the Helsinki Agreement with great interest, and it has come to my attention that the small number of concessions which have been made seem to run concurrently with other intolerable violations of human rights. I speak of the recent release from prison of Dr. Mikhail Shtern, whose long overdue freedom was granted in light of the gravity of his illness, on the very eve of the arrest of Anatoly Sharansky, whose only crime has been his attempts to join his bride in Israel since 1974.

It has been my great pleasure to speak out to Soviet authorities in behalf of both these men, as well as others who have put themselves and their families out of fortune and in some cases in danger by attempting to exercise their civil rights, rights to which the Soviet Government has promised to afford its citizens, yet has not.

I join my colleagues with a sense of duty and pride in declaring that we must push for total compliance with the Helsinki Declaration and with the principles of human rights. We never forced the Soviet Union to sign this agreement. They entered into it willingly. Now let us show them that they cannot make commitments which they do not intend to keep. Let us show them that we expect them to honor the principles which they have willingly agreed to uphold, lest all past and future agreements become meaningless and void.

Mr. MAZZOLI. Mr. Speaker, as a cosponsor of House Concurrent Resolution 97, a similar resolution to Senate Concurrent Resolution 7, I want to take this opportunity to express my personal concern over the plight of the Jews who live in the Soviet Union.

Despite the fact that the Soviet Union has permitted a higher number of Jews to emigrate in recent months than previously had been the case, there remain in Russia many Jews who wish to leave but who have been denied that basic human right of free movement across national borders.

It is not sufficient justification, in my mind, for General Secretary Brezhnev to contend that Soviet human rights pol-

icy is strictly an internal matter and, therefore, not America's concern.

The Soviet Union's tight restrictions on emigration is in direct contravention of the Helsinki accords. As a cosignor of that agreement, the Soviet Union pledged—among other things—to honor the principle of freer travel for all its people.

This principle has been in little evidence in the Soviets' handling of visa requests and in their overall attitude toward travel by their minority group citizens.

Further, it is my understanding that Soviet officials have continued to harass certain minority groups—in particular Soviet Jews—and have made a concerted effort to abrogate the civil rights and the human liberties of these minority groups.

A case in point is the Soviet Union's restriction on the importation by mail of flour and foods containing flour. This is apparently an action directed at Russian Jews who utilize flour in the making of matzos during the Passover season.

Again, by agreeing to the Helsinki accords, the Soviets went on record as supporting the right of religious groups to meet and to worship freely.

If the Helsinki document is to have anything more than purely symbolic meaning, the Soviet Government must guarantee its citizens freedom of religious association.

It is incumbent on the United States—as well as on other signatories of the Helsinki Final Act—to persevere in championing the cause of those Soviet citizens whose civil liberties have been systematically abused.

There can be no compromise on human rights. Because of our rich heritage of personal, political, and religious freedom, the United States must remain in the forefront of the worldwide movement for human rights and human dignity.

I fully support Senate Concurrent Resolution 7 and the call it makes for Soviet accountability with respect to certain unviolable tenets of human existence.

Mr. MINISH. Mr. Speaker, I rise in support of Senate Concurrent Resolution 7, expressing the concern of the Congress regarding the treatment of Soviet Jews and other minorities in the Soviet Union.

As a signatory of the Helsinki Declaration, it is the responsibility of this country to express our dissatisfaction with the recent actions of the Soviet Union which have restricted and harassed dissent within that nation.

The Soviet Union is pledged, as a cosigner of that agreement, to permit free emigration, yet it continues, through intimidation, to deny emigration visas to minorities.

It is particularly appropriate, Mr. Speaker, to consider this resolution at a time when our own Government has lifted virtually all restriction on travel by Americans and the Soviet authorities apparently have begun one of their periodic crackdowns on Jews and others seeking basic human rights.

This resolution indicates to the Soviets that the Congress has a sustained and continuing interest in strict adherence to the Helsinki Declaration. As a cosponsor of a similar House measure, I urge overwhelming passage of Senate Concurrent Resolution 7.

Mr. KOSTMAYER. Mr. Speaker, I rise in support of this resolution.

When the Helsinki agreement was signed in 1975 the Soviet Union advertised that fact as a victory in diplomacy for the Communist bloc. The Soviets apparently attached little importance to the human rights section of the accords.

The President has made well known his interest in human rights. He has taken this cause to the United Nations. I am sure he will address the human rights issue in upcoming negotiations with the Soviet Union.

The pressure on the Soviets must be maintained. We must be relentless in our insistence on the implementation of the rights provisions of the Helsinki accords.

That is why I urge passage of this resolution. The Soviets must be made aware that disapproval of illegal beatings, imprisonment, and harassment is not limited to the President and State Department. The American people disapprove, and we as their representatives can collectively express that disapproval here today.

And let us not ignore the fact that although the Soviet harassment of citizen groups and minorities seems to cut across all nationalities, the Soviet Jews are singled out consistently for abusive treatment. This is discrimination in its ugliest form, and the lessons we have learned in Europe should not be forgotten. Jewish rights and freedoms must be guaranteed.

I again urge resounding approval of Senate Concurrent Resolution 7.

Mr. RINALDO. Mr. Speaker, one of the significant achievements of the Final Act drafted at Helsinki was to solidify the issue of human rights as a legitimate topic for discussion in international forums. Although the United Nations Charter and the Universal Declaration on Human Rights made the subject of civil liberties a matter of international concern long before the Helsinki accord, the Final Act gave this question a new prominence.

I am afraid, however, that the Soviet Union is adhering to this agreement as poorly as it has to other international accords. Reports of beatings, imprisonments, and harassment of Soviet Jews have increased at an alarming rate. Moreover, Chairman Brezhnev himself in effect confirmed these reports by arrogantly declaring yesterday that no nation can tell him to comply with the Helsinki pact.

Détente can have no meaning without a commitment on the part of Soviet authorities to respect the civil rights of its citizens. Most importantly, such a commitment should come before the preparatory meeting, required by the Final Act, in Belgrade. In large part, the success of that followup to Helsinki will rest heavily on a demonstration by the Soviet Union of its adherence to the human rights provisions of the Final Act.

Mr. Speaker, I am grateful for this opportunity to expresse my views on this subject, just as I will be pleased to vote in favor of Senate Concurrent Resolution 7, which expresses the desire of Congress that the Soviet Union discontinue its harassment of Soviet Jews. I am hopeful that, in the near future, the Soviet Union will begin to live up to its international and moral obligations and thus make such legislative activity unnecessary.

Mr. STEERS. Mr. Speaker, today the House is considering a resolution similar to House Concurrent Resolution 97, offered by the distinguished gentleman from Connecticut (Mr. MOFFETT) of which I am a cosponsor, that expresses the concern of the American people to the Soviet Government concerning the harassment of Soviet Jews and other minorities seeking to reunite with their families in foreign lands.

A resoluton of this kind is essential if the Russians are to understand that the United States will not be bullied out of insisting on Soviet compliance with the Helsinki Declaration. The Soviets will, no doubt, call this resolution interference in their internal affairs, but that is obviously not the case. This resolution simply requests that the Soviet abide by a signed agreement.

If we cannot be assured of Russia's willingness to abide by this agreement, then how can we be sure they will abide by other agreements. I expect the Soviets will not yield on this matter for some time, and they will probably try to exert pressure on the United States to withdraw from its present position. However, the U.S. Congress must not relent in seeking full compliance with the Helsinki accords.

There is another, more tragic, side to this issue, and that is the plight of all the refuseniks in the Soviet Union. These individuals took the courageous step of applying for emigration visas and were refused—which is contrary to the basket three provisions of the Helsinki Declaration. Upon their refusal, many of them lost their jobs, and their lives in the Soviet Union entered a state of limbo. Often, most of the refusenik's family is already out of the Soviet Union.

The fate of these individuals, who suffer daily harassment both official and unofficial, lies in the hands of the Soviet bureaucracy which is ignoring its international agreement to allow the emigration of these and other Soviet citizens.

The resolution we are voting on today will not solve these problems immediately. However, it will be a positive step in the long journey ahead to secure freer movement for, and the termination of harassment of, Soviet Jewry and other minorities in the Soviet Union.

Mr. BURKE of Florida. Mr. Speaker, I would like to express my support for Senate Concurrent Resolution 7, which is similar to a House concurrent resolution which I cosponsored and which, if enacted, will proclaim the sense of the Congress that the sustained interest of the American people be conveyed to the Soviet Government regarding adherence to the Helsinki Declaration, including their pledge to facilitate freer movement

of people, expedite the reunification of families, and uphold the general freedom to leave one's country.

Mr. Speaker, we in the United States often take many of our freedoms for granted. One freedom in particular we tend to assume is the freedom to emigrate. So close is this freedom to our national spirit that when Emma Lazarus wrote her inscription for the Statue of Liberty she called upon the nations of the world to send "your tired, your poor, your huddled masses yearning to breathe free" and "the wretched refuse of your teeming shore."

The spirit of openness contained in these passages says much about us as Americans. It says first of all that we are a land of immigrants. And it also says that we naturally expect that those who desire to come to our shores will be allowed to come. What is not recognized in these lines, however, is the fact that the Soviet Union has intertwined the freedom to emigrate into one of the most perverse political systems ever to darken the human record. What we in the United States assume as a natural inalienable right is flagrantly disregarded in the Soviet Union.

On August 1, 1975, in Helsinki, Finland, the heads of 32 European nations, the Soviet Union, the United States and Canada, sat down at a long, blue-draped table and signed a blue-bound document the size of a phone book which declared their mutual "respect for human rights and fundamental freedoms." This document declared that "in the field of human rights and fundamental freedoms, the participating states will act in conformity with the purpose and principles of the Charter of the United Nations and with the Universal Declaration of Human Rights. They will also fulfill their obligations as set forth in the international declarations and agreements in this field including inter alia the International Convenants on Human Rights, by which they may be bound." One of the many principles laid in the Universal Declaration of Human Rights was that "everyone has the right to leave any country, including his own, and to return to his country."

Mr. Speaker, no one was more pleased with the Helsinki agreement than Leonid Brezhnev. Addressing the audience in the soaring white-marble hall, the Soviet Communist party leader solemnly urged that the principles of Helsinki be "put to practical use and made a law of international life not to be breached by anyone." He also said that—

> We note with deep satisfaction that . . . these principles are imbued with respect and care for man, so that he can live in peace and look forward to the future with confidence.

Mr. Speaker, these words were uttered only 1½ years ago. And yet, what a mockery the Soviet Union has made of the Helsinki proceedings. In spite of these spoken platitudes, the Soviet leaders have continued to set loose throughout the entire fabric of Soviet society a wickedness which finds no equal in scale or intensity in the history of man. And let there be no mistake about this threat. Unless we find ways to counter these excesses, the main fabric of European civilization may not remain erect at the close of the struggle in which we are now engulfed.

But, it may be asked, what are the excesses of which you speak? Why is it that the Jewish people, in particular, want to leave the Soviet Union? Well, let me answer by listing a bill of particulars by no means complete in scope.

Soviet Jews are denied equal ethnic rights guaranteed to all other nationalities by Soviet law.

All centers of Jewish culture have been closed.

Jewish publishing houses and Jewish printing presses have been closed. All Yiddish type face has been melted down.

The entire Jewish educational system has been dismantled.

Teaching Hebrew and Yiddish is not allowed.

It is impossible to buy any books on Jewish history.

It is impossible to find a copy of the Bible.

Jewish prayer books have all but vanished.

There is only one rabbi left in the USSR. No new rabbis are being trained in the country.

Less than 60 synagogues remain but few function much of the time. Those who attend are fearful the KGB will break up services—which it often does. KGB agents come to services disguised as congregants.

Religious calendars, indispensable guides to religious observances, cannot be published (except for the "show piece" Central Synagogue in Moscow where some are occasionally allowed).

Prayer shawls and other Jewish devotional articles are not allowed to be produced.

Almost no contact with Jewish co-religionists is allowed. This is in contrast to the experiences of other faiths in the Soviet Union: Eastern Orthodox, Protestant, Catholic, and Moslem.

Jewish cemeteries are regularly desecrated. Historic Jewish gravesites have been bulldozed.

Virulent anti-Semitism is everywhere. Jews and Judaism are constantly the target of anti-Semitism in the media.

Young Soviet Jews are deprived of getting any kind of Jewish education and religious instruction.

Soviet Jews can no longer get good jobs in the USSR in contrast to only a few years ago. Some universities now have quotas.

Those Jews who have jobs are liable to lose them immediately upon applying for emigration visas.

For Jewish activists, arbitrary arrest, beatings and interrogation is common.

Due process for Jews in court proceedings which are emigration-related is next to nonexistent.

Civil rights, social rights—the right to work, cultural rights, freedom of education—have been taken from Soviet Jews. In denying these human rights Soviet authorities are blatantly violating the Helsinki agreement, accepted international law, its own internal legal system and the minimum decent behavior of civilized people.

Mr. Speaker, these, and numerous others, are the reasons Soviet Jews want to emigrate from the Soviet Union.

Mr. Speaker, it was as recent as March 17, 1977, that I wrote to General Secretary Leonid I. Brezhnev to express my indignation at the treatment recently accorded Anatoly Scharansky. Mr. Scharansky has been the target of systematic harassment by officials of the Soviet Government for some time. Ever since filing his application for permission to emigrate to Israel in 1973, he has been subject to increasing pressures. However, on March 4, 1977, his situation gravely worsened when Izvestia published an infamous letter accusing Mr. Scharansky and other prominent Soviet Jews, along with two American diplomats, of lending themselves to espionage and treasonous activities against the Soviet State. Since that time he has been under extensive KGB pressure until on March 15 he was arrested by Soviet authorities. While these charges are false and without foundation, there can be no doubt that they are serious insofar as treason is a capital crime in the Soviet Union.

Mr. Speaker, even since then, Mr. Brezhnev's own words have made it quite clear that the Soviet Union does not intend to comply with the human rights provisions of the Helsinki accords. In a major address to a national trade union congress, on March 21, 1977, Mr. Brezhnev bitterly assailed the Carter administration's support for Soviet dissidents as unwarranted "interference in our internal affairs." He warned that—

> Normal development of relations on such a basis is unthinkable.

In summing up the position of the Soviet Government, General Secretary Brezhnev said that—

> We will not tolerate interference in our internal affairs by anyone and under any pretext.

This is what atheistic Soviet communism thinks about human rights.

Mr. Speaker, the United States would be false to its own political values and traditions if it stood silent in the face of this wanton political oppression. Running throughout the American political character is the theme that America occupies a special place in the hard march of mankind. As Cushing Strout has shown in "The American Image of the Old World," the self-image of America is that of a land of virtuous simplicity untainted by tyranny, injustice, and vice. Our Founding Fathers—Benjamin Franklin, Thomas Paine, Thomas Jefferson, John Adams, Alexander Hamilton, and others—all believed that it was America's destiny to be the repository and the exemplar of human freedom. Even in recent times, President Truman declared that it was the policy of the United States to "defend free peoples everywhere" and President Kennedy announced to the world that the United States was going to defend freedom around the globe. President Carter has made it clear that the struggle for human rights will be the cornerstone of his foreign policy. Throughout our tradition—and influencing our foreign policy—is the belief that America's future is linked with the future of other

peoples and other nations around the world—people who would similarly be touched by those unquenchable fires of freedom.

Mr. Speaker, I ask that the U.S. House of Representatives give its unanimous consent to this concurrent resolution. Let us rise up and show our support to those victims of political oppression in the Soviet Union who look to us not only for support, but who see us as the "last best hope for mankind."

Mr. BIAGGI. Mr. Speaker, I rise to join in the protest against the accelerated campaign by the government of the Soviet Union to persecute and harass prominent minority members of its citizenry, particularly Soviet Jews. Adoption of this resolution today will place the United States Congress squarely on the side of justice in the struggle for human rights in the Soviet Union.

The actions of the Soviet Union directed against its minority citizens have included beatings, imprisonment, the denial of applications for emigration visas and most recently, a ban on the importation of special foods for the Jewish Passover. This flies directly in the face of the Helsinki agreement which respects the rights of individuals to emigrate and to be free from persecution; the most fundamental of all human rights. This Nation has been most outspoken in its insistence that all signators of the Helsinki Accord adhere to all its principles. This resolution reflects still another example of our commitment to have this agreement honored.

In recent weeks, certain cases of minority harassment in the Soviet Union have received wide public attention in the United States. This, coupled with the position of the Carter administration on human rights, has triggered strong statements by Soviet leaders. It is my view that our pursuit of human rights and self determination for all, is an admirable principle. Yet, I have some concerns that the policy is not being applied universally. It is imperative for this Nation to achieve credibility in its foreign policy. We must speak out against human rights violations wherever and whenever they occur, whether they involve friend or foe.

This Nation must not be intimiated by verbal rumblings from the Kremlin. Our cause in solidarity with oppressed minorities in the Soviet Union is just and should be continued. This resolution deserves the overwhelming support of all Members.

Mr. DOWNEY. Mr. Speaker, I rise in favor of this concurrent resolution expressing the concern of Congress over the harassment of Soviet Jews and other minorities. As the world's leading democratic Nation, it is this country's obligation to protest the oppressive actions the Soviet Union imposes upon its citizens. The Helsinki accords, internationally agreed upon principles of human rights, to which the Russians are in blatant violation, is a pact between nations that permits no exception.

Last week, the Soviets surprised us all when they released Dr. Mikhail Shtern. Dr. Shtern was imprisoned in a Soviet labor camp on trumped up charges of accepting bribes, and was sentenced to 8 years. This 60-year-old man suffered for 2 years in the camp before the Soviet supreme court saw fit to release him. Just prior to his release, Shtern was placed in a punishment cell—a 2- by 3-foot cubicle, with iron pegs sticking out from the walls. He was forced to remain in a fetal position for 15 days, during which time he was fed only every other day. Fortunately, Shtern has now been rejoined with his wife and is now recuperating from his ordeal.

Unfortunately, this gesture from the Kremlin is not likely to be a trend-setter. In fact, later in the same day that Shtern was released, Anatoly Sharansky, another Soviet Jewish dissident, was captured on a street corner. To date, Sharansky has not been charged, and we are all wondering if we will ever hear from him again.

Diplomatic action from the United States is the only way that we can ever hope to guarantee the Soviet citizens the very basic human rights that we all take for granted in this country. And we have more potential for influencing the Kremlin than I think most of us realize.

The Soviet Union relies heavily on the United States for our food and technology exports. Without these exports the Russians would suffer severe agricultural and industrial production shortages. To put it simply, their industries would not function and their people would not eat.

The Kremlin is very much aware of their dependence on this country. Yet, they have been consistently able to gain the upper hand in negotiations with Americans who are all too accustomed to taking the first Soviet "Nyet" for an answer.

If we are actually serious about this Nation's stand for the human rights of Soviet citizens, we must be willing to use whatever necessary threats—perceived and real—of prudent economic mechanisms to force the Russians into submission on this very important issue.

Without our help, the lives of these Soviets and others like them will continue to be filled with fear and oppression.

Ms. OAKAR. Mr. Speaker, I am heartened by the attention and energies that the Carter administration, particularly the President himself, have devoted to the question of human rights. Sharing such concerns, I have taken time today to pay particular attention to the plight of the Jewish people within the Soviet Union.

The right to emigrate has been the central issue in any discussion of Soviet Jews. Indeed, Soviet leaders have responded to Western pressures and allowed a far greater number of Jews to leave the Soviet Union. Today, the monthly emigration quota for Jews stands at 1,300. Yet, this is not to be confused with a new direction in Soviet emigration policies or a new Soviet approach to the issue of human rights. In fact, the increased number of emigrees was a gesture to the new administration, and as President Carter shows his commitment to the essence of this issue rather than shallow gestures, these quotas will again be in danger in more restriction.

Beyond emigration, the issue of Soviet Jewry touches upon the treatment of Jews who choose to remain or must remain under the rule of the Supreme Soviet. On a recent occasion, Soviet Jewish dissidents presented their demands for more dignified treatment by police and other state agencies as well as a more lenient emigration policy. Those who appeared at government offices to present these demands were set upon and beaten by uniformed police. Other abuses of Soviet Jews have included the use of psychiatry to punish the most outspoken dissenters in an effort to force recantation.

Abuses of this nature cannot be left to the whim and folly of Soviet officials. Soviet repression of the Jewish people is not to be dismissed as a mere internal matter. We in the Congress must use our constituted power to bring respect for human and civil rights to the Soviet Union. House resolutions are a fine statement of spirit and idea, but the Congress must continue to use its legislative powers in the areas of tariff and export credit to bring basic respect for human dignity to the Soviet Union.

Until such time as the Soviet Jew can carry out his life in a manner that he chooses, I urge my colleagues to be vigilant in their attention to this matter and persistent in their cries for human justice.

Mr. ZABLOCKI. Mr. Speaker, I have no further requests for time, and I urge adoption of the concurrent resolution.

The SPEAKER. The question is on the motion offered by the gentleman from Wisconsin (Mr. ZABLOCKI) that the House suspend the rules and concur in Senate Concurrent Resolution 7.

The question was taken.

Mr. MOFFETT. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER. Pursuant to clause 3 of rule XXVII, and the Chair's prior announcement, further proceedings on this motion will be postponed.

GENERAL LEAVE

Mr. BROOMFIELD. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the subject of Senate Concurrent Resolution 7.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

SUPPLEMENTAL MILITARY ASSISTANCE FOR PORTUGAL FOR FISCAL YEAR 1977

Mr. HAMILTON. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 3976) to authorize supplemental military assistance to Portugal for the fiscal year 1977, and for other purposes.

The Clerk read as follows:

H.R. 3976

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 504(a)(1) of the Foreign Assistance Act of

1961 is amended by inserting at the end of the table of countries and amounts—

"Portugal ---------- 30,000,000".

The SPEAKER. Is a second demanded?

Mr. FINDLEY. Mr. Speaker, I demand a second.

The SPEAKER. Without objection, a second will be considered as ordered.

There was no objection.

Mr. HAMILTON. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of H.R. 3976, a bill to authorize the allocation of $30 million in grant military aid to Portugal for fiscal year 1977. This supplemental fiscal year 1977 request was transmitted to the Congress in late February. Chairman ZABLOCKI introduced the bill February 23 by request and it was referred to the Subcommittee on Europe and the Middle East which I chair.

On March 1, 1977, the subcommittee held a lengthy hearing with officials of the State Department, Defense Department, Treasury Department, and the American Ambassador to Portugal who returned for the hearing. Following the hearing the bill was marked up by the subcommittee and ordered reported favorably, to the full committee which in turn reported it favorably by voice vote to the House on March 15, 1977.

Mr. Speaker, this bill supports important foreign policy interests of the United States. Portugal is a NATO ally. It has, after 50 years of authoritarian rule, moved in an impressive and seemingly convincing way to develop crucial democratic institutions and an effective parliamentary system. This dramatic progress has occurred in the course of 2 turbulent years following the 1974 Portugal revolution. However, forces of the extreme left, including the Communist Party, and forces of the extreme right are not committed to democracy taking roots in Portugal. In addition, neighboring Spain is now going through some of the political upheavals Portugal has experienced. The political balance in the Iberian Peninsula is not yet stable.

The United States has an important stake in what develops in Portugal and in the Iberian Peninsula. We need to support Portugal and Portugal, at this time, needs economic, political, and military assistance from its NATO allies. Our participation in helping Portugal will serve as an encouragement to states like West Germany to continue giving aid also.

The specific purpose for H.R. 3976 concerns Portugal's desire to participate in the military affairs of NATO. The $30 million is designed to help equip and train a newly established air-transportable, Portuguese brigade that will be assigned to NATO. This request is the first part of a 3- to 4-year program for that bridgade. Other NATO allies, including West Germany, Britain, and Canada, are expected to participate in efforts to reorganize and modernize the Portuguese military.

The $30 million authorized to be allocated by this bill will be used to provide one C–130 air transport aircraft with spares and support, and priority ground force equipment, including 66 M–113A1 armored personnel carriers to the newly constituted 4,000 man airborne brigade.

This aid will help assure a Portuguese military establishment that is nonpolitical, NATO-oriented, nonextremists. The committee does believe that we need to demonstrate strong support for Portugal now and that Portugal's active participation in NATO affairs is in our national interest.

Mr. Speaker, I urge the passage of H.R. 3976. The Iberian Peninsula is at a political and economic crossroads. It is not in the interest of this Nation to send the wrong signals to these states and their leaders now. Portugal has made important strides in the last 2 years. But it needs our help. Portugal still faces serious economic and political challenges. Our assistance is designed to help the Portuguese help themselves.

Finally, Mr. Speaker, the expenditures which will result from the adoption of this bill have been assumed in the third concurrent resolution on the budget for fiscal year 1977.

Mr. Speaker, I urge the adoption of H.R. 3976.

Mr. FINDLEY. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, H.R. 3976, in authorizing $30 million in grant military assistance for Portugal, will permit a more effective Portuguese participation in NATO.

This $30 million will help equip an army airborne brigade to be deployed with NATO's southern command. The 4,000-man unit will function as regional reserves responding to crises situations. In fashioning this role for the brigade, Portugal and NATO's supreme allied commander have together recognized and utilized the potential value of the Portuguese troops, the only forces in Europe with battle experience.

Funds authorized will provide the brigade with one C–130 air transport aircraft, spares and support, and with armored personnel carriers. To delay this authorization until fiscal year 1978 would postpone Portuguese procurement of this equipment and would, thereby, disrupt the brigade's formation and training. Expedition of our aid is crucial to Portuguese attempts to restore discipline and a sense of mission to armed forces once racked by political factionalism.

This grant military aid, in effect, represents a dual commitment shared by Portugal and the United States.

For Portugal, the commitment is to NATO and to the values the Western alliance espouses. Having extricated itself from colonial wars in Africa, Portugal is now turning its focus toward Europe. Having thrown off the yoke of a rightwing dictatorship, Portugal now seeks to protect and enhance human rights. Having repulsed the threat of the authoritarianism of the left, Portugal now enjoys an elected, democratic government.

For the United States, the commitment is to a strengthened Atlantic community and to the nascent Portuguese democracy. By reinforcing Portugal's new orientation toward Europe, we are promoting Portuguese identification with our Western ideals. We are also demonstrating our intention, in cooperation with our allies, to revitalize NATO.

Our commitment is shared by fellow NATO members who are also providing military equipment and economic aid to Portugal. U.S. assistance should further encourage nations such as West Germany to continue their aid programs to Lisbon.

The United States, in setting its aid priorities has not been indifferent to the economic problems Portugal faces. We have recently provided a $300 million short-term loan to Portugal from the Treasury Department's Exchange Stabilization Fund. Another $300 million loan on a medium-term basis will be available to Portugal this year should Congress authorize American participation in a $1.5 billion international consortium.

United States aid, both economic and military, recognizes immediate Portuguese needs and gives evidence of our faith that Portugal, with some help, should be able to meet those needs. I would hope, however, that the considerable sum of loans and grants we are providing do not presage a long-term American aid obligation to Portugal. Indeed, Portugal should strive to reestablish its economic viability and remove its dependence on outside economic and military grants.

I would stress, therefore, that this supplemental assistance request for Portugal should be conceived of as short-term aid. As such, its importance is not to be minimized. It will help stabilize a nation that, though well on its way to becoming a full partner in the defense and political and economic fabric of Western Europe, is still struggling to achieve its Democratic objectives.

I include the following:

1. What grant military assistance has the United States already provided to Portugal in Fiscal Year 1977?

The U.S. has allocated $830,000 in grant military assistance to Portugal in FY 1977. H.R. 3976 is necessary to modify existing statutory limitations on the allocation of military assistance funds. Section 504(a)(1) of the Foreign Assistance Act of 1961 identifies eight countries, not including Portugal, to which funds available for military assistance may be allocated in FY 1977 and specifies the amount which may be allocated to each of them.

Section 504(a)(2) of the Act prohibits the use of more than $3.7 million in FY 77 for military assistance to countries not identified in section 504(a)(1). The allocation of $830,000 to Portugal was made under this ceiling.

Together, these two provisions of law prevent that furnishing of the proposed supplemental military assistance to Portugal in FY 77. H.R. 3976 modifies these limitations on the allocation of military assistance funds by adding Portugal to the list of countries in section 504(a)(1) and by specifying that $30,000,000 may be allocated to that country.

2. What are the aid requests for FY 1978 for Portugal?

The Administration is requesting $21 million in P.L. 480 Title I, $25 million in grant military assistance, and $3 million in military training.

Also, the United States is involved in negotiations for establishing an international consortium loan of $1.5 billion for Portugal. The U.S. share would be approximately $550

million; this would be spread over a 3 year period with the first tranche of $300 million being transferred to Portugal in FY 78. This would be a medium-term non-concessional loan (interest rates at the cost of money to the U.S. Treasury). This loan will be subject to Congressional authorization.

3. What aid have other nations given?

In the past two years, the Europeans, especially the West Germans, have provided balance of payments support to the extent of $1 billion.

The Federal Republic of Germany has contributed 20 G-91 aircraft to the brigade in question and is actively considering further aid.

The international consortium will have the support of the F.R.G. and of several other European nations.

4. Is Portugal politically stable?

Mario Soares (Swar-ez) is Prime Minister of a minority Socialist government. The Socialist Party has received approximately the same plurality of votes in the last three elections: April 1975 (Constituent Assembly); April 1976 (Parliamentary Assembly); and December 1976 (local). This amounts to 33 to 35% of the vote. This is a good sign of stability in the electorate. The Prime Minister is committed to democracy. He ran on a platform espousing the "European option". He is pro-NATO and is now campaigning for Portuguese membership in the E.E.C. There is a continuing restiveness, however, among elements of the right and of the left which could pose a threat to Portugal's democratic evolution.

5. How strong is the Communist Party in Portugal?

The Communist Party in Portugal has about 100,000 members. It has strength disproportionate to its numbers in the labor unions, however. It received 13–15% of the vote in the last two elections. Its leader, Alvaro Cunhal, is the most Stalinist of any Western European communist leader. The municipal elections in December 1976 actually removed communists from many of the municipalities they had controlled in their heyday, thus weakening their control over local infrastructures. Cunhal's Stalinist approach to politics has made unthinkable any political alliance between the communists and the socialists.

6. What is the size of the Portuguese armed forces?

The total number of people in the military has been scaled back over a two-year period from well over 217,000 to some 76,000 and it is expected that this number will drop even further to about 60,000.

The army is to be maintained at a level of approximately 36,000 men compared to close to 200,000 at the height of the Angola war.

This was a courageous step in a nation where unemployment is running at 15%. The intention, however, was to design a professional army, one that would not be tempted to embroil itself in politics.

In 1976 Portugal committed roughly 5.4% of its GNP to defense expenditures. This is not expected to decrease.

7. Is the Portuguese situation so bad as to justify this aid?

By 1976 Portugal had lost virtually all markets in former colonies which took over $270 million or 17% of Portugal's exports in 1973.

Income from tourism was down about $173 million in 1975 and $180 million in 1976 as compared with 1973.

Emigrant remittance were down about $172 million in 1975 and the same again in 1976 as compared with 1973.

Capital flight has been estimated at between $200 million and $300 million per year in 1975 and 1976.

Portugal's economy has had to absorb over half a million refugees from former colonies, plus most of the 100,000 men Portugal has cut from its armed forces since mid-1975.

Portugal is running a balance of payments deficit of $800 million to $1 billion per year.

Inflation is running at 20–25% per year.

Unemployment is 15%.

8. What are the Portuguese doing to help themselves?

Prime Minister Soares himself told his Socialist Party Congress last fall that without economic stabilization there can be no democracy.

Portugal, therefore, has:

Enacted laws to restore private sector confidence;

Imposed tax surcharges on imports in order to save foreign exchange;

Imposed limits on wage increases;

Passed a 1977 budget to raise taxes and reduce expenditures to cut the budget deficit;

Restored many farms and factories that had been nationalized to private hands. This process is continuing.

Ninety U.S. firms are represented in Portugal. Most remained throughout the revolution but contracted operations. None were nationalized.

Mr. HAMILTON. Mr. Speaker, I yield 2 minutes to the gentleman from Massachusetts(Mr. STUDDS), whose knowledge of Portugal is equal to that of any Member in the House and who has had a great interest in this bill.

Mr. STUDDS. Mr. Speaker, I rise in strong support of this measure. I do so as one who is not normally enthusiastic about U.S. foreign military assistance programs in general and in particular in the case of a nation such as Portugal, which now finds itself facing severe economic diffculties.

I think it is important that this House recognize the uniqueness of the situation in Portugal, and the critical importance to that country, to the NATO alliance, and to our own national interest, that this aid be forthcoming, for political at least as much as for military reasons.

The Government of Portugal is engaged in a very tenuous and critically important experiment with democracy after 50 years of dictatorship. They have survived attempted coups from both the right and the left in the past 3 years. One of those, remarkably, was from a left-wing military. The Military Establishment had been seriously infiltrated by Communists and had been through a decade or more of futile colonial wars in Africa. The critical need for it now is to be depoliticized, to assume a new and genuinely professional role.

The Armed Forces of that nation have been reduced in the past 2 years from 200,000 men to some 40,000 men, and this constitutes an act of enormous courage on the part of the Government, given the unemployment and severe economic difficulties currently faced by the democratically elected Government of Portugal.

I urge, both in the interests of that ally of the United States and in the interests of our own country, that we adopt this measure.

Mr. HAMILTON. Mr. Speaker, I yield 2 minutes to the gentleman from New York (Mr. SOLARZ).

Mr. SOLARZ. Mr. Speaker, I think that this legislation has to be seen in the context of our efforts to formulate a foreign policy which is consistent with the democratic and humanitarian traditions of our country. We very frequently hear in this Chamber a lot of anguished talk when countries that we have supported in the past abandon democracy in favor of dictatorship. Unfortunately, we hear very little talk about what we can do to assist those few countries which have abandoned dictatorship in favor of democracy.

I think that if we are going to be consistent, at the same time we cut back on our assistance to those countries that have embarked on the road to repression, we ought to be increasing our assistance to those countries that have chosen to embark on the path of freedom. Portugal is engaged, as our distinguished colleague from Massachusetts just indicated, in a very perilous effort to establish firm democratic roots and traditions in that country. I think we have an obligation to help them, and I think this legislation represents a very constructive effort to enhance the prospect for the survival of democracy in a country that has a very important role to play in maintaining the freedom and independence of Western Europe as a whole.

Mr. HAMILTON. Mr. Speaker, I have no further requests for time, and I urge adoption of H.R. 3976.

The SPEAKER. The question is on the motion offered by the gentleman from Indiana (Mr. HAMILTON) that the House suspend the rules and pass the bill H.R. 3976.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

A motion to reconsider was laid on the table.

Mr. HAMILTON. Mr. Speaker, I ask unanimous consent for the immediate consideration of the Senate bill (S. 489) to amend the Foreign Assistance Act of 1961.

The Clerk read the title of the Senate bill.

The SPEAKER. Is there objection to the request of the gentleman from Indiana?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 489

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 504(a)(1) of the Foreign Assistance Act of 1961 is amended—

(a) by striking out in the first sentence "$177,300,000" and inserting in lieu thereof "$181,800,000"; and

(b) by inserting in the second sentence—

(1) "Portugal" at the end of the table of designated countries; and

(2) "$34,500,000" as the fiscal year 1977 amount for Portugal in that table.

MOTION OFFERED BY MR. HAMILTON

Mr. HAMILTON. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. HAMILTON moves to strike out all after the enacting clause of S. 489 and insert in lieu thereof the provisions of H.R. 3976, as passed.

The motion was agreed to.

The Senate bill was ordered to be read a third time, was read the third time, and passed.

The title was amended so as to read: "to authorize supplemental military assistance to Portugal for the fiscal year 1977, and for other purposes."

A motion to reconsider was laid on the table.

A similar House bill (H.R. 3976) was laid on the table.

URGING THE CANADIAN GOVERNMENT TO REASSESS ITS POLICY OF PERMITTING THE KILLING OF NEWBORN HARP SEALS

Mr. RYAN. Mr. Speaker, I move to suspend the rules and agree to the concurrent resolution (H. Con. Res. 142) urging the Canadian Government to reassess its policy of permitting the killing of newborn harp seals.

The Clerk read as follows:

H. CON. RES. 142

Whereas the annual six-week harp seal hunt in Canada is scheduled to begin March 12, 1977, amidst growing public concern and protest;

Whereas the Canadian Government has increased the quota for this year's hunt by one-third to one hundred and seventy thousand seal pelts;

Whereas the 1977 quota will allow hunters to kill up to 90 per centum of the newborn seal pup population;

Whereas it is predicted that the annual hunt will eventually destroy the harp seal herds;

Whereas seal hunting regulations in Canada allow the barbarous practice of killing the baby seals by repeatedly striking the heads of the animals with clubs; and

Whereas there is a growing international appreciation of the need to preserve endangered species of animals: Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring), That, because the killing of newborn harp seals in Canadian waters is a cruel practice which may cause the extinction of that species of seals, the Government of Canada is urged to reassess its present policy of permitting such killing in Canadian waters.

The SPEAKER. Is a second demanded?

Mr. FINDLEY. Mr. Speaker, I demand a second.

The SPEAKER. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER. The gentleman from Michigan (Mr. BROOMFIELD) will be recognized for 20 minutes.

Mr. BROOMFIELD. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, House Concurrent Resolution 142 was approved unanimously by the Committee on International Relations. It is motivated by humanitarian and practical concerns. It is an attempt to spare 90 percent of the newborn harp seal pups from imminent, brutal death by clubbing. It is also designed to insure that the harp seal does not become an extinct species.

But, above all, House Concurrent Resolution 142 is an appeal to the conscience of the Canadian Government. We do have an obligation—to ourselves and to the various forms of life that share this planet with us—to urge our good friends and neighbors in Canada to reassess their policy on this matter.

I commend the gentleman from California for introducing this legislation, and I urge the strongest support for it.

Mr. AMBRO. Mr. Speaker, today we are considering House Concurrent Resolution 142, urging the Canadian Government to reassess their policy of permitting the slaughter of newborn harp seals.

This year's quota for the hunt has actually been increased, in spite of uncertainty about the number of harp seals in the world today. Regardless of this dispute over the danger of extinction, important as it is, however, the purpose of the hunt is frivolous—solely to provide pure white fur to adorn the unthinking wealthy.

Since the income from this barbarious hunt in the waters of the Gulf of St. Lawrence is small, the slaughter cannot even be justified on economic grounds, if indeed, economics could ever provide an excuse for this senseless slaughter of newborn harp seals. I, therefore, urge my colleagues to join me in passing House Concurrent Resolution 142.

Mr. ANDERSON of California. Mr. Speaker, I rise in strong support of House Concurrent Resolution 142, which urges the Canadian Government to reconsider its support for the annual 6-week hunt for harp seal pups.

As a cosponsor of this legislation, I sincerely feel that it is time for the Congress to go on record as being opposed to this barbaric hunt. Some of us have seen films of this annual 6-week harvest. Newborn harp seals bear a beautifully white, soft fur for the first 2 weeks of their lives; they are sought by the hunters who club and skin them on the spot, and who, unfortunately, find a ready market for the skins they take.

The hunters are mostly fishermen in the area for whom the seals represent their source of income during the long winters. Primarily because it is an important part of these peoples' livelihoods, the Canadian Government has for years approved of the hunt, limiting the numbers of pups to be killed.

This year—despite an international outcry against the continued slaughter—the limit has been raised to an incredible 170,000, almost 90 percent of all the harp seal pups born. In other words, only 1 out of every 10 harp seal pups born this year will be able to face natural hazards—predators, disease, starvation—before becoming an adult, and breeding future generations of seals.

Mr. Speaker, I sympathize with the men who feel this hunt is necessary for their survival. But, I also firmly believe that this hunt is unnecessary, cruel and totally unjustified.

By passing this resolution, Congress shall not be meddling with the affairs of another country. But we will have effectively expressed our outrage at a practice that should have been ended long ago.

Mr. KOCH. Mr. Speaker, as the chief sponsor along with my friend and colleague, NED PATTISON, of H.R. 446, the bill to establish a Commission on the Humane Treatment of Animals, I am particularly concerned about the inhumane actions taken against animals. The senseless slaughtering of baby harp seals in Canada is one such practice. Each year the public outrage on this issue has been great and yet the senseless slaughter continues. This slaughtering is not taking place in American waters but rather in waters controlled by the Government of Canada. So all we in the Congress can do in this resolution is express our outrage against the present Canadian policy of permitting the killing of these seals in Canadian waters. Now that we are taking this too modest step, we must plan the next step if the atrocities do not stop which could introduce a boycott of Canadian furs.

Mr. LEGGETT. Mr. Speaker, I rise in support of House Concurrent Resolution 142. The continued killing of harp seal pups, in the face of mounting evidence that the harp seal herds are threatened with extinction, is a proper subject of concern by the House of Representatives. Although this resolution merely urges the Government of Canada to reassess its harp seal policy, it is an important step in the eventual termination of this disturbing slaughter.

Although I am in full support of this resolution, I would like to point out that the resolution properly should have been referred to the Merchant Marine and Fisheries Committee for consideration.

Under the rules of the House, the Committee on Merchant Marine and Fisheries has jurisdiction over fisheries and wildlife, including research restoration, refuges, conservation, and international fishing agreements. Over the years, the committee has strenuously pursued its responsibilities in the area of fisheries and wildlife protection. Many of the most vital and important pieces of legislation in the area of fisheries and wildlife conservation have originated in the Committee on Merchant Marine and

Fisheries. A partial list of such laws passed by this committee includes the Fur Seal Act of 1966, the Marine Mammal Protection Act of 1972, the Endangered Species Act of 1966 and 1969 and, more recently, the Endangered Species Act of 1973.

Under the Fur Seal Act, the United States manages the fur seals on the Pribilof Islands of Alaska pursuant to the Convention on the Conservation of North Pacific Fur Seals, of which Russia, Japan, Canada—along with the United States—are signatories to the Convention. Under the Marine Mammal Protection Act, it is unlawful to import into the United States any marine mammal, in particular seals, if such mammal was pregnant at the time of taking, nursing at the time of taking, or less than 8 months old, whichever occurs later; taken from a depleted stock or was listed as threatened or endangered; or taken in a manner deemed inhumane by the Secretary of the Interior or Commerce, as the case may be.

Consequently, the committee's concern about fisheries and wildlife conservation and the proper management of our limited animal resources has not been limited to domestic concerns, as evidenced by the previously mentioned laws. In addition, in the last Congress, the Committee on Merchant Marine and Fisheries developed and eventually guided into law the Fishery Conservation and Management Act of 1976 which extended the U.S. fishery zone from 12 to 200 miles.

This act did not simply relate to the activities of U.S. fishermen. Rather, it provided for the negotiation and implementation of governing international fishing agreements with all foreign nations fishing within the new U.S. fishery zone.

Mr. Speaker, I raise the issue of the proper referral of this resolution—not out of some petty concern about the jurisdictional boundary of the Merchant Marine and Fisheries Committee—but rather out of a belief that a coherent national policy in the area of fisheries and wildlife preservation demands input from the committee that deals with these issues on a daily basis.

House Concurrent Resolution 142 deals with the inhumane way in which baby seals are taken, by striking the heads of animals with clubs, and with the taking of animals which have been determined to be endangered. Both of these issues have previously been dealt with by the Merchant Marine and Fisheries Committee in the passage of the Marine Mammal Act.

Mr. Speaker, I would hope that in the future resolutions of this nature are referred to the Committee on Merchant Marine and Fisheries for consideration and, if deemed appropriate, sequentially referred to the Committee on International Relations for further consideration.

Mr. EVANS of Delaware. Mr. Speaker, I rise in strong support of the resolution urging Canada to reassess its policy of permitting the cruel and wanton killing of harp seals in Canadian waters.

This brutal practice, if allowed to continue, will undoubtedly lead to the extinction of the harp seal, and I believe this Nation must indicate as forcefully as we possibly can the deep public concern and revulsion over the killing of these seals.

Throughout history, man has repeatedly shown his disdain for life through uncontrolled slaughtering of animals. As a result, many species of wild life are no longer to be found on this planet, and hundreds more are on the verge of extinction.

It is time we called a halt to this bloody madness. The unregulated killing of animals such as the harp seal, especially by the technique of bashing the seals' head in with clubs, must be stopped. I urge my colleagues to support this resolution in overwhelming numbers, so that Canada and the rest of the world clearly understands that this Nation intends to fight cruelty to animals whenever and wherever it occurs.

Mr. RYAN. Mr. Speaker, I have no further requests for time.

The SPEAKER. The question is on the motion offered by the gentleman from California (Mr. RYAN) that the House suspend the rules and agree to the concurrent resolution (H. Con. Res. 142).

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the concurrent resolution was agreed to.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. RYAN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the concurrent resolution just agreed to.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

ANNOUNCEMENT BY THE SPEAKER

The SPEAKER. Debate has been concluded on all motions to suspend the rules.

Pursuant to clause 3, rule XXVII, the Chair will now put the question on each motion on which further proceedings were postponed, in the order in which that motion was entertained.

Votes will be taken in the following order:

H.R. 3437, de novo; and

Senate Concurrent Resolution 7, on which the yeas and nays were ordered.

Pursuant to the provisions of clause 3(b)(3), rule XXVIII, the Chair announces he will reduce to a minimum of 5 minutes the period of time within which a vote by electronic device may be taken on the additional motion to suspend the rules on which the Chair has postponed further proceedings.

VOCATIONAL EDUCATION TECHNICAL AMENDMENTS

The SPEAKER. The unfinished business is the question of suspending the rules and passing the bill H.R. 3437, as amended.

The Clerk read the title of the bill.

The SPEAKER. The question is on the motion offered by the gentleman from Kenucky (Mr. PERKINS) that the House suspend the rules and pass the bill H.R. 3437, as amended.

The question was taken.

Mr. STEIGER. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 396, nays 1, not voting 35, as follows:

[Roll No. 89]

Clay	Quillen	Tucker
Collins, Ill.	Roe	Udall
Eckhardt	Roncalio	Ullman
English	Ryan	Young, Alaska

The Clerk announced the following pairs:

Mr. Teague with Mr. Andrews of North Dakota.

Mr. Shipley with Mr. Hubbard.

Mr. Hawkins with Mr. Bonker.

Mr. Biaggi with Mrs. Collins of Illinois.

Mr. Breckinridge with Mr. Milford.

Mr. Clay with Mr. Pursell.

Mr. Giaimo with Mr. Brodhead.

Mr. Ullman with Mr. Ryan.

Mr. Staggers with Mr. Eckhardt.

Mr. Murphy of New York with Mr. Quillen.

Mr. Roncalio with Mr. Carter.

Mr. Roe with Mr. Udall.

Mr. Sisk with Mr. English.

Mr. Metcalfe with Mr. Steers.

Mr. Lundine with Mr. Stangeland.

Mr. Brademus with Mr. Tucker.

Mr. Simon with Mr. Scheuer.

So (two-thirds having voted in favor thereof), the rules were suspended and the bill, as amended, was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

HARASSMENT OF SOVIET JEWS AND OTHER MINORITIES

The SPEAKER. The unfinished business is the question of suspending the rules and concurring in the Senate concurrent resolution (S. Con. Res. 7).

The Clerk read the title of the Senate concurrent resolution.

The SPEAKER. The question is on the motion offered by the gentleman from Wisconsin (Mr. ZABLOCKI) that the House suspend the rules and concur in the Senate concurrent resolution (S. Con. Res. 7), on which the yeas and nays are ordered.

The vote was taken by electronic device, and there were—yeas 400, nays 2, not voting 30, as follows:

[Roll No. 90]

So (two-thirds having voted in favor thereof) the rules were suspended and the Senate concurrent resolution was concurred in.

A motion to reconsider was laid on the table.

A similar House concurrent resolution (H. Con. Res. 97) was laid on the table.

PROVIDING FUNDS FOR THE COMMITTEE ON RULES

Mr. DENT. Mr. Speaker, by direction of the Committee on House Administration, I call up a privileged resolution (H. Res. 189) and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 189

Resolved, That effective January 3, 1977, in carrying out its duties during the first session of the Ninety-fifth Congress, the Committee on Rules is authorized to incur such expenses (not in excess of $42,000) as it deems advisable. Such expenses shall be paid out of the contingent fund of the House on vouchers authorized and approved by such committee, and signed by the chairman thereof.

SEC. 2. Funds authorized by the resolution shall be expended pursuant to regulations established by the Committee on House Administration in accordance with existing law.

Mr. DENT (during the reading). Mr. Speaker, I ask unanimous consent that the resolution be considered as read and printed in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

The SPEAKER. The gentleman from Pennsylvania (Mr. DENT) is recognized for 1 hour.

Mr. DENT. Mr. Speaker, this resolution is to provide funds for the Committee on Rules. It was passed unanimously in committee. The Committee on Rules asked for $42,000 for this year's budget, and was given $42,000 by the Committee on House Administration.

Mr. Speaker, I ask that the resolution be agreed to.

Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

PROVIDING FUNDS FOR THE EXPENSES OF INVESTIGATIONS AND STUDIES TO BE CONDUCTED BY THE COMMITTEE ON AGRICULTURE

Mr. DENT. Mr. Speaker, by direction of the Committee on House Administration, I call up a privileged resolution (H. Res. 298) and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 298

Resolved, That effective January 3, 1977, the expenses of the investigations and studies to be conducted by the Committee on Agriculture, acting as a whole or by Subcommittee, not to exceed $1,070,200, including expenditures for the employment of investigators, attorneys, clerical, stenographic, and other assistants, for specialized training, pursuant to section 202(j) of such Act, as amended (2 U.S.C. 72a(j)), of committee staff personnel performing professional and nonclerical functions, and for the procurement of services of individuals or organizations, shall be paid out of the contingent fund of the House on vouchers authorized by such committee, signed by the chairman of such committee, and approved by the Committee on House Administration. Not to exceed $10,000 of the amount provided by this resolution may be used to procure the temporary or intermittent services of individual consultants or organizations thereof pursuant to section 202(i) of the Legislative Reorganization Act of 1946 (2 U.S.C. 72a(i)); but this monetary limitation on the procurement of such services shall not prevent the use of such funds for any other authorized purpose. Not to exceed $5,000 of such total amount may be used to provide for specialized training, pursuant to section 202(j) of the Legislative Reorganization Act of 1946, as amended (2 U.S.C. 72a(j)), of staff personnel of the committee performing professional and nonclerical functions but this monetary limitation for specialized training shall not prevent the use of such funds for any other authorized purpose.

SEC. 2. No part of the funds authorized by this resolution shall be available for expenditure in connection with the study or investigation of any subject which is being investigated for the same purpose by any other committee of the House, and the chairman of the Committee on Agriculture shall furnish the Committee on House Administration information with respect to any study or investigation intended to be financed from such funds.

SEC. 3. Funds authorized by this resolution shall expire immediately prior to noon on January 3, 1978.

SEC. 4. Funds authorized by this resolution shall be expended pursuant to regulations established by the Committee on House Administration in accordance with existing law.

Mr. DENT (during the reading). Mr. Speaker, I ask unanimous consent that the resolution be considered as read and printed in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

The SPEAKER. The gentleman from Pennsylvania (Mr. DENT) is recognized for 1 hour.

Mr. DENT. Mr. Speaker, this resolution was passed unanimously by the Committee on House Administration, and is in the amount of $1,070,200. That was the amount asked for by the Committee on Agriculture.

There was a slight increase—one of the few increased by the Committee on House Administration—and was granted after the committee heard the problems of the Committee on Agriculture and the activities it is going to enter into. We felt that the committee was entitled to a slight increase, and it was so voted on unanimously by the Committee on House Administration.

Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

PROVIDING FOR THE EXPENSES OF INVESTIGATIONS AND STUDIES TO BE CONDUCTED BY THE COMMITTEE ON ARMED SERVICES

Mr. DENT. Mr. Speaker, by direction of the Committee on House Administration, I call up a privileged resolution (H. Res. 310) and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 310

Resolved, That effective January 3, 1977, the expenses of investigations and studies to be conducted by the Committee on Armed Services, acting as a whole or by subcommittee, not to exceed $590,500, including expenditures—

(1) for the employment of investigators, attorneys, and clerical, stenographic, and other assistants;

(2) for the procurement of services of individual consultants or organizations thereof pursuant to section 202(i) of the Legislative Reorganization Act of 1946, as amended (2 U.S.C. 72a(i)); and

(3) for specialized training, pursuant to section 202(j) of such Act, as amended (2 U.S.C. 72a(j)), of committee staff personnel performing professional and nonclerical functions;

shall be paid out of the contingent fund of the House on vouchers authorized by such committee, signed by the chairman of such committee, and approved by the Committee on House Administration. Not to exceed $75,000 of the total amount provided by this resolution may be used to procure the temporary or intermittent services of individual consultants or organizations thereof pursuant to section 202(i) of the Legislative Reorganization Act of 1946, as amended (2 U.S.C. 72a(i)); and not to exceed $12,500 of such total amount may be used to provide for specialized training, pursuant to section 202(j) of such Act, as amended (2 U.S.C. 72a(j)), of staff personnel of the committee performing professional and nonclerical functions; but neither of these monetary limitations shall prevent the use of such funds for any other authorized purpose.

SEC. 2. No part of the funds authorized by this resolution shall be available for expenditure in connection with the study or investigation of any subject which is being investigated for the same purpose by any other committee of the House; and the chairman of the Committee on Armed Services shall furnish the Committee on House Administration information with respect to any study or investigation intended to be financed from such funds.

SEC. 3. The authorization granted by this resolution shall expire immediately prior to noon on January 3, 1978.

SEC. 4. Funds authorized by this resolution shall be expended pursuant to regulations established by the Committee on House Administration in accordance with existing law.

Mr. DENT (during the reading). Mr. Speaker, I ask unanimous consent that the resolution be considered as read and printed in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

The SPEAKER. The gentleman from

Pennsylvania (Mr. DENT) is recognized for 1 hour.

Mr. DENT. Mr. Speaker, this resolution was passed unanimously by the Committee on House Administration, and I urge its adoption by the House.

Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

PROVIDING FOR THE EXPENSES OF INVESTIGATIONS AND STUDIES TO BE CONDUCTED BY THE SELECT COMMITTEE ON AGING

Mr. DENT. Mr. Speaker, by direction of the Committee on House Administration, I call up a privileged resolution (H. Res. 382) and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 382

Resolved, That, effective January 3, 1977, expenses of investigations and studies to be conducted by the Select Committee on Aging, acting as a whole or by subcommittee, not to exceed $787,625 including expenditures for the employment of investigators, attorneys, and clerical and other assistants, and for the procurement of services of individual consultants or organizations thereof pursuant to section 202(1) of the Legislative Reorganization Act of 1946 as amended (2 U.S.C. 72a(1)), shall be paid out of the contingent fund of the House on vouchers authorized by such committee, signed by the chairman of such committee, and approved by the Committee on House Administration. Not to exceed $7,000 of the total amount provided by this resolution may be used to procure the temporary or intermittent services of individual consultants or organizations thereof pursuant to section 202(1) of the Legislative Reorganization Act of 1946, as amended (2 U.S.C. 72a(1)); but this monetary limitation on the procurement of such services shall not prevent the use of such funds for any other authorized purpose.

SEC. 2. No part of the funds authorized by this resolution shall be available for expenditure in connection with the study or investigation of any subject which is being investigated for the same purpose by any other committee of the House; and the chairman of the Select Committee on Aging shall furnish the Committee on House Administration information with respect to any study or investigation intended to be financed from such funds.

SEC. 3. The authorization granted by this resolution shall expire immediately prior to noon on January 3, 1978.

SEC. 4. Funds authorized by this resolution shall be expended pursuant to regulations established by the Committee on House Administration in accordance with existing law.

Mr. DENT (during the reading). Mr. Speaker, I ask unanimous consent that the resolution be considered as read and printed in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

The SPEAKER. The gentleman from Pennsylvania (Mr. DENT) is recognized for 1 hour.

Mr. DENT. Mr. Speaker, this resolution was passed unanimously by the Committee on House Administration, and I urge its adoption by the House at this time.

Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

PROVIDING FUNDS FOR FURTHER EXPENSES OF INVESTIGATIONS AND STUDIES OF COMMITTEE ON SMALL BUSINESS

Mr. DENT. Mr. Speaker, by direction of the Committee on House Administration, I call up a privileged resolution (H. Res. 370) and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 370

Resolved, That for the further expenses of the investigations and studies to be conducted by the Committee on Small Business acting as a whole or by subcommittee, not to exceed $634,320 including expenditures for the employment of investigators, attorneys, and clerical and other assistants, and for the procurement of individual consultants or organizations thereof pursuant to section 202(1) of the Legislative Reorganizations Act of 1964, as amended (2 U.S.C. 72a(1)), shall be paid out of the contingent fund of the House on vouchers authorized by such committee, signed by the chairman of such committee, and approved by the Committee on House Administration. Not to exceed $50,000 of the total amount provided by this resolution may be used to procure the temporary or intermittent services of individual consultants or organizations thereof pursuant to section 202(1) of the Legislative Reorganization Act of 1946, as amended (2 U.S.C. 72(1)); but this monetary limitation on the procurement of such services shall not prevent the use of such funds for any other authorized purpose.

SEC. 2. No part of the funds authorized by this resolution shall be available for expenditure in connection with the study or investigation of any subject which is being investigated for the same purpose by any other committee of the House, and the chairman of the Committee on Small Business shall furnish the Committee on House Administration information with respect to any study or investigation intended to be financed from such funds.

SEC. 3. Funds authorized by this resolution shall be expended pursuant to regulations established by the Committee on House Administration in accordance with existing law.

Mr. DENT (during the reading). Mr. Speaker, I ask unanimous consent that the resolution be considered as read and printed in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

COMMITTEE AMENDMENT

The SPEAKER. The Clerk will report the committee amendment.

The Clerk read as follows:

Committee amendment:

Strike out all after the resolving clause and insert:

That for the further expenses of the investigations and studies to be conducted by the Committee on Small Business acting as a whole or by subcommittee, not to exceed $515,000 including expenditures for the employment of investigators, attorneys, and clerical and other assistants, and for the procurement of individual consultants or organizations thereof pursuant to section 202(1) of the Legislative Reorganization Act of 1946, as amended (2 U.S.C. 72a(1)), shall be paid out of the contingent fund of the House on vouchers authorized by such committee, signed by the chairman of such committee, and approved by the Committee on House Administration. Not to exceed $50,000 of the total amount provided by this resolution may be used to procure the temporary or intermittent services of individual consultants or organizations thereof pursuant to section 202(1) of the Legislative Reorganization Act of 1946, as amended (2 U.S.C. 72a(1)); but this monetary limitation on the procurement of such services shall not prevent the use of such funds for any other authorized purpose.

SEC. 2. No part of the funds authorized by this resolution shall be available for expenditure in connection with the study or investigation of any subject which is being investigated for the same purpose by any other committee of the House, and the chairman of the Committee on Small Business shall furnish the Committee on House Administration information with respect to any study or investigation intended to be financed from such funds.

SEC. 3. Funds authorized by this resolution shall be expended pursuant to regulations established by the Committee on House Administration in accordance with existing law.

Mr. DENT (during the reading). Mr. Speaker, I ask unanimous consent that the committee amendment be considered as read and printed in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. DENT. Mr. Speaker, the Committee on Small Business came before the Subcommittee on Accounts and asked for $634,320. The committee had some discussion with the chairman and the ranking member, and the committee in markup decided to cut this resolution $119,000 to the sum of $515,000.

Mr. SMITH of Iowa. Mr. Speaker, will the gentleman yield?

Mr. DENT. Mr. Speaker, at this time I yield to the gentleman from Iowa (Mr. SMITH) for debate only.

Mr. SMITH of Iowa. Mr. Speaker, I want to point out that we have a rather unusual situation on the Committee on Small Business. We changed chairmen. The retiring chairman left here early in the fall. A number of people retired. They were not put on, as they should not have been. We had a big change in the subcommittee chairmanship. The fact of the matter is that we cannot do what we need to do within this budget.

Mr. Speaker, I am one who likes to play by the rules, and when given a budget I like to plan my expenditures so that will be the amount that we will spend for the year, and there is no way we can do what we need to do within this committee on this budget.

Mr. DENT. Mr. Speaker, the gentleman came before the committee, and there was a discussion on the matter of $50,000 for a consultant. At this time we were not given detailed information regarding the large increase for the Small Business Committee. The Subcommittee on Accounts recommended the amount based on the money expended in the 94th Congress, second session, which was $385,934. They returned $129,490.

The subcommittee looked at the level of spending when the committee was

operating at full force in the 94th Congress, first session, and they still spent $332,000. Having no other information before us, we cut back and still gave an increase to the committee to allow for expanded activities. However, if the gentleman would have taken the opportunity to explain the situation to us I am sure that the committee at that time would have given consideration to his request in that particular aspect. I can only assure the committee chairman: Since the committee has acted, I say to the gentleman that he, like all other chairmen, will be assured of funding at the level that the chairman can completely justify the funds to do their duties. We do not want to cut out any of the duties of a full committee.

At that point, if a committee honestly needs additional money they come to the Account Subcommittee and show us their figures and show us their funding needs, and we will give them an opportunity to have another hearing on a supplemental resloution.

Mr. SMITH of Iowa. If the gentleman will yield further, I want to make it clear that I will not be accused of spending more than was allocated if I spend more than one-twelfth of the allotted rate in this resolution.

Mr. DENT. The gentleman will not be.

Mr. DICKINSON. Mr. Speaker, will the gentleman yield?

Mr. DENT. I yield to the gentleman from Alabama (Mr. DICKINSON.)

Mr. DICKINSON. I thank the gentleman for yielding.

Mr Speaker, just let me say, as the ranking member of the committee, I would like to reaffirm and underscore what the chairman of the subcommittee has said. In my tenure on the committee I have never known of any subcommittee or permitted it to come before our group on accounts or full committee where they were not funded in any amount they could justify the need for. Usually we are too generous.

So I will say that whenever someone runs out of money and they come back and show justification for an increase, I have never known them to be refused.

Mr. DENT. And I am sure the gentleman has never known any committee in the House to have such added duties that required additional funds. Definitely mistakes have been made, and we are only doing this in order to see if we cannot get back to some notion of operating the House more equitably in line with the work being done by the House and the committees of the House. The Subcommitee on Accounts is just trying to exercise some sort of fiscal responsibility in this House.

Mr. Speaker, I assure the gentleman that this committee will act in that particular light all the way through.

Mr. DICKINSON. Mr. Speaker, if the gentleman will yield further, the subcommittee chairman is absolutely right, but just let me say in line with what I said earlier that I have never known the committees of the House to come before the Subcommittee on Accounts and the Committee on House Administration with such large increases requested as they have this year.

Mr. DENT. I understand that, but we also have to look at the rules of the House. We have to also look at the activities of the House and rate the committees as to their added duties and consider the added number of subcommittees. We are trying our best to keep the funding at the proper level in line with the work that is being done.

Mr. SMITH of Iowa. Mr. Speaker, will the gentleman yield further?

Mr. DENT. I yield to the gentleman from Iowa.

Mr. SMITH of Iowa. Mr. Speaker, on that basis I appreciate the gentleman's response, but I would remind him, however, that all we ask for is the amount that was allocated last year and the amount of the salary increases. On that basis we will probably have enough to do what we need to do, but we will probably be in for another amount in a year or so and attempt to show the gentleman that we will not have enough to last throughout the entire year.

Mr. DENT. Mr. Speaker, I understand that, and the proper action will be taken. All these requests will be looked at by the committee.

Mr. Speaker, I urge that the committee amendment be adopted and the resolution be agreed to.

The committee amendment was agreed to.

The resolution was agreed to.

A motion to reconsider was laid on the table.

PROVIDING FOR EXPENSES FOR FIRST SESSION ACTIVITIES OF COMMITTEE ON INTERIOR AND INSULAR AFFAIRS

Mr. DENT. Mr. Speaker, by direction of the Committee on House Administration, I offer a privileged resolution (H. Res. 378) and ask for its immediate consideration.

The Clerk read the resolution as follows:

H. RES. 378

Resolved, That expenses of investigations and studies to be conducted by the Committee on Interior and Insular Affairs, acting as a whole or by subcommittee, not to exceed $964,092, including expenditures for the employment of investigators, attorneys, and clerical, and other assistants, and for the procurement of services of individual consultants or organizations thereof pursuant to section 202(i) of the Legislative Reorganization Act of 1946, as amended (2 U.S.C. 72a(i)), shall be paid out of the contingent fund of the House on vouchers authorized by such committee, signed by the chairman of such committee, and approved by the Committee on House Administration. Not to exceed $27,000 of the total amount provided by this resolution may be used to procure the temporary or intermittent services of individual consultants or organizations thereof pursuant to section 202(i) of the Legislative Reorganization Act of 1946, as amended (2 U.S.C. 72(i)); but this monetary limitation on the procurement of such services shall not prevent the use of such funds for any other authorized purpose.

SEC. 2. No part of the funds authorized by this resolution shall be available for expenditure in connection with the study or investigation of any subject which is being investigated for the same purpose by any other committee of the House; and the chairman of the Committee on Interior and Insular Affairs shall furnish the Committee on House Administration information with respect to any study or investigation intended to be financed from such funds.

SEC. 3. Funds authorized by this resolution shall be expended pursuant to regulations established by the Committee on House Administration in accordance with existing law.

Mr. DENT (during the reading). Mr. Speaker, I ask unanimous consent that the resolution be considered as read and printed in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

COMMITTEE AMENDMENT

The SPEAKER. The Clerk will report the committee amendment.

The Clerk read as follows:

Committee amendment: strike out all after the resolving clause and insert:

That expenses of investigations and studies to be conducted by the Committee on Interior and Insular Affairs, acting as a whole or by subcommittee, not to exceed $875,000, including expenditures for the employment of investigators, attorneys, and clerical, and other assistants, and for the procurement of services of individual consultants or organizations thereof pursuant to section 202(i) of the Legislative Reorganization Act of 1946, as amended (2 U.S.C. 72a(i)), shall be paid out of the contingent fund of the House on vouchers authorized by such committee, signed by the chairman of such committee, and approved by the Committee on House Administration. Not to exceed $27,000 of the total amount provided by this resolution may be used to procure the temporary or intermittent services of individual consultants or organizations thereof pursuant to section 202(i) of the Legislative Reorganization Act of 1946, as amended (2 U.S.C. 72a(i)); but this monetary limitation on the procurement of such services shall not prevent the use of such funds for any other authorized purpose.

SEC. 2. No part of the funds authorized by this resolution shall be available for expenditure in connection with the study or investigation of any subject which is being investigated for the same purpose by any other committee of the House; and the chairman of the Committee on Interior and Insular Affairs shall furnish the Committee on House Administration information with respect to any study or investigation intended to be financed from such funds.

SEC. 3. Funds authorized by this resolution shall be expended pursuant to regulations established by the Committee on House Administration in accordance with existing law.

Mr. DENT (during the reading). Mr. Speaker, I ask unanimous consent that the committee amendment be considered as read and printed in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

The committee amendment was agreed to.

The resolution was agreed to.

A motion to reconsider was laid on the table.

PROVIDING FOR EXPENSES OF INVESTIGATIONS AND STUDIES TO BE CONDUCTED BY AD HOC SELECT COMMITTEE ON THE OUTER CONTINENTAL SHELF

Mr. DENT. Mr. Speaker, by direction of the Committee on House Administration,

I offer a privileged resolution (H. Res. 343) and ask for its immediate consideration.

The Clerk read the resolution as follows:

H. RES. 343

Resolved, That effective January 3, 1977, the expenses of special investigations and studies to be conducted by the Ad Hoc Select Committee on the Outer Continental Shelf, acting as a whole, not to exceed $350,000, including expenditures for the employment of investigators, attorneys, and clerical, and other assistants, and for the procurement of services of individual consultants or organizations thereof pursuant to section 202(1) of the Legislative Reorganization Act of 1946, as amended (2 U.S.C. 72(a)(1)), shall be paid out of the contingent fund of the House on vouchers authorized by such committee, signed by the chairman of such committee, and approved by the Committee on House Administrations not to exceed $50,000 of the total amount provided by this resolution may be used to procure the temporary or intermittent services of individual consultants or organizations thereof pursuant to section 202 (1) of the Legislative Reorganization Act of 1946, as amended (2 U.S.C. 72(1)); but this monetary limitation on the procurement of such services shall not prevent the use of such funds for any other authorized purpose.

SEC. 2. No part of the funds authorized by this resolution shall be available for expenditure in connection with the study or investigation of any subject which is being investigated for the same purpose by any other committee of the House except in conformance with H. Res. 97; and the chairman of the Ad Hoc Select Committee on the Outer Continental Shelf shall furnish the Committee on House Administration information with respect to any study or investigation intended to be financed from such funds.

SEC. 3. The authorization granted by the resolution shall expire immediately prior to noon on January 3, 1978.

SEC. 4. Funds authorized by this resolution shall be expended pursuant to regulations established by the Committee on House Administration in accordance with existing law, and pursuant to H. Res. 97.

Mr. DENT (during the reading). Mr. Speaker, I ask unanimous consent that the resolution be considered as read and printed in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

COMMITTEE AMENDMENT

The SPEAKER. The Clerk will report the committee amendment.

The Clerk read as follows:

Committee amendment: Strike out all after the resolving clause and insert:

That effective January 3, 1977, the expenses of special investigations and studies to be conducted by the Ad Hoc Select Committee on the Outer Continental Shelf, acting as a whole, not to exceed $315,000, including expenditures for the employment of investigators, attorneys, and clerical, and other assistants, and for the procurement of services of individual consultants or organizations thereof pursuant to section 202(1) of the Legislative Reorganization Act of 1946, as amended (2 U.S.C. 72a(1)), shall be paid out of the contingent fund of the House on vouchers authorized by such committee, signed by the chairman of such committee, and approved by the Committee on House Administration. Not to exceed $50,000 of the total amount provided by this resolution may be used to procure the temporary or intermittent services of individual consultants or organizations thereof pursuant to section 202(1) of the Legislative Reorganization Act of 1946, as amended (2 U.S.C. 72a(1)); but this monetary limitation on the procurement of such services shall not prevent the use of such funds for any other authorized purpose.

SEC. 2. No part of the funds authorized by this resolution shall be available for expenditure in connection with the study or investigation of any subject which is being investigated for the same purpose by any other committee of the House except in conformance with H. Res. 97; and the chairman of the Ad Hoc Select Committee on the Outer Continental Shelf shall furnish the Committee on House Administration information with respect to any study or investigation intended to be financed from such funds.

SEC. 3. The authorization granted by the resolution shall expire immediately prior to noon on January 3, 1978.

SEC. 4. Funds authorized by this resolution shall be expended pursuant to regulations established by the Committee on House Administration in accordance with existing law, and pursuant to H. Res. 97.

Mr. DENT (during the reading). Mr. Speaker, I ask unanimous consent that the committee amendment be considered as read and printed in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

The committee amendment was agreed to.

The resolution was agreed to.

A motion to reconsider was laid on the table.

PROVIDING FOR EXPENSES OF INVESTIGATIONS AND STUDIES TO BE CONDUCTED BY COMMITTEE ON BANKING, FINANCE AND URBAN AFFAIRS

Mr. DENT. Mr. Speaker, by direction of the Committee on House Administration, I offer a privileged resolution (H. Res. 280) and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 280

Resolved, That effective January 3, 1977, the expenses of investigations and studies to be conducted by the Committee on Banking, Finance and Urban Affairs, acting as a whole or by subcommittee, not to exceed $3,001,668, including expenditures for the employment of investigators, attorneys, and clerical and other assistants, and for the procurement of services of individual consultants or organizations thereof pursuant to section 202(1) of the Legislative Reorganization Act of 1946, as amended (2 U.S.C. 72a(1)), shall be paid out of the contingent fund of the House on vouchers authorized by such committee, signed by the chairman of such committee, and approved by the Committee on House Administration. Not to exceed $126,000 of the total amount provided by this resolution may be used to procure the temporary or intermittent services of individual consultants or organizations thereof pursuant to section 202(1) of the Legislative Reorganization Act of 1946, as amended (2 U.S.C. 72a(1)); but this monetary limitation on the procurement of such services shall not prevent the use of such funds for any other authorized purpose.

SEC. 2. No part of the funds authorized by this resolution shall be available for expenditure in connection with the study or investigation of any subject which is being investigated for the same purpose by any other committee of the House; and the chairman of the Committee on Banking, Finance and Urban Affairs shall furnish the Committee on House Administration information with respect to any study or investigation intended to be financed from such funds.

SEC. 3. The authorization granted by the resolution shall expire immediately prior to noon on January 3, 1978.

SEC. 4. Funds authorized by this resolution shall be expended pursuant to regulations established by the Committee on House Administration in accordance with existing law.

Mr. DENT (during the reading). Mr. Speaker, I ask unanimous consent that the resolution be considered as read and printed in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

COMMITTEE AMENDMENT

The SPEAKER. The Clerk will report the committee amendment.

The Clerk read as follows:

Committee amendment: Strike out all after the resolving clause and insert:

That effective January 3, 1977, the expenses of investigations and studies to be conducted by the Committee on Banking, Finance and Urban Affairs, acting as a whole or by subcommittee, not to exceed $2,613,590, including expenditures for the employment of investigators, attorneys, and clerical and other assistants, and for the procurement of services of individual consultants or organizations thereof pursuant to section 202 (1) of the Legislative Reorganization Act of 1946, as amended (2 U.S.C. 72a(1)), shall be paid out of the contingent fund of the House on vouchers authorized by such committee, signed by the chairman of such committee, and approved by the Committee on House Administration. Not to exceed $126,000 of the total amount provided by this resolution may be used to procure the temporary or intermittent services of individual consultants or organizations thereof pursuant to section 202(1) of the Legislative Reorganization Act of 1946, as amended (2 U.S.C. 72a(1)); but this monetary limitation on the procurement of such services shall not prevent the use of such funds for any other authorized purpose.

SEC. 2. No part of the funds authorized by this resolution shall be available for expenditure in connection with the study or investigation of any subject which is being investigated for the same purpose by any other committee of the House; and the chairman of the Committee on Banking, Finance and Urban Affairs shall furnish the Committee on House Administration information with respect to any study or investigation intended to be financed from such funds.

SEC. 3. The authorization granted by the resolution shall expire immediately prior to noon on January 3, 1978.

SEC. 4. Funds authorized by this resolution shall be expended pursuant to regulations established by the Committee on House Administration in accordance with existing law.

Mr. DENT (during the reading). Mr. Speaker, I ask unanimous consent that the committee amendment be considered as read and printed in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

The SPEAKER. The Chair recognizes the gentleman from Pennsylvania (Mr. DENT).

Mr. DENT. Mr. Speaker, before asking for the adoption of this resolution,

I want to say that these last four resolutions, which are all amended, have all been cut from their increases in amounts of $119,000 to over $600,000, with the cooperation of both the ranking minority member and the chairman of the committee.

The committee amendment was agreed to.

Mr. DENT. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

REQUEST FOR CONSIDERATION OF HOUSE RESOLUTION 393, AUTHORIZING ADDITIONAL FUNDS FOR THE LEADERSHIP OFFICES

Mr. DENT. Mr. Speaker, after last week, when I said that House Resolution 393 would not come up, I spoke with the gentleman from Maryland (Mr. BAUMAN); and he is satisfied that we can call it up at this time.

Therefore, Mr. Speaker, by direction of the Committee on House Administration, I call up House Resolution 393 and ask unanimous consent for its immediate consideration.

The Clerk read the title of the resolution.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

Mr. FRENZEL. Mr. Speaker, I reserve the right to object.

I would like to ask the distinguished subcommittee chairman if this is the resolution which authorizes two new positions for the majority leader and two for the minority leader, each to be paid approximately $47,500, and which also authorizes additional expenses to both of those offices?

Mr. DENT. Mr. Speaker, if the gentleman will yield, that is right.

Mr. FRENZEL. Mr. Speaker, armed with that information, I think we have done enough of this sort of thing by unanimous consent, without any kind of vote. I think this matter ought to come before the House in the normal way, and I object to consideration of it at this time.

Mr. THOMPSON. Mr. Speaker, will the gentleman yield?

Mr. FRENZEL. I retract my objection, Mr. Speaker. Still reserving the right to object, however, I yield to the gentleman from New Jersey (Mr. THOMPSON), the distinguished committee chairman.

Mr. THOMPSON. Mr. Speaker, I would concede that this matter might be and perhaps should be, in view of what is involved, subject to debate and to debate only.

I would like to point out, Mr. Speaker, that if the unanimous-consent request is granted to the distinguished gentleman from Pennsylvania (Mr. DENT), then a debate could ensue, except, of course, I would expect that he would not yield for any amendment. Then after debate, Mr. Speaker, a rollcall vote could follow if that, in the judgment of the gentleman from Minnesota (Mr. FRENZEL), is the procedure which should be followed.

Mr. FRENZEL. Mr. Speaker, I thank the gentleman for his contribution.

PARLIAMENTARY INQUIRY

Mr. FRENZEL. Mr. Speaker, I have a parliamentary inquiry.

The SPEAKER. The gentleman will state his parliamentary inquiry.

Mr. FRENZEL. Mr. Speaker, in the event that the unanimous-consent request is not objected to, what would be the provision for debate on the resolution by the gentleman from Pennsylvania (Mr. DENT)?

The SPEAKER. The Chair would respond that the gentleman from Pennsylvania (Mr. DENT) would have control of 1 hour of time.

Mr. FRENZEL. Further reserving the right to object, Mr. Speaker, may I ask the gentleman from Pennsylvania (Mr. DENT) if he would yield the customary 30 minutes to the minority for purposes of debate?

Mr. DENT. If the gentleman will yield, I would only yield for purposes of debate; and I am sure that the gentleman will get all the time he needs. If it takes a half hour to do so, the gentleman will get that half hour.

Mr. FRENZEL. Mr. Speaker, in the light of the information that we will have a chance to debate this matter and that the House may, if it wishes to do so, have a vote on the resolution, I will withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

Mrs. FENWICK. Reserving the right to object, Mr. Speaker, do I understand it that there will be opportunity for debate only and not for amendment? In other words, should we wish to reduce these sums, we will not be able to reduce them; is that correct?

Mr. DENT. If the gentlewoman will yield, that is correct.

Mrs. FENWICK. Why is that?

Mr. DENT. Because the resolution is coming up under that kind of privilege.

Mrs. FENWICK. Can we remove the privilege?

Mr. DENT. We can vote for it or against it, up or down, but we cannot vote to amend it.

Mrs. FENWICK. However, we will get a chance to vote it up or down.

Mr. DENT. That is right.

Mrs. FENWICK. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania for the immediate consideration of House Resolution 393?

Mr. STEIGER. Mr. Speaker, I object.

The SPEAKER. Objection is heard.

PARLIAMENTARY INQUIRY

Mr. DENT. Mr. Speaker, I have a parliamentary inquiry.

The SPEAKER. The gentleman will state his parliamentary inquiry.

Mr. DENT. Mr. Speaker, do I understand that the procedure now is to lay the resolution over for a day and that we can take it up tomorrow, if necessary?

The SPEAKER. The Chair will state that on that particular resolution there is a 3-day availability requirement.

Mr. DENT. Three days. I thank the Chair.

COMMUNICATION FROM SERGEANT AT ARMS—SUBPENA AND ORDER TO APPEAR IN U.S. DISTRICT COURT FOR DISTRICT OF NEW JERSEY

The SPEAKER laid before the House the following communication from the Sergeant at Arms:

WASHINGTON, D.C.,
March 21, 1977.

HON. THOMAS P. O'NEILL, JR.,
Speaker, House of Representatives,
Washington, D.C.

DEAR MR. SPEAKER: On February 28, 1977 I was served with the attached subpoena duces tecum, and an order thereto, commanding me to appear in the United States District Court for the District of New Jersey and to bring with me the documents described therein. It is my understanding that a letter granting an extension of time to comply with the subpoena is forthcoming.

Pursuant to the provisions of House Resolution 10, I am hereby transmitting said subpoena and order, and the matter is presented for your consideration.

Sincerely,

KENNETH R. HARDING,
Sergeant-at-Arms.

The SPEAKER. Pursuant to the provisions of House Resolution 10, the subpena and order will be printed in the RECORD.

The subpena and order referred to follow:

[In the U.S. District Court for the District of New Jersey]

SUBPENA TO TESTIFY BEFORE GRAND JURY

To Sergeant-At-Arms, United States House of Representatives, Washington, D.C.

You are hereby commanded to appear in the United States District Court for the District of New Jersey at U.S.P.O. & Courthouse Bldg. in the city of Newark on the 1st day of March 1977 at 10:00 o'clock A.M. to testify before the Grand Jury and bring with you any and all books, records, and documents set forth on the attached Schedule A pertaining to the account of Edward A. Garmatz of Maryland, for the period September 9, 1971 through and including September 20, 1972.

This subpoena is issued on application of the United States.

Jonathan L. Goldstein, United States Attorney. By: Frank Razzano, Asst. U.S. Attorney.

ANGELO W. LOCASCIO,
Clerk.

Date: Febraury 17, 1977.

SCHEDULE A

1. Monthly account statements.
2. Copies of all cancelled checks.
3. Deposit slips and deposit items.
4. Loan records.
5. Financial statements and credit reports.
6. Copies of all promissory notes.
7. Copies of all cashiers' or treasurers' checks issued by, on behalf of, or at the request of the account holder.
8. Copies of all correspondence, memoranda, formal and informal, maintained concerning the account or account holder.

U.S. DISTRICT COURT, DISTRICT OF NEW JERSEY

ORDER

In the matter of the grand jury empaneled July 27, 1976.

This matter having been opened to the

Court on the *ex parte* petition of Jonathan L. Goldstein, United States Attorney for the District of New Jersey, by Frank C. Razzano, Assistant United States Attorney, for an Order declaring that documents subpoenaed from the Sergeant-At-Arms of the United States House of Representatives by the Grand Jury empaneled on July 27, 1976 are necessary, relevant and material to a pending investigation by the aforementioned United States Grand Jury into violations of Title 18, United States Code, Section 201, and others, and for good cause shown;

It is on this 10th day of February, 1977:

Ordered that the documents subpoenaed from the Sergeant-At-Arms of the United States House of Representatives by the Grand Jury empaneled on July 27, 1976, are necessary, relevant and material to a pending investigation by the aforementioned United States Grand Jury, into violations of Title 18, United States Code, Section 201, and others, and it is

Further ordered that the documents subpoenaed from the Sergeant-At-Arms of the United States House of Representatives may be released to a representative of the United States Marshal's Service, Washington, D.C. as agent for this Court, and it is

Further ordered that the representative of the United States Marshal's Service should thereafter transfer said documents to the United States Attorney's Office for the District of New Jersey as agent for said Grand Jury.

LAWRENCE A. WHIPPLE,
U.S. District Judge.

INTRODUCTION OF BILL TO LIFT PROPOSED BAN ON SACCHARIN

(Mr. WRIGHT asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. WRIGHT. Mr. Speaker, my good friend and colleague, DALE MILFORD, has been extremely concerned about the Federal Drug Administration's recent proposed ban on saccharin and the effects this ban will have on his constituents. As you may know, DALE was admitted to Bethesda Naval Hospital yesterday afternoon for observation after experiencing mild chest discomfort. For this reason, he was not able to introduce a measure he had prepared which he believed would help remedy the situation that has come to light as a result of this proposed ban. Knowing of his concern in this matter, it is my pleasure to introduce today, in his behalf and my own, the bill he had prepared for introduction, and to include in the RECORD at this point the remarks Mr. MILFORD had planned to make when he introduced it.

The remarks read as follows:

Mr. MILFORD. Mr. Speaker, the Food and Drug Administration's proposed ban on saccharin continues to cause concern and consternation among my constituents and, as you well know, among many of our colleagues. I certainly share these feelings. Few federal actions within recent memory have provoked so many appeals for help and have made so many persons vitally concerned for their well-being.

The intent of the so-called "Delaney Amendment" was good. However, in spite of the good intentions, the amendment's provisions crippled the FDA by not allowing any flexibility in its enforcement.

Perhaps saccharin does cause cancer. Personally, I am not convinced it does, and many of my constituents feel the same way. Even if there is a risk, the diabetics, the weight conscious, the cavity-prone and many others are willing to take the risk, and they do not understand why saccharin can be banned completely on medical evidence not corroborated by FDA's own testing.

I am introducing legislation today which would give the FDA the latitude it so desperately needs, and which would specifically lift the proposed saccharin ban until the Secretary of HEW could evaluate the danger of the artificial sweetener under these flexible guidelines.

In my bill, the Secretary could allow a product suspected of being harmful to remain on the market while it undergoes further testing, require warnings on food products containing suspect additives or, in extreme cases, make the additive available only through a doctor's prescription.

I urge quick action by our colleagues to give the FDA regulations which allow for some good common horse sense in dealing with harmful food substances.

PERSONAL EXPLANATION

(Mr. RUDD asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. RUDD. Mr. Speaker, I was necessarily absent from the House of Representatives yesterday, owing to the hearing on the central Arizona project before the Water Projects Review Team of the U.S. Department of Interior, at which Gov. Raul Castro and members of the Arizona congressional delegation testified in behalf of continued funding and completion of this important reclamation project.

Had I been present and voting yesterday. I would have cast "yea" votes for the following four bills on the legislative calendar:

H.R. 3712—A bill extending authorizations of appropriations under the Library Services and Construction Act of 1956.

H.R. 422—A bill providing duty-free treatment for aircraft engines imported as temporary replacements for certain aircraft engines undergoing overhaul.

H.R. 1404—A bill providing duty-free entry of carillon bells for Smith College, Northampton, Mass.

H.R. 3259—A bill providing continued temporary duty suspension on importation of certain horses.

Mr. Speaker, I would have cast a "nay" vote on final passage of H.R. 4800, the Emergency Unemployment Compensation Act of 1977, providing 13 additional weeks of unemployment benefits for a total allowance of 1 full year of such benefits.

I share the views against this legislation expressed by my distinguished colleagues BILL ARCHER, of Texas; PHILIP CRANE, of Illinois; and BILL FRENZEL, of Minnesota, who succinctly and eloquently stated their opposition to H.R. 4800 in the report of the Committee on Ways and Means that accompanied the bill to the House floor.

For the benefit of my constituents and others who may have an interest in my reasons for opposing this legislation expanding the amount and length of unemployment compensation, I would like to include those views in the RECORD at this point:

MINORITY VIEWS OF THE HONORABLE BILL ARCHER, PHILIP M. CRANE, AND BILL FRENZEL REGARDING H.R. 4800, THE EMERGENCY UNEMPLOYMENT COMPENSATION ACT OF 1977

We oppose enactment of this bill. It provides incentives not to work. The measure is discriminatory in operation. It will encourage fiscal irresponsibility among the states in the management of their unemployment compensation systems.

It shifts financing responsibility from corporate employers to the taxpayers of the U.S. The cost to the taxpayers is $588 million in fiscal year 1977 and $530 million in fiscal year 1978, a total of more than a billion dollars.

Under this bill an unemployed individual who has drawn 39 weeks of unemployment compensation benefits in Los Angeles, California, will be able to draw another 13 weeks of benefits. An individual similarly situated in Dallas, Texas, will not be eligible to draw additional benefits. Both are equally out of work. While the majority of the Committee characterizes this disparity as "targeting" it constitutes an indictment of the system's inequity.

While the bill does not necessarily make benefits available to those who need them it does provide benefits for a lucky few for extended periods of up to a year. That is simply too long to pay unemployment compensation. The Federal-State Unemployment Compensation system was created to deal with relatively short-term unemployment. It admirably deals with the problems of short-term unemployment. But longer term unemployment is simply beyond the scope of the program's focus. State law qualification provisions, benefit levels and administrative structure are all geared to a 26-week basic program—not one paying benefits for twice that long.

FSB is a program designed for temporary use in the depth of a recession. Last year, the Unemployment Compensation Subcommittee decided it should not be extended. After eight quarters of improvement, an extension of FSB is totally unjustified.

The bill uses general revenues to finance these benefits. In prior years we have used employer payroll taxes to cover these costs. The general taxpayers are being asked to relieve corporate taxpayers of this obligation. Utilizing general revenues is grossly unfair to those states which have in the past raised revenues to meet their benefit obligations rather than borrowing from the federal trust fund for these purposes. In this connection 22 states are now over $3.8 billion in debt to the Federal Government; they may be encouraged to ignore their indebtedness if we choose to take the proposed course of action with regard to future FSB financing.

The bill also grants authority for an additional 2-year deferral of loan repayments by the States beyond the 3-year deferral authorized by present law. This is a clear signal to the states that they need not worry too much abut repaying their debts to the Federal account. Absent this extension employers in only 2 States would automatically suffer a reduction in their payroll tax credit next year; the unemployment compensation funds of these States have been in debt since 1972 and 1973 respectively. No other state would suffer such a reduction until calendar year 1980 if efforts were underway in each of the States to replenish their accounts. Thus, there is ample time to deal legislatively with the issue in the future should it become necessary.

In short this bill is disruptive of the regular unemployment compensation system. It distorts the program's operation which is premised on an insurance concept. An insurance system cannot pay 52 weeks of unemployment compensation benefits. A welfare system can. This is a welfare bill.

We must recognize what simple common

sense and recent experience indicate; we cannot solve the problems of unemployment by extending the duration of unemployment compensation payments. In some cases we exacerbate the unemployment problem by offering a year-long incentive to stay unemployed. This bill ignores that obvious fact.

BILL ARCHER.
PHILIP M. CRANE.
BILL FRENZEL.

SENTENCING REFORM

(Mr. McCLORY asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. McCLORY. Mr. Speaker, today my colleagues from Virginia (Mr. BUTLER) and Illinois (Mr. RAILSBACK) join me in sponsoring legislation aimed at correcting one of the most alarming inequities of our Federal criminal justice system: the sentencing process. We have all doubtless heard of judge-shopping in the courts; of different sentences for different offenders for the same crime. It is not entirely the fault of a few judges applying their own prejudices and personal criteria to the sentencing process. Rather, it is the fault of a system which grants so much discretion in sentencing that wide disparity is inevitable.

Our bill seeks to accomplish the following: First, establish specific sentencing criteria, including recommended sentence ranges, through which more uniform treatment of similarly situated defendants will ensue; second, require judges to announce their reasons for the record when sentencing convicted offenders; and third, authorize appellate review of sentences.

To facilitate these goals, and make properly studied recommendations to the courts through the Congress, our bill creates a "U.S. Commission on Sentencing," composed of five members appointed by the Judicial Conference and representative of the criminal justice system generally. The Commission will automatically expire after 6 years and will, during its lifetime, be empowered to recommend sentence ranges for specific offenses together with sentencing guidelines for consideration by the trial judge. Following appropriate review by both Houses of Congress, these ranges and guidelines will be passed on to the Federal courts. In setting his sentence, a judge will be required to consider these recommendations. If his decision is to impose a penalty above or below the recommended range, he must cite the reasons therefor for the record. If the penalty is higher than the recommended range, the defendant will be entitled to appeal. If the converse is true, the Government will be granted a similar right. Sentences imposed within the recommended range may also be reviewed but only upon petition.

We believe that our bill will help create a responsible alternative to the rash of mandatory penalties which have been suggested in recent years as the cure for the crime problem. Our present system does not guarantee the fairness which an effective and efficient criminal justice system demands. Indeterminate, widely discretionary sentencing authority is a a cause of the problem. However, mandatory penalties are not the answer. Instead, this concept of presumptive sentencing, which fosters not only the interests of the convicted offender but also those of a society which wishes to more directly control his release, is, in sum, a better idea. It is my hope that after committee hearings, the measure may be recommended for passage by the House.

WHY ZAIRE?

(Mr. JOHNSON of Colorado asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. JOHNSON of Colorado. Mr. Speaker, the Government of Zaire has asked for additional aid, and unless we in the Congress take action to prevent it, the Carter administration will probably grant the request. We have no treaty obligation to Zaire; it has no place in our own military defense program; yet we are proceeding to become more entangled and involved. There has been no justification for extending aid and probably none will be forthcoming. That is because there is no justifiable rationale for intervention.

The Washington Post has written two editorials entitled "Why Zaire?" in which they point out the folly of the administration action. I urge my colleagues to read them carefully.

Mr. Speaker, let me quote just in part from one of the editorials as follows:

The stability of Zaire: is that what the Carter Administration's brave new African policy means? Shades of John Foster Dulles, Dean Rusk, Henry Kissinger and the whole balance-of-power gang.

This is the Carter Administration, isn't it?

Mr. Speaker, the complete text of the editorials is as follows:

[From the Washington, D.C. Post, Mar. 16, 1977]

WHY ZAIRE?

True, Zaire is one of Africa's largest and most populous and relatively most moderate states and it's been more friendly than not to American political and economic interests for nearly two decades. True, it deepened its claim on Washington by lending itself to the previous administration's secret involvement, aborted when revealed, in the Angolan civil war. True (or so it appears) it's in some trouble at the moment now that Angola, tasting revenge, seems to be sponsoring attacks on the old Katanga part of Zaire (the former Congo) by separatist-minded Katangese. And, true, it's better that the new administration should send emergency military aid openly rather than again go down the CIA path. Two planeloads of military gear were dispatched yesterday.

It's still a highly dubious proposition for the United States to deepen its involvement in the murk of Zaire in the way that it has. President Mobutu is not exactly what you'd call Jimmy Carter's type of foreign leader. He runs a crude police state of which the State Department, looking for a silver lining, has just said in its human rights report, "Generally, however, after interrogation non-political prisoners are not subject to repeated beatings." The United States professes not to know what kind of soup Zaire is really in, whether Cubans are training the Angolan mercenaries, or financing them, or merely offering moral support; or whether the emergency American military aid thus far sent or contemplated will do its intended job. There is an open-ended quality to Zaire's predicament—its long-developing economic predicament as well as its newly developing political one—and it raises the question of whether Zaire is for the United States still a good bet. We have had unhappy experiences with open-ended involvements of which Vietnam, of course, is Exhibit A.

The larger issue is how the United States intends to treat the disputes among black states which are endemic on the African continent. This is the first one to explode since Jimmy Carter became President—indeed, it is the first foreign military conflict of any kind in which he has involved the United States—and people are naturally looking at his policy for what precedents it may hold. We find his approach troubling. He has not explained the contingencies or stakes which require such an abrupt American response, nor the risks of delay. He has not indicated that the United States is moving by diplomatic means, say, by appealing to the Organization of African Unity or even to the United Nations, to seek a peaceful resolution of the dispute. He came to the White House promising to shoulder more responsibility for Africa's and the developing world's economic welfare. It is odd to see him reacting to his first challenge in the pattern of the previous administration: hustling more security assistance to a longtime client state which may or may not be under Cuban guns. Why doesn't Mr. Carter slow down and say what his policy is and where he thinks it will fetch us up.

[From the Washington, D.C. Post, Mar. 18 1977]

WHY ZAIRE? (II)

Why Zaire? We asked on Wednesday. The moment seemed right, since Secretary of State Vance was going up to the Hill that very day to explain why the administration had suddenly rushed two planes full of military gear to that jittery African nation. But, as far as we can see, he didn't really explain it at all. Breaking into the old Foggy Bottom mumble, he merely asserted that if the Katanga soldiers who've crossed from Angola into Zaire succeeded in threatening the copper mines, Zaire's stability would be imperiled. He provided no serious rationale at all for why the stability of Zaire is of such importance to the United States that the administration should ignore its own professed concern for human rights (Zaire is a real loser in that department), identify itself with one of Africa's more corrupt and ineffective governments, and accept an involvement in a dispute with such a raw, ragged, runny look to it. The stability of Zaire: is that what the Carter administration's brave new African policy means? Shades of John Foster Dulles, Dean Rusk, Henry Kissinger and the whole balance-of-power gang.

If Secretary Vance's performance on Zaire was dismal, however, that of the International Relations Committee was appalling. Where are the no's of yesteryear? What happened to those vigilant tigers supposedly so ready to ensure that executive power is wisely and well used? Lapping cream out of the administration's saucer, that's what. Aside from some sharp questions by Rep. Don Bonker (D-Wash.)—questions which Mr. Vance slipped by—the rest of the committee simply ignored its responsibility to check on what is after all the Carter administration's first brush with a foreign firefight. It was enough to make you wonder where Congress had been for the past 10 or 20 years.

No, we do not think that Zaire is "another Vietnam." But we do think that the administration has reacted rashly and reflexively to an old client's dubious appeal for emergency aid. Is Angola, in helping a dissident group launch forays into Zaire, doing anything that Zaire has not done recently, and may even

still be doing, to Angola? Cannot a way be sought—in particular, by Zaire's European or other African friends—to tame by diplomatic means the running dispute between Angola and Zaire? Are the United States' accumulated obligations to Zaire so overwhelming that the administration could not briefly pause to see what else might be done? At the least, could not the Secretary of State have designed to spell out the considerations which seemed to him to make it necessary to fly to President Mobutu's aid? This is the Carter administration, isn't it?

NUCLEAR ENERGY BILLS

(Mr. SKUBITZ asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. SKUBITZ. Mr. Speaker, the nuclear industry is no longer in its infancy and the American public is much more attuned to the risks and hazards of nuclear power. Private citizens are increasing their demands for access to decisionmaking relating to the various stages of the nuclear fuel cycle. The magnitude of the potential problems associated with nuclear facilities suggests to me that opportunities for timely public participation in nuclear energy decisions must be increased. Consequently, fundamental reform is necessary to assure that we do not confront the realities of nuclear power in 1977 with a regulatory process forged with the attitudes of 1954.

Today I am joining the chairman of the House Interior Committee, Mr. UDALL, as a cosponsor of two bills pertaining to nuclear energy.

I am joining the chairman to demonstrate my support for his efforts on these two pieces of legislation. It is my hope that the full Interior Committee and the Congress will do likewise.

The first of these bills would significantly add to the role that a State would play in determining whether or not a nuclear energy plant might be located within its boundaries. It would give the States the authority to veto the construction of either a nuclear power facility or a fuel reprocessing plant before a Nuclear Regulatory Commission could even issue a construction permit for a project.

The second bill would allow a State to veto the construction of a nuclear facility within a 90-day period after the license for such a facility had been approved. Additionally, this measure would permit a State to prescribe tougher environmental standards for a nuclear generating facility than those issued by the Nuclear Regulatory Commission.

These two bills collectively would guarantee that the people of a State play the role they should, in determining whether or not a nuclear facility should be located in their State. If there should ever be a major accident at a generating facility in the State of California, it will be the people of California who are first exposed to the consequences of such an accident—not the people of Kansas. Similarly, if the day ever comes when a nuclear facility is constructed in my home State of Kansas, it will be the people of Kansas who will initially face the consequences of an accident at any future plant—not the people of New York or the bureaucrats of the Nuclear Regulatory Commission. Surely the people who will face the consequences of any such nuclear accident should have a voice in determining the construction of a plant in their State.

I remind my colleagues of the furor stirred up in my own district when the old Atomic Energy Commission tried to force local citizens to agree to a radioactive waste disposal site in Lyons, Kans. The AEC proposal, nicknamed "Project Salt Vault," would have posed a significant threat to the health and safety of the residents of Lyons and all Kansas. Fortunately, public outrage finally forced the AEC to reluctantly abandon their plans for Project Salt Vault.

A bill that I am introducing today is intended to prevent the Lyons, Kans., situation from ever developing again. The bill provides a State with greater authority to control the disposal of radioactive wastes, and is similar to legislation recently introduced by Representative CARR and Representative RUPPE. My bill would prohibit the Federal Government from locating a radioactive waste disposal site in a State that had not previously approved a specific site by statewide referendum.

Mr. Speaker, I urged my colleagues to join me in support of this vital regulatory reform.

H.R. 4250, COMMON SITUS PICKETING BILL

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio (Mr. ASHBROOK) is recognized for 60 minutes.

Mr. ASHBROOK. Mr. Speaker, tomorrow the House is scheduled to consider H.R. 4250, a bill to legalize secondary boycotts in the construction industry. The ultimate goal of this legislation, popularly known as the common situs picketing bill, is to force nonunion workers to join the building trades unions.

The current law is based on a 1951 U.S. Supreme Court decision. The Court ruled in the Denver Building Trades case that certain kinds of union picketing at construction sites are prohibited because they constitute illegal secondary boycotts. Under this ruling, if a union has a dispute with a particular subcontractor, it can only picket the gate used by the employees of the subcontractor. Picketing the whole site in such cases is unlawful.

In other words, when there is a dispute at a construction site between a construction union and a contractor or subcontractor, the union may set up a picket line and shut down the work of that particular contractor or subcontractor until the dispute is resolved. Since there are usually many contractors and subcontractors on a construction site who are not parties to the dispute, most of the work at that site can continue.

All of this would change, however, if H.R. 4250 were enacted. Then the union would be free to picket and close down the work of all contractors and subcontractors on the site. Even those contractors and subcontractors not a party to the dispute—that is, secondary to it—would become embroiled in the controversy. The unions would have the right to involve neutral contractors in a dispute not their own and to close down the whole project until the contractor with whom they have a dispute is driven off the job or comes to terms.

This change in the law would have a major impact on union organizing. The building and trades unions would be given the tools to compel all contractors and subcontractors working at a construction site to hire only union labor. Contractors out of necessity would employ only union workers in order to avoid labor problems instigated by the unions. As the chief sponsor of this bill in the House commented about similar legislation in 1975,

> Reduced to its simplest terms, no employer with a brain in his head is going to try to mix union and nonunion subcontractors once this bill is enacted.

So supporters of H.R. 4250 are very honest about this bill. They publicly say that they want it passed so as to assist in union organizing. Andrew Biemiller, the AFL–CIO lobbyist, has stated categorically that the intent of this legislation is to make every worker a union worker.

H.R. 4250, then, would grant extensive new powers to union organizers. It would make it virtually impossible for anyone not wishing to join a labor union to work at a construction site unless all of the employees at the site were nonunion.

The word "site" is another major problem with this bill. Nowhere is this key term defined. Secretary of Labor Ray Marshall himself was unable to define a site which could be closed down by pickets.

The lack of a definition would result in massive controversy and litigation. The point is proved by the Davis-Bacon Act language of "directly on the site" which, after 46 years of use, continues to generate a great deal of controversy and confusion.

For example, does "site" include offsite sand and gravel plants, stone quarries, ready-mix concrete plants, hot-mix asphalt plants, fabricating plants, and other kinds of facilities that are set up miles or even hundreds of miles from the project to service it? Does "site" take in an entire 2,000-mile pipeline construction project? It would certainly appear to do so when such projects are under the general responsibility of a general contractor who subcontracts out portions of the project to subcontractors. This question is one that poses serious problems for the proposed Alaska Trans-Canadian Gas Pipeline project. Unfortunately, the bill leaves us with no answers.

Even those who have supported common situs picketing legislation in the past, however, should have severe reservations about H.R. 4250. Incredible as it may seem, the present bill is drafted far broader than the bill considered in the last Congress.

The previous bill amended only the secondary boycott provisions of the National Labor Relations Act [8(b)(4)(B)]. H.R. 4250, however, relates back to subsection (b), the subsection which includes almost all of the unfair labor practices by unions. In one deft move al-

most all the unfair labor practices by unions are made not applicable to construction unions.

By repealing such prohibitions in (b), H.R. 4250 would allow mass picketing, restraint or coercion of employees or employers, refusals to bargain in good faith, excessive fees required by unions of members, featherbedding practices, and so forth. This is hardly, as the title of the bill states, "Equal treatment of craft and industrial workers." I offered in committee and will offer again on the floor of the House an amendment to limit the terms of H.R. 4250 to 8(b)(4)(B) only, thereby allowing the unfair labor practices to remain unfair labor practices whether involved in common situs or not.

At this point I would like to include in the RECORD the following editorial by nationally syndicated columnist James J. Kilpatrick and a supplemental statement by the U.S. Chamber of Commerce regarding the impact of common situs on minorities and on areas of high unemployment:

"COMMON SITE" SCUFFLE

(By James J. Kilpatrick)

The most colorful combats on Capitol Hill generally involve some issue of principle, politics or power. We are heading rapidly toward a showdown, first in the House and then in the Senate, on an issue that embraces all three. It is Frank Thompson's common site picketing bill.

Mr. Thompson, D-N.J., is chairman of the House Committee on Labor-Management Relations. He is in such a tearing rush to get his bill to the floor that he cannot pause to hear responsible voices in opposition. The gentleman has all the votes he needs in committee. Why bother?

The bill deserves more thoughtful consideration. We are concerned here with an important principle: the principle of individual freedom. The measure is deeply entangled in politics: the politics of the Carter victory last November. At bottom is a question of power: the power of the building trades unions and of George Meany, president of the AFL–CIO.

The Thompson bill is blessed with a certain sweet simplicity. Its purpose is to dragoon non-union workers into the building trades unions. This is a purpose altogether congenial to the mind of Mr. Meany, who cannot understand, try as he may, why any person would resist union membership. Such obstinacy baffles the venerable tyrant. But if non-union carpenters, plumbers and equipment operators cannot be persuaded to join up voluntarily, the Thompson bill provides a handy-dandy solution: Make 'em join.

The measure thus addresses itself to a familiar situation. On a large construction site, a general contractor customarily has subcontracts with 10 or 15 or 20 firms. These firms, in turn, may have subcontracts of their own. Typically, some of the jobs are union jobs; some are not.

Under existing law, if an electrical subcontractor and the electricians' union have a dispute, the union electricians may walk out on strike—but their strike cannot shut down the entire operation. Mr. Thompson's bill would change the law. A picket line at one part of the site would be treated as a picket line for the whole site. If the subcontractor employed both union and non-union workers, the pressures would prove almost irresistible. In order not to delay the project, new union shop agreements would be virtually compelled. The non-union workers would get seven days to come aboard—or they could quit.

It is beautiful, is it not? The freedom of the individual counts for nothing in this brutally efficient manifestation of the press gang. All the construction unions want, says Mr. Meany blandly, is "equal treatment." They want to be treated as other unions are treated in a large industrial plant. But the analogy is pure sham.

In the field of labor relations, the com-con site picketing bill is the first of Mr. Carter's chickens to come home to roost. The President is pledged to signing the Thompson bill if it reaches his desk. He also is pledged to approve the bill nullifying state right-to-work laws. He is committed to an increase in the minimum wage. He also has promised to seek legislation furthering the cause of public employe unionism.

These and other aims were catalogued the other day when Mr. Meany's executive committee met in Bal Harbour, Fla. The President will be reminded of the debt he owes labor in such key states as Ohio, New York and Pennsylvania. Political bills are like other bills: They have to be paid.

But it may be that Mr. Meany's power will prove more apparent than real. The AFL–CIO contributed to the campaigns of an estimated 60 per cent of the members of Congress elected in November, but many of these will not stay bought. Any effort to abolish the right-to-work laws will set off a firestorm of popular protest. At least 40 senators are committed against the common site picketing bill. The dangers in public employee unionism are more widely recognized with every passing month. We are in for some gorgeous battles; and Mr. Meany should understand this much, at least: Those who resent the concentrated power of organized labor have only begun to fight.

SUPPLEMENTAL STATEMENT ON H.R. 4250 COMMON SITUS PICKETING/CONSTRUCTION COLLECTIVE BARGAINING OF THE CHAMBER OF COMMERCE OF THE UNITED STATES

"THE IMPACT ON MINORITIES"

The law books are overflowing with cases in which building trades unions have been found guilty of illegal employment discrimination under Title VII of the Civil Rights Act of 1964. For example, in *McCarthy* (*Asbestos Workers, Local 53*) v. *Vogler*, 1 FEP cases 577 (5th Cir. 1969), the union refused to refer blacks and Hispanics for employment and denied them membership opportunities. In *Sims* v. *Sheet Metal Workers, Local 65*, the union admitted whites who flunked a test as a journeyman, while requiring blacks to pass the test to receive a permit. [6 FEP Cases 1141 (6th Circuit 1973)]. The plumbers uuion was found to have refused blacks membership, referral opportunities on the same basis as whites and acceptance into apprenticeship programs in *U.S.* v. *Plumbers, Local 73*. [2 FEP Cases 81 (D.C. Ind. 1969)]. The ironworkers violated Title VII by failing to grant membership and work to blacks and Hispanics on the same basis as whites in *U.S.* v. *Local 10, Ironworkers*, [6 FEP Cases 59 (D.C. Nev. 1973)]. The Electrical Workers' refusal to either admit blacks to membership or refer them for work was found a violation of Title VII in *U.S.* v. *International Brotherhood of Electrical Workers, Local 357*, (D.C. Nev. 1972).

It would be possible to find similar cases for the Carpenters, Operating Engineers, Bricklayers, Lathers, Steamfitters and so forth but the point is that construction unions have in the past used their total control of job opportunities in the building trades to deny apprenticeship, employment, referral and membership to blacks and other minorities. The assertions made by organized labor's supporters of H.R. 4250 to the contrary, at least one government agency does not believe that the unions have mended many of their old, errant habits. See "The Challenge Ahead, Equal Opportunity in Referral Unions," U.S. Commission on Civil Rights (May 1976). In transmitting that report to the President and Congress, the Commission observed that:

"referral unions still maintain discriminatory practices that have an adverse effect on the employment opportunities of minorities and women."

The report itself is a litany of trade union abuses of the employment rights of minorities. See Report, pages 23–30, 38–51, 58–92. There are minorities in construction, of course, and many of them owe their employment to non-union (open shop) contractors who were willing to give them job opportunities in the building field. For example, 1970 figures show black union members as 8.7% of wage and salary workers in construction, compared to non-union blacks which were 11.2% of wage and salary workers in construction. ["Common Situs and Economic Analysis," Rinfret, New York (1977).] Under H.R. 4250, these minority but non-union workers could be freely picketed off a project to please the building unions. In most cases, construction unions are not interested in getting non-union craftsmen, black or otherwise, to join their organizations, instead, they want to remove them from the project to fill the jobs with their union members.

It is for the Congress to decide, keeping past construction union biases in mind, whether those same discriminatory unions should be rewarded and their control over the labor market increased by enactment of H.R. 4250. We think the answer must be no.

Minority subcontractors

The average minority subcontractor employs about six people and has all of the problems associated with small enterprises (under capitalization, difficulty qualifying for bonds, lack of management skills, trouble keeping good workers) and, in addition, discrimination. But aggregate data show that these contractors do a lot of business—$1.7 billion in 1972. In 1974, minority contractors did $68 million of federal contract work under the Small Business Administration's § 8(a) program. In many current projects, of course, minority contractors work side by side with union contractors. Under H.R. 4250, they would lose those opportunities.

Probably less than half of all minority contractors are affiliated with organized labor, yet H.R. 4250 would legalize union picketing aimed at forcing these struggling contractors off the job—not ostensibly because of their minority status, but because of their being non-union. We know unions have no soft spot for minority contractors because the building trades have tried to keep them off projects in the past, for example, the Washington METRO subway system. [See "Unions Fight METRO Rule on Contracts for Blacks," Washington Post, p. A–34 (22 August, 1974).]

Unions are not interested in organizing these minority, non-union contractors either, and in past have been found in violation of the Civil Rights Act by refusing to organize black contractors with black employees. *U.S.* v. *Sheet Metal Workers*, Local 36, [2 FEP cases 127 (8th Cir. 1969).] As noted, the unions merely want all the jobs for their unemployed members, and with an average of 22.9% unemployed in the construction trades, their hunger is substantial.

Impact in areas of high unemployment

Virtually all witnesses before the Subcommittee agreed that Title I of H.R. 4250 would "polarize" the construction industry into regions of all-union or all non-union contractors. The unions want this because it will give them more power over building projects, and apparently, the chance to extract even more impressive wages from employers. Opponents of the bill deplore the anticipated polarization because union demands will not be tempered by the pres-

ence of open shop competition. But polarization will have an effect beyond those immediately involved in construction. An examination of how the common situs power will probably work demonstrates that there will be a severe impact in areas of present high unemployment.

Common situs will be very effective in "all union" areas which typically will be in the heavily unionized Northeastern United States and large cities and urban areas. It will not be very effective in "all non-union areas" which will be in less developed areas, the South and parts of the Mid-West. Recent surveys show general unemployment much higher in the Northeast, the large cities and urban areas. Much of that unemployment is minorities.

An employer wanting to build a new facility or to improve an old one these days must be very mindful of costs. Thus, an employer looking at sites in "all-union" areas would have to allow for increased construction costs due to: a) the cost of union construction itself, and b) the anticipated total site "down time" potentially possible due to situs picketing. Such increased costs would be likely to cause that employer to choose the "all non-union" area which offers actual lower construction costs as well as no lost time due to situs picketing. Left behind by that employer in the "all-union" area would be not only situs picketing problems, but also the high urban unemployment rate which would have been reduced by the jobs the new or improved facility would have provided.

In conclusion, H.R. 4250 rewards the most discriminatory unions, would severely hurt most minority contractors, and would further worsen the employment picture in large urban areas which desperately need to generate jobs for the unemployed.

Mr. ROUSSELOT. Mr. Speaker, will the gentleman yield?

Mr. ASHBROOK. I yield to the gentleman from California.

Mr. ROUSSELOT. I appreciate the gentleman's yielding.

Mr. Speaker, I also appreciate the time that my colleague, the gentleman from Ohio, has taken to discuss this important national issue. Is my understanding correct that the Roper organization recently conducted a nationwide poll on the subject of common situs picketing and that 77 percent of the public feel that a construction union should only be allowed to picket the work of the contractor with whom it has a dispute and not all other contractors on the building site? Is that correct?

Mr. ASHBROOK. It is my understanding that the Roper poll actually found 77 percent in agreement with the position stated by the gentleman from California, and in opinion research a similar poll found 72 percent of the people surveyed were against common situs picketing.

Mr. ROUSSELOT. If the gentleman will yield further, actually, then, there have been several recent polls on this subject, and according to these several surveys well over three-quarters of the American people—assuming these samples are correct—feel that H.R. 4250 is unwarranted and unnecessary legislation.

Mr. ASHBROOK. I would say that is a fair statement. Between 70 percent and 77 percent in those two polls, one being 72 percent and one 77 percent.

Mr. ROUSSELOT. Mr. Speaker, will the gentleman yield further?

Mr. ASHBROOK. I will be glad to yield to the gentleman from California.

Mr. ROUSSELOT. Let me review for the Members of the House some findings of the most recent nationwide study by the Roper organization:

Item No. 1. The study showed that more than three-fourths of the American people—including 64 percent of all union members—feel building trades union officials should not have the power to picket an entire construction site.

Item No. 2. Overall, the study showed that 77 percent of the public feels that a construction union "should only be allowed to picket the work of the contractor with whom it has a dispute and not the whole building site." This opinion was expressed by 73 percent of the blue-collar workers, 64 percent of the union members, 73 percent of the Democrats, 79 percent of the Independents, 84 percent of the Republicans, 80 percent of the people who describe themselves as being conservative, 76 percent of the people who call themselves liberal, and 78 percent of the self-identified moderates.

Item No. 3. Only 12 percent of the people questioned took an opposing point of view, that a union "should be allowed to picket the whole building site even if it stops work of all other contractors and employees."

(Incidentally, Mr. Speaker, a similar study last year, showed substantially the same opposition to "common situs" type picketing. It was conducted by another nationally known research organization, Opinion Research Corp., Princeton, N.J. That study showed 16 percent of the public favoring the expanded picketing power, while 73 percent said construction unions should only be allowed to picket the contractor with whom they have a dispute.)

Item No. 4. The more than 2,000 people who were questioned by the Roper organization were asked the following question:

On building sites many unions represent different kinds of employees of contractors working there—electricians, carpenters, plumbers, and so forth. When one of the unions is striking against one of the contractors, which of these two rules do you think should apply?

Rule A. The union should only be allowed to picket the work of the contractor with whom it has a dispute and not the whole building site.

Rule B. The union should be allowed to picket the whole building site even if it stops work of all other contractors and employees.

The respondents were handed cards containing the alternative answers, and were asked to choose. By an overwhelming margin, the people decided that fairness dictates that the building trades unions should not have the power to coerce people with whom they have no real dispute.

Mr. Speaker, the Roper organization has had extensive experience conducting studies in the fields of social and political science—for a wide range of clients, including Harvard University, the U.S. Department of Health, Education, and Welfare, the Peace Corps, Metropolitan Life Insurance Co., Columbia University, and others.

If my colleague, Mr. ASHBROOK, will yield further, I have an additional question. Is it my understanding that this legislation (H.R. 4250) that will be before us, is substantially different in many respects from what it was when we voted on it a year ago? Is that correct?

Mr. ASHBROOK. It is my understanding, I will say to the gentleman from California, as a person who has worked on this bill that it is substantially different. These differences are outlined in the Minority Views which will be distributed—I do not know whether the gentleman has one on his desk at this point. I think they extend far beyond what is referred to as equal treatment of the crafts. I think in many ways it can be clearly shown that union members who belong to construction trades would have advantages far superior to anything that other union members might have in either the industrial or other aspects of our economy.

Mr. ROUSSELOT. I am very appreciative of my colleague's taking the time to bring to the House's attention some of the different aspects of this proposed legislation as compared to the legislation we had before us a year ago. I was somewhat amazed that there have been so many voices from those who have tried to imply that it is really not much different from the legislation voted on by the House in the summer of 1976.

But, as my colleague has pointed out, the legislation is in fact not only substantially different, but also a greater number of the American public, if the polls are correct, are more aware of the damaging aspects of it than they were, say, a year ago. Citizens are more alert to its ultimate adverse effects on the consumer because of the potential construction cost increases that could well occur in the building business and drive the prices of homes, hospitals, farm facilities, commercial stores, and so forth, right out of sight. So ultimately it could be the consumers, or taxpayers in the case of public works, that would be most adversely affected. Is that not correct?

Mr. ASHBROOK. That would be my understanding that anything that drives prices up, whether it is those of us in the Congress or whether it is the independent action of oil companies or whether it is the pressure of trade unions, all of those things ultimately, as I understand it will equally affect the higher prices that the consumers will have to pay for their products. in this case we are talking about something that affects almost every single American. It enters into the budget of everyone. There is no way we can escape the effects of this.

Mr. ROUSSELOT. I appreciate that.

There is one other aspect of this legislation that is somewhat disturbing. I have heard some minority groups in my own area who are presently employed in the construction field, and their statements to me are that the bill, as they understand it, would place nonunion blacks, Vietnam veterans—and in fact all persons in the construction labor force who are not or do not wish to become members of a particular construction union at a serious disadvantage. For example, some Mexican-American construction workers are fearful they will be closed out of the work force as the result of the

passage of this bill. Does the gentleman feel as a member of the committee which has carefully reviewed all aspects of H.R. 4250 that this fear is justified?

Mr. ASHBROOK. I would say in response to the various astute questions of my colleague that yes, I not only feel that way but also most of the minority subcontractors—there are not that many minority contractors—feel they would be most adversely affected by this bill. The bill prohibits picketing for reasons of discrimination, I think that is clear, but I think where most subcontractors are concerned is that in many cases they are nonunion and the essence of this bill is for the organized areas of the trades in effect to make a job a union job, so they are going to be caught in that shuffle, not necessarily because they are a minority but just because as a matter of fact for the most part they are in that area. They do I think get a little bit less. They are for the most part nonunion. There has been a period in the trades when they were not able to get into the unions and that has been abated somewhat in the last years.

Mr. ROUSSELOT. This was stated in testimony before the committee?

Mr. ASHBROOK. They have expressed they feel they would be among the first to go and be squeezed out, so the minority subcontractors are by and large opposed to this bill.

Mr. ROUSSELOT. I appreciate my colleague yielding. I see there are others who wish to participate in this discussion.

Mr. ASHBROOK. I thank the gentleman for his comment.

Mr. FORD of Michigan. Mr. Speaker, will the gentleman yield?

Mr. ASHBROOK. I yield to my good and patient friend, the gentleman from Michigan (Mr. FORD).

Mr. FORD of Michigan. Mr. Speaker, I would like to express a question to the gentleman from California as well as the gentleman in the well. I saw the multi-thousand-dollar ad, or a sample of it that is running around the country, which is acknowledged to be paid for by the National Right to Work Committee, which enjoys some free Federal dollars in the sense that they are tax exempted, and there was a Roper poll referred to in the ad. I would like to ask the gentleman if that is the Roper poll he was making reference to in an earlier comment?

Mr. ROUSSELOT. Mr. Speaker, if the gentleman will yield, I will respond.

Mr. ASHBROOK. The gentleman from California referred to that poll. I yield to the gentleman from California.

Mr. ROUSSELOT. I referred to that in my discussion, and reviewed some of the findings.

Mr. ASHBROOK. I am more conversant with the Research Corp., poll which showed 72 percent. I have heard of that poll, I will say to the gentleman from Michigan. I have not examined it carefully.

Mr. FORD of Michigan. Mr. Speaker, the newspaper ad, over the signature of the National Right to Work Committee, said that the National Right to Work Committee commissioned the Roper organization to make the poll and presumably directed the form of the questions.

It is quite obvious that they either deliberately intended to mislead the people who were polled, or as is sometimes the case in that kind of organization, they are so blinded by their preconceived prejudices that they do not understand the issues, because as a matter of fact the 77 percent approved proposition A of the propositions A and B contained in the poll, which said that they thought a labor organization having a dispute with a single contractor on a building site ought to be able to picket that contractor at the building site and that, in fact, is what this legislation is designed to do. A building contractor would not presently be given the rights that are in paragraph A. In fact, the form of the Roper poll was worded so badly, I think it can be properly argued, notwithstanding any suggestion of improper motives on the part of the questioners in the way the questions were structured, that they structured the question to read that a reasonable person would not approve, if 77 percent of the people approved an option given as option A to those 77 percent, if they were Members of the House would be voting for the situs picketing bill coming before us tomorrow.

Mr. ASHBROOK. Mr. Speaker, I thank the gentleman from Michigan for his contribution.

I happened to look a little closer at the poll distributed by Mr. Georgine of the construction industry. I think it would be interesting to note this was basically commissioned by the trade unions and they asked, and I tend to agree they ask the self-serving statement that propounders of polls present to the American people. In this case it was, "Do you favor equal treatment of construction unions?" I was surprised they only got 51 percent, even the way they structured the question; so I think the observation of the gentleman from Michigan (Mr. FORD) is very valid.

Mr. FORD of Michigan. Mr. Speaker, I quite agree with the gentleman from Ohio. That is one of the things we would hope ultimately the American people would learn to watch for in trusting anyone's commissioned poll or anyone who has an interest in the outcome of the issue.

I have to say, however, if the gentleman will yield further, I find the discussion of the poll to be somewhat irrelevant, when the gentleman from California has given such overwhelming propensity to respond to minority groups that put pressure on the gentleman in his district. I know of the gentleman's long-lasting, abiding and constantly demonstrated concern for the downtrodden minorities; but I wish the gentleman just would not engage in the prejudice others are showing toward our friends who wear hardhats because they took on the flag burners a few years ago and became conscientious as a group as a symbol of hardworking people, blue collar Americans, who stand up for their rights. We do like to give them at least the same rights that those who defended my friend, the gentleman from California, a few years ago had when they were exercising their rights.

I am really saddened by the antihardhat tenor that comes through, especially when the gentleman seems to gloss it over by saying the gentleman was trying to protect the downtrodden minorities.

Mr. ASHBROOK. Mr. Speaker, I would say to my friend in responding that I think, in the first place, the gentleman knows that this Member has never relied on polls.

Mr. FORD of Michigan. I referred to the gentleman from California (Mr. ROUSSELOT).

Mr. ASHBROOK. So I only have marginal knowledge of these polls, as we have other basic options.

I certainly concur with my friend's observations regarding the patriotism of these fine people. I think the thing that has amazed me the most is the general lack of pressure of these same people for this legislation. I would be constrained to point out in this case that it seems to be coming from the internationals, not so much from the rank and file.

I know one thing that has amazed me in talking to my colleagues is how little pressure they felt back home from their friends in the construction industry and this particular legislation; but as we all know, it is something very symbolic. It is something they have wanted for 25 or 30 years. That accounts for some of the reason we have not received the pressure from our friends in hardhats.

Mr. Speaker, as long as the gentleman has train of observation, if the gentleman wants to continue, fine.

Mr. FORD of Michigan. Mr. Speaker, I appreciate the gentleman's observations in connection with this matter.

Mr. ASHBROOK. I thank the gentleman. We will probably be hearing a lot from the gentleman from Michigan tomorrow.

I will be glad to yield to a very able member of our committee, a freshman, who I might add has taken the leadership on this issue, the gentleman from Oklahoma (Mr. EDWARDS).

Mr. EDWARDS of Oklahoma. Mr. Speaker, I thank the gentleman for yielding to me.

I have two comments I would like to make. First, I think our distinguished colleague from Michigan, a member of the committee (Mr. FORD), has raised a couple of very good points. I think the first is in questioning the nature of the polls that have been reported, and I have seen the poll that was commissioned by the AFL–CIO and discussed before our committee.

Mr. ASHBROOK. Striking, was it not?

Mr. EDWARDS of Oklahoma. Striking. I was very impressed by the way in which a question could be phrased so misleadingly, for example, "Are you in favor of equal treatment?" That question could only get 51 percent support.

But, I think the main point I would like to make—because I think the gentleman from Michigan is to be commended—the main point that is involved in this bill is the benefit, the welfare of the working men and women, the people who belong to these craft unions. If I can read between the lines somewhat of what the gentleman from Michigan said, I assume he is going to vote against H.R. 4250 because the working men and

women who belong to these unions are the ones who are going to be laid off, without any fault of their own, because of some dispute some other worker has with an employer, and these innocent people are going to be out of jobs.

I am very concerned about that, about the welfare of the working people in my district. Therefore, I hope, following his comments, the gentleman from Michigan will support us in opposing this bad legislation.

Mr. ASHBROOK. I would just say that the gentleman from Michigan, obviously, will speak for himself, and no one else can presume to do that, but be my guest. If the gentleman from Michigan favors passage of H.R. 4250, I find that surprising in view of what he has just said.

Mr. ROUSSELOT. Mr. Speaker, will the gentleman yield further?

Mr. ASHBROOK. I yield to the gentleman from California.

Mr. ROUSSELOT. I appreciate the gentleman yielding to me. I only ask the gentleman to yield so that I may respond to my distinguished colleague from Michigan.

I am somewhat surprised that Mr. FORD would indicate somehow that those who find the common situs picketing bill to have substantial defects should be "antihardhat" in their philosophy, because exactly the opposite is true. The Roper poll shows those opposing the common situs bill are the real "prohardhat" advocates. As a matter of fact, the reason the Roper poll was commissioned in the first place as I understand it, was that the opponents felt the Roper organization had the strongest unbiased reputation and was very reliable. I, too, have seen those questions, as many members of the Labor and Education Committee have and I thought they were pretty carefully worded so as not to show a partisan leaning but rather to try to elicit from all the people who were polled a fair and objective response.

I can see why my good colleague from Michigan would not be very happy with the Roper poll results. The Roper poll showed that 64 percent of all union members surveyed did not favor the common situs picketing bill. It showed that most of those blue collar members, that is, hardhat workers did not agree with the position of my good colleague from Michigan. You see that puts the gentleman from Ohio, myself, and others opposing the bill clearly on the side of the majority of hardhats.

We can excuse the gentleman from Michigan for trying to undercut the results because he is obviously moving away from the feelings of a majority of the hardhats of America.

It is even more interesting to see why that 64 percent of the union membership did not favor this legislation. It is my hope—Mr. FORD will take the results more seriously and join the hardhats who feel this legislation is unnecessary and wrong.

Again, I agree with my colleague from Ohio (Mr. ASHBROOK) that we cannot make our judgments on surveys alone. Commonsense should also prevail. The recent Roper poll is but one measurement of opinion we can take into account. A commonsense review of the legislation (H.R. 4250) should tell us there are many flaws in the bill, such as:

It in effect legalizes secondary boycotts by allowing a contractor on the same site to be unjustifiably affected by a dispute that does not involve him, thereby denying a basic principle of protection of innocent neutrals;

Passage will assist in rapid and complete unionization of all construction workers;

It reinstates provisions allowing unfair labor practices—by repealing most of section 8(b) NLRA—including picketing for unlawful objectives, mass picketing to coerce employees in selecting bargaining representatives, and generally unrestrained picketing;

It allows construction-union picketing for purposes of "inducing" employees of industrial and manufacturing concerns, State and local governments, railway labor employees, and others not involved with the construction industry;

The safeguards limiting picketing are generally illusionary;

Imprecision and ambiguity, which will raise enormous legal problems in labor-management relations, an area already widely disputed in the courts—they point out that witnesses themselves disagreed on interpretations; and

Alleged attempts to correct inequities between construction union and other labor union picketing, which ignore factors already giving building trades latitude in picketing and striking, and an advantageous bargaining position which has resulted in high wages and restrictive work practices.

Mr. ASHBROOK. I would say to my colleague from Michigan: Let us be honest. This has been high on the priority of unions for many years. It is always that their resolution, which will repeal the old Denver building trades case, is something that has been proposed for a number of years. My friend and colleague, the chairman of our subcommittee, often indicates it has been practically his life's work during the years he has been in Congress.

But I think when we strip it of all the emotionalism—they want it; and from the opponents view, quite often they think it is a terribly bad piece of legislation—I think two points will stand out. One, I see very little in the passage of H.R. 4250 that will bring about a general increase in wages or the pay of the average construction worker. I think, by and large, title II was put in this particular bill because there is a feeling in many areas they have already outstripped what might be the wage standards in the area. Second, it is certainly not going to add any more construction.

So we have to look beyond those two basic reasons for the passage of the bill. I think the passage of the bill is contingent upon the arguments of the union proponents. Not necessarily the proponents in the Congress, but the union proponents. They have very clearly indicated they want to make the construction jobs union jobs. I think that is the heart of the legislation, and it is not necessarily to raise wages, not necessarily to have more construction.

But from their point of view, which I recognize as proper, to make every job wherever possible a union job, there remains the possibility of union workmen side by side, working on a site with nonunion workmen.

Again I say that is certainly their prerogative. It does not happen to be the position I agree with. It is one of the reasons I took this time to speak out against this legislation.

Mr. Speaker, my colleague, the gentleman from Arizona (Mr. RUDD), has also taken an hour for a special order; so I will yield back the balance of my time so that the gentleman from Arizona can continue the debate on this issue.

Mr. HAGEDORN. Mr. Speaker, whether or not one is in favor of extending common situs picketing rights to building and construction trade unions, to label H.R. 4250 as an equal treatment bill is a misnomer and a violation of every truth-in-labeling concept.

The construction unions may feel that common situs picketing is proper and desirable, but the fact remains that no other trade union is permitted to picket employers with whom it has no dispute. Such secondary boycotting is outlawed in all instances by all unions. Construction unions already possess the same right to engage in primary strike activity as any other union. They are permitted to picket employers to the same extent as other unions, employing the same tactics and striking on the basis of the same grievances. They are simply not accorded the special privilege of doing what is prohibited to other unions—embroiling innocent employers in disputes not of their own making. If a majority in Congress feel that this is an antiquated policy, they are free to alter it in any manner they see fit, but they should not be deluded into believing that equal treatment is the issue at stake.

Indeed, a case can easily be made that equal treatment could best be achieved by requiring the construction unions to relinquish the substantial legal advantages that they already enjoy with respect to other unions. First, section 8(e) of the Taft-Hartley Act specifically exempts them from national labor policy which prohibits so-called hot cargo agreements. Under this exemption, construction unions alone are permitted to specify in their bargaining contracts firms with which the employer may not do business. This provision already gives these unions the limited opportunity to accomplish through the backdoor what common situs would permit them to accomplish through the front door.

Second, construction unions alone can require new employees to join within 7 days of starting employment in those States which permit the union shop, while other unions must wait 30 days before membership requirements can be enforced under section 8(f) of Taft-Hartley. Thus, in order to retain their jobs in these States, employees must join and pay tribute to construction unions more than 3 weeks earlier than may be required by other unions. Especially hard hit by this exception are students and part-time workers who must either pay substantial union fees immediately upon

assuming employment, or who are deterred from seeking construction employment in the first place.

Third, construction unions alone are permitted to utilize hiring halls and refer from them to employers. Again, industrial unions are prohibited from this practice under section 8(f). Not only have hiring halls become the equivalent of a closed shop in many segments of the construction industry, but they also have a notorious history of discriminating against minority applicants.

Finally, construction unions alone are permitted to enter into so-called prehire agreements with employers whereby the employer agrees to hire workmen under the terms of the collective bargaining agreement entered into before any employees are hired. Unlike other labor organizations, such contracts can be negotiated even prior to the time at which the union's majority status has been conclusively determined under section 9 of the National Labor Relations Act.

I recognize that there are differences in the nature of the employment experience between construction and regular factory work. Perhaps, some of these differences, such as the transitory nature of much construction work, justifies the privileges which construction unions enjoy. That is a question not at issue in H.R. 4250. At issue, simply, is the economic and social dislocation that would result from extending further privileges to the construction unions. The merit of such an extension is at issue, and should not be obscured by reference to this bill as an equal treatment bill of any sort, correcting past inequities. There are no such inequities to be corrected.

Mr. SYMMS. Mr. Speaker, passage of this legislation would result in severe economic impact on the building trades at a time when that industry is already plagued by unemployment higher than that for the rest of the industries. Construction unemployment averages almost 23 percent; why should a bill permitting expanded work stoppages and increased costs at construction sites be supported in the Congress?

The power which this bill would provide to the construction unions would enable a single union, representing only a small number of employees on a construction site, to close down the entire project and force all other workers on the project from their jobs. In addition to the economic hardship this would mean to the workers and their families, the expanded picketing action allowed by the bill would also be detrimental to the construction business and to the economy as a whole. In fact, in a report prepared last month by the noted Rinfret Associates, Inc., entitled "Common Situs and Economic Analysis," the conclusion stated that—

It would tend to increase unemployment and/or decrease employment opportunities and tend to increase the inflationary bias of the American economy.

In addition to the harmful economic impact of the common situs picketing bill; my colleagues should be aware of the special hardship this legislation would work on small business and minority contractors. Minority contractors have traditionally tended to be nonunion, as they have had difficulty gaining entry into local craft unions. Secretary of Labor Ray Marshall, in the September 1974 issue of Journal of Economic Literature, made this point in an article entitled "The Economics of Racial Discrimination: A Survey." In it he stated that—

whether or not these unions are able to bar blacks depends primarily on their control of entry into the occupation. Craft unions, for example, ordinarily have considerable control of the supply of labor. The main job control instruments of craft unions are control of training, entry into the trade and union, and job referrals.

With the legalization of secondary boycotts in the construction industry, unions will be able to use it as a tool to force removal of any nonunion employees and subcontractors from a construction site. In fact, AFL–CIO officials have admitted in hearings held in previous years on common situs legislation, that it provide them with the power to "destroy independent unions" and that their aim was to "see every job—a union job."

By the same token Mr. Speaker, all of us should recognize that passage of this secondary boycott bill would threaten the small businessman in the construction field. Not only would its anticompetitive effects harm those already in the field, but those effects would act to restrict their competitive entry into the building trades fields. Again, the reputable Rinfret analysis concludes that—

It would appear that common situs would have a negative impact on small businesses as they now exist in this industry and would work against free entry of small businesses into the construction industry.

Mr. TREEN. Mr. Speaker, I am unable to understand why this bill is being rushed through the Congress in an effort by its proponents to have it on the President's desk by Easter. My colleagues should know, if they do not already know, that reputable independent polls indicate that the majority of the American public does not want a common situs picketing bill. Moreover, these independent polls indicate that a majority of union members also agree with the verdict of the general American public.

The noted Roper organization, one of the country's most highly respected research organizations, recently concluded a poll on the issue of secondary boycott in the construction industry. Released just last week, the Roper poll shows that three-fourths of the American public, including 64 percent of all union members, feel that a secondary boycott on a construction site should not be allowed. Specifically, the opinion that a construction union "should only be allowed to picket the work of the contractor with whom it has a dispute and not the whole building site," was shared by 73 percent of the blue collar workers, and 64 percent of the union members.

These findings are consistent with results of a similar poll taken last year by another nationally known organization, the Opinion Research Corp. That poll indicated that 73 percent of the public believe that construction unions should be allowed to picket only the particular contractor with whom they have a dispute. In fact, this particular organization has conducted a similar poll for the past 11 years, always with results indicating that a majority of the American public do not favor secondary boycotts in construction. I am including for the record the specific statistics from the past 11 polls taken on the subject by the Opinion Research Organization.

WHO WANTS SECONDARY BOYCOTTS IN CONSTRUCTION? NOT THE AMERICAN PUBLIC—NOT EVEN UNION CONSTRUCTION WORKERS!

Opinion Research Corporation of Princeton, N.J. conducted a nationwide survey of the American public in May, 1976, and in it was the following question:

On building sites many unions represent different kinds of employees of contractors working there—electricians, carpenters, plumbers, and so forth. When one of the unions is striking against one of the contractors, which of these two rules do you think should apply?

Rule A—The union should only be allowed to picket the work of the contractor with whom it has a dispute and not the whole building site.

Rule B—The union should be allowed to picket the whole building site, even if it stops work of all other contractors and employees.

[In percent]

No opinion	8	6	7	5	8	7	6	5	7	7

Mr. DICKINSON. Mr. Speaker, I appreciate having the opportunity to express my views on legislation to legalize common situs picketing in the construction industry. I would like to explain my reasons for opposing this legislation to my colleagues.

As you know, I have long been an advocate of the right of every individual to obtain and keep a job without having to join a union if he or she does not wish to do so. I believe this is a vital freedom which must be preserved if personal liberty is to remain a reality in the United States. However, should a bill allowing

secondary boycotts be approved by the Congress, that freedom will be severely jeopardized.

The current practice on most construction projects is for a general contractor to hire subcontractors to handle the various aspects of the project. The subcontractors may hire a mix of union and nonunion laborers or be exclusively closed or merit shop, but it is fairly certain that some of the workers on a construction site will be nonunion in view of the fact that 75 percent of the American labor force does not belong to any union. If a union is allowed to shut down an entire construction project because of a dispute with one of the many employers on the job over the hiring of nonunion people, it is apparent that the general contractor will be wary of doing business with a nonunion subcontractor. Such a situation will force nonunion laborers (who voluntarily elect not to be union members) out of work or into unions—if they can gain entry.

Construction trades unions have a notoriously bad track record for allowing minorities into their memberships. The U.S. Commission on Civil Rights acknowledged that fact in a publication in May 1976 and recognized that legalization of the secondary boycott will make the problem even worse. It would be a double shame for the Congress to give lip service to the tragedy of extremely high unemployment among minorities while effectively putting more minority employees out of work. If minority workers are not able to get into construction unions and open shop minority subcontractors are not awarded contracts by closed shop general contractors due to the threat of a secondary boycott, passage of common situs legislation would certainly create such unemployment.

Of course this situation could be reversed, and it is possible that contractors will turn away from unions altogether and go exclusively to merit shop subcontractors. They might also insist on nonstrike clauses and penalty payments in bid agreements with union subcontractors. In either case, individual workers will be penalized, and contractors will lose their right to deal with subcontractors on the basis of experience and price. It is likely that many small firms will be driven out of business as well.

Even if the secondary boycott did not infringe on individual freedom, in terms of fair play alone it is reprehensible. After all, letting one union tie up a construction site and force other workers off the job, when those workers have no part in the dispute and their employers have no jurisdiction over negotiations to end the dispute, is a basic affront to the American sense of justice. Furthermore, the cost to the taxpayers and consumers in terms of lasting effects on the economy as well as higher-priced homes and other goods created by construction delays and the increased wages negotiated would be an additional unfair burden. We bemoan the fact that low- and middle-income families have been priced out of the single-family housing market, but we consider legislation which will lead to even higher construction costs. The American public should not be made to accept such duplicity.

Trade unions complain that they are discriminated against because they do not have the right to close an entire construction project while industrial unions have the power to close an entire plant. What they neglect to mention is the fact that there is no comparison between the two situations because even if the industrial employees belong to several unions, the manufacturer is a single employer with complete control over his labor relations policies whereas the general contractor and the subcontractors on a construction job are separate employers. Each employer has control only over his own employees and has no power to resolve a dispute between another contractor and his employees.

To bolster their claim that there is one employer on a construction job, the unions claim that contractors and subcontractors on the job-site are joint venturers, but this argument does not hold water. It is difficult to understand how entities which do not share profits and losses, do not have a common labor policy, and, in fact, even sue one another because of commercial disputes arising from work performed on the same project can be considered joint venturers.

The building trade unions already enjoy the same leverage as other unions; that is, the right to strike against their employer. Efforts to extend further powers to these unions through common situs picketing have been thwarted by the Congress for the past 30 years, and the Supreme Court ruled in 1951 against the practice and recently allowed a triple damage suit against a union in Texas that had engaged in a secondary boycott. A survey by the Opinion Research Corp., of Princeton, N.J., revealed that common situs picketing is opposed by 68 percent of the American public including 57 percent of all union members. In the light of such awesome opposition, it seems the 95th Congress would be remiss in its duty to represent all the people if we were to choose to pass this bill. I urge my colleagues in the House not to pass this measure but to defeat it on its lack of merit.

Thank you, Mr. Speaker.

Mr. ARCHER. Mr. Speaker, if it is the intent of the Congress to legislate increased construction costs and lengthy construction delays, the proponents of H.R. 4250, the common situs picketing bill, have indeed come up with an excellent means to accomplish those dubious goals.

Quite conceivably, this measure could be used to shut down construction projects of such critical national importance as the trans-Alaskan oil pipeline—if a union representing only a few employees of one of the many subcontractors on the project chooses to do so.

I am totally opposed to this measure, and I urge my colleagues in the House to reject it.

Certainly construction workers are entitled to the same protection under the law as workers in other industries have—and that is already guaranteed under existing law. This measure that is now being considered would grant to construction unions a totally unprecedented amount of additional power to bring construction projects to a halt—far in excess of any such powers held by unions in other industries.

There is something else at stake here, too. What about the subcontractor, the small businessman, who falls victim to such a strike even though his own employees are members of a different union and have no grievance against him? He is prevented from fulfilling his contract by workers who may have no relationship to his portion of the construction project at all. What about nonunion employees that may be working for a subcontractor? Are they to be denied the right to work and provide a living for their families by a few union employees who have a grievance against some totally unrelated subcontractor?

Mr. Speaker, one has to question whether H.R. 4250 is anything more than still another tool to remove nonunion employees from all construction sites—even in those States where right to work laws exist. It represents still another step in the strengthening of what is becoming the absolute power of national unions over the locals—and that certainly is contrary to the intent of Congress in the passage of the Landrum-Griffin amendments to the National Labor Relations Act.

This House of Representatives will be making a grave mistake if it imposes this unnecessary and extremely harmful legislation on the consumers of this country who will have to pay the price for all delays and increased costs of all construction in this country.

Mr. CRANE. Mr. Speaker, at the outset, let me congratulate my two distinguished colleagues from Ohio and Arizona, Mr. ASHBROOK and Mr. RUDD, for taking the time to organize this special order today. What with the very limited time devoted to hearings on this bill, it is important not only for us as Members to speak out, but also for constituents to know that their voice is being heard. The excuse that this measure was fully debated in the previous Congress is wholly inadequate on two counts. For one, this bill is different than the previous one; for another, the massive outpouring of constituent discontent was instrumental in bringing about the Presidential veto of that earlier effort. Quite clearly, the American people do not want this legislation and it is time their voice was heard. Even if one discounts things as subjective as mail counts or letter writing campaigns to the White House, the evidence of public opposition to common situs picketing legislation is weighty. A year ago, the Opinion Research Corp. conducted a poll which indicated that not only were 72 percent of the people surveyed against common situs picketing, but 54 percent of all union members opposed it as well. A much more recent poll, this time conducted by the Roper organization, not only bore out these results but showed a stiffening of opposition to common situs. As of several weeks ago, Roper found that 77 percent of all Americans were against common situs and that opposition amongst union members had risen from 54 percent to 64 percent.

The reasons for this rather decisive reflection of public opinion are not difficult to discern. There are at least eight solid objections that can, and should be raised

to title I and several more that are applicable to title II. In sum, this bill does not provide equality of treatment for the construction trade unions. What it does is add another special privilege to an impressive list of special privileges the building trades already enjoy.

Succinctly put, what title I of this bill would do is permit the construction unions to engage in secondary boycotts by picketing an entire jobsite not just that portion of it being worked by their employer. The net result would be that the employees of one subcontractor could, in a dispute with their employer, keep employees of all other subcontractors from working even if they are in no way involved or interested. Furthermore, there would be few limits on the type of issues that could lead to such a situation.

The rationale behind all this, from the building trades unions' point of view, is that everybody working on a jobsite is a joint venture in the project. However, nothing could be further from the truth. The subcontractors do not share profits or losses, nor do they have the same labor agreements with their employees. All the companies are legally distinct entities with different responsibilities and it could easily work out that a subcontractor could make a fortune on a project while the general contractor goes broke or vice-versa. Moreover, from the standpoint of the employees there is no common employer as is frequently the case on an industrial site.

Looking beyond the inapplicability of the joint venturer theory, passage of this bill is likely to have one of two results: either a general contractor will hire unionized subcontractors exclusively or he will hire nonunion subcontractors exclusively. Price will no longer be the key determinant in who gets subcontracts because a mixed jobsite will, due to secondary boycotts, mean a picketed jobsite in all likelihood. Secretary of Labor Ray Marshall, in his March 9 testimony before the House Subcommittee on Labor-Management Relations, frankly admitted this when he said common situs would:

> . . . probably create either totally union or totally nonunion construction sites.

When George Meany testified several years ago on H.R. 5900 in the 94th Congress—the previous common situs bill—he carried this point to its logical conclusion when he stated labor's objective was to make every job a union job. Realistically, this is more likely to happen in the Northeast and the Midwest, where the unions are strongest; but still the theory that all construction workers should be forced to join a union in order to work is not an appealing one. If the freedom to associate, guaranteed in the first amendment, is to mean anything, its converse, the freedom not to associate, should also be upheld. Yet, this bill would effectively circumvent State right-to-work laws on the books in 20 States, to say nothing of the discrimination it would encourage.

Ironically, the groups most likely to be hurt by this bill are going to be the minority groups. Historically, the building trades unions have long been guilty of racial discrimination and, according to the May 1976 of the U.S. Commission on Civil Rights, this discrimination continues. Therefore, "making every job a union job" is not in the interest of black employees—despite the provision of section 101(a) of this bill—any more than it is for black subcontractors, most of whom are understandably nonunion. The reasons for this are threefold: minority workers will still have trouble getting into unions because of age and apprenticeship requirements—ostensibly—and minority contractors will not want to put themselves in a position where they will have to lay them off for those reasons. Also, minority subcontractors, as in the case with so many small contractors, cannot afford from a competitive standpoint the higher costs of unionization.

There is another angle to be considered, and it helps explain why construction trade union membership is not growing quickly enough to suit the labor union bosses. That angle is, of course, the greater flexibility of open shop as opposed to union shop. In a union shop situation, a building trades union worker may labor in one, and only one, of the 18 construction trades while on a job but a non-union worker may work at several trades successively, thus remaining employed longer. It is little wonder then that many construction workers prefer to stay out of the union and would understandably resist being forced to join one, if indeed it were permitted. If jobsites are going to shut down for periods of time due to secondary boycotts, a lot more construction workers are going to be out of work than there are now and too many are unemployed as it is. In fact, the unemployment rate among construction workers is currently estimated at 15.6 percent and the continuing recession in the construction industry is the very reason Congress has passed one and is about to pass another Public Works Employment Act. So, where is the logic in aggravating the unemployment problem unless we are going to give more food stamps to strikers or have more public works projects, both of which are counterproductive. What would make far more sense is open shop—right-to-work—all across the land and a tax reform program that would lead to the creation of the capital necessary for more construction of plants and facilities which in turn will mean more jobs.

The impact of common situs on inflation should not be overlooked either. If union affiliation, instead of price, is going to become the key criterion for the award of contracts and time consuming delays because of job site shutdowns are going to become the rule rather than the exception, then construction costs will inevitably rise.

Such increases, given the importance of the construction industry in this country, will help fuel the fires of inflation which of course hurts everybody, construction workers included. Before giving in to the arguments of those who claim this legislation can be justified on the grounds that it will bring about equal treatment for construction workers, we should keep in mind that at $11.46 per hour—on average—a construction worker has the highest wage rate of any industry. A 1975 study by the Bureau of Labor Statistics showing that construction workers made $265 per week as compared to $249 for a miner, $234 for utilities employees and $189 for manufacturing employees as a whole, speaks for itself.

In this context, we should also look at the legal status of construction trades unions vis-a-vis industrial unions. Those building trades unions people pushing common situs say they only want equality; but, in fact, what they want is another special privilege on top of those they already have. Consider for a moment that only the construction and garment unions are exempt from the prohibitions against hot cargo clauses contained in the Taft-Hartley Act; and only the construction unions can operate a hiring hall. Additionally, only construction unions are able to force employees to join the union in 7 days instead of the normal 30 and only the construction unions can negotiate a contract before the employer has hired any union workers. With all these things, it is hard to see how the construction unions are being discriminated against and it is difficult to discern any adverse effects from such alleged discrimination.

Having mentioned hot cargo agreements, I should also note that passage of common situs legislation would have profound antitrust implications. Learned legal opinion strongly indicates that were antitrust laws applied to labor unions as well as to management, secondary boycotts as well as all hot cargo clauses would not only be prohibited but would be a crime punishable by a fine and/or jail term. Yet, instead of treating all parties in the economic arena in the same way, this bill would extend the hot cargo exemption the construction unions already enjoy to the secondary boycott. That, in turn, would go counter to the trend indicated in recent Supreme Court rulings—Connell Construction Co. against Plumbers Local 100 and NLRB against Enterprise Association of Steam Pipefitters—limiting the extent to which unions can engage in product boycotts without violating the antitrust laws. In short, by passing this bill we would, in effect, be saying that it is perfectly all right if construction unions act in restraint of trade, even if their interest goes beyond work preservation. The precedent thus set could open the door for even more trouble in the future.

Finally, I am concerned that H.R. 4250 may go far further than is generally realized, to the extent that it may eliminate any such thing as an unfair labor practice by a construction union. Just this possibility, if nothing else, should have been reason enough for the Education and Labor Committee to have taken more testimony and to have given more time to this legislation. From what I can tell, this bill is far broader than H.R. 5900 in the last Congress and it should, therefore, be examined with a fine tooth comb. I can only hope that when the debate begins tomorrow the House will undertake just such an examination and, in the end, decide this bill is not in the best interest of this country. If ever there was a special interest bill, this is it; and if ever there was a time to deny special interest groups more special privileges, that time is now.

I urge my colleagues to take another look at this bill and, when the time comes, to vote no. The special interests behind this legislation might not be pleased, but the people will.

Mrs. HOLT. Mr. Speaker, with hideous haste reflecting powerful special interest pressure, the common situs picketing bill is being pushed to the floor of this House.

The issue is power, and power alone. It would enable a union striking or picketing one subcontractor to picket and close down an entire construction site, causing financial damage to all other subcontractors and their workers on the site.

The consequences will be costly delays in construction projects and higher labor costs, meaning a reduced market for construction work and fewer jobs for workers. The important thing to remember is that this legislation will impose real economic damage on an industry that can ill afford any setbacks.

Now we all know that the construction industry has been through very hard times. The recession hit it with greater force than most other industries, and it is only now beginning to recover.

But what is being presented to this Congress is legislation that would cause serious economic harm to this very industry, and this for the sake of union power.

Let us not hear any arguments that this legislation is either fair, or necessary, or will improve the condition of workers in the construction industry. It is none of those things.

Minority workers should be particularly alarmed by this legislation, because its purpose is to increase the power of building trades unions which have been notorious in their discrimination against minority workers. The intent of this legislation is to give unions the power to exclude nonworkers from construction sites. It is as simple as that.

In a situation in which a union or unions could stop an entire construction project to protest the presence of nonunion workers, general contractors would become very nervous about the subcontractors and labor they employ.

But I would advise the construction trades unions to take a serious second look at what they are attempting here. This legislation could ultimately work against them.

It could have the effect of bringing more construction work to merit-shop general contractors who would avoid using any union labor because of the threat of common situs picketing. Union workers would be totally excluded from sites where the general contractor runs a merit shop.

It is a two-edged sword that we have here, and one can only speculate about the probable long range effects on union strength. However, construction unions have been gradually pricing themselves out of the market in a trend that has been continuing for some years, and this legislation would seem to encourage more suicidal lurches in that direction.

Under the circumstances, perhaps this is a desperate legislative grasp for total union control of the industry. The clear intent is monopoly power, and Congress should not become a party to any such intent.

Fortunately, this legislation died in the last Congress after President Ford vetoed it. But the union bosses feel that this Congress and the new President will be more amenable to their power play. I hope they are wrong.

Mr. LEACH. Mr. Speaker, I urge defeat of the common situs picketing bill.

The common situs issue is an issue of principle as well as of economics. There are decent arguments on each side of the fence, as my colleagues on the other side of the aisle have made clear, but I come down on the side of maximum freedom of individual choice and association.

From an economic point of view, I would like to cite six reasons for opposition. First, common situs would very likely prove to be a particular threat to the small business entrepreneur. The construction industry is dominated by very small businesses, especially in nonurban areas. By its competitive and seasonal nature and its capital intensiveness, the construction industry is susceptible to high rates of business failure. Common situs would aggravate an already precarious situation and would work against free entry of small entrepreneurs into the marketplace.

Second, to the extent that common situs would increase construction costs, it would place additional barriers to home ownership and building in general, and consequently tend to increase unemployment in the construction industry.

Third, the general inflationary tendencies caused by common situs would be reflected in the economy as a whole, thereby reducing consumer demand and ability to pay for other goods and services.

Fourth, common situs would tend to work against the economic interests of minorities who have limited access to good apprenticeship programs and would likely hold back their economic integration into the construction industry.

Fifth, particularly in areas where there is a healthy competition between union and nonunion contractors, common situs might actually jeopardize a union-shop contractor who is low bidder on part of a major construction project. To avoid difficulties in having a mixture of union and nonunion subcontractors, the general contractor might opt to choose only nonunion workers, thus unfairly prejudicing fair opportunities for the union member and the integrity of the marketplace.

Finally, from the perspective of a small, rural State which has a right-to-work law and which has a long tradition of family-oriented small business, common situs implies bringing to States like my own the construction practices of some of our toughest cities. I feel strongly that as trends in America develop toward bigness we ought to do everything possible to preserve and protect rural, small town values. Accordingly, I urge defeat of the common situs picketing bill.

GENERAL LEAVE

Mr. ASHBROOK. Mr. Speaker, I ask unanimous consent that all Members may be granted 5 legislative days in which to revise and extend their remarks on the subject of these special orders.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

There was no objection.

COMMON SITUS PICKETING

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Arizona (Mr. RUDD) is recognized for 60 minutes.

Mr. RUDD. Mr. Speaker, the legislation providing for common situs picketing being supported by the administration will have a devastating adverse effect on construction workers—union and nonunion—on the construction industry, and on investors in new construction.

Common situs is secondary boycott, and no one has ever argued successfully that secondary boycott is legally or morally justified.

On every great construction job there the dozens of subcontractors. The argument advanced by Secretary of Labor Marshall that the general contractor and the subcontractors are joint venturers is totally without logical foundation.

The subcontractors deal with different unions—are separate legal entities. They have their own policies and their own modes of operation. They operate under different labor agreements, and they are all trying to make enough profit to pay their labor and stay in business.

The truth of the matter is that there is an adversary relationship many times between the general contractor and the subcontractor. The general contractor, who must answer to the owner, is required to insist that the subcontractor perform the work according to specs—and on time.

In right-to-work States such as Arizona, both union and nonunion subcontractors sometimes work on the same project. When a labor dispute occurs, the reserve gate permits these employees who are not involved in the dispute to continue working.

Under the provisions of common situs, a labor dispute involving one subcontractor doing a very minor portion of the total job—with perhaps only two or three employees—could be picketed. And this could shut down the whole job, forcing every worker to put down his tools and forego his paycheck.

Perhaps the supporters of common situs believe it will give the unions a distinct new advantage to force nonunion workers off the job. This will require repeal of section 14(b) of the Taft-Hartley Act, and nullification of the States' right-to-work laws.

As a practical matter, it will permit the agitators and the troublemakers within the union to foster labor disputes and impose their own personal will on their fellow workers—and on all the subcontractors and the general contractor.

The sponsors of this legislation piously proclaim they want the building trades workers to have the same rights as their industrial brothers. The truth is that the construction worker who is employed only 40 weeks a year—and many of them work year around—has averaged earnings substantially higher than workers in manufacturing employed 12 months a year, workers in wholesale and retail trade employed 12 months a year, and

workers in private industry who work 12 months a year.

I invite the sponsors and supporters of this common situs legislation to look at the real world—and to put aside their abstract theories.

In my home State of Arizona, an imaginative, innovative developer is putting together new plans for a great new shopping center and mall.

Some of the buildings will be constructed by union contractors working for the developer. Other buildings will be constructed by the tenants who have leased the ground. There may be, all told, as many as 1,500 construction workers on the site.

Let us assume for a moment that one of the companies which has leased the ground and plans to build its own buildings engages a nonunion contractor. The other contractors cannot prevent this. The developer cannot prevent this.

But under common situs, a trivial dispute involving just one of the general contractors on the job—or just one of the subcontractors on the job—could close down the entire project.

Secondary boycott is wrong, because by any definition it involves innocent parties—people who have no connection with a dispute between a particular union and its employers.

We can believe that if this legislation is passed, and signed by the President, it will certainly polarize the construction industry.

It will, in effect, force all general contractors to work either exclusively open shop, or exclusively union.

The polarization will be accomplished through a potentially disastrous series of strikes on thousands of projects—and inevitably the cost of construction will increase. This will add to the fires of inflation, and the worker who it is alleged will benefit from common situs picketing will bear the brunt of the punishment.

The arguments against common situs picketing are clear, strong, and logical. They have been made available to the Secretary of Labor, to the President, and to the Members of Congress who are sponsoring and promoting this legislation.

Every year for the past 10 years, the Opinion Research Corp. of Princeton, N.J., has conducted a nationwide survey of the American public to identify the degree of support for common situs picketing.

In each of those 10 years, the general public has been opposed to common situs picketing—with about 70 percent of those responding opposed, and from 15 to 17 percent only of those polled favoring common situs.

And what about the union members themselves?

Every year for 10 years, a majority of the union members have opposed common situs picketing.

We Americans have always been a nation of builders. We tackle a job. We get things done.

The hair shirt of union construction is low productivity. There are 17 building trades international unions—plus the Teamsters. And in times past we have found restrictive practices ordained by union rules—restrictive practices which have limited production.

The general contractors of America—working in concert with right-minded union leaders—have steadfastly and constantly increased union wages. Common situs picketing will create all manner of of new labor disputes—the effect of which will be to increase construction costs.

Union workers will be penalized through the loss of work.

Union contractors will be penalized.

The general public will be injured.

Surely this Congress will act in the best interests of every one of us, who are all involved, and recognize the secondary boycott for the destroyer it truly is.

Mr. Speaker, I would like to yield now to the distinguished gentleman from California (Mr. DEL CLAWSON).

Mr. EDWARDS of Oklahoma. Mr. Speaker, will the gentleman yield?

Mr. RUDD. I yield to the gentleman from Oklahoma.

Mr. EDWARDS of Oklahoma. Mr. Speaker, first I want to commend my colleague and friend and fellow freshman, the gentleman from Arizona (Mr. RUDD) who, I think, has done a superb job in presenting the case here today.

I sit on the Committee on Education and Labor and have seen this bill as it has been developed. I think that the gentleman from Arizona (Mr. RUDD) has hit on many of the major points that have given me problems with the bill.

To elaborate a bit, I would tell the gentleman that during the testimony before our committee, Mr. Robert Georgine, speaking for the AFL–CIO, testified that, in fact, the effect of this legislation would be to polarize the construction trades. He made the statement that there would be no more mixing of union and nonunion workers on the same job if H.R. 4250 was passed.

Of course, I think the implied assumption there is that there is going to be tremendous pressure on construction employers to unionize or else they will find their entire jobs shut down.

Therefore, Mr. Speaker, I think the gentleman has hit a very important point here, and I commend him for it.

Mr. RUDD. Mr. Speaker, I appreciate the generous remarks of the gentleman from Oklahoma (Mr. EDWARDS).

Mr. Speaker, it will be of interest to all Members that an economic analysis of the effect of common situs legislation, such as that before this Congress, has been prepared by Rinfret Associates of New York.

The four main conclusions of this study, commissioned by industry groups, are briefly stated in the Rinfret report as follows:

One. Common situs would most likely prove to be a threat to the small entrepreneur in the construction industry.

Two. Common situs would tend to work against the economic interest of the minority groups and would most likely hold back their economic integration into the construction industry.

Three. Common situs would tend to increase unemployment in the construction industry and would contribute to an already unacceptable level of unemployment.

Four. The impact of common situs on general inflation is almost impossible to measure in a direct way. It is fair to say, however, that common situs would add to the general inflationary tendencies which we are now experiencing.

Mr. Speaker, I would like to include this short but highly important economic analysis of the adverse effects of common situs at this point in the RECORD:

COMMON SITUS

1. Introduction. This study attempts to analyze the economic impact of common situs on (1) minorities, (2) small business, (3) unemployment and (4) inflation.

The conclusions of this study are couched in terms of tendencies. It is not possible to state dogmatic conclusions because the subject is complicated and the available data leave much to be desired.

It is recognized that common situs may be as much a political and moral issue as it may be an economic issue. Political and moral considerations are outside the scope of this study. This study carries no ideology. It is a straightforward attempt to analyze the economic impact of common situs.

2. Conclusions. In the simplest form possible and on the assumption that the analysis which follows will be read in conjunction with the statistical tables which are a part of this report, our conclusions are as follows:

One. *Common situs would not likely prove to be a threat to the small entrepreneur in the construction industry.*

Two. *Common situs would tend to work against the economic interest of the minority groups and would most likely hold back their economic integration into the construction industry.*

Three. *Common situs would tend to increase unemployment in the construction industry and would contribute to an already unacceptable level of unemployment.*

Four. *The impact of common situs on general inflation is almost impossible to measure in a direct way. It is fair to say, however, that common situs would add to the general inflationary tendencies which we are now experiencing.*

These conclusions are not valid under all legislative conditions but only in the context of the legislation now pending before Congress. It is obvious that these conclusions would have to be changed or modified depending on the extent to which legislation before Congress is changed or modified.

3. Analysis. In this section of the report we indicate the reasoning and the thinking behind the conclusions. In order to keep this report unencumbered, we have confined the great body of statistical tables to the Appendix. Those statistical tables are, however, part and parcel of the analysis and should be considered an integral part of this report. Before considering the analysis of the economic impact of common situs on the entrepreneur, minorities, unemployment and inflation, it is worthwhile to examine the construction industry in general at this particular moment.

One. *Economic Overview.* The following may be said to be the current economic situation in the construction industry:

(1) *A high rate of unemployment.* In 1976 the construction industry had an unemployment rate of 15.6 percent as compared with a national unemployment rate (which includes construction) of 7.7 percent. Both figures were higher in 1974. There has been double-digit unemployment in construction in every year since 1970 except 1973, whereas there has been no double-digit unemployment for the country as a whole.

(2) *Lower volume.* The volume of new construction put in place (in 1967 dollars) reached a peak of $93.3 billion in 1973. The latest volume figure which is available for this series is for the month of December 1976. In that month, the volume of new

construction put in place was $74.7 billion (annually rated).

(3) *High hourly earnings.* The average hourly earnings of construction workers (skilled, semiskilled and unskilled) has materially exceeded those in manufacturing industry. In 1976 average hourly earnings in construction were 48 percent higher than those in manufacturing. The average hourly earnings in both construction and manufacturing have increased every year in the past decade. The recession of 1973–1975 did not stop the upward thrust of these average hourly earnings.

(4) *Construction costs increase faster than general prices, i.e. the construction industry has a greater inflationary bias than the economy as a whole.* The Engineering News Record Building Cost Index is a recognized measure (one of several) of construction costs. In 1965, this cost index was .99 of the Consumer Price Index, .97 of the All-Commodities Wholesale Price Index and .97 of the industrial component of the Wholesale Price Index. In 1976 these ratios were 1.24, 1.15 and 1.16, respectively. It should be pointed out, however, that the 1976 ratios were lower than those of 1972–1973. In the past several years, the rate of increase in consumer prices and in wholesale prices has been somewhat greater than the rate of increase in construction cost indexes.

(5) *Productivity has dropped precipitously.* This drop in productivity (output per man-hour) in construction may be a function of the decline in the volume of new construction put in place in the past several years, but if so, it has exceeded the decline in productivity in manufacturing industry which occurred in the 1973–1975 recession. On the base of 1967=100, productivity in the construction industry was 94.0. In the nonfarm business sector it was 114.2 and in the manufacturing sector it was 123.5.

(6) *Housing is disappointing.* This area of the construction industry merits being singled out for attention because it is tied so intimately to national economic goals. Housing starts (multiple and single-family) peaked at 2.36 million units in 1972. In 1976, housing starts recovered from their 1975 low and reached 1.54 million units.

This level of starts was below general expectations for the industry. At the end of 1975, most industry analysts thought that housing starts would approximate 1.7 million units in 1976 and could be as high as 1.8 million units. There are many, many problems in the economic structure of housing, not the least of which is the fact that the average sales price for a new one-family house has more than doubled since 1965. It now takes more hours of work for the average American to buy a new home than at any time in the postwar period.

To sum up, the construction industry currently suffers from low volume, low productivity, high costs and high selling prices.

Two. *Minorities.* The economic statistics on minority participaton and representaton in economic sectors and in the labor unions leave much to be desired. In some cases the statistics are partial and incomplete, and in some cases there are no good time series. There is frequent disagreement about the statistics gathered by the unions themselves as compared with those gathered by the U.S. Government. We adhere to the rule, which we have followed for twenty-five years, that the primary source for statistics should be the U.S. Government.

Union representation in the contract construction industry, as a percent of total union membership, appears to have reached a peak of 13.8 percent in 1962. In 1974, the latest year for which we have comparable data, contract construction union members represented 11.3 percent of all union members in the United States.

In 1974, the total membership of the reporting locals in the building trades was 1.33 million people. Of this number, there were about 209,00 people in minority groups; about one-half were black and the remainder were people with a Spanish surname, Indians, Orientals and others. In 1974, the minority participation in the building trades unions reached 15.7 percent, which appears to have been the highest level in those years for which we have records.

The construction industry appears to have about the same percentage of blacks as does manufacturing when the measure of "blacks as a percent of wage and salary workers" is used. In 1970 the figures were 10.2 percent for construction and 10.7 for all manufacturing. The highest percentage of blacks is found in Services and Government.

Black union members as a percentage of wage and salary workers in all manufacturing in 1970 was 12.4 percent. In Services and Government the figures were 18.6 percent and 16.5 percent, respectively. Black union members as a percentage of wage and salary workers in the construction industry in 1970 was 8.7 percent, which is the lowest for any major sector.

Nonunion blacks as a percentage of wage and salary workers in all manufacturing in 1970 was 9.8 percent. In Services and Government the figures were 13.5 percent and 11.8 percent, respectively. The figure for the construction industry was 11.2 percent.

Examination of all the sectors in the economy in 1970 indicates that in all those sectors except "transportation and utilities" and "construction", black union members constituted a higher percentage than did nonunion members. In "transportation and utilities" and "construction", the percentage of nonunion members exceeded that of union members.

In the September, 1974 *Journal of Economic Literature* in an article entitled "The Economics of Racial Discrimination: A Survey", the present Secretary of Labor, Ray Marshall, makes the point that black workers have difficulty getting into local craft unions (the type of labor organization prevulent in the construction industry). Ray Marshall states that "whether or not these unions are able to bar blacks depends primarily on their control of entry into the occupation. Craft unions, for example, ordinarily have considerable control of the supply of labor. The main job control instruments of craft unions are control of training, entry into the trade and union, and job referrals."

It would appear that construction unions with common situs would be able to exercise greater control over the labor force. Historically, the minority groups have not participated as fully in the construction industry as they have in other industries.

Three. *Small Business.* The constructon industry appears to be dominated by small businesses.

In 1972, there were about 438,000 firms engaged in contract construction. The number of firms with one to nine employees was about 352,000. These firms, therefore, represented about 80 percent of all the firms engaged in contract construction.

There were only about 4,520 firms with 100 or more employees engaged in contract construction in 1972. These firms represented about one percent of all the firms engaged in contract construction.

The construction industry has a very high rate of business failures. We have consistent statistics for business failures for the past decade. In 1975, construction business represented close to 20 percent of all business failures in the U.S. That was the high point. The lowest percentage of failures was registered in 1972, when it was 14.4 percent. For the first ten months of 1976, construction failures represented 18.2 percent of all business failures.

The average liability per failure in the construction industry has tended to increase sharply in the last decade. In 1965 the average liability per failure was about $116,000. It peaked at about $286,000 in 1974 and was about $236,000 for the first ten months of 1976 (not annually rated).

The construction industry has a greater percentage of workers on strike than does the economy as a whole. In 1973, the percentage of workers involved in strikes for "all industries" was 3.0 percent. For manufacturing it was 4.9 percent. For construction it was 10.1 percent. This tendency for a greater percentage of workers in the construction industry to be involved in strikes is long-standing and persistent.

Contract construction stoppages have been declining steadily as a percent of all U.S. stoppages since 1965. In 1965 contract construction stoppages represented about 24 percent of all U.S. stoppages but declined to 10.1 percent by 1973. Construction workers represented 3.8 percent of the total employed civilian labor force in 1965 and 3.9 percent in 1975. The percentage of contract construction work stoppages in 1965 and in 1973 exceeded the percentage of contract construction workers in the total civilian labor force.

The construction industry is dominated by very small businesses with a high bankruptcy rate, high liabilities per failure, a high rate of strikes and a high rate of work stoppages.

It would appear that common situs would have a negative impact on small businesses as they now exist in this industry and would work against free entry of small businesses into the construction industry.

Four. *Unemployment.* The construction workers' peak employment level was reached in 1973 with 3.3 million people. In 1975, it totaled approximately 2.7 million people, about the same number as in 1965.

The peak unemployment rate in the construction industry was reached in 1975 at 18.4 percent. The national average unemployment rate for the same year was 8.5 percent. As noted earlier, the 1976 unemployment rate in construction was 15.6 percent. The national average was 7.7 percent.

Average hourly earnings in the construction industry, as noted earlier, have consistently exceeded average hourly earnings in manufacturing. In 1976, for example, construction average hourly earnings were 1.48 times those in manufacturing. The cost indexes for construction, as noted earlier, have consistently exceeded national measures of inflation.

The construction industry is by and large a craft industry, not readily adaptable to mass production techniques. As indicated earlier, productivity (output per man-hour) in the construction industry has fallen behind that of the rest of the private sector and has in fact declined in the past several years.

Labor costs are an integral part of construction costs. Labor costs in the construction industry exceed those of the economy as a whole. It seems fair to say that an important part of the problem of the declining volume of construction and declining construction employment is relatively high labor costs.

To the extent that common situs increases the costs of construction and to the extent that common situs exerts extraordinary upward pressure on wages, then its end result may be to increase unemployment in the construction industry and to decrease employment opportunities. This could adversely affect the ability and opportunity to integrate minority groups into the construction trades.

Five. *Inflation.* To the extent that common situs would not result in increased work stoppages in the construction industry and to the extent that wage increases in the construction industry would not exceed productivity, common situs would not be inflationary.

If common situs were to result in increased work stoppages and wage increases which would exceed productivity, then it would be inflationary.

The past is not necessarily a precursor of

the future, and events in the future frequently turn out to be very different from what had been anticipated.

The history of the construction industry includes increases in costs which exceed national measures; average hourly earnings which are above national averages and which, until recently, tended to increase faster than the national average; lower productivity than the national average; and a relatively high rate of work stoppages. These are the perfect ingredients for inflation.

On the base 1967=100, wage costs in the construction industry were 187 in 1976 and material costs were 188. This simple comparison indicates the complexity of the inflation problem. Each bit of inflation is a part of the whole and the whole influences each bit.

It would appear that common situs would tend to add to the inflationary bias of the United States economy at the present moment and would work against efforts to minimize or moderate inflation trends.

4. Conclusions Revisited. This analysis and these conclusions are based upon known factors in proposed common situs legislation. It is realized and understood that proposed legislation attempts to offset some of the conclusions arrived at in this report. This analysis has attempted to take into account proposed safeguards in common situs legislation.

Taking all these factors into account, it would appear that common situs legislation to date would work against minority groups and small businesses. It would tend to increase unemployment and/or decrease employment opportunities and tend to increase the inflationary bias of the American economy.

Mr. DEL CLAWSON. Mr. Speaker, will the gentleman yield

Mr. RUDD. I yield to the gentleman from California.

Mr. DEL CLAWSON. Mr. Speaker, I want to associate myself with the remarks of the gentleman from Arizona (Mr. RUDD) in this special order.

Mr. Speaker, the "hobgoblin" of a "foolish consistency" is to be carefully avoided if we in the Congress would also escape Emerson's attribution of that quality to "little statesmen, philosophers, and divines." But the reliance on general guiding principles which renders us ineligible for that label is, in my view, an integral part of our consideration of H.R. 4250 to permit secondary boycotts in the construction industry although the Taft-Hartley Act and the Landrum Griffin Act make the practice illegal. A basic principle of individual freedom of choice is involved in this legislation—the right of individual employees to determine by majority rule whether they do or do not wish to be represented by a union or other bargaining agent. Equally important principles of the National Labor Relations Act and subsequent legislation are also violated by features of the common situs picketing bill, H.R. 4250. Freedom is infringed by its insurance that only union labor be employed by contractors or that men and women who want construction employment may only work for employers who have agreed to contractors with unions.

Recognizing the principle that unions have a right to use those bargaining methods at their disposal, it is my hope that Congress will also recognize the "foolish inconsistency" of denying the very rights of free choice of bargaining agents from which the system of collective bargaining derives its strength.

The bill deserves to be rejected if for no other reason than the very real threat it will pose to the industry and workers it purports to assist. Appreciating the influence and relevance of the construction industries and all the contractors and subsidiaries associated with the industry to the entire economy of the country—in the public interest, no less than the interests of those immediately affected, Congress should reject situs picketing as set forth in H.R. 4250.

Mr. ASHBROOK. Mr. Speaker, will the gentleman yield?

Mr. RUDD. I yield to the gentleman from Ohio.

Mr. ASHBROOK. Mr. Speaker, I would certainly like to congratulate my friend, the gentleman from Arizona (Mr. RUDD), for his leadership in this particular area.

It is not trite to say, Mr. Speaker, that when we convened in January, one of the legislative proposals that almost everybody in this body knew was going to come up rather soon was the common-situs picketing legislation, legislation which almost cleared the last session of Congress, but was vetoed by the President.

I recall very well that the gentleman from Arizona (Mr. RUDD) had not been here for more than a few days when he came to me because I am the ranking member on that committee to ask what he could do to help.

During the intervening 2 months the gentleman has been one of the leaders in trying to convince this body that this legislation is not good for the country at this time.

I also want the record to show that I appreciate the gentleman's efforts in this regard. It is very unusual for a freshman Member to take such an outstanding lead so early in his congressional career and I believe the record should show that the gentleman from Arizona (Mr. RUDD) has made a very substantial contribution on this bill.

Mr. RUDD. Mr. Speaker, I thank the gentleman from Ohio (Mr. ASHBROOK) for the remarks he has made and would advise the gentleman that I appreciate his remarks. The gentleman has indeed been a leader in this respect and I recognize that.

Mr. Speaker, editorial comment on the subject of common situs picketing across the Nation has been substantially opposed to legislation to legalize the secondary boycott.

An excellent editorial appeared just last Friday on March 18, in the Phoenix Gazette, one of Arizona's great daily newspapers and I would like to include a portion of it in the RECORD. It is entitled "Stop the Stampede," which it is hoped is exactly what the House of Representatives will do when H.R. 4250 comes before the House this week.

Mr. Speaker, I ask unanimous consent to include the editorial at this point in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arizona?

There was no objection.

The editorial is as follows:

[From the Phoenix Gazette, Mar. 18, 1977]

STOP THE STAMPEDE

Legislation to enable a single small union to shut down an entire building project is being rushed through Congress by organized labor before the public becomes aware of what is going on. If and when Congress passes the common situs picketing bill, President Carter is pledged to sign it.

The reason for stampeding this legislation became obvious this week when the National Right To Work Committee released the results of a brand new public opinion poll. Taken by the Roper Organization, the poll shows that more than three-fourths of the American people—including 64 per cent of all union members—feel that building trades union officials should not have the power to picket an entire construction site.

According to Roper, 77 per cent of the public feels that a construction union "should only be allowed to picket the work of the contractor with whom it has a dispute and not the whole building site." This opinion was favored by 73 per cent of the blue collar workers, 64 per cent of the union members, 73 per cent of the Democrats, 79 per cent of the Independents, 84 per cent of the Republicans, 80 per cent of the conservatives, 76 per cent of the liberals and 78 per cent of the moderates.

In the face of these overwhelming odds, it is no wonder that the unions are anxious to ram the common situs picketing bill through Congress. Given time to let the feelings of the vast majority of their constituents be expressed, most members of Congress in debt to the labor special interests would find it difficult, to say the least, to go against the wishes of such decisive majorities.

The story is the same in all classes, age groups and regions. The highest percentage in favor of common situs picketing was among union members, and even here those in favor amounted to a mere 30 per cent.

It won't be bringing the country together nor will it be keeping faith with the democratic process to pass the common situs picketing legislation when, all around the country and across the board, the public is so overwhelmingly against it.

Mr. ROUSSELOT. Mr. Speaker, will the gentleman yield?

Mr. RUDD. I am happy to yield to the gentleman from California.

Mr. ROUSSELOT. Mr. Speaker, I appreciate my distinguished colleague, the gentleman from Arizona (Mr. RUDD), for yielding to me and wish to express my appreciation to him for bringing out the very important point of what the economic impact would be of this legislation, H.R. 4250, not only upon union members and how it would adversely affect them, how it would adversely affect minority groups that want to be in the construction business, but also how it will adversely affect the entire economy.

I believe my good colleague, the gentleman from Arizona, as has been indicated by the gentleman from Ohio (Mr. ASHBROOK), the gentleman from Oklahoma (Mr. EDWARDS), and others, is to be commended for making sure that this House understands what the impact of this adverse legislation will be on every single consumer nationwide in their districts who will either have to cough up taxes for local construction of city, county, and State projects but who will also have to cough up extra money for the millions of dollars we expend on Federal public works construction projects. The gentleman has explained how this legislation will very adversely affect all those individuals as taxpayers in public works projects, also in the case of privately constructed buildings, roads,

and that type of thing that the consumer ultimately pays in the products or services they buy in the marketplace.

So again I say, Mr. Speaker, that I am very, very pleased at my colleague, the gentleman from Arizona (Mr. RUDD), in his efforts. I know that he has done his homework on this subject and is already showing to the House that he is willing to take the leadership in these kind of important consumer issues in bringing to the attention of the entire House the economic impact they will have on the entire country.

I compliment my colleague for his very discerning and incisive statement here today and for taking this time. As my colleague, the gentleman from Ohio, has already stated, the gentleman from Arizona in the well early on came to the Members of the House who were on the Committee on Education and Labor and offered to be of service to help bring the ramifications of this bill to the entire House, and we are grateful that he took the leadership to do that.

Mr. RUDD. The remarks of the gentleman from California display him to be the very knowledgeable gentleman that he is, who deserves the support of his constituents and the support of every Member of this body. I appreciate those remarks.

I would like to say just one thing, Mr. Speaker, that only this morning I received a report from a national union, the Congress of Independent Unions of 35,000 members. This report is in opposition to common situs legislation.

I submit this statement for inclusion in the RECORD:

CONGRESS OF INDEPENDENT UNIONS,
Alton, Ill.

On behalf of the 35,000 individual members of the Congress of Independent Unions and the affiliated unions, therein, we oppose enactment of H.R. 3500, now pending in the House of Representatives.

The proposed legislation could not have come at a worse time. Just when this country needs immediate, massive, new construction to boost the economy, H.R. 3500, if enacted, would have the effect of spawning costly and lengthy labor disputes never before seen in the construction and building industry.

According to the proponents of the Bill, H.R. 3500 is designed to insure equal treatment of the building trades and craft unions working at a common construction site. *As a practical matter the Bill would insure unequal treatment.* Individuals who have chosen a union representation, and the employer who was awarded work from competitive bidding, would be denied all *human rights* of choice. Those unions *not* presently affiliated with the A.F.L.–C.I.O., such as the Congress of Independent Unions, would be immediately forced out of all construction jobs where they are now protected.

Bill H.R. 3500 would not allow employers in the construction industry to remain or become equal opportunity employers, as they will be forced to hire employees from trade union halls. These same trade unions, have and, are refusing to open their membership to minority groups at the time Congress is thinking of giving trade unions a monopoly on all building. Many States and the Federal Government are holding construction moneys up because of the trade unions refusal to comply with the Equal Opportunity Commission.

In many large cities, HUD has not allowed moneys to rebuild or repair residential buildings, denying many jobs simply because the trade unions would not comply with their codes; St. Louis being one of these cities in late 1976.

As an example of the above, an employer having employees represented by the Congress of Independent Unions was employed as a sub-contractor on the construction of the world-famous "Gateway Arch" in St. Louis, Missouri. The contractor was paying prevailing rates, but due to the *sole fact* that his employees were affiliated with the Congress of Independent Unions instead of the A.F.L.–C.I.O., the other trade unions at the job site picketed, and *passed resolutions* not to work with this contractor's *employees*. As a result, *all work* at the job site was *halted* until the Congress of Independent Unions was able to obtain Federal protection to complete the job under *8(b)(4)*.

Enactment of H.R. 3500 would completetly destroy such an employer whose *employees* by exercising their rights under Section 7, vote to join a Union other than the A.F.L.–C.I.O.

The significance of this case can be seen when you realize that this particular contractor and most of his employees were black. The proposed change by H.R. 3500 would, in effect, prevent such *employees* from *ever* working in the construction field, unless and until they affiliated with the A.F.L.–C.I.O. (The above case was litigated as National Labor Relations Board Cases: 14–CC–348, 14–CCC–350, 14–CC–352, and 14–CC–358).

It is claimed the general contractor is the employer but, in fact, one employer or his employees can not perform the complete job so he must sub-contract or let another employer perform certain other craft work. This, in effect, denies people their human rights of freedom of choice.

A further stated purpose of H.R. 3500 is to apply the same principles of labor law to the construction and building industry that are currently applied to the garment industry. Such purpose totally ignores the reason why an exemption with respect to Section 8(b)(4)(B) was made for the garment industry in the first place. As was noted in *Employing Lithographers* vs *NLRB* 49 LRRM 2869 (5th CCA), the broad exemption for the garment industry was granted to protect an industry that was peculiarly subject to poor working conditions—involving a sweat shop industry, complete with very low wages and substandard working conditions. The construction and building industry, on the other hand, today has the highest paid workers who generally work in the best possible conditions for construction work in the world. There is simply no economic basis to justify the same treatment at this point for the construction and building industry.

It has been suggested that equal treatment should be accorded to the construction and building unions as exists for industrial unions. Circumstances just are not the same.

For example, there may be more than one union in an industrial plant, not necessarily affiliated, but only one employer dealing with all of the unions.

On a construction site, there may be many employers and any one of these employers, by disputing with his employees, could cause a shut down of the entire project, leaving no recourse to the other employers or their employees.

It is respectfully submitted that Section 8(b)(4) is already receiving too much abuse by the use of Informational Pickets. The net effect of H.R. 3500 would be to completely nullify the rights guaranteed to individual workers under Section 7 of the National Labor Relations Act, as amended to bargain collectively through representatives of their own choosing, denying each and every one their human rights.

We seek no advantage over other unions in the construction industry. We plead that this Congress not approve any Bill that will, either directly or indirectly deprive the construction workers of their legal right to select a union of their own choice. We urge Congress to protect good and valid collective-bargaining agreements from the abuses of Situs Picketing. Quality can not be retained or restored by a monopoly.

Of equal importance to the Congress of Independent Unions objection is the fact that the proposed Situs Picketing Bill will provide a tailor-made alibi for denying *human rights* to the millions of workers whose color keeps them in the lower economic levels of our society. If the Situs Picketing Legislation proposed by H.R. 3500 becomes the law of the land, thousands of employees in the construction industry will lose the protection of Section 8(b)(4)(i) and (i)(B) of the Act if they happen to be of the "wrong" color or "wrong" union.

We are sure that the Congress does not intend to give only members of one (1) particular union affiliation the exclusive right to work on all construction projects. This bit of legislation would, in effect, give A.F.L.–C.I.O. the right to close down by picketing all construction jobs not hiring 100% members of its affiliates.

CONGRESS OF INDEPENDENT UNIONS,
TRUMAN DAVIS, *National President.*

Mr. GRASSLEY. Mr. Speaker, will the gentleman yield?

Mr. RUDD. I will gladly yield to the distinguished gentleman from Iowa.

Mr. GRASSLEY. I thank the gentleman for yielding.

Mr. Speaker, it would be hard for me nor would I try, to improve upon the words of the gentleman from California complimenting the gentleman from Arizona on his leadership in this area. I would only echo those remarks and say "Amen" to them and thank him for what he has done.

Additionally, I would like to say on this issue that speaking as a former labor union member, a member of the International Union of Machinists, I do not believe that we should have common situs picketing. I believe in the right not to belong to a union. I believe that the right to work for a contractor on a job with union members is a basic American freedom that we ought to protect.

We have a responsibility in this Congress to protect those freedoms. The freedoms guaranteed by the first amendment to the U.S. Constitution should not be infringed upon or undone by legislative action as comprehended by H.R. 4250.

Really what we are talking about here in satisfying the insatiable thirst of a few labor union leaders to require that everybody belong to a union, or that only union members can work on a construction site, or that only nonunion members totally might be allowed to work on a construction site because there can be no intermingling, is an attempt to turn this land of the free into the land of the fee. That is what is very basic to this issue.

There are just some people in this country—and I am sorry that we have those few people—who somehow believe that in order to work for a living one ought to have to pay for that privilege. I do not know what is any more un-American—I cannot think of anything

more un-American—than to have such an economic sanction tied to the freedom to feed ourselves and our families.

Mr. Speaker, the common situs picketing bill (H.R. 4250) which we are to consider tomorrow has been described by the New York Times as "uncommonly bad." This characterization is most appropriate and well-deserved.

A recent public opinion poll indicates that a majority of the American people are opposed to the passage of H.R. 4250. That survey, released last Thursday, shows that fully 77 percent of our citizens, as well as 64 percent of union members, do not want the National Labor Relations Act changed to permit secondary boycotts at construction sites. I do not believe that we in the House of Representatives should follow a policy of legislating by public opinion surveys. Nonetheless, the fact remains that if Congress approves this measure it will be, once again, disregarding the will of the American people.

My primary reason for speaking today is to voice my concern with the provisions of title I of H.R. 4250. As I said earlier, the statutory language would legalize secondary boycotts in the construction industry. As you know, this practice was specifically outlawed by the Taft-Hartley Act as being an unfair labor practice.

The object of a secondary boycott is to exert pressure upon innocent third parties who are neutral to the primary dispute. Those persons who are put out of work by a secondary boycott will then use their influence and power in order to force a settlement—presumably on terms advantageous to the initial strikers. In a sense, these innocent third parties, which would include union and nonunion employees alike, will become pawns in a chess game the outcome of which is of no direct importance. They will be caught in the crossfire and suffer accordingly.

This legislation will allow a single union, which may represent only a few of the employees at a construction location, to expand its picketing activity so as to shut down an entire jobsite. This awesome power would have an incredibly destructive effect on the construction industry and, I beileve, our Nation as a whole. It is difficult to comprehend why anyone would vote for a bill which would undermine the protection of the individual worker which the National Labor Relations Act was intended to provide. Yet, we are told that the prospects for passage of H.R. 4250 are extremely good.

The backers of common situs picketing have admitted that the expanded powers sought here are to aid in organizing the construction industry. With this tool, a union can shut down an entire construction site in order to see that nonunion employees are removed from the job. It would allow "top down" organization by forcing neutral third parties to influence employers to accept a union which employees previously may have rejected by secret ballot. Common situs picketing would be a disaster for small businesses and minority contractors. The polarization of the construction industry into union and nonunion camps would follow as night does day. A worker's freedom of choice would become a thing of the past.

The proponents of common situs argue that H.R. 4250 does nothing more than insure that craft and industrial workers will receive equal treatment. This assertion is patently false. H.R. 4250 will make construction workers, who already enjoy higher wages than industrial employees—and perhaps not coincidentally a higher rate of unemployment—more equal than others. This reminds me of George Orwell's Animal Farm where the law was—

> All animals are equal, but some are more equal than others.

A brief review of the provisions of the bill we are talking about here today leads one to the inescapable conclusion that its terms are unfair and inequitable. I agree with the statement of Senator Robert Taft in 1947, made during the consideration of amendments to the Labor Management Relations Act when he said:

> There is no reason that I can see why we should make it lawful for persons to incite workers to strike when they are perfectly satisfied with their conditions. . . . On that basis there can be a chain reaction that will tie up the entire United States in a series of sympathetic strikes.

Let me conclude by saying that I am pleased to participate in this discussion on common situs picketing. I hope that we are not just whistling in the dark on this matter here today.

Mr. RUDD. The remarks of the gentleman from Iowa mark him as the statesman that he truly is. He is a statesman pointing out that freedom to choose is a basic ingredient of our system of Government, and a basic factor which has made our country great.

Mr. EDWARDS of Oklahoma. Mr. Speaker, will the gentleman yield?

Mr. RUDD. I yield to the gentleman from Oklahoma.

Mr. EDWARDS of Oklahoma. I thank the gentleman for yielding.

I would like to comment that with the remarks the gentleman from Arizona has made and the contributions from others who have had colloquy with him, I believe the gentleman has made a very good record preceding a vote on this issue.

There were two other points that I think ought to be inserted here for consideration. The first is that this bill H.R. 4250 will come to the floor with a major flaw, a major flaw other than the philosophy which is a flaw in itself, and that flaw is that even though this is a common situs picketing bill, nowhere in the bill is there a definition of what a common situs is, which alone I think is enough to cause one to vote against the bill.

The second thing which concerns me greatly because it has been so largely ignored in the debate over this bill is that a provision in H.R. 4250 in effect wipes out insofar as construction union picketing is concerned all those previous prohibitions against what have been unfair labor practices—coercion, harassment, mass picketing, violence, and the like—and not enough attention has been given here in the committee, during the hearings in the subcommittee, or in the discussion of the Members themselves about the fact that this is a significant and very detrimental step in labor relations in this country.

I thank the gentleman for yielding.

Mr. RUDD. I appreciate the points the gentleman has made.

Mr. TRIBLE. Mr. Speaker, will the gentleman yield?

Mr. RUDD. I yield to the gentleman from Virginia (Mr. TRIBLE).

Mr. TRIBLE. Mr. Speaker, I rise in opposition to H.R. 4250, a bill to permit common situs picketing in the construction trade unions. This bill would exempt the building and construction trade unions from the secondary boycott provisions of the National Labor Relations Act.

Common situs picketing is at odds with the primary purpose of the National Labor Relations Act. H.R. 4250 will not promote "orderly and peaceful" procedures for the resolution of labor disputes. Instead, the bill could disrupt the construction industry and the economy.

Proponents of this bill argue that the construction and building unions should be accorded the same treatment as industrial unions. This argument, however, misses a fundamental point—construction and industrial businesses are substantially different. For example, in an industrial plant, there may be more than one union but there is only one employer. On a construction site, there may be many employers and many unions. If this bill is enacted, any one of the employers could shut down the work of the others by disputing with his employees. This is not possible in an industrial setting where an employer affects only his own output when he has a labor dispute.

H.R. 4250 would also destroy the rights of innocent employees and employers to be shielded from disputes in which they are not involved. In the process, workers would lose wages, builders would lose profits, and the public would have to pay higher prices.

Moreover, this bill would discourage equal opportunity employment. Employers in the construction industry will be forced to hire employees from trade union halls. These same trade unions have traditionally resisted opening their membership to minority group members. Many States and the Federal Government are holding up construction money because trade unions have refused to comply with rulings of the Equal Opportunity Commission. This situation will only get worse if secondary boycotts are permitted.

Finally, this bill violates the freedom of choice of individual employees to select a bargaining agent, or choose not to do so. If this bill becomes law, all contractors and subcontractors could be subjected to secondary organizational picketing and, consequently, unionization without free choice by employees.

Mr. Speaker, I urge the defeat of H.R.

4250 as an unnecessary and discriminatory piece of special interest legislation.

Mr. RUDD. I thank the gentleman from Virginia.

TRIBUTE TO THE HONORABLE FRANCES PAYNE BOLTON, MEMBER OF CONGRESS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio (Mr. VANIK) is recognized for 60 minutes.

Mr. VANIK. Mr. Speaker, I want to pay high tribute to our former colleague, Frances Payne Bolton, who died on March 9 in Ohio.

She was a remarkable woman—a person of many interests and backgrounds, a person who brought much to the House of Representatives.

Although she came from comfortable circumstances, Frances Payne Bolton came to understand and appreciate the burdens of all Americans. She applied this appreciation to her work in Washington, and continued to work for the public's interest even after she left the House.

An excellent article about Congresswoman Bolton was written for the Washington Post by Edward A. O'Neill. I would like to include it with my remarks for the benefit of my colleagues. The article follows:

FORMER REPRESENTATIVE FRANCES BOLTON, IN CONGRESS 29 YEARS, DIES

(By Edward A. O'Neill)

Former Rep. Frances Payne Bolton, (R-Ohio), a Standard Oil heiress who became one of the hardest working members of Congress during her tenure of nearly 29 years, died Wednesday at her home in Lyndhurst, Ohio. She was 91.

Only one woman member of Congress served longer than she—Rep. Edith Nourse Rogers (D-Mass.), who died in 1960, just after she had been nominated for her 19th two-year term.

Mrs. Bolton was defeated in 1968 when she attempted at the age of 83 to win her 15th consecutive term, by Rep. Charles A. Vanik, a Democrat, who challenged her after a shifting of district boundaries.

Marquis Childs in a column in The Washington Post in 1946, when Mrs. Bolton had been in the House for nine years, characterized her this way: "She knows that a conservative is not someone who merely says no in a loud and angry voice. A conservative must know how to conserve, which does not mean standing in the way of all change."

There was an eclectic quality about this very rich woman from Cleveland who more than did her job in the legislative halls. She made herself an expert on Africa. She traveled, with the help of her own considerable resources, for hundreds of thousands of miles to see what the world was like.

She could be called the "mother" of the Army Nurse Corps because of efforts she made as a civilian during World War I. She interested herself personally and financially in such diverse activities as control of veneral disease, extra-sensory perception, medical education for blacks, basic English, the illegitimate children of American soldiers overseas and African art. At 65, she could and did dance the polka with her Slavic constituents.

She asked no special perquisites as a woman in Congress, but was frequently critical of her male colleagues. During the civil rights debates in the 1960s, she said on the floor of the House, while trying to get a federal ban against discrimination against women: "Your bones harden long before our bones do. We live longer and have more endurance."

She told the National Press Club in 1965, "The Lord after creating the world, put a man in charge. He messed everything up, so the Lord turned everything over to a woman, and He gave her everything He had given man, plus two more things: pain, so that she would understand what creation is, and laughter, so that she could stand that the man."

Mrs. Bolton, after her 1968 defeat, returned to Cleveland but kept an office in Washington as a base from which to operate the many interests she kept in this area, including the Mount Vernon Ladies Association, which maintains the George Washington estate.

She was president of the Accokeek Foundation, and for it bought more than 400 acres of land across the Potomac from Mount Vernon to protect it from development and preserve the view. The tract and other land has been designated as Piscataway Park, under federal auspices, but has not yet been developed.

Mrs. Bolton retained her home on Wyoming Avenue NW near the French Embassy, and used it during her visits here, which might have been as often as four times, a year. She also kept houses in Maine and Palm Beach, Fla., where her father was one of the first people to build a winter vacation home.

Born Frances Payne Bingham on March 29, 1885, she was reared in the style of the newly wealthy society of industrial Cleveland, and in a climate of high-level Republican politics. Her father, Charles W. Bingham, banker and industrialist, was a close friend of William McKinley, Mark Hanna and William Howard Taft.

However, one of her grandfathers, Henry B. Payne, was a Democrat who represented Ohio both as a representative and a senator. One of his sons, Oliver Hazard Payne, was an early associate of John D. Rockefeller, Sr., in the formation of the Standard Oil Company. Mrs. Bolton inherited a fortune from this uncle, among whose other heirs was her cousin, Payne Whitney, the New York financier.

Mrs. Bolton attended private school in Cleveland, then Miss Spence's in New York where the daughters of wealthy families living west of the Alleghenies were sent for eastern "finishing." She later studied voice at the Mannes School of Music in New York, and for a time, was said to have considered a singing career.

But she went back to Cleveland, made her debut, and joined a debutante club called the Brownies, which engaged in various good works. Unlike most debutantes of her day, Frances Bingham's encounter with the darker side of Cleveland during duties as an assistant to public health nurses left a lasting impression. For the rest of her life, nursing and public health were major preoccupations.

In 1907 she married Chester Castle Bolton, a son of Mark Hanna's business partner.

The Boltons had three sons and a daughter. The infant daughter died a day after birth during the influenza epidemic of 1919. Mrs. Bolton also nearly died in the epidemic.

Her bout with influenza left Mrs. Bolton a near invalid, but she took up yoga exercises and regained her health and energy.

In 1928, her husband ran for Congress as a Republican from Ohio's 22d District, and won. He served in the House until 1939, except for a two-year hiatus when he was beaten during the Roosevelt landslide in 1936.

When her husband died in 1939, Mrs. Bolton successfully ran in a special election to replace him in the House.

When Mrs. Bolton was elected to Congress in 1939, she was "vaguely isolationist," as one writer described her. She voted the conventional Republican line of those days—against President Franklin D. Roosevelt's "billions for defense" legislation, Lend-Lease, and other measures. With the coming of Pearl Harbor, like other Republicans', her views changed.

The first significant piece of successful legislation she sponsored was the Bolton Act, which established the U.S. Cadet Nurse Corps. More than 124,000 nurses were trained under the act, and nurses in uniform began receiving pay comparable to that of male officers.

Mrs. Bolton's Cleveland area district became the most populous in the nation, having more than 900,000 people after World War II. In 1952, it was divided and her son Oliver P., ran for election as a Republican in the new district. According to one biographical sketch. Mrs. Bolton asked her son if there was anything she could do to help him in his campaign. His reply was, "Sure there is—stay the hell out of my district." He was elected.

The only mother-son combination to serve simultaneously in Congress, they differed many times in their votes. Oliver Bolton suffered a heart attack in 1956, and left the Congress. He died in 1972.

Mrs. Bolton is survived by a son, Kenyon Castle Bolton, of Cleveland, eight grandchildren and four great-grandchildren.

Mr. LATTA. Mr. Speaker, I rise to pay tribute to the late Frances Payne Bolton, former Republican Representative from Ohio and one of the most distinguished, innovative, and visionary women ever to serve in the U.S. Congress.

Born into a wealthy industrial family, Frances Bolton dedicated her life to improving the lot of those less fortunate than herself. During nearly three decades in the U.S. Congress, she became a champion of social, hygienic, educational, and industrial programs, pushing through reforms to guarantee equal opportunities for all Americans, and encouraging similar initiatives around the world.

Through the Bolton Act, this distinguished Ohioan prodded Congress to establish a $5 million U.S. Cadet Nurse Corps which trained 124,000 nurses. Those nurses, in return for their training served in the Armed Forces or in essential civilian positions, and proved to be an invaluable resource to American forces during World War II. Though Mrs. Bolton, a widow and mother of four children, was ahead of her time in urging fair treatment for women, she was also concerned that traditionally female domains be opened to men, who gained access to the military nurse corps through her efforts.

As ranking Republican on the House Foreign Affairs Committee, Frances Bolton was extremely active in international affairs, and among many of her "firsts" was the first woman appointed as a congressional delegate to the United Nations General Assembly. In 1955, she was the first Congresswoman ever to head a

mission abroad, and soon afterwards was a U.S. delegate to the British-American Parliamentary Conference. At different times she also served as an alternate delegate to the 1966 NATO Parliamentary Conference in Paris, a U.S. delegate to the Ghana Independence ceremonies, and a U.S. delegate to the 1966 Council of Europe in Strasbourg, France. Chairman of the House Subcommittees on the Mideast and Africa, Mrs. Bolton played a crucial role in promoting black educational and social projects in both America and Africa, and in 1965 was honored by an award from Operation Crossroads Africa.

The wife of the late U.S. Congressman Chester Castle Bolton, Frances Bolton originally joined the ranks of Congress to fill the unexpired term of her late husband, but because of her own outstanding initiative, talent, and leadership was elected to 14 full congressional terms. Serving from 1940 through 1969, she was half of the first mother-son team in Congress, with her son, Oliver Payne Bolton, elected as a Representative from Cleveland from 1953 through 1957, and from 1963 through 1965.

It was my great privilege to serve with Frances Payne Bolton as a member of the Ohio delegation to the U.S. Congress, and it is a great pleasure today to pay tribute to her as a fine legislator who spanned social, geographical, and ethnic barriers to become an inspiration far beyond her very grateful and proud State of Ohio.

Mr. HARSHA. Mr. Speaker, it was with great personal regret that I learned of the death of Frances P. Bolton. Mrs. Bolton was an extraordinary person and one of Ohio's most respected and admired daughters.

Upon her election to the House of Representatives to succeed her late husband, she became the first woman to serve our State in this body. During her 14 terms in office, she was almost an institution in the House. She was the epitome of honor, talent, dedication, and ability. She set a standard of personal integrity and accomplishments that would be difficult for anyone to emulate.

While many of her achievements were in the field of health, she was perhaps best known for her influence in the area of foreign relations. As a member of the House Foreign Affairs Committee for 28 years and ranking minority member of the committee for 6 years, she was deeply committed to bipartisanship in foreign relations and demonstrated an early interest and expertise in African affairs. She was the first woman Member of Congress to serve as a delegate to the United Nations General Assembly or to head a mission abroad.

It was a source of pleasure to me to know and serve with Mrs. Bolton, and those of us who had this privilege recall her honesty and compassion and remember her with great affection and respect. The Bolton family has long dedicated itself to public service, and I am confident this tradition will not end with Mrs. Bolton's passing.

I wish to join with my colleagues here in the House in expressing my deepest sympathy and extending my condolences to the family of this great and gallant lady.

Mr. BROWN of Ohio. Mr. Speaker, it was with a great amount of sadness that I learned of the death of our former colleague from Ohio, Mrs. Frances P. Bolton. I would like to join my colleagues today in a heartfelt tribute to her memory.

Mrs. Bolton's distinguished record of service in Congress for 29 years is well known to all of us. She was elected to succeed her late husband, Chester C. Bolton, in a special election during the 76th Congress, when my late father. Clarence J. Brown, Sr., was serving his first term.

She and dad served together for many years as members of the Ohio Republican delegation. Mrs. Bolton was the ranking minority member of the Foreign Affairs Committee while dad was the ranking minority member of the Rules and Government Operations Committees.

I also had the honor of serving with Mrs. Bolton for several years after I came to Congress. It was then that I learned to appreciate her great dignity, her sense of humor, and her positive leadership. One anecdote tells much about this effective Congressman—and she always referred to herself as a Congressman. It seems a number of her male colleagues in shirtsleeves were perspiring over legislative draftsmanship and experiencing some frustration. One of them, in his annoyance, turned the air blue with his language during the discussion of a matter at issue. When he suddenly remembered Mrs. Bolton's presence, he stopped and apologized profusely. Unruffled, Mrs. Bolton responded:

"Oh, never mind me. After all, I'm just one of the boys; but now that we've let off our steam, let's get down to hammering out the legislation."

On another occasion, I experienced Mrs. Bolton's perspective on things first hand. I had been agonizing personally over how to vote on a difficult issue. My male colleagues had cajoled and argued with me one way and another until I was uncomfortable in my own indecision. Then I saw Mrs. Bolton heading toward me. When she came up with her imposing stance and called me "CLARENCE." I knew I was in trouble.

"CLARENCE," she said, "I've been meaning to talk to you."

"Not you, too, Mrs. Bolton. I've been lobbied by everybody."

"Not about this," she said. "I always felt free to criticize your father, and I feel I have a right to tell you when I think you are doing something wrong."

I conceded that prerogative to her and asked her what she wanted to say.

She drew herself up and said, "It is not proper for a Member of Congress to chew gum on the floor of the House."

Had she asked me to do so, I would have spit my gum out in her hand then and there. She was an effective teacher in small things as well as great matters. While we did not always agree, we always enjoyed each other's confidence and respect.

Mr. Speaker, Joyce joins me in extending sympathy to Mrs. Bolton's son, Mr. Kenyon Bolton of Cleveland, her eight grandchildren, and four great grandchildren. Mrs. Bolton's strong character and devoted service will be greatly missed.

I was honored to be asked by the family to serve as an honorary pallbearer at the service for her conducted at the historic Old Stone Presbyterian Church in downtown Cleveland, where she was a member, by its pastor, Rev. Raymond Lewis, in whose consideration for the pastoral post he has held for 20 years she had played a significant part. I could not help on that occasion but recall that Mrs. Bolton had escorted me down the aisle to the well of the House when I was first sworn into the Congress in January 1966.

As the senior member of our Ohio delegation in Congress, she was sought out for advice by me on many occasions. One such question of mine related to the problem all Members have from time to time their own consciences. I raised this issue with Mrs. Bolton once and was told:

A good Member of Congress votes both his conscience and the views of his constituents.

Thinking age might have interfered with her understanding of my question, I tried to explain:

No, Mrs. Bolton, I mean how should a Member vote when his conscience tells him one thing, but his constituents want him to vote the other way.

Mrs. Bolton drew herself up to her best matronly and congressional stature and said:

Clarence, if your conscience and your constituency conflict too often, you had better start looking for another line of work.

Mrs. Bolton never had to look for another line of work. She represented her constituency with faithfulness while standing tall for the beliefs she held most dear. She was best known for her enduring interest in the continent of Africa and nurse training. But Mrs. Bolton also was a force in the struggle for women's and minority rights. She was also instrumental in preserving Piscataway Park across the Potomac River from Mount Vernon.

Mr. Speaker, at this time I would like to insert in the RECORD two articles which properly summarize the contributions Mrs. Bolton made to her country and the world in her life of public service.

[From the Cleveland Plain Dealer, Mar. 13, 1977]

FRANCES BOLTON EULOGIZED FOR A LIFE OF SELFLESS SERVICE

Former Rep. Frances Payne Bolton, matriarch of one of Ohio's most prominent families, was eulogized yesterday as a woman who loved her church, her country and the people she represented in Congress for 29 years.

About 600 persons—business leaders, politicians and family friends—gathered at Old Stone Church in downtown Cleveland for Mrs. Bolton's funeral. She died Wednesday

at her home in Lyndhurst at the age of 91, following a five week illness.

As the rain fell, she was buried in Lake View Cemetery next to her husband, Chester C., who died in 1939 while in the middle of his fifth term in Congress.

Mrs. Bolton, a Republican in the family tradition, was elected to succeed him and continued to represent the 22d Congressional District until 1968, when she was defeated by Rep. Charles A. Vanik, D-22.

Her sons, Oliver P., who also served in Congress, and Charles B., also are buried in Lake View Cemetery.

The services were conducted for Mrs. Bolton by her pastor at Old Stone Church, the Rev. Lewis F. Raymond, whom she was responsible in bringing here from Chicago in 1957.

Each of us is less for her not being with us, the Rev. Mr. Raymond said, adding that Mrs. Bolton led an exemplary life.

Former President Gerald R. Ford, who served with her in Congress for 20 years, was unable to attend the funeral but sent a telegram, which was read by the Rev. Mr. Raymond. The former president was an honorary pallbearer.

Ford called Mrs. Bolton "a woman of high intellect, deep compassion, and with unexcelled devotion to her country."

"Her life was as rich and fulfilling as it was long, and by touching so many people with her goodness, her legacy of healing and selfless service will endure through time," Ford said. "We mourn her death but we are very thankful for her life."

The crowd that started filling the church 90 minutes before the services began was testimony also to the respect and admiration felt for Mrs. Bolton. But their praise was silent, not spoken.

Mrs. Bolton's coffin was draped with an American flag. An 11-man honor guard of representatives of the U.S. Army, Navy, Marines, Air Force and Coast Guard alternated standing at attention next to her casket. Five hundred white roses were arranged behind the coffin. Floral arrangements dotted the altar.

Eighty members of the Bolton family, led by her only surviving child, her son, Kenyon, occupied the front pews. Relatives came from Cleveland, Boston, New York and Washington, D.C.

The 54-minute service opened with the choir singing, "My Country 'Tis of Thee."

Present were 37 honorary pallbearers. They included Gov. James A. Rhodes; former Sen. Robert Taft, Jr., former Sen. Margaret Chase Smith of Maine;

Former Reps. Walter Judd of Minnesota and Charles E. Chamberlain of Michigan; Rep. J. William Stanton, R-11, of Painesville, and Rep. Clarence J. Brown Jr., R-7, of Urbana, and former GOP national chairman Ray C. Bliss.

Also, H. Chapman Rose, senior partner in the firm of Jones, Day, Reavis & Pogue, and Janette MacPhail, dean of the Frances Payne Bolton School of Nursing at Case Western Reserve University.

[From the Washington Post, Mar. 11, 1977]

FORMER REP. FRANCES BOLTON, IN CONGRESS 29 YEARS, DIES

(By Edward A. O'Neill)

Former Rep. Frances Payne Bolton (R-Ohio), a Standard Oil heiress who became one of the hardest working members of Congress during her tenure of nearly 29 years, died Wednesday at her home in Lyndhurst, Ohio. She was 91.

Only one woman member of Congress served longer than she—Rep. Edith Nourse Rogers (D-Mass.), who died in 1960, just after she had been nominated for her 19th two-year term.

Mrs. Bolton was defeated in 1968 when she attempted at the age of 83 to win her 15th consecutive term, by Rep. Charles A. Vanik, a Democrat, who challenged her after a shifting of district boundaries.

Marquis Childs in a column in The Washington Post in 1946, when Mrs. Bolton had been in the House for nine years, characterized her this way: "She knows that a conservative is not someone who merely says no in a loud and angry voice. A conservative must know how to conserve, which does not mean standing in the way of all change."

There was an eclectic quality about this very rich woman from Cleveland who more than did her job in the legislative halls. She made herself an expert on Africa. She traveled, with the help of her own considerable resources, for hundreds of thousands of miles to see what the world was like.

She could be called the "mother" of the Army Nurse Corps because of efforts she made as a civilian during World War I. She interested herself personally and financially in such diverse activities as control of venereal disease, extra-sensory perception, medical education for blacks, basic English, the illegitimate children of American soldiers overseas and African art. At 65, she could and did dance the polka with her Slavic constituents.

She asked no special perquisites as a woman in Congress, but was frequently critical of her male colleagues. During the civil rights debates in the 1960s, she said on the floor of the House, while trying to get a federal ban against discrimination against women: "Your bones harden long before our bones do. We live longer and have more endurance."

She told the National Press Club in 1965, "The Lord after creating the world, put a man in charge. He messed everything up, so the Lord turned everything over to a woman, and He gave her everything He had given man, plus two more things: pain, so that she would undertand what creation is, and laughter, so that she could stand that and the man."

Mrs. Bolton, after her 1968 defeat, returned to Cleveland but kept an office in Washington as a base from which to operate the many interests she kept in this area, including the Mount Vernon Ladies Association, which maintains the George Washington estate.

She was president of the Accokeek Foundation, and for it bought more than 400 acres of land across the Potomac from Mount Vernon to protect it from development and preserve the view. The tract and other land has been designated as Piscataway Park, under federal auspices, but has not yet been developed.

Mrs. Bolton retained her home on Wyoming Avenue NW near the French Embassy, and used it during her visits here, which might have been as often as four times a year. She also kept houses in Maine and Palm Beach, Fla., where her father was one of the first people to build a winter vacation home.

Born Frances Payne Bingham on March 29, 1885, she was reared in the style of the newly wealthy society of industrial Cleveland, and in a climate of high-level Republican politics. Her father, Charles W. Bingham, banker and industrialist, was a close friend of William McKinley, Mark Hanna and William Howard Taft.

However, one of her grandfathers, Henry B. Payne, was a Democrat who represented Ohio both as a representative and a senator. One of his sons, Oliver Hazard Payne, was an early associate of John D. Rockefeller Sr., in the formation of the Standard Oil Company. Mrs. Bolton inherited a fortune from this uncle, among whose other heirs was her cousin, Payne Whitney, the New York financier.

Mrs. Bolton attended private school in Cleveland, then Miss Spence's in New York where the daughters of wealthy families living west of the Alleghenies were sent for eastern "finishing." She later studied voice at the Mannes School of Music in New York, and for a time, was said to have considered a singing career.

But she went back to Cleveland, made her debut, and joined a debutante club called the Brownies, which engaged in various good works. Unlike most debutantes of her day, Francies Bingham's encounter with the darker side of Cleveland during duties as an assistant to public health nurses left a lasting impression. For the rest of her life, nursing and public health were major preoccupations.

In 1907 she married Chester Castle Bolton, a son of Mark Hanna's business partner.

The Boltons had three sons and a daughter. The infant daughter died a day after her birth during the influenza epidemic in 1919. Mrs. Bolton also nearly died in the epidemic.

Her bout with influenza left Mrs. Bolton a near invalid, but she took up yoga exercises and regained her health and energy.

In 1928, her husband ran for Congress as a Republican from Ohio's 22d District, and won. He served in the House until 1939, except for a two-year hiatus when he was beaten during the Roosevelt landslide in 1936.

When her husband died in 1939, Mrs. Bolton successfully ran in a special election to replace him in the House.

When Mrs. Bolton was elected to Congress in 1939, she was "vaguely isolationist," as one writer described her. She voted the conventional Republican line of those days—against President Franklin D. Roosevelt's "billions for defense" legislation, Lend-Lease, and other measures. With the coming of Pearl Harbor, like other Republicans', her views changed.

The first significant piece of successful legislation she sponsored was the Bolton Act, which established the U.S. Cadet Nurse Corps. More than 124,000 nurses were trained under the act, and nurses in uniform began receiving pay comparable to that of male officers.

Mrs. Bolton's Cleveland area district became the most populous in the nation, having more than 900,000 people after World War II. In 1952, it was divided, and her son, Oliver P., ran for election as a Republican in the new district. According to one biographical sketch, Mrs. Bolton asked her son if there was anything she could do to help him in his campaign. His reply was, "Sure there is—stay the hell out of my district," He was elected.

The only mother-son combination to serve simultaneously in Congress, they differed many times in their votes. Oliver Bolton suffered a heart attack in 1956, and left the Congress. He died in 1972.

Mrs. Bolton is survived by a son, Kenyon Castle Bolton, of Cleveland, eight grandchildren and four great-grandchildren.

Mr. RHODES. Mr. Speaker, I join my colleagues in the Congress in expressing our sadness at the death of a former Member, Frances Bolton, who served with great distinction in this body for nearly three decades.

Frances Bolton was a grand lady. She came to Congress at an age when many consider retirement. She was a force for good, a compassionate and determined fighter for women's rights and any cause she considered worthwhile and just. Frances Bolton was a constructive conservative and an ardent conservationist. The Nation will forever benefit from her work in preservation of the scenic grandeur of the Mount Vernon shoreline.

She sponsored and fought through

Congress U.S. Cadet Nurse Corps legislation, which has produced more than 124,000 trained nurses.

She was widely traveled, broadly informed and intensely interested in helping humanity. It was my privilege to have served with Mrs. Bolton during many of the years she graced the Congress.

Unique in the annals of the House with simultaneous service by Frances Bolton and her son, Oliver, who served three terms in the House, they represented contiguous congressional districts in Cleveland. The late Oliver Bolton and I were in the same freshman class in Congress. He and his wife Adie became very close friends of mine, and my wife Betty.

Frances Bolton was a unique spirit in the House, a woman of great charm and warmth. She served the 22d District of Ohio with distinction for 29 years. The House of Representatives is the richer for the years she spent among us.

Mr. McCLORY. Mr. Speaker, the report of the passing of our former colleague, Representative Frances Bolton of Ohio, recalls her long and illustrious career in the U.S. House of Representatives terminating in 1968.

Mr. Speaker, I regard it as a great privilege to have known Frances Bolton and to have served with her in this body for 5 of the 30 years during which she represented so ably her Ohio Congressional District.

Mr. Speaker, Frances Bolton is part of an illustrious American family which has given honorable and distinguished service to the State of Ohio and to the Nation. Frances Bolton's many activities in addition to her congressional service included her leadership of the Mount Vernon Ladies Association in which she served as vice regent since 1938—having general control and administration of George Washington's historic home at Mount Vernon.

Mr. Speaker, I am privileged to take part in this ceremony honoring Representative Frances Bolton and to express my respect for her useful life and illustrious career. In addition, Mr. Speaker, I express my sympathy to members of her family who survive.

Mr. KINDNESS. Mr. Speaker, those of us who have only spent a few years in the House of Representatives are somewhat limited in fully understanding and appreciating the 29-year tenure of Mrs. Frances Payne Bolton who passed away on March 9, 1977. In Ohio, the lady whose interest in the developing African Continent caused some to call her the "African Queen," whose grace and bearing, coupled with her generosity, caused some to call her the "Richest Woman in Congress," has been a folk hero for many years. But folk images do not always provide for the most appropriate appreciation of an individual's service.

A young feminist recently alleged that, in her time, Mrs. Bolton would not have been elected to the Congress "if her husband had not died." A serious student of history never devotes much attention to the "ifs." The "ifs" do not account for Mrs. Bolton's countless contributions to this body or to our Nation, both as a Member of Congress and as a private citizen. And, yes, the times have changed—in part because of the life and being of Mrs. Bolton.

We all know that Mrs. Bolton's service has enriched this body, and I speak for most Ohioans when I note that she will be missed.

While Mrs. Bolton's service cannot be described in a few short paragraphs, I would like to call your attention to the following summation of her career which appeared in the New York Times on March 10:

FRANCES PAYNE BOLTON DIES AT 91; MEMBER OF CONGRESS FOR 30 YEARS

CLEVELAND, March 9.—Frances Payne Bolton, a member of Congress for nearly 30 years, the widow of a Congressman and the mother of another one, died early this morning at her home in suburban Lyndhurst.

Mrs. Bolton, who was defeated for reelection in Congress in 1968, had been in ill health for several months. She would have been 92 years old this month.

She served in Congress from 1939, when she succeeded her late husband, Chester C. Bolton, until she was defeated by Representative Charles A. Vanik, a Democrat.

CALLED "AFRICAN QUEEN"

At the time she left Congress Mrs. Bolton was ranking Republican on the House Foreign Affairs Committee and headed a number of its subcommittees, including one on Africa. She had visited many African countries, often at her own expense, and was dubbed "the African Queen" by some Washington reporters because of her interest in that continent.

She was also very interested in the nursing profession. In World War I Mrs. Bolton was instrumental in persuading Newton D. Baker, then Secretary of War, to establish the Army School of Nursing. In World War II, she sponsored the bill creating the Cadet Nurse Corps and later traveled throughout France inspecting hospitals.

The school of nursing at Case Western Reserve University, which she helped establish, is named for her.

RICHEST WOMAN IN CONGRESS

Mrs. Bolton often was described as the richest woman in Congress. She used her money to support a lifetime of public service and philanthropy.

Both her grandfathers, William Bingham and Henry B. Payne, served as members of the Ohio legislature, and Mr. Payne, a Democrat, served for several years as a United States Senator.

In 1953 her youngest son, Oliver T. Bolton, was elected to Congress from a district adjoining her own. They became the first mother-son team ever to serve in Congress. Oliver Bolton did not seek re-election in 1956. He died in 1972.

Mrs. Bolton was born on March 29, 1885, in Cleveland to the banker-industrialist Charles W. Bingham and his wife, Mary Perry Payne Bingham. She was educated at Hathaway Brown School here and at Miss Spence's School for Girls in New York and spent a few years in Europe traveling and studying music. She never attended college, although she eventually received 16 honorary degrees.

In 1907 she was married to Chester C. Bolton, who died in 1939 while a member of Congress.

During her years in Congress Mrs. Bolton served on the House Republican Policy Committee, from 1959 to 1965. She was also the first woman named as a Congressional delegate to the United Nations.

AIDED MT. VERNON

Another philanthropic activity that interested Mrs. Bolton was Mount Vernon, the home of George Washington. She had been Ohio vice regent of the Mount Vernon Ladies Association since 1938 and was president of the Accokeek Foundation Inc., an organization set up to preserve the area around Mount Vernon. She also bought 500 acres of the Mount Vernon overview to protect it from commercialization.

After leaving Congress Mrs. Bolton was appointed to the board of governors of the Middle East Institute. She was a trustee of Lake Erie College in Plainsville, Ohio; Tuskegee Institute in Alabama; Meharry Medical College in Nashville; Capitol Associates; the United States Capitol Historical Society, and the Central School of Practical Nursing in Cleveland.

Mrs. Bolton made her home at Franchester Farms in the Cleveland suburb of Lyndhurst. She also had houses in Palm Beach, Fla., Washington and Prouts Neck, Me.

She is survived by a son, Kenyon C. Bolton, eight grandchildren and three great-grandchildren.

Her oldest son, Charles Bingham Bolton, died March 28, 1976. The school of dentistry at Case Western Reserve University is named in his honor for his contributions to dental science.

Mr. MILLER of Ohio. Mr. Speaker, some who pass through these Halls of Congress in service to their fellow countrymen leave behind their own highly distinctive, personal mark on this body. Such was the lasting contribution made by Frances Payne Bolton.

On the 9th of March Mrs. Bolton departed this world for the eternal reward God always planned for her. To those of us who knew and worked with our former colleague, her loss is profoundly felt. For in Mrs. Bolton we found a unique spirit of boundless energy unbridled by convention yet filled with hope and enthusiasm.

Always strong willed in purpose and independent of mind, Mrs. Bolton did not fit that mold of what was then proper for a woman of her social status to say and do. Unabashedly, she threw herself into politics and refused to be muscled about in what was then a male-dominated world. Through her determination and strength of character, she emerged from the political battles as one of Ohio's most influential Republicans and the Nation's most respected politicians.

Throughout her distinguished career in Congress which spanned three decades, she championed equal rights for women. At times it was a lonely campaign but Mrs. Bolton persevered and succeeded in advancing recognition and opportunities for millions of American women. She blazed a trail and carried a torch when it was not so fashionable to do so. In her outspoken advocacy for women she was perhaps a woman ahead of her time. But time is fast catching up with her pioneer efforts.

Mrs. Bolton's lifelong interest in nursing education and public health is well known. Among her many legislative achievements for the betterment of wom-

en and minors was the Bolton act which created the U.S. cadet nurse corps. Today's nursing profession owes much to her foresight and efforts.

Her interest also in international development led to her appointment to the House Foreign Affairs Committee from where in 1944 she became the first Member to visit a war zone and later visit the Soviet Union. In 1933 she also became the first woman appointed as congressional delegate to the U.N. General Assembly.

Few Members have brought to this House the courage and candor that were distinctly Mrs. Bolton's. She was a real fighter who loved political competition—its intrigue, its nuances. Fiercely partisan, yes, but above all loyal to her own convictions and sense of decency.

She led a rich, full life that was blessed by many rewards chief of which were her children who carried forward that same tenacity and enthusiasm in all they did. Our lives like so many of those she served and fought for are richer because of Frances Bolton. Her memory will always remain with us.

Mrs. Miller and I extend our deepest sympathies to the surviving members of Mrs. Bolton's family, and especially to her son, Kenyon, and to his wife, the former Mary Peters of Lancaster, Ohio. We share their sadness in the passing of this great and dear lady, even as we share their pride in her magnificent life.

At this point, Mr. Speaker, I would like to add the following biographical sketch of Mrs. Bolton as it appears in "A Minority of Members: Women in the U.S. Congress," by Hope Chamberlin:

UNDER NO ILLUSIONS—FRANCES P. BOLTON, REPUBLICAN OF OHIO

About midway in her long congressional career (1940–69) Ohio Republican Frances Bolton was asked by a colleague where she got her even temper, her calm disposition. "Where few want to go," she said. "In hell!"

If the listener was startled, it was probably because he had been conditioned to accept at face value the many glowing word portraits that painted Mrs. Bolton as being free from life's devilish problems. She was ever the "richest woman in Congress." No one mentioned the poor little rich girl.

The world in which Frances Payne Bingham grew up appeared to glitter. It was one of vast liquid assets flowing from oil, coal, iron, and shipping; of distinguished heritage (Robert Treat Paine, signer of the Declaration of Independence, and John Howard Payne, author of "Home Sweet Home"); of society pedigrees and debutante parties. There were winters at an estate in Palm Beach, summers at a country house near Lake Erie, leisurely trips to Europe, education at the best private schools at home and abroad.

Miss Bingham never knew financial hardship, but neither did she know the familial reassurance that a plain-looking, shy young girl needs. Before she reached her 14th birthday the two people who might have bestowed such reassurance—her mother and her oldest brother—died. Her sister Betty, whose outgrown dresses Frances had to wear, enjoyed the role of a sibling who is prettier and older. "Oh, Francie, you can't do anything right!" was a favorite remark of hers, repeated just often enough to instill in an impressionable child feelings of incompetence and insecurity.

Frances's father, Charles William Bingham, for all his admirable qualities, was not the kind of man who could manifest warmth or affection or break with Victorian tradition—even as a new century dawned. His firm principles and brusque, authoritarian discipline ruled life in the family's spacious, well-staffed house on Cleveland's fashionable Euclid Avenue.

Particularly vivid in Frances's memory is the fear that welled up in her one morning during her 19th year when he said, "I want to talk to you in my study after breakfast."

Once they were in that room he asked, "Francie, have you been going about with the visiting nurse?"

"Yes, sir."

"Why did you do it without asking me?"

"Because I knew you would say 'no.'"

"Yes," he said, "I would. But since you have done it, tell me about it."

As a member of the Brownies (a Cleveland debutante club), she explained, she had joined a group effort to aid the public health nurses. She worked five half-days a week, reporting at 8 o'clock in the morning to make the tenement rounds. She did what she was told, mainly removing tattered clothing from small children and bathing them with soap and Lysol.

Father Bingham did not give permission for her to continue the work, nor did he flatly say that she must end something she obviously found satisfying. His concluding remark, however, eased somewhat the guilt stemming from having led a double life without telling him. "Now that you have seen how most people in this world have to live, I hope you will never forget it," he said.

She would not. This initiation into the manifold problems of nursing and public health education was to remain a major preoccupation for life.

The marriage of Frances Payne Bingham to Chester Castle Bolton in 1907, when she was 22 and he 25, followed an engagement of the socially prescribed length. It was not in the old-fashioned sense either a prearranged union or a marriage of convenience, but simply a wedding of peers. He was a neighbor, Harvard-educated, the industrial son of Mark Hanna's business partner, and someone she had known as long as she could remember. Tragedy was to test their union; so was the monetary imbalance resulting from a wife's having more money than her husband (she inherited millions from her uncle Oliver Hazard Payne). Meanwhile a world war intervened.

Before Frances Bolton moved with three young sons to Washington, where Captain Bolton's talent had been drafted by the War Industries Board, she had begun in earnest to channel her abundant energy toward upgrading the nursing profession. Her first public speeches were delivered when she was a member of the board of Cleveland's Lakeside Hospital. She spared no details in describing why "our custodians of health should not be treated as domestic servants," and she invited listeners to tour the attic rooms where nurses were required to live. "All I hope is you go up and see for yourselves," she said, "and I defy you to sleep well afterwards."

In the national interest she was instrumental in convincing the Secretary of War and fellow Clevelander, Newton D. Baker, to establish the Army School of Nursing. This master stroke—accomplished despite persuasive arguments by Red Cross officials that volunteers had already been trained to care for the wounded and were only waiting for permission to sail to France—required all the patience, grit, and articulation that Frances Bolton could command. At one point she thwarted bureaucratic delaying tactics by announcing in Baker's outer office that she would not leave until he signed the activation order.

Influenzal pneumonia, after the birth of her only daughter (who lived but one day), nearly snuffed out Mrs. Bolton's life in 1919. She credits the discipline of yoga with restoring her health and enabling her to cope later, when her oldest son, 18-year-old Charles, broke his neck in a diving accident and in the agonizing years immediately afterward when she helped him regain the use of one set of paralyzed muscles, then another.

Attention to Charles's progress did not permit Mrs. Bolton actively to join her husband's campaign for Congress in 1928, but, once the transition had been made to a new home on Wyoming Avenue in Northwest Washington, she did not neglect the formal social duties then required of a congressman's wife. And from a desk in the Bolton library she continued to supervise the Payne Fund, which she had established with her uncle Oliver's gift. This philanthropy enabled her to attack at the grassroots some of the problems that cried out for remedy, not relief. Foremost was education for nurses. Toward its improvement she gave $1.5 million in stock certificates to Western Reserve University to establish a school of nursing. Systematic contributions also launched the National Committee for the Study of Juvenile Reading; an observation post in Switzerland (she called it her "window to the world") where, among other things, a perspective on narcotics traffic could be obtained; and research centers to appraise such diverse phenomena as radio communication (at Ohio State University) and parapsychology (at Duke University).

In 1936, when the GOP carried only Maine and Vermont, Chester Bolton lost the 22d District. While he laid the groundwork for his comeback, his wife tended to the party's renaissance as a member of the Ohio State Republican Committee and as vice-chairman of the national GOP assembly making a comprehensive survey of party policies.

From outside the range of political floodlights, she was suddenly and dramatically placed in front of them the day in October 1939 when Chester Bolton died. Not all local party leaders wanted a widow as their representative in Congress, and some accepted her candidacy only when her supporters suggested that she probably would get tired of the job in a few months and go on to other things. Those same protestors were undoubtedly swayed by being reminded that it had been a Bolton check for $125,000 that had assured Cleveland the Republican National Convention in 1936.

If the backing she received from the party hierarchy was less than unanimous, Frances Bolton was to have the satisfaction of a sweeping popular victory. In the special February 1940 election she easily won the right to succeed her husband, defeating by an almost 2-to-1 margin Democrat Anthony A. Fleger, a lawyer and former mayor of Parma. It did not hurt her popularity when she announced that she would return to the U.S. Treasury the $10,000 pension that Congress had voted to grant all widows of congressmen. "Under the circumstances," she wrote, "this would be excessive."

The freshman representative from Ohio enlarged the House female contingent in the 76th Congress to six—two of whom, Mary Norton and Edith Rogers, were in their 15th years of continuous service. What they and the male assemblage saw in 54-year-old Frances Bolton was a youngish-looking, rather short, sprightly woman with a trim, very erect figure. A Florida tan set off the brilliant blue of her eyes. There was determination in the set of her firm chin, and the promise of affability in her quick smile. The mature Mrs. Bolton bore no resemblance to the not very pretty, insecure Miss Bingham.

The district Frances Bolton represented was, in a way, a political family heirloom,

won in 1874 by her maternal grandfather, Henry B. Payne, a Democrat who later went to the Senate. Rated according to population it was the largest in the country: over 700,000 (and to grow to nearly 1 million before reapportionment based on the 1950 census reduced it to a more manageable 350,000). Primarily metropolitan, it had a sizable proportion of shipping and factory workers, a high percentage of foreign-born, some farmers, and all of the wealthy residents of several posh Cleveland suburbs.

As war clouds darkened over Europe and debates over U.S. neutrality lengthened in Congress, the way she cast her votes reflected the vaguely isolationist mood characterizing both her own frame of mind and that of most of her constituents. She reluctantly supported the controversial draft bill (peacetime conscription had never before been tried in the United States), having succumbed to the argument that a show of U.S. strength would discourage an aggressor. But later she said "No" to Roosevelt's "billion dollars for defense" and to the lend-lease plan that would entitle Russia, as well as the Western European allies, to receive war material from the United States.

Not long before the Japanese attack on Pearl Harbor in December 1941, she gradually moved toward a preparedness stand, while not forsaking her hope that an alternative to war could be found. This shift in ideology was due partly to the conclusions she reached after "seeking out and facing the facts" as a member of the Foreign Affairs Committee and partly to the insight she gained from two longtime GOP members, John Vorys of Ohio and Charles Eaton of New Jersey, staunch proponents of armed might. Then, too, her two youngest sons, Kenyon and Oliver, were in the army. She spoke for them, she said at a later date, when she told House members to "stop their bickering [over parities, subsidies, and crop penalties] and get on with defeating the Axis."

The first building blocks in Frances Bolton's legislative career were measures to advance the nursing profession. Nowhere in Congress did nurses have a more determined and effective tribune. The focus of her wartime activity was recruitment—an extension of the battle she had fought a quarter of a century earlier in Newton Baker's anteroom. The $5 million Bolton Act creating a U.S. Cadet Nurse Corps gave the country more than 124,000 women trained through grants covering their tuition, fees, uniforms, maintenance, and pocket money in return for a pledge to serve in the armed forces or essential civilian posts until at least six months after the end of hostilities. From this departure point she secured passage of a bill giving nurses in uniform a pay scale identical to that of male officers.

At a time when segregation was practiced by the U.S. military, Frances Bolton insisted that Negro nurses "be given full opportunity to prove themselves." Her concern for this minority led her to accept a place on the advisory councils of Alabama's Tuskegee Institute and Meharry Medical College in Tennessee.

As a champion of equal rights, she did not believe in distinctions between the sexes "either in their privileges and opportunities or in their duties." During the cold war she openly advocated that women be drafted: "I am afraid that gallantry is sorely out of date, and as a woman I find it rather stupid. . . . Women's place includes defending the home." In the sixties she sponsored an equal-rights-for-men bill: It authorized the U.S. Army and the U.S. Navy to commission male nurses.

Curious by nature, she was never altogether satisfied with her performance in Congress until she had collected facts firsthand. She became a peripatetic congressman (the title "congresswoman" was anathema to her), traveling hundreds of thousands of miles during World War II and afterward on all sorts of missions and sometimes under frustrating circumstances.

To inspect American hospitals in England in 1944 she had to coax British authorities to let her board a BOAC plane, because the U.S. Army Air Force was forbidden to carry civilians. For her tour in France she borrowed a nurse's uniform to comply with the military ban against civilian clothes. After the Iron Curtain was lowered and Secretary of State Dean Acheson told her it would be impossible to obtain a visa from the Soviet Union, she called on Russian Ambassador Andrei Gromyko—and became the first member of the Foreign Affairs Committee ever to set foot on Russian soil.

The African survey she proposed at age 71 turned into a solo fact-finding mission. Members of the Subcommittee on Africa said they could not remain away from their offices for three months. Taxpayers could not be expected to pay for a trip by a committee of one—even if it was the chairman. Out came her checkbook. She assembled a team consisting of a Defense Department transportation officer, a Signal Corps photographer, and a physician from the Mayo Clinic. Aboard commercial planes, trains, boats, and various other types of carriers she traveled 20,000 miles to study schools, hospitals, and mission stations in 24 countries south and east of the Sahara. On her return in 1955 she said:

"We Westerners have gone over there somewhat ruthlessly to get rather than to give. Now we must turn in a different direction. We must make it come from our hearts. . . . Nor shall we be doing all the giving, for Africa has much to give. There is a quality in the African that the world needs: there is rare adaptability, a capacity of quick comprehension, an eagerness and a hunger to learn, to know, to do, that is both stimulating and challenging."

Taking up the challenge, she gave a young girl from Kenya the wherewithal to graduate from a U.S. medical school, funded a Nigerian boy's education, and became a founding member of the Women's Committee of the African-American Institute. Her public support of independence for African nations—both as a delegate to the United Nations and as a member of Congress—is replete with empathetic advice about schools and health facilities. Her personal and political commitment did not go without recognition from Africans. President Diroi Hamani of Niger called her the "godmother of Africa."

Washington critics of Representative Bolton's foreign affairs work, while giving her high grades for effort and effervescence, claimed that many of her impromptu utterances were flawed by sweeping partisan overstatements ("The President [Truman] is to blame for failing to keep our agreements and for turning to vacillation and appeasement in Europe") and that her more formal pronouncements were marred by equally sweeping generalities ("Africa is the land of the future where 200 million people can move, if we and they will it so, from the oxcart to the atomic age in one splendid leap").

This was one side of the story. There was another. It was on Frances Bolton's recommendation that the Committee on Foreign Affairs consented to streamline some of its antiqutated machinery. Five permanent subcommittees were established, each specializing in geographical areas of which there were counterparts in the State Department. The information she gathered in Russia and its satellite countries provided the basis for three scholarly reports focusing on the dangers the United States could expect from worldwide Communist expansion. Among the things she spelled out was the need for American leadership in the Republic of Korea: "This country will fall into hands that will make the world a very unsafe place for us." On June 27, 1950, the North Koreans invaded the South, and President Truman ordered U.S. military forces to return their fire.

If by paying so much attention to international affairs Frances Bolton gave her constituents a clear and vulnerable target at which to shoot, she also gave them a performance easier to admire than to fault. Clevelanders were intrigued by a woman who could escape an elephant charge in the Congo, dine with Saudi Arabia's King Ibn Saud and his harem, convince Russian U.N. Ambassador Andrei Vishinsky to use his influence to bring to the United States the teenage sons of a Romanian couple in exile, exchange gifts with the Queen Mother of Ruanda-Urundi, host the American visit of the Angel of Dienbienphu, and ease taut tempers in the course of an angry committee dispute with the improbable question "Mr. Chairman, wouldn't it be a good idea if we all got up and sang?"

There were other reasons Ohioans repeatedly sent Frances Bolton back to Washington while sometimes putting a Democrat in the State Capitol or in the Senate. She faithfully apprised them of important congressional goings-on through a regular newsletter, she answered all mail promptly, and she planned her office schedule in such a way as to permit time for conversation with constituents. That she had the money to increase her staff in Washington and in Cleveland and suburban Mayfield beyond the number paid for by Congress was more of a boon to the folks at home than to their representative. The efficiency of her well-paid aides could be counted on for anything from tickets to the Cherry Blossom Festival to letters of recommendation for a job.

Frances Bolton's campaign philosophy and routine also helped cement constituency support. She never spent more than the law allowed. She drove her own moderately priced sedan whenever she made the rounds in Cleveland, almost never turned down a bid to speak, and reveled in an opportunity to shake hands or dance the polka. In 1952, when her bid for a seventh term received more than usual national attention because her 36-year-old son, Oliver, was running in the 11th Ohio District, her hectic schedule that began at 6 a.m. and ended after 10 p.m. exhausted many cameramen and reporters.

As the only mother-son team ever to serve concurrently in Congress, the Boltons frequently captured headlines, especially when they proved her pre-election statement that Oliver was "no carbon copy" and split their first House vote, or when perennial rumors of a Bolton dynasty surfaced and had to be denied—even as Oliver, recovering from a heart attack in 1956, announced he would not seek re-election.

"I'll miss having my grandchildren nearby," she said of the news. There may also have been a small sigh of relief, for this was the son who, when she asked him if there was anything he would like her to do during his campaign, replied, "Sure there is—just keep the hell out of my district!"

Redistricting posed some serious problems for Frances Bolton in the 1960s, and she worried about them—just as she did about each election. Not one to prolong tension, however, she consoled herself with the fact that she was in a better position than ever

to exercise power and influence. The "Dean of Congresswomen" title had passed to her from Edith Nourse Rogers. She was the ranking minority member of the Foreign Affairs Committee and chairman of the Republican side of the Ohio delegation. At her handsome Wyoming Avenue home she entertained the great and near great. There, amid antique furnishings and oil paintings of Yankee ancestors, an evening would begin with cocktails and end with the hostess's saying to departing guests, "Thank you. You've given me a lovely time, asking me to talk about myself all evening."

It had always been Mrs. Bolton's contention that all women—especially those in Congress—had to work twice as hard as men for everything they accomplished. "The Lord, after creating the world, put a man in charge of it," she told the Women's National Press Club in 1965. "He messed everything up, so the Lord turned everything over to a woman, and He gave her everything He had given man, plus two more things: pain, so she would understand what creation is, and laughter, so that she could stand that and the man."

In the course of the marathon civil rights debate in the 1960s she fought to include women in the federal ban against discrimination. Directing her remarks to the males in the House, she said, "Your bones harden long before our bones do. We live longer, have more endurance." It was one argument no congressman dared refute: The debater was a still-sprightly octogenarian.

Under no illusions that her age would not be an issue in the 1968 congressional contest, Representative Bolton, nevertheless, entered the race with optimism. To her opponent, 55-year-old Charles A. Vanik, a seven-term Democratic congressman, she addressed the warning that he would not "have an easy time of it running against what he likes to call 'a nice old lady.'"

She was right, but even the till-death-do-us-part loyalty of thousands of her constituents could not overcome what gerrymandering had done. The 22d District had been turned largely into an extension of the city of Cleveland, with all the city's problems.

After a redrawing of the boundaries of the 22d, Vanik chose to leave his old (and also altered) adjacent district to challenge Representative Bolton, bringing with him a band of devoted helpers—including many young people who had been in the cheering section of Presidential-hopeful Eugene McCarthy. Vanik never referred to Frances Bolton's age but it became an issue when a *Cleveland Press* endorsement pointed out that he was "in the prime of life."

Frances Bolton, looking 20 years younger than her 83 years, gave the fight everything she had. The stakes were high: If the GOP gained control of Congress, she could become chairman of the House Foreign Affairs Committee.

When a reporter asked her how much she was counting on a sweep of Ohio by Richard Nixon, she replied crisply, "Not much." Of third party candidate George Wallace, she said, "What on earth is Wallace going to do to us? That's the thing that terrifies both Democrats and Republicans."

Her campaign manager, Don Gropp, figured that some Wallace voters would go for Frances Bolton because "she's more conservative than Vanik." That comparison was clearly true, but, owing to a shift in population and some gerrymandering, the district had become overwhelmingly Democratic. Liberal Vanik won the 22d.

"No, I don't want to be named an ambassador," she said after losing her bid for a 15th consecutive term. "I'm retired. Now I can do what I please."

Ms. OAKAR. Mr. Speaker, I had previously paid tribute to Mrs. Bolton, but I would like to join my fellow colleagues of the Ohio delegation in tribute to a gallant lady. I have long been an admirer of Mrs. Bolton, who came to the Congress just before I was born. She is well known for her accomplishments in the field of foreign affairs. She authored the Bolton bill which created the U.S. Cadet Nurse Corps during World War II. She also introduced and pushed for legislation that would allow male nurses to obtain commissions for performing nursing, a role that was traditionally viewed as women's work. She had wide-ranging interests, and was a firm believer in equal treatment for men and women.

As the second woman from Ohio to become a Member of Congress, I salute the first Congresswoman from Ohio. Her dedication and hard work set an example for all of us.

GENERAL LEAVE

Mr. JEFFORDS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the subject of the special order of Mr. VANIK relative to the late Honorable Mrs. Frances P. Bolton, a former Member of the House.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Vermont?

There was no objection.

DOUBLE STANDARD FOREIGN POLICY DEALINGS LAYING A TRAP

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Louisiana (Mr. WAGGONNER) is recognized for 15 minutes.

Mr. WAGGONNER. Mr. Speaker, Communist influence in Africa has skyrocketed at such an alarming rate that it now endangers American defense and economic interests there. We are laying our own trap in southern Africa, and we are irresponsibly walking into it.

While we are floundering, changing direction and wondering what our policies ought to be, the Russians and their Communist allies are vigorously pressing for their goal of domination of all Africa.

Their primary objective, however, is control of southern Africa with its rich deposits of strategic minerals and its geographically important sea-lanes around the Cape of Good Hope.

With control of the minerals of southern Africa and the supply route for oil around the cape, the economies of our allies in Western Europe and Japan, as well as our own economy, would be virtually in the hands of the Russians.

In my opinion, we are playing right into their trap with ill-conceived and downright dangerous foreign policy actions.

Make no mistake about it, the Cubans are supplying the manpower, but the Russians are directing the offensive strategy to overrun southern Africa.

Conservative intelligence estimates place the number of Cuban troops scattered throughout Africa as high as 22,000, including some 6,000 infantry soldiers.

The Cuban presence in Angola and Mozambique have been well documented, but Cuban advisors, instructors, technicians, and fighting troops are entrenched in at least eight other African countries. They now control virtually every aspect of life in the conquered territory of Angola, backed up by a KGB-supervised intelligence network.

It is nothing short of outrageous that liberal doubletalk about human rights and majority rule is being used to justify abandoning legitimate U.S. interests in southern Africa.

Linking our foreign-policy decisions to human rights may be an admirable thing to do if the proponents are sincere in improving human rights. But when we examine how this policy is being carried out, it becomes obvious that a double standard is being applied.

Human rights, of a necessity, must be a legitimate concern and goal of every nation. But I would hasten to point out that the United States, having already recognized that it cannot be the world's policeman, must also recognize that it cannot be the world's priest.

For instance, the economic sanctions against Rhodesia are based upon that government's alleged refusal to recognize human and political rights of the majority of its population. Yet, the principal alternative supplier of chrome is the Soviet Union, which is one of the world's worst violators of human rights. But when an amendment to prohibit the importation of chrome from any country that violated the United Nation's Human Rights Accord was offered to the bill to reinstitute the ban on Rhodesian chrome the House soundly defeated it.

What about human rights in Uganda, Mozambique, Angola, Tanzania, Burundi, or any of a half-dozen other African dictatorships which have murdered literally hundreds of thousands of their citizens who opposed them? Do these people not have human rights too? Are we to recognize Vietnam and ignore their trampling of human rights and mass murder?

Our foreign policy—if it can even be considered a policy at all—has been riddled with inconsistent and arbitrarily applied double standards.

As a result, our once staunch allies lack the confidence in the U.S. Government that they once had. We are literally driving them away. Brazil, one of our strongest allies in South America for many years, reportedly plans to deal with the Soviets for arms supplies because of U.S. criticism about its internal affairs. We have alienated Argentina, Chile, and Uruguay with the same heavy-handed tactics.

The Communists have also made deep inroads among our Western European allies of France, Italy, Spain, and Portugal. We cannot expect to get cozy with the Communists and still expect our friends to blindly accept the discrimination and antagonism we have shown toward them.

Our foreign policy, first and foremost, must be to protect our own vital interests, and the interests of our allies abroad. Without a firm, vigorous foreign policy that follows this aim, the United States cannot withstand the global assault the Soviets continue to mount.

"EQUAL PROTECTION UNDER THE LAW"

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. CRANE) is recognized for 30 minutes.

Mr. CRANE. Mr. Speaker, with the coming of spring and the early stirrings of committee activity, it is readily apparent that labor legislation will loom large in the first session of the 95th Congress. In the next few days and weeks, common situs picketing legislation is to be considered by both the House and Senate and, if it passes, we are likely to see attempts to increase the minimum wage, to reform the National Labor Relations Act, to apply the provisions of the National Labor Relations Act to State and local governments, to subject Federal employees to the requirements of a union shop and, perhaps, to repeal State right-to-work laws. What remains unexplained, however, is why, in the light of continuing inflation and unemployment, we should be increasing the legislative bias in favor of organized labor instead of framing legislation that will treat labor and management equally, and simultaneously benefit the consumers of this Nation. After all equal rights and equal protection under the law are basic American concepts and all of us, union members included, have a stake as consumers.

A few examples will better illustrate my point. The summer before last, the Teamsters Union simultaneously struck no less than 28 different companies which owned and operated all 76 canneries in the State of California. The subsequent cannery shutdown, coming as it did at the height of the growing season, caused not only the canning companies to lose upward of $1 million a day, but the fruit and vegetable growers who were not involved in the labor dispute to lose four times that amount as their crops rotted on the vine. One third of the California apricot harvest, 14 percent of the peach crop, 5 percent of the pear crop, and 2½ percent of the processing tomato output spoiled. This development, combined with the 28 percent wage increase that the Teamsters finally won, contributed to an estimated 2 to 3 cents a can increase in the cost of these items at checkout counters around the country.

A second example occurred in Philadelphia a few years earlier. In this instance, the Carpenters Union negotiated an agreement with contractors not to install prefabricated doors on construction sites. By a close 5 to 4 decision, the Supreme Court ruled in National Woodwork Manufacturers Association against NLRB, that the carpenters were within their rights because work preservation was involved not as the minority on the court claimed, a product boycott of the type prohibited by section 8e of the Taft-Hartley Act. As a consequence, plumbers now refuse to handle plastic pipe, glaziers refuse to handle prefabricated window walls and painters refuse to use brushes over 4 inches wide—all of which discriminates against uninvolved parties and drives up the cost of construction for the American public.

Yet another example involves the Amalgamated Meat Cutter and Butcher Workmen's Union and its dealing with many of the Nation's supermarkets. It turns out that, in a number of cities, the meat cutters have effectively prevented supermarket managers from selling over-the-counter what is known as boxed beef—beef that has been cut, vacuum packed and shipped ready-for-sale by the packer. As a consequence, some 33 million Americans do not have the choice of buying this type of beef, a choice which could save them anywhere from $180 million to $325 million each year.

Ironically, the effects of monopolistic activity on the part of unions not only contribute significantly to higher prices but frequently cost rank and file union members their jobs. It is axiomatic that when one union, through industry-wide bargaining, can set wage scales for an entire industry at a level higher than that warranted by productivity, it reduces the number of people that can profitably be employed in that industry. An excellent example comes once again from the supermarket industry.

Ten years ago, almost all stores in the Baltimore-Washington area had full time cashiers. Because the companies cannot afford such high labor costs, they are employing more cashiers part time, meaning that cashiers frequently get no more money and fewer benefits than they would have a decade ago. In fact, primary benefits are more time off, less chance for advancement, and a greater prospect of losing one's job to automation.

Before going further, it should also be noted that if an individual company were allowed to corner the product market and fix prices the way a single union can fix wages through industrywide bargaining, not only would the officers of that company be in deep legal trouble but the public would be outraged. The American public would never tolerate General Motors being the sole distributor of cars, or United States Steel being the only producer of steel, or Gulf Oil being the only marketer of petroleum. Yet, too little is said about the fact that all employees of auto manufacturers belong to the United Auto Workers, all steel workers belong to the United Steelworkers, and all supermarket cashiers in the Baltimore-Washington area belong to the Retail Clerks International Association.

Similarly, what would happen if representatives of the fast food industry sat down together and decided that "Big Macs" would be sold only in the East, Kentucky Fried Chicken would be available only in the South, "Whoppers" would be sold exclusively in the Midwest, and "Superchefs" could only be purchased in the Far West. Undoubtedly there would be a terrible hue and cry everytime somebody West wanted some of Colonel Sanders finest or someone in the Midwest had a "Big Mac attack." Yet, there is little protest—vocal or otherwise—when the unions sit down and decide amongst themselves what their respective jurisdictions will be within the labor market. In fact, last week's agreement between the United Farm Workers and the Teamsters, which gave the former jurisdiction over California field workers and the latter control over the same canneries that were struck 2 years back, is an excellent example of union allocation at work. As Dr. Sylvester Petro of Wake Forest University School of Law pointed out while commenting on the AFL–CIO's no-raiding principle:

> If any business group were to so openly dictate the choices of consumers, it would be prosecuted by sundry Federal agencies and hailed before one or another, of perhaps many Congressional committees.

The public would, likewise, be justifiably upset if a firm were permitted to tell its customers that, since preservation of business depended upon it, they would henceforth be unable to make any purchases if they did any business with a competing firm. Under antitrust law, this would be called exclusive dealing and is illegal. However, a construction union may, as we have seen, choose not to install prefabricated doors or plastic pipe, in the name of work preservation, and there is little public outcry even though the union is engaging in a similar attempt to restrain trade.

Moreover, nothing has been done—despite rather extensive coverage on CBS's 60 minutes—about the ability of one maritime union—the Maritime Engineering Beneficial Association—to enforce preferential—if not exclusive—hiring of employees trained in a school operated by the union president. If that were not enough, those effectively blacklisted from jobs are the very same people the U.S. taxpayers have specifically trained to learn the maritime trade—the graduates of the U.S. Merchant Marine Academy. To create a comparable situation, one would have to imagine the U.S. Army being commanded by men and women trained at a union run officers school rather than at our military academies, OCS, or an ROTC program. One must wonder if this scenario is not the real reason behind union interest in organizing the military.

Speaking of blacklisting, an analogous situation would exist if employers opted to notify one another of employees' labor union activities and agreed not to hire those labeled as prolabor troublemakers. The result would be that workers would be kept from their trade just as surely as certain products are kept from the market or Merchant Marine Academy graduates are kept out of the maritime workforce. For just that reason, blacklisting by employers was declared to be an unfair labor practice in the National Labor Relations Act.

Reason and justice dictate that rather than granting the construction trades

unions an exemption to the current prohibition against secondary boycotts—to go along with the exemption they presently enjoy from the prohibitions against hot cargo clauses—we should be drafting labor legislation that would treat everyone the same insofar as the antitrust laws are concerned. Just as management should have the right to organize and operate a business in competition with other businesses, so should labor representatives have the right to organize and operate labor unions within the context of the free enterprise system. But, just as management should not be able to enjoy special privileges by operating in a monopolistic fashion, neither should organized labor by operating in restraint of trade. Ideally, the best situation would be one in which comparable bargaining units dealt with one another knowing in advance that colluding to fix wages industrywide would be as illegal as colluding to fix prices in the marketplace.

To accomplish these objectives, I am introducing today a bill which will end the labor union exemption, presently provided for in section 6 of the Clayton Act of 1914, from the provisions of the Sherman Antitrust Act. In addition, the bill would remove the prohibition on the issuance of injunctions against labor unions in cases where Sherman Act violations are involved, and it would make participation in hot cargo agreements and secondary boycotts a crime. However, the measure would not affect rights specifically granted to organized labor under the Nation's labor laws; it would simply eliminate special privileges and exemptions that would otherwise be considered antitrust violations.

The question then arises—what practices presently engaged in legally by labor unions would be prohibited under this bill if it were to be enacted? This is not easy to answer for the Sherman Act itself does not specifically delineate violations, leaving it to the courts to judge what circumstances might constitute a "conspiracy in restraint of trade." However, just as a body of case law has developed with respect to violations of the antitrust laws by corporations, so too would it develop with respect to labor unions. Looking at earlier court decisions, it is likely that such practices as industrywide bargaining, coordinated bargaining, secondary picketing, product boycotts, and jurisdictional strikes would be outlawed by this bill. In addition, the construction and garment industries would no longer be permitted to utilize "hot cargo" agreements and these agreements, as well as secondary boycotts, would become crimes—punishable by a $1 million fine a 3-year jail term or both—instead of unfair labor practices as they are currently. Certainly, termination of all these practices would not be inconsistent with the intent of this legislation.

On the other hand, it would seem, again consistent with legislative intent, that passage of this bill would not affect labor's right to organize, to bargain collectively, and to strike; or its ability to mandate exclusive representation or require compulsory membership. All these things are provided for in either the National Labor Relations Act, the Taft-Hartley Act, or the Landrum-Griffin Act; with the exception of the provisions dealing with secondary boycotts and hot cargo clauses these acts would not be affected.

While I personally believe that the first amendment guarantees of "freedom of association" strongly suggest that the compulsory union membership provision of the Taft-Hartley Act should be replaced by a right-to-work clause, I would be the first to argue that this is not the vehicle for accomplishing that end. Such a reform should be taken up separately, as an amendment to labor rather than antitrust legislation, where its merits or demerits could be argued in their proper context. I have introduced such legislation, and hope that it too will someday pass, but it should be reiterated again, for the benefit of those who might have reservations about this legislation, that the right-to-work issue is separate and distinct from equal treatment under the antitrust laws and should not be a factor in the consideration of the latter.

Lest it be thought that enactment of the legislation I am proposing today be considered a radical departure from American legal tradition, let me point out that English common law, from which our system of jurisprudence is derived, made it clear that it was an offense for both employers to combine to fix prices and employees to combine to fix wages. This concept carried over into American law, manifesting itself in the passage of the Sherman Antitrust Act; within 4 years of its enactment, the courts began applying its provisions to both labor and management. It was only after vehement protests by the fledging labor movement that the labor union exemption was written in to the Clayton Act in 1914.

Looking back in history, that Clayton Act exemption made far more sense then than it does today. Prior to the Civil War, blacklisting and yellow-dog contracts—whereby an employee agrees not to join a union—were frequently used by management to discourage unionization and in 19 instances during the period 1806–1842, various courts found people involved in union organizing activity guilty of conspiracy. It was not until after the Civil War and the lowering of the Industrial Revolution that unionism achieved any real support. Even then, the road was rocky. The Knights of Labor, founded in 1869, died within 20 years and it was not until 1886 that the A.F. of L. got its start. So, at the time of the Sherman Act and shortly thereafter there was some truth to the statement that the balance of power in labor-management relations was tilted in favor of management.

Now, however, such is no longer the case and there is much to suggest the converse is true. With the passage of the Norris-La Guardia Act and the National Labor Relations Act, organized labor acquired a bill of rights to go along with their antitrust exemption. Although the latter has never been interpreted as total, subsequent judicial attempts to balance the competitive thrust of the antitrust laws with the noncompetitive tendencies of labor law gave the unions ever more room to operate. Partially as a result, strikes reached an all time high during the critical World War II year of 1944 which, in turn, led to heightened postwar concern about labor union abuses. The Taft-Hartley Act and the Landrum-Griffin Act were both manifestations of this concern, as was the more recent decision, incorporated into the Federal Campaign Practices Act of 1974—part of which has since been ruled unconstitutional—to limit in-cash and in-kind labor union contributions to political candidates.

The focus of postwar legislation on reforming the labor laws in preference to the antitrust laws should not, however, be construed as a lack of interest in abuses of the latter. In fact, both the House of Representatives, in its original version of the Taft-Hartley Act, and the Justice Department, in a 1955 study, recommended terminating the antitrust exemption for labor unions. Moreover, starting in 1965, with the Pennington and the Jewel Tea cases, the Supreme Court began to define more narrowly the scope of that exemption, a trend which has continued in the Connell Construction Co. against Plumbers Local 100 case—1975—and in NLRB against Enterprise Association of Steam Pipefitters—1977. Given the fact that only 22 percent of the Nation's workforce is unionized and the other 78 percent suffer any time either labor or management can raise prices by restraining trade, these developments are encouraging. The only problem is, narrowing the exemption does not go far enough. It should be eliminated all together.

Putting all these elements together, it seems to me that the legislation I am about to introduce is not only consistent with past legal tradition and the American concept of equal treatment but is more appropriate under the circumstances. It will not prevent unions from organizing, bargaining with, and directly exerting pressure on their employer for better wages and working conditions. What it will do is prevent unions from trying to gain these objectives through restraints on trade which would be illegal if engaged in by the employer trying to achieve his objectives in the marketplace. Ultimately, application of the axiom "what's sauce for the goose is sauce for the gander" will benefit everybody. Employers and employees will be operating on the same terms, innocent third parties will not be adversely affected by disputes in which they are not involved and consumers, union and nonunion alike, will benefit by not being subjected to the inflationary impact of contract settlements based more on economic extortion than economic reality. In short, the Nation as a whole should come out ahead and that is justification enough for what I believe to be a long overdue legislative initiative.

WHALEN SEEKS ONSITE CONSULTATION FUNCTION FOR OSHA

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio (Mr. WHALEN) is recognized for 5 minutes.

Mr. WHALEN. Mr. Speaker, I recently joined as a cosponsor of the Sarasin-Steiger bill, H.R. 1327, which provides for onsite consultation by agents of the Occupational Safety and Health Administration.

Virtually identical legislation was considered and passed by the House last year, but died in the Senate. I believe that onsite consultation would be a welcome improvement in the OSHA laws—it will be of benefit to both employers and employees—and I hope we will see prompt action this year on H.R. 1327.

Very briefly, the Sarasin-Steiger bill provides:

First upon the request of the employer, OSHA shall send an agent to the workplace for purposes of consultation and advice regarding compliance with OSHA requirements. Priority shall be given to small businesses and to firms which are engaged in especially hazardous lines of work. After the visitation, the employer will receive a written report from OSHA.

Second, the consultative visit shall not be considered as an inspection or investigation. However, the employer will be responsible for correcting within a reasonable time any imminent, serious danger that is discovered.

Third, except in the case of imminent and serious dangers, the findings of a consultative visit will be kept isolated from OSHA enforcement activities. Under the provisions of H.R. 1327, OSHA consultative and enforcement personnel will operate separately.

Fourth, additional funds are made available to OSHA for the purpose of carrying out this new consultative program.

Under the present law, the Occupational Safety and Health Administration can perform no functions other than promulgating and enforcing worker safety regulations. OSHA is currently prohibited from providing advisory services to employers.

I believe this is a mistake. The small businessman wants to be in compliance with OSHA regulations. Yet because he does not have the technical expertise that is available to most large companies, he often does not know or understand how to conform to OSHA requirements.

It seems to me that we should make provision for the small business operator who sincerely wants to assure the safety of his workplace, but who cannot afford private consultation. And it seems to me that OSHA's responsibilities should be expanded to include such advisory services in addition to its present enforcement role.

The basic idea behind the OSHA laws is to help protect the safety and health of American workers. We can better realize this worthy goal by allowing OSHA to go into business establishments, when invited, to give advice on how to bring such workplaces into full and voluntary conformity with Federal standards.

The present system, properly, is designed to detect and penalize violations of OSHA standards. But it does not necessarily facilitate the identification and correction of problems in uninspected ships. H.R. 1327 would correct this defect and I commend its authors, RON SARASIN and BILL STEIGER, for their simple and logical solution. I am happy to serve as a cosponsor of this legislation and I urge our colleagues to join us in seeking its passage.

HARASSMENT OF SOVIET JEWS AND OTHER MINORITIES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Virginia (Mr. FISHER) is recognized for 5 minutes.

Mr. FISHER. Mr. Speaker, as a sponsor of House Concurrent Resolution 97, I wanted to briefly comment on the situation which prompted the House to formulate this expression of concern about the harassment of Soviet Jews and other minorities.

A primary purpose of the 1975 Helsinki accord was to establish common guidelines among signatory nations to guarantee the human rights of their citizens. These fundamental principles include the right of individuals to travel for professional and personal reasons, unrestricted working conditions for professional journalists, scholars, scientists and others, and fundamental religious liberties, especially for minority groups.

The Soviet Union has persistently violated the terms of the accord through its treatment of Soviet Jews and other minorities. A major concern is the denial of exit visas to Soviet Jews who wish to emigrate to Israel. Numerous cases of harassment and imprisonment of these individuals have been brought to the attention of U.S. officials, including Members of Congress, especially through the efforts of the U.S. Conference on Soviet Jewry.

On several ocasions I have written to Soviet officials requesting information about Soviet Jews who have been imprisoned or denied exist visas to reunite with their families who have already emigrated to Israel. Although I have never received responses to my inquiries, I have thought it important to make my interest in these situations known. Today, the House has the opportunity to make a formal expression of congressional concern about these ongoing policies of the Soviet Union. I urge my colleagues to unanimously approve this resolution.

CONGRESS SHOULD SPEAK OUT ON VIOLATIONS OF BASIC HUMAN RIGHTS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Montana (Mr. BAUCUS) is recognized for 10 minutes.

Mr. BAUCUS. Mr. Speaker, I welcome this opportunity to speak out on the absence of fundamental human rights in the Soviet Union, a situation which bears most heavily upon the Soviet Jewish population and other dissident minorities.

As evidenced by Secretary General Brezhnev's comments yesterday concerning American interest in the internal situation in the Soviet Union, we are now certain that our voices are being heard. I am proud to say that the Congress has been very vocal in its protests on behalf of those who suffer from a lack of fundamental rights, not only in the Soviet Union, but anywhere in the world where this type of injustice occurs.

Recently I have joined with some of my colleagues in sponsoring a Soviet Jewish family which is being forcibly detained. This same project last year may have helped influence the Soviet powers, as a full 17 percent of the sponsored families were given permission to emigrate.

In addition, I have supported measures addressing contraventions of the Helsinki accords in the Soviet Union, and the denial of human rights of certain Cuban and Argentinian prisoners.

Congress cannot and should not sit by and watch injustice around the world without speaking out in hopes that our voices will be heard and heeded. I am proud to say that I have joined with my colleagues and addressed violations of basic human rights, and only hope that a time will come in the near future when this will no longer be necessary.

CURBING SHOE IMPORTS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Massachusetts (Mr. BURKE) is recognized for 5 minutes.

Mr. BURKE of Massachusetts. Mr. Speaker, the Boston Globe in an editorial carried in its Thursday paper, has made a convincing case for curbing shoe imports. The paper contends that such an action by President Carter does not portend a stiffening of trade barriers or a revival of protectionalism, rather, a need to rationally assess the impact of trade policies on domestic employment; as the Globe points out, unemployed workers have no place to go. Employment prospects for unemployed shoe workers are next to nil. A labor-intensive industry employing semiskilled workers or skills which are nontransferable to other occupations, is a special case and should be considered as such.

Mr. Speaker, during consideration of the Trade Reform Act of 1974, much debate centered on the shoe industry and its particular needs. The framers of the 1974 act gave assurances time and time again to concerned Senators and Congressmen that there was a deep concern about the shoe industry's future. I would encourage everyone to go back and read the debate in the Senate at that time. Over and over again the view was expressed that the industry could expect relief under the "liberalized provisions" of the bill. Indeed, the distinguished

chairman of the Senate Finance Committee, RUSSELL LONG, in response to questioning by Senator MUSKIE states:

It is our guess that if the shoe industry would seek relief under the terms of this Act, chances are 90 out of 100 that it would get relief.

Mr. Speaker, this was the intent and understanding of the Congress when it passed the Trade Act. I contend that promises were made to this industry at the time, but promises are all they have gotten; it is time for action.

The Boston Globe editorial follows:

[From the Boston Globe, Mar. 17, 1977]

CURBING SHOE IMPORTS

Many of the congressional representatives pressing the Carter Administration for increased tariffs on imported shoes are generally free-traders. But, conceding their vulnerability to charges of hypocrisy and political self-interest, they make a persuasive case.

In theory, the weight of the argument is all on the side of liberalized trade policies. The elimination of artificial trade barriers will give free-market forces full rein. Production activities will naturally shift to those countries where a particular product can be manufactured most cheaply and, therefore, most profitably. As a result, employment in those countries will be stimulated and inflation will be curbed.

All that is very fine when the domestic workers displaced by an influx of foreign manufacturers can, after a reasonable transition period, find new jobs. But that is not the case with the nation's or this state's shoe workers. In the last nine years, as imported shoes have gradually come to supply nearly half the domestic market, 18,000 jobs in Massachusetts have been lost and the state's production of shoes has decreased by 55 percent.

A 1975 study by the Federal Reserve Bank found that Massachusetts shoe industry workers who had lost their jobs in the previous 20 to 56 months had substantial difficulty finding new employment. One-fourth of them had found no work at all; 50 percent had been unable to secure full-time work; and the lucky 25 percent who had found full-time jobs had had to take an average 16 percent cut in pay.

Work in shoe factories requires either few skills or highly specialized skills that are not transferable to other occupations. Two-thirds of the shoe industry's workers are women. On the average they have only nine years of schooling.

Certainly one of the most troubling trends in the American labor market is the growing disparity in job security and wage rates between the dynamic sectors and the more labor-intensive, low-skill occupations. In a reversal of traditional wisdom, an emphasis in formulating our international trade policy might now be on protecting low-skill jobs while continuing to count on innovation to create new jobs in high-technology industries now made vulnerable to foreign competition. Such a distinction would allow President Carter to approve the International Trade Commission's proposed tariff-quota plan for the shoe industry while rejecting the commission's recommendation this week for the imposition of sharply higher tariffs on imported television sets.

At first blush, the timing of the ITC's recommendations—which place major decisions on trade policy before President Carter just weeks before his economic summit in London—seems unfortunate. Yet, if the President acts judiciously, he can assure our trading partners that we generally wish to continue to lower barriers to free trade; and at the same time, he can reassure domestic interests that our defenses won't be abandoned altogether.

VICE PRESIDENT'S STATEMENT ON ELECTORAL REFORM

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New Jersey (Mr. THOMPSON) is recognized for 5 minutes.

Mr. THOMPSON. Mr. Speaker, in connection with the President's comprehensive election reform message to Congress today, I have the privilege of introducing the universal voter registration bill which is the cornerstone of the package. I value the bipartisan cosponsorship as indicated by Mr. CONTE's and Mr. WHALEN's names on the bill. I fully expect there would have been more cosponsors from both sides of the aisle had time permitted more advance consultation.

Vice President MONDALE held a press conference this morning to highlight the President's message. The Speaker, the majority leader, the majority whip, Mr. CONTE, Mr. WHALEN, and I participated in the press conference together with several of our colleagues from the Senate. The Vice President's eloquent opening statement on electoral reform is submitted herewith for the RECORD:

OFFICE OF THE VICE PRESIDENT PRESS RELEASE

WASHINGTON, D.C.—Vice President Walter F. Mondale announced this morning that President Carter is sending a "comprehensive election reform message" to Congress.

At a news conference here, Mondale issued the following statement:

"Today, the President is sending to the Congress a comprehensive election reform message. This message includes a legislative proposal for universal election day voter registration for federal elections with steps to encourage adoption of the same system in state and local elections. This is a concept long advocated by the President. The message also recommends congressional action on a number of other important reforms. Before going into the details of these proposals, I would like to take just a few minutes to discuss our broad objectives in submitting these recommendations.

"President Carter believes that there is nothing more crucial to the success of our democracy than the broadest possible public participation in our political system. The history of our Republic from the earliest days has been the removal of arbitrary and unjustified barriers to citizen participation in elections. As Americans, we reject the notion that our federal leadership should be chosen on the basis of wealth or privilege or special influence. We believe that all citizens, wherever they live, whatever their means, should be able to exercise an equal voice in our election process.

"Unfortunately, the array of confusing and sometimes burdensome registration requirements now prevents many citizens from casting their ballots on election day. Some states have already taken the lead in simplifying these requirements and the results, in terms of increased voter turnout, have been dramatic. We believe the federal government should exercise long-overdue leadership by providing for a simplified system for election day registration in the case of elections to federal office, and by encouraging the states to adopt similar systems to govern state and local elections.

"Legislation is today being submitted to achieve this important objective. This legislation has bipartisan support. It was developed in close cooperation with the Congress.

"On behalf of the President and myself, I want to particularly thank Frank Thompson and Howard Cannon, who will be the principal sponsors of the universal registration bill, and Senators Edward Kennedy and Alan Cranston for their splendid cooperation with us in developing this proposal. Their advice and support as well as that of all the others here have been invaluable.

"Let me explain briefly what this measure would do. The bill would require state and local governments to permit voters to register for federal elections on election day at the polling place. It would provide financial assistance to cover the costs of federal election day registration and to modernize the administration of elections. It also offers an added financial incentive for states to adopt election day registration for state and local elections. It would provide strong criminal penalties to prevent fraudulent registration and voting and federal power, through the Federal Elections Commission, to seek injunctions against patterns of fraud and other violations of the act. State and local officials would continue to administer registration and elections and the act provides as much flexibility as possible to take into account the many differences in such practices among the states.

"Election day registration has already been employed in a number of states and the results have typically been a significant increase in voter participation with no increase in voter fraud. I might point out that Minnesota, which has used election-day registration since 1974, had a turnout in this last election of nearly 72%—the highest in the nation. Over 450,000 Minnesota citizens were registered on election day in 1976, yet not a single charge of fraud was filed.

"In addition, the President is recommending in today's message that the Congress adopt a number of other important reforms. Specifically, he is urging that the Congress take action toward the following goals:

"Adoption of a system of public financing for congressional campaigns;

"Revision of the Presidential public campaign financing system to simply that system and to encourage greater grass roots participation in Presidential campaigns;

"Approval of a constitutional amendment for direct popular election of the President and Vice President; and

"Liberalization of the Hatch Act to permit federal civil servants with proper safeguards to exercise more fully the political rights of citizens in our democracy.

"Adoption of these recommendations would help to curb the influence of special interests in elections to federal office. At the same time, it would help to increase the influence of the people by making it easier for all Americans to vote, and in the case of Presidential elections, by assuring that those votes are counted equally.

"Standing as we are today, on the threshold of America's third century, there is no more important task for us as a nation than to continue the momentum toward a society in which all citizens participate as freely, as fully, and as equally as possible in our democracy."

ESTABLISHMENT OF INTERNATIONAL TREATY TO CONSERVE NORTHERN HEMISPHERE PINNIPEDS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Rhode Island (Mr. ST GERMAIN), is recognized for 5 minutes.

Mr. ST GERMAIN. Mr. Speaker, in the past, the United States has been a leader in the preservation of species that, due to shortsighted overexploitation or unsound harvesting practices, have had their populations reduced to near extinction levels. In proposing House Concurrent Resolution 147, I would like to see this leadership role maintained.

The concurrent resolution calls for the establishment of an international treaty which would bring about the conservation of all Northern Hemisphere pinnipeds—seals, whales and dolphins.

The reduction of the great blue whale population to near extinction levels because of unchecked harvesting is a poignant example of what will eventually happen when there is no international agreement.

At present, another species of pinniped, the harp seal, is in the center of controversy.

Every spring, conservationists and humanitarians are appalled by the violent and ruthless manner in which the baby harp seal is harvested. With club in hand, hunters turn Canada's frozen ice packs red as they collect their pelts. The barbarous manner in which this harvest is carried out is distressing. Equally distressing is that, despite public outcry, the hunt continues.

In 1971, the International Commission for the Northwest Atlantic Fisheries banned seal hunting in the Gulf of St. Lawrence from large vessels and aircraft and set a quota of 150,000 harp seals for the hunt off Newfoundland and Labrador.

This action indicates that the principals involved realize that there is a need to curb the wholesale slaughter of the harp seal. I propose we respond decisively in meeting this need.

I wish to join with my colleague from California, Mr. RYAN, in calling for a halt to the brutal harvesting of these animals, and further, would wish to see an international treaty drawn up to protect this entire genus of animals from unsound and ill-advised practices.

I urge you to lend your support to the halting of the harp seal hunt and the unchecked harvesting of all pinnipeds.

HEARING ON ANTITRUST EXEMPTIONS AND IMMUNITIES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New Jersey (Mr. RODINO) is recognized for 5 minutes.

Mr. RODINO. Mr. Speaker, I wish to announce that the Subcommittee on Monopolies and Commercial Law will hold an initial hearing on Tuesday, March 29, 1977, to inquire into the scope, nature, and effect of our antitrust exemptions and immunities. The hearing will be held in room 2141, Rayburn House Office Building, commencing at 10 a.m.

During the past several years, there has been increasing concern on the part of both the Ford and Carter administrations, and the Congress, over the effect of these immunities on competition. The Federal Trade Commission and the Department of Justice have both raised significant issues through litigation and study, and the courts have eliminated or narrowed some exemptions. Private groups have also raised serious questions of the effect of these exemptions.

This initial hearing will examine the broad range of exempt industries, and provide the groundwork for possible further hearings into specific exemptions.

The witnesses will be representatives from the Bureau of Competition of the Federal Trade Commission and the Antitrust Division of the Department of Justice.

A LONG-TERM AID TO THE NATION'S ECONOMIC WELL-BEING: THE INVESTMENT POLICY ACT OF 1977

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. ROSTENKOWSKI), is recognized for 5 minutes.

Mr. ROSTENKOWSKI. Mr. Speaker, there is no more essential element to this Nation's economic well-being than its investment posture. The surest indicator of a strong economy is the confidence investors show in it by participating in the growth of capital. It is without doubt that our future ability to compete in international markets will depend in large measure on actions taken now. This is why I am today most enthusiastically introducing the Investment Policy Act of 1977.

This act makes it a national policy that the Federal Government, in cooperation with State and local governments, use all practical means consistent with other considerations of national policy to provide sufficient incentives to assure maximum investment in private enterprise in order to increase the production of goods, the providing of services, the employment of workers, the opportunity for profit and the payment of taxes.

The Federal Government is called upon to use all practicable means to improve and coordinate Federal plans, programs and policies to: First, optimize the return from allocation of resources to education and training; Second, provide an environment in which each citizen has the opportunity to achieve his or her full economic potential; Third, assure for the United States' private enterprise effective competitive access to world and domestic markets; fourth, encourage the effective use of advancing technology consistent with the preservation of a health environment; fifth, enjoy quality goods and services produced and provided at reasonable prices to consumers and at profitable price levels resulting from higher productivity; and sixth; create an economic environment in which there will be incentives to invest sufficiently in necessary plant, equipment and working capital.

The Investment Policy Act of 1977 will also require the President to include in his Annual Economic Report to the Congress an investment policy report which shall include information on: First, levels of investment capital available, required, and applied; second, current and foreseeable trends in the levels of investment capital; third, reviews of the economic programs of the Government, and reviews of other economic conditions affecting capital investment in the United States; and fourth, programs for carrying out the policy declared.

The act also specifies that the investment policy report shall be referred to the Committee on Banking, Finance and Urban Affairs of the House of Representatives and the Committee on Banking, Housing, and Urban Affairs of the Senate. Finally, the Council of Economic Advisers will be required to analyze and interpret economic developments and to appraise programs relating to the declared policy of the act.

Mr. Speaker, I strongly urge my colleagues to carefully study the language of this bill, and to support its very worthwhile aims.

VETERANS' ADMINISTRATION JUDICIAL REVIEW

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Colorado (Mr. WIRTH) is recognized for 5 minutes.

Mr. WIRTH. Mr. Speaker, I am introducing legislation today to open the Veterans' Administration to judicial review of adjudicated decisions and to give veterans full access to counseling proceedings before the Veterans' Administration.

This legislation, the Veterans' Administration Judicial Review Act of 1977, will correct some of the peculiarities that make the VA exempt from the rules and regulations that apply to all agencies under the Administrative Procedures Act. Veterans with disability and pension eligibility claims bring most cases before the VA appeals board. This three-member internal board hands down the final decision on claims. There is no other recourse—no outside review by our Federal courts.

This bill would open the final decisions of the appeals board to judicial review, the same as for all Federal agencies. In addition, this bill would eliminate the $10 attorney fee limitation on cases brought before the VA appeals board.

The fee limitation, enacted after the Civil War to protect veterans, has outlived its original purpose. In this day and age, a $10 limitation on attorneys' fees virtually prohibits any veteran from obtaining legal counsel—a right guaranteed in the fifth amendment.

I am sure many Members of Congress are familiar with veterans who have been denied their disability, pension, or education benefits by the VA despite what appears to be a perfectly good case. I am hopeful this legislation will correct inconsistencies and add uniformity to VA decisions.

My colleague, the Honorable JONATHAN BINGHAM, has introduced identical legislation, H.R. 200. Together we hope to correct the inequities of the VA appeals process.

SITUS PICKETING LEGISLATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Minnesota (Mr. QUIE) is recognized for 60 minutes.

Mr. QUIE. Mr. Speaker, I introduced H.R. 4969, which is similar to the situs picketing legislation approved by the last Congress, but with some additional provisions. Tomorrow, I will be offering amendments, along with my colleagues, Congressmen ASHBROOK and ERLENBORN, to make the committee-reported bill, H.R. 4250, conform to my bill, H.R. 4969.

If these amendments are adopted, the bill would then be similar to the bill approved by the last Congress with the addition of three amendments related to "fast track" construction, prevailing wage and definition of site. These amendments are referred to in the following comments as amendments Nos. 2, 5, and 7. After my discussions with both labor and management in the construction industry, I believe that these amendments should be adopted.

Amendment No. 4 is not part of my substitute, H.R. 4969, as it deals with information received after the bill was drafted. While H.R. 4250 grants broad rights to engage in secondary boycott activities, it purports to restrict that right where the activity is directed against someone who is on the site to install or service his employer's product. The problem is that the bill does not extend that same protection to persons who regularly install products manufactured by persons other than their employer's. My amendment would extend the protection to cover this latter situation.

Congressman ASHBROOK will offer his amendment clarifying that employees primarily engaged in the construction industry are the ones subject to common situs picketing and Congressman ERLENBORN will offer amendment on residential construction to make the bill conform to the bill which the President vetoed last year.

My amendments and explanations of each of them follow:

AMENDMENT NO. 1 TO H.R. 4250, AS REPORTED

Page 20, line 25, strike out "this subsection (b)" and insert in lieu thereof "clause (B) of this paragraph (4)".

EXPLANATION

The experience of the construction industry, together with the legislative history of Section 8(b)(4)(B), formerly 8(b)(4)(A), has persuaded me that contractors and subcontractors on a construction site, notwithstanding their being separate legal entities, are in fact "interrelated" for purposes of achieving a common objective and necessarily have to integrate their work to achieve their goal. Therefore, I cannot agree with the view, which was a major premise of the *Denver Building Trades* decision, that the several employers engaged in a single construction project are wholly unconcerned and neutral with respect to one another. The stated purpose of H.R. 4250 is to overrule *Denver* so that building trades may enjoy a right now held by industrial workers—the right to picket where their employer's work is related to the work of similarly situated employers who are in fact concerned with the labor dispute of their employer. As drafted, however, H.R. 4250 is seriously flawed, for in its effort to create equality between craft and industrial workers it entirely exempts the craft unions from the proscriptions of subsection (b), which sets forth those specific unfair labor practices in which a union cannot engage. In other words, craft unions will be licensed to engage in conduct which the industrial unions cannot now exercise. For example, craft unions, unlike industrial unions, could strike or picket in a manner now considered unlawful (e.g., through violence and threats of bodily harm) and for objectives now declared unlawful, such as (a) to require the primary employer to select or fire certain supervisory personnel, (b) to support a "take-it-or-leave-it" bargaining position, (c) to support non-mandatory bargaining demands. The bill creates this anomaly by using the phrase "nothing contained in this subsection (b)," rather the more narrow and appropriate phrase "nothing contained in clause (B) of this paragraph (4)."

My amendment would rectify this problem by substituting "clause (B) for this paragraph (4)" for "subsection (b)" presently in the bill at page 20, line 25. This change would provide the requisite change in the existing law so as to authorize picketing by building trades at common sites where the dispute arises out of wages, hours, and other working conditions that are part and parcel of the entire construction activity at the site. Yet, the legislation as qualified by my amendment would still preserve the needed restraints against unfair labor practices that Congress has seen fit to outlaw in Section (b) of the NLRA.

AMENDMENT NO. 2 TO H.R. 4250, AS REPORTED

Page 21, line 6, strike out "a" and everything that follows down through "subcontractors" on line 10, and in lieu thereof insert: "any of several employees who are primarily engaged in the construction industry on the job site with whom the individual's employer has a direct contractual relationship either as contractor or subcontractor or with whom the individual's employer has a common contractor primarily engaged in the construction industry".

EXPLANATION

The intent of common situs picketing has been to give equal treatment to craft and industrial workers. This amendment addresses this goal of the legislation, allows the building trades to picket where their employer's work is related to the work of like employers who are not wholly unconcerned with the labor dispute of their employer.

The reason for this amendment was explained by witnesses from the 3M Company at hearings on H.R. 4250. Those witnesses explained that industrial employers, who are considered only users of construction, or buyers of construction services, engage in "fast-track" methods of expansion or construction. That method involves the design and planning in stages, allowing construction during one phase while another phase was being planned. Consequently, the contractors of one phase could not be considered interrelated or contractors of subcontractors with those engaged in a different phase. Nor would general contractors working on different projects within the buyer's facilities be considered one for purpose of common site picketing. The amendment offers protections from situs picketing where "fast-tracking" methods of construction are being performed. "Fast-tracking", incidentally, is followed in about 50 percent of industrial construction today.

In studying the legislative history of Section 8(b)(4)(B), formerly 8(b)(4)(A), I came to the conclusion that contractors and subcontractors on a construction site may be separate legal entities, but that they are "interrelated" for purposes of achieving a common objective and necessarily have to work in close correlation and cooperation to reach their goal. Therefore, it appears that in most situations the several employers engaged in a single construction project are not wholly unconcerned and are not really neutral with respect to one another. Where it can be shown, as in the "fast-tracking" method, that they are separate, then the realities of the situation should allow them to escape the common situs picketing.

AMENDMENT NO. 3 TO H.R. 4250, AS REPORTED

Page 22, line 11, following "authorize" insert "striking,".

Page 22, line 13, after "person" insert "where an object thereof is".

EXPLANATION

H.R. 4250 attempts to limit the scope of permissible secondary activity where its purpose is to remove or exclude individuals from the site on the grounds of sex, race, creed, color, national origin, or non-union membership, and to engage in certain forms of organizational or recognitional activity now proscribed by subsections 8(b)(4)(D) and (b)(7). The problem with the bill is that while it prohibits picketing and threats thereof, it does not restrict an equally potent form of concerted activity—the strike. My amendment corrects this by adding "striking" to the list of proscribed conduct.

A further problem with H.R. 4250 in this context is that it fails to recognize that concerted activities may be carried out for several purposes—one of which may be lawful, another of which may be unlawful. My amendment makes clear that such concerted activities may not be carried out if one of its objects is unlawful as defined by the three subsequent clauses, even if the union can identify an arguably lawful object of the activity.

AMENDMENT NO. 4 TO H.R. 4250, AS REPORTED

Page 2, line 3, strike the words "produced by that person" and insert in lieu thereof the words "regularly installed or serviced by that person".

EXPLANATION

The third clause of H.R. 4250's second proviso insulates from secondary boycott activity those employees of an employer who is at a construction site but not engaged primarily in the construction industry. The clause contemplates that such employees are represented by a labor organization, are present at the site for the purpose of installing or servicing the product produced by the employer. The problem with this clause is that it ignores the fact that the servicing of products is often not done by the manufacturer of the product. For example, it is not uncommon for the manufacturers of climate control equipment to contract for the servicing of equipment manufactured by a competitor. My amendment will bring this latter class of persons within the insulating provisions of the second proviso's third clause.

AMENDMENT NO. 5 TO H.R. 4250, AS REPORTED

Page 23, line 16, strike out "whether" and everything that follows down through "site." on page 24, line 3, and in lieu thereof insert the following: "whether any of several employers are primarily engaged in the construction industry, ownership or control of the construction site shall not be a factor to be considered, and, for the purposes of the preceding provisos, the term 'site' means one physically contiguous location at which the employers involved are engaged in interre-

lated construction, alteration, painting, or repair towards a common objective and in physical proximity to each other.".

EXPLANATION

Despite the close attention which the sponsors have given attempting to define the parameters of the concerted activity at a construction site sanctioned under the bill, it is indeed a little ironic that H.R. 4250 does not define what a "site" is. Surely such a definition is needed if the legislation is not to be applied beyond its intended scope of sanctioning concerted activity under the circumstances of *Denver Building Trades*, namely, where the work of the various employers is aimed toward a common objective and is in physical proximity to each other at a contiguous location. My amendment provides that for purposes of this legislation "site" means location at which employers involved are engaged in interrelated construction, alteration, painting, or repair towards a common objective and in "one physically contiguous physical proximity to each other."

Without such a definition, courts will have to grapple with application of this legislation to a variety of unique circumstances: what is the "site" in a large industrial park where construction proceeds separately on behalf of the various tenants? What is the "site" where an entrepreneur builds a factory on one side of a highway and a parking lot on the other, with bids to two general contractors?

AMENDMENT NO. 6 TO H.R. 4250, AS REPORTED

Page 22, line 20, insert immediately after "(b):" the following: "*Provided further*, That nothing in the above provisos shall be construed to authorize any strike, picketing, threatening to picket, or causing to be picketed any person, other than the employer of the employees involved in the dispute, where an object thereof is to require that person to pay wage rates exceeding the prevailing wage rate for work of a similar nature in the locality, as determined by the Secretary of Labor:".

AMENDMENT NO. 7 TO H.R. 4250, AS REPORTED

Page 22, line 20, insert immediately after "(b):" the following: "*Provided further*, That if a labor organization engages in picketing a construction site for an object described in paragraph (7) of subsection (b), there must be filed a petition under subsection (c) of section 9 within five days after commencement of such picketing, or if a charge is filed under subsection (b) of Section 10, the Board shall conduct an election and certify the results thereof within fourteen calendar days from the filing of either the petition or the charge:".

EXPLANATION

This amendment was offered to the common situs legislation of the last Congress by Senator Hathaway. That amendment was adopted by the Conference with the following explanation:

"It is the understanding and intention of the conferees that within the mandatory 14-day period prescribed by this proviso the Board will follow insofar as possible its present procedure for expedited elections under the first proviso to section 8(b)(7)(C). The conferees emphasize that in every case the regional director, within the 14-day period, must investigate any charge that picketing for an object described in section 8(b)(7) is taking place and must, within 14 days, make a finding, based upon a preponderance of the evidence, as to whether or not there has been a violation as charged. In all such situations, this process of investigation, and of an election and certification (where appropriate) must take place within 14 days."

The amendment I offer is changed slightly in that where recognitional or organizational picketing is occurring, the union must file a petition within 5 days from the start of such picketing. If the employer files a charge, or where a petition is filed, then an election must be conducted within 14 days. This limits the time for recognitional and organizational picketing, to a total time of no more than 19 days.

One of the complaints of the construction unions is that they cannot get elections. This provision provides for expedited elections in the construction industry. It also protects the industry from lengthy recognitional disputes.

At hearings on this legislation, it was strongly argued that the *Denver* decision has enabled contractors to contract for labor under a depressed wage scale. This is because contractors have been able to retain cheaper, nonunion labor in many instances, without fear of significant economic reprisals from labor unions. As presently drafted, the bill appears to ignore this justification for overruling *Denver*. My amendment would permit common situs activity where the objective is to protest the payment of wages that are below the prevailing wage rate. (That prevailing rate is, of course, ascertainable by the Secretary of Labor under his existing authority.) However, where a union seeks to obtain wages that are above the prevailing rate, then it remains subject to the restraints of Section 8(b)(4)(B) heretofore imposed on secondary boycotts. Furthermore, this amendment does not prohibit the union from picketing for reasons other than prevailing wages, such as safety, etc.

AMENDMENT NO. 8 TO H.R. 4250, AS REPORTED

Page 24, beginning on the line immediately following line 3, insert the following new section:

(b) Section 8 of such Act is amended by adding at the end thereof the following new subsection:

"(h) Notwithstanding the provisions of this or any other Act, where a Federal or State law requires separate bids and direct awards to employers for construction, the various contractors awarded contracts in accordance with such applicable Federal or State laws shall not for the purposes of the third proviso at the end of paragraph (4) of subsection (b) of this section, be considered in the relationship of contractors and subcontractors with each other or with the Federal, State or local authority awarding such contracts at the common site of the construction."

Page 24, line 4, strike out "(b)" and in lieu thereof, insert "(c)".

EXPLANATION

The basic justification of concerted activity common situs of construction is that the work is essentially an interrelated endeavor among various separate legal entities (contractors and subcontractors) aimed toward a common goal. The relationship among the various entities is often a voluntary one in which the members are not neutral bystanders. The bill, however, recognizes that in public construction the various contractors find themselves working side-by-side not necessarily by voluntary choice, but by virtue of being awarded separate contracts under applicable bidding laws. In such cases, the *Denver* decision still governs, but only where the contracts are awarded under *State* laws. No consideration is given to contracts awarded under Federal law, nor can I conceive of a principled reason for discriminating against Federal contracts. My amendment would remove this disparity by treating Federally awarded contracts similarly to State contracts.

AMENDMENT NO. 9 TO H.R. 4250, AS REPORTED

Page 26, line 6, strike out "." immediately before the period insert the following: ", except that with respect to construction work which was contracted for or on which work had actually started prior to the date of enactment, the amendments made by this Act shall take effect two years after such effective date".

EXPLANATION

H.R. 4250 presently provides a 90-day effective date, after which *all* construction in this country will be subject to common situs picketing permitted under this bill. No allowance or exception is made for construction that was contracted for or in progress prior to the effective date of this bill. My amendment proposes to exempt, from the provisions of this bill, construction that was either contracted for and actually began *prior* to enactment.

Such an exclusion is called for on the basis of simple justice and fairness.

The testimony brought out that much of construction work is not now done by union labor. Indeed, this fact is one of the factors prompting organized labor to press this legislation; the leadership candidly admits their hopes that this bill will facilitate their efforts to organize in greater numbers and to capture a greater share of the construction work. The testimony further established the reason why non-union labor has such a great share of the work that it is much more competitively priced than union labor. It is thus evident that in many existing construction contracts the industry has taken advantage of the more economically priced labor and has computed its total costs, estimated its profits, and submitted bids based upon these prevailing labor costs. Contracts have been entered into with the expectation that the variables which enter into fixing these costs would not change so as to encourage an exaggerated use in these costs over the period of the construction. One of these variables, of course, is the ability of the industry to withstand the economic pressures of the craft unions to organize and to achieve more favorable wages.

There is no question but that H.R. 4250 wroughts a readjustment of the relative economic strengths of unions and management in the construction industry. Unions may now resort to a more patent form of economic pressure—to the extent of closing down an entire site—in an effort to achieve more favorable terms of pay and benefits. Correspondingly, industry is not in as strong a position as before to withstand such economic pressures. Consequently, the likelihood realistically arises that during the term of many existing construction contracts the industry, through the "free play of economic forces," will be required to accept union demands, e.g., higher wages, that would directly inflate the costs of a construction job.

The problem here is not whether the union demands are by themselves justified nor should my position be construed as a criticism of a union's efforts to achieve better benefits. Rather, my central concern here is with the basic unfairness of frustrating the expectations and intentions of the parties to construction contracts. This concern has been of central importance to the law of private contracts in this country, and has been equally so in the area of labor relations. For it is fundamental to our National labor policy that terms of employment and grievances should be adjusted voluntarily and within the private sector through the negotiation and administration of collective bargaining agreements. Surely, a collective bargaining agreement works best where it is not built on shifting sands. Likewise, construction agreements should not be undermined.

My amendment seeks to protect the integrity of existing construction agreements. It is noted, however, that I do not propose to exempt existing construction entirely from this legislation. Such construction will become subject to the act two years after enactment. This provision reflects a balancing of competing interests—the interest of not frustrating the expectations of the parties and the interest in implementing this legislation. Parties cannot expect to be entirely free of changes in the law that will affect their relationship. It is my belief that despite the disappointment the parties to a construction agreement may experience in the short run, the two year lead time will give them a fair opportunity to adjust their agreements in anticipation of the effective date of the Act.

"A NEW APPROACH TO INCOME MAINTENANCE"

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. KOCH) is recognized for 10 minutes.

Mr. KOCH. Mr. Speaker, just this morning I had the pleasure of testifying at regional hearings on Welfare Reform sponsored by the United States Department of Health, Education, and Welfare in New York City. The regional hearings are part of the administration's effort to study and make recommendations concerning comprehensive welfare reform. I applaud those efforts.

Similar hearings were held on March 10, 1977, by HEW Secretary Califano in Washington, D.C. At that time I testified as chairman of the Welfare Reform Task Force of the Northeast-Midwest Economic Advancement Coalition on the impact of welfare reform on the Northeast and Midwest regions.

This morning I testified as a Member of Congress on my own welfare reform proposal, H.R. 952. I introduced the Minimum Income Maintenance Act on January 4, 1977, to offer solutions to what I believe to be the major deficiencies in the current welfare systems. I believe this proposal can serve as an important vehicle for much needed discussion of welfare reform in the Congress. For the benefit of my colleagues, I am enclosing my prepared remarks delivered this morning.

TESTIMONY OF CONGRESSMAN EDWARD I. KOCH ON H.R. 952, THE MINIMUM INCOME MAINTENANCE ACT

Mr. Chairman, I am pleased to have the opportunity to be here today to discuss the issue of welfare reform. I want to commend the new administration not only for focusing attention on the problems of welfare reform, but on bringing the discussion of this issue to the people in the states and localities who have grappled with these programs for so long. These hearings are an important step in bringing our collective wisdom to bear on constructing effective remedies to the inequities and inefficiencies of an antiquated and, in many cases, antihuman welfare system. I applaud the President and the Secretary of Health, Education and Welfare on these efforts.

Mr. Chairman, I believe not only the President, but Members of Congress and the citizenry as a whole recognize the grave consequences of our nation of an expensive and unwieldy welfare program. It was with these consequences in mind that on January 4, 1977, I introduced comprehensive welfare reform legislation in the 95th Congress. My legislation, H.R. 952, the Minimum Income Maintenance Act, would reform current welfare programs and consolidate AFDC, SSI and Food Stamp programs into a single Federal welfare program which is both equitable and efficient.

One of the basic inequities that we face with respect to welfare, is that today an individual can receive annually on the average $2,859 in New York City and $530 in Biloxi, Mississippi. My proposal addresses these tremendous disparities in benefit levels by establishing a single national welfare system of benefits. H.R. 952 is based on the premise that we must have a national welfare program with those eligible receiving the same benefit level irrespective of where they live, except for a cost of living differential, so that there would be no incentive to move from one state to another, as is currently the case.

Furthermore, I believe that our citizenry is not only concerned about the tremendous disparities of benefit levels in the current system, but is legitimately angered by the fact that families on welfare sometimes end up with more income than those who are employed. H.R. 952 would insure that the millions of employed Americans who work hard just to make ends meet know that those who are not working would receive substantially less.

The legislation provides that the maximum welfare payment be 50% of the income level that the Bureau of Labor Statistics considers adequate to lead a modest life (Lower Level Family Budget). That figure in New York City is $10,266 for a family of four, so that the maximum welfare payment would be $5,133 including all public benefits, with the exception of medicaid.

Finally, one of the most important aspects of the Minimum Income Maintenance Act is that it eliminates a huge welfare bureaucracy. The inefficiency in the administration of welfare programs is indeed an outrage. President Carter has estimated that there is one employee for every six recipients of public benefits. Recent calculations indicate that 13.3 cents per benefit dollar spent on the A.F.D.C. program (Aid to Families with Dependent Children) is consumed by administrative costs. My bill would eliminate much of this waste.

Some of the other key provisions of H.R. 952 are:

1. The entire welfare payment would be paid for and administered by the Federal government.

2. All able-bodied persons would have to take jobs when offered, excluding the elderly, disabled, or a parent responsible for caring for pre-school children.

3. Work enabling expenses, such as day care costs, would be deducted from the income level so as to avoid penalizing the recipient for incurring the costs of pursuing gainful employment.

4. The Act contains a two-year "grandfather clause" to insure that families currently receiving AFDC, SSI and food stamps do not suffer immediate losses because of the transfer to a national welfare program.

5. No locality participating in the program would be permitted to add on any benefit, and if it does, it would be penalized by a loss of funding in other federal programs equal to the amount of its attempted supplementation of welfare benefits. That is intended to protect localities from the political pressures which have caused the current disparities, as have the local compassionate responses which would not be carried out responsibly within reasonable fiscal constraints.

6. The Inspector General of HEW would be specifically empowered to prosecute cases of administrative and recipient fraud.

The total cost of this program, all of which would be borne by the Federal government, would be $38 billion initially according to figures provided me by the House of Representatives Information Systems, and $30 billion once the 2-year "grandfather" clause expires. This contrasts to the current total cost of $21 billion which includes the federal, state and local government shares of AFDC, SSI, food stamps and other welfare aid. The reason for the increased cost is that many current state benefit levels would have to be substantially increased because they are currently so low, while the few states that are providing unrealistically high levels of benefits would be required to reduce their benefit levels. It should be kept in mind that currently cities, counties and states are carrying over ⅓ of our total national welfare costs and are going broke doing that. According to figures provided me by the Congressional Research Service, the state and local share of major welfare programs in 1976 was 36% with the share of some jurisdictions running as high as New York's 48% share.

Mr. Chairman, I believe that the two most important areas of legislative concern for the Congress and President in 1977 are providing job opportunities for those who want to work and providing for those who are unable to work a minimum national welfare benefit. I support the administration's efforts to put our nation back to work and I hope that the dialogue generated by my proposed legislation and regional hearings such as this can lead to the development of a welfare policy that is both fair and compassionate.

I would like to include for the record a summary of H.R. 952, the Minimum Income Maintenance Act, and I want to again thank you for the opportunity to testify before you this morning.

SUMMARY OF THE MINIMUM INCOME MAINTENANCE ACT (MIMA)

The Minimum Income Maintenance Act would replace the AFDC, SSI and Food Stamp programs with a single national welfare system of benefits which would be administered by the federal government and for which all qualified residents of the U.S. would be eligible. The legislation would regionalize welfare benefits by utilizing the Bureau of Labor Statistics' (BLS) "lower budget" figure for both SMSA (Standard Metropolitan Statistical Area) and non-SMSA areas. In determining maintenance payments, the bill would establish the applicable BLS figure as the eligibility standard and 50% of the applicable BLS figure as the maximum Koch payment. The Koch benefit would be that maximum figure reduced by ½ of all income and work enabling expenses, as defined by the Act.

A sample of current BLS lower budget figures for a family of four is set forth below to convey an idea of what the level of benefits would be in the different regions across the country.

New York City	$10,266
Pittsburgh, Pa	9,205
Cleveland, Ohio	9,489
Detroit, Mich	[1] 9,501
Atlanta, Ga	8,924
Baton Rouge, La	8,588
Denver, Colo	9,319
San Francisco, Calif	10,509

[1] Maximum payment would be 50% of this figure.

NOTE.—Currently, BLS provides lower budget figures for a hypothetical family of four and for a retired couple in 40 of the 276 SMSAs. The BLS hypothetical family of

four consists of a 38 year old husband employed full time, his non-working wife, a boy of 13 and a girl of 8. The Koch program would have BLS develop comparable figures for varying family sizes and compositions in SMSA and non-SMSA areas.

For purposes of the bill, income is defined as including both earned and unearned income and all public payments, such as veterans' benefits and social security, in order to reduce the inequities created by some state welfare programs which reduce benefits by some government payments but not by others. The Secretary of HEW would determine which in-kind and vendor payments would be exempted in computing income. Medicaid is to be the only public payment explicitly exempted for that purpose. Work enabling expenses, as defined by regulations promulgated by the Secretary (including day-care expenses) would be deductible in establishing "income."

The definitions and formulas which follow indicate how the Koch benefit would be computed:

Eligibility standard—The BLS lower budget figure for respective family size and SMSA, or comparable non-SMSA figure.
Maximum payment—50 percent of the applicable BLS lower budget figure.

$$\text{Koch benefit} = \text{maximum payment minus } \frac{\text{earned and unearned income} + \text{public payments} - \text{work enabling expenses}}{2}$$

Total family income = earned and unearned income + public payments + Koch benefit.

A significant aspect of the Koch benefit formula is the way in which it deals with the problem of work disincentive—a well-known failing of our current welfare systems. Under the Koch bill, benefits decrease as the recipient's income increases by a benefit loss rate of 50% until the ceiling is reached. Thus program benefits are tapered off gradually until the benefit levels have been diminished to an insignificant amount before applying the cutoff. By doing so, the system avoids work disincentives created by an abrupt, though perhaps lower, cutoff point. Similarly, work enabling expenses such as day-care costs are deducted from the income level in calculating benefits so as to avoid penalizing the recipient for having incurred the unavoidable costs of pursuing gainful employment.

Mandatory registration at local employment offices and active job seeking are a prerequisite to receiving benefits under the Koch bill. The elderly, the handicapped and mothers with pre-school children would be exempt from that requirement.

Below are computations which show how the Koch benefit formula would create a rational work incentive scale. (Work enabling expenses are not considered for purposes of this chart.)

	Assume BLS lower budget figure of $10,000			
Income	Maximum payment	− ½ income	= Koch benefit	Total income
0	$5,000	− 0	= $5,000	$5,000
$4,000	5,000	− ½ ($4,000)	= 3,000	7,000
$7,000	5,000	− ½ (7,000)	= 1,500	8,500
$9,500	5,000	− ½ (9,500)	= 250	9,750

Family is defined in the bill in such a way as to avoid the unfortunate family splitting which resulted from the AFDC program. Childless couples, intact families, individuals, retired couples, dependent children and stepparents (as they contribute to the support of dependents) are defined and included in the program.

Quarterly retrospective accounting and monthly reporting would be employed in administering the program. Though states that wish to participate in the program will be specifically prohibited from supplementing the Koch benefit, emergency needs will be covered by regulations promulgated by the Secretary. Assets shall be imputed to income by disregarding the first $10,000 of assets and counting each additional $10,000 of assets as $100 in income.

The Minimum Income Maintenance Act contains a "grandfather clause" to insure that those families currently receiving FDC, SSI and Food Stamps do not suffer immediate losses because of the transfer to a national welfare program. Those families for whom benefits under the Koch bill would be less than those which they currently receive from the programs listed above, would continue receiving their current level of payment for two years. Anyone who files an application for public assistance after the bill is enacted would not be entitled to the level of payment insured by the bill's "grandfather clause."

The Inspector General of HEW would be specifically empowered to investigate and, where necessary, prosecute cases of both administrative and recipient fraud. In addition, the Inspector General will be empowered to audit the program for over and under payments.

INSURING A HIGH MORALE AND A HEALTHY GOVERNMENT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Virginia (Mr. HARRIS) is recognized for 5 minutes.

Mr. HARRIS. Mr. Speaker, I am introducing today a bill which is central to effective government. It would benefit both the employer and the employee and smooth employer-employee relations in the Federal work force. My legislation guarantees career Federal workers their grade and pay if their position is downgraded; this is a concept known as "saved grade."

Last month I asked the House Post Office and Civil Service Committee, on which I serve, to include this measure in its report to the Budget Committee and I am pleased to report that on March 9 the committee approved its report on the 1978 budget resolution and included my bill. Thus, the committee has in effect supported my request that this bill be considered by the 95th Congress—has placed the bill on the committee's agenda for 1977—and today I am carrying out the commitment I made by introducing the bill.

Fears are running rampant in the bureaucracy. Agencies are initiating or contemplating reorganizations. Some agencies are facing possible elimination. A new classification system—the factor evaluation system—is being implemented and on February 23 of this year the chief administrator of that program indicated to me personally that the FES "involves looking at all jobs" and that FES could "expedite downgradings." Allegations of grade creep and a bloated bureaucracy surface almost daily from all quarters. Job reorganizations and reclassifications are a real possibility, whether justified or not.

The legislation I have prepared would allow the employee, whose job is downgraded, to retain his or her grade or pay when the job is reclassified at a lower level. Importantly, the bill covers both general schedule—white collar—and wage grade—blue collar—personnel. Currently, the employee whose position is downgraded keeps the former, higher salary for only 2 years; after 2 years the salary drops to the downgraded level.

Having assurance of grade and salary retention is fair to the employee. Such a guarantee prevents what I think is an unwarranted punitive action—loss of status and pay—when the employee accepted in good faith a position that was incorrectly classified or that requires reclassification after the employee takes a job. It is not the employee's fault, for example, that computer jobs have become overclassified since the 1960's when computer specialists were scarce. It is not the employee's fault that political philosophies change, requiring more auditors and fewer social workers. It is not fair to make the employee suffer undue personal hardship, humiliation, and damage to career potential because times change or agencies needs and goals take new directions. Nor should downgrading be a tool to demoralize and drive out individuals or a ruthless ruse to disguise budget cutting.

The bill is equally important for Government. There is no better ingredient for good government than a high morale, a work force with a positive attitude. Under this bill, agencies would be free to reclassify positions, recognize their mistakes, and modify positions to fit their changing needs—without alienating agency personnel. Reducing grade, status, and pay is bound to alienate workers. Just the possibility that one's position and pay can suddenly be reclassified downward through no fault of the employee can inevitably create an atmosphere of fear and suspicion.

Thus, guaranteeing to the employee these basic jobs rights will keep our contract with the employer and enhance the effectiveness of Government, because the employee will have a more positive outlook and respect for Government.

PERSONAL EXPLANATION

(Mr. MIKVA asked and was given permission to extend his remarks at this point in the RECORD.)

Mr. MIKVA. Mr. Speaker, due to a meeting on legislative matters that was off of Capitol Hill, I was unable to be present for the vote yesterday to suspend the rules and pass H.R. 3712, to amend the Library Service and Construction Act. Had I been present, I would have voted "yes."

CONGRESSIONAL APPROVAL OF CERTAIN CORPS OF ENGINEERS PROJECTS

(Mr. MIKVA asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. MIKVA. Mr. Speaker, I am today introducing legislation to clarify a law first enunciated in 1884. In 1909 the Congress amended this law by permitting the Chief of Engineers, U.S. Army, to maintain and repair canal navigation projects. However, under this authority the corps has gone much further than keep these projects "in repair." When repair means building a whole new set of locks 2 miles downstream that is both deeper and longer than the present facility and costs $400 million, as in the case of locks and dam 26, then the time has come for Congress to reexamine the authority it bestowed on the corps 68 years ago.

The purpose of this bill is not to debate the merits of replacing locks and dam 26. Rather, my bill is intended to prevent confusion, delays, and litigation over future work projects by prohibiting the Chief of the Army Corps of Engineers from repairing projects costing more than $4 million without obtaining congressional approval. In my view, the Congress should specifically authorize significant repair and maintenance projects.

I feel strongly that locks and dam 26 is unnecessary and environmentally unsound, but I feel more strongly that projects costing over $4 million deserve full congressional consideration. This and other repair projects are too important to be considered outside the context of a national waterways and transportation program.

Mr. Speaker, at this point, I include the text of the bill in the RECORD:

H.R. 5347

A bill to require specific statutory authorization for each canal maintenance, repair, or reconstruction project costing $4,000,000 or more to be undertaken by the Secretary of the Army acting through the Chief of Engineers

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 4 of the Act entitled "An Act making appropriations for the construction, repair, and preservation of certain public works and rivers and harbors, and for other purposes", approved July 5, 1884 (33 U.S.C. 5), is amended by inserting immediately after "not otherwise appropriated: *Provided,"* the following: "That no warrant or requisition to pay the expenses of maintaining, repairing, or reconstructing any of the aforesaid works shall be paid by the Secretary of the Treasury for any project for which the total cost to the United States is to be $4,000,000 or more unless such project has been specifically authorized by a law enacted before the date of the commencement of maintenance, repair, or reconstruction work on such project: *Provided further,".*

SEC. 2. The amendment made by the first section of this Act shall apply to any project for maintenance, repair, or reconstruction of any canal or other public work under authority of section 4 of such Act of July 5, 1884, on which maintenance, repair, or reconstruction work is commenced after the date of enactment of this Act.

PERSONAL EXPLANATION

(Mr. MAZZOLI asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. MAZZOLI. Mr. Speaker, when Roll No. 85 was taken yesterday on the previous question on the rule to H.R. 4800, extending the Emergency Unemployment Compensation Act of 1974, I was absent from the Chamber.

Had I been present at the time of the vote I would have voted "yea."

QUESTIONS AND ANSWERS ON H.R. 4250

(Mr. ASHBROOK asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. ASHBROOK. Mr. Speaker, on March 17, 1977, the sponsor of H.R. 4250, Mr. THOMPSON, propounded, and then answered certain questions he claimed had been raised regarding this legislation. There should be many more questions raised. They should all be answered properly. Here are my answers to those questions:

QUESTIONS AND ANSWERS ON H.R. 4250

1. Q. Does H.R. 4250 legalize secondary boycotts?

A. Not only does H.R. 4250 legalize secondary boycotts, it also legalizes many other unfair labor practices for construction unions only. Since a secondary boycott is union pressure to force one employer to cease doing business with another employer, legal precedent makes clear that picketing all, or any neutral employers on a construction site for that purpose is a secondary boycott. H.R. 4250 would change that law. To constitute a secondary boycott, striking employees do not necessarily have to "leave the scene" of a dispute, particularly when the dispute is at a common site.

The secondary effects of H.R. 4250 arise in several situations. By a total shutdown of the jobsite, union pickets hope to be able to influence the particular subcontractor with whom they have a dispute by applying pressure to general contractors and other subcontractors on the site through a total stoppage of all work. In point of fact, neither general contractors nor other subcontractors are likely to have any direct control over the labor relations policies of the employer with the dispute. Thus, common situs picketing is clearly a secondary boycott situation, and could arise either from picketing against employment of a non-union subcontractor on the job or from a labor dispute with union subcontractors on the job. In both cases, in the words of Taft-Hartley, "an object thereof" would be "forcing or requiring any person to . . . cease doing business with any other person."

It should be emphasized that construction unions *can* strike and picket construction sites, and like any union representing employees at a common site, must limit its activities as near as possible to the dispute.

2. Q. Suppose a contractor brings onto a job a subcontractor whose employees are non-union labor. Would H.R. 4250 permit the building trades council to picket the job as unfair?

A. Yes. Under present law, picketing to remove a non-union subcontractor is an unfair labor practice whether in industrial or construction site picketing. This is an unlawful "objective" under present law. However, H.R. 4250 allows such picketing, and extends it to all employers at the site, not just for a judicially protected purpose of preserving "area standards", but for the specific purpose of removing that non-union subcontractor.

With the context of the rights and duties under the NLRA, it seems that unless the selection of a subcontractor is related to the contractor's collective bargaining commitments, any interference with that selection by organized labor is necessarily outside of its legitimate interests of wages and working conditions. Notice that the original intent of "equal treatment" legislation was to allow a construction union to "picket" a whole site. That intent has been expanded to now include picketing for unlawful objects as well.

3. Q. Would enactment of H.R. 4250 give workers in the construction industry "special treatment"?

A. Yes. H.R. 4250 literally repeals all the provision of the NLRA regarding unfair labor practices as they apply to picketing and strikes at construction sites, in addition to their newly recognized right to enmesh innocent neutrals in labor disputes over which the neutral has no control. No other labor organizations have the right to picket other than the employer with whom they have a dispute, except in an "ally" situation. Construction unions can now picket at a common site, to the extent allowed by the law, the same as industrial unions can now picket at the common situs of a dispute. However, the extensive provisions of H.R. 4250 give construction unions rights beyond anything industrial unions ever dreamed of since enactment of the NLRA.

Furthermore, as to the limited issue of picketing, the contention that the General Electric case creates a separate test and more relaxed rules for industrial picketing is a fallacy and taken out of context. In that case, the industrial union was permitted to picket the reserved gate because it was "a mingled gate", used by those performing work involved in the strike as well as by neutral firms. The rule is universal that any union, industrial or construction, is permitted to picket a reserved gate that is "a mingled gate" of that kind. On the other hand, if that reserved gate in the General Electric case had not been "a mingled gate", the industrial union could not have lawfully picketed it, and would continue to be unable to lawfully picket it if H.R. 4250 passes. Note, however, the building trades unions will have a "special" right to do so under the bill, as well as other rights the bill creates.

4. Q. Does H.R. 4250 authorize a union to picket where an object is to force the subcontractor off the job because he employs minorities?

A. Yes and No. The bill prohibits "picketing" to remove an employee for discrimination reasons. It does not prohibit "strikes" for such purposes. Neither does it prohibit picketing for such purpose where that purpose is just one of a few reasons for picketing. Moreover, minority contractors are of necessity non-union and the building trades unions could use the fiction of "area standards" picketing to force those minority contractors from the site.

H.R. 4250 provides no protection against discrimination of minority enterprises which are small businesses, generally tending to be non-union. Moreover, due to past discrimination by building trades unions in refusing to admit minorities or females to apprentice programs or hiring halls, the only opportunities in the construction trades for minorities and females for years were the non-union contractors who did not rely on unions for their workers. These contractors, and their minority employees would be greatly harmed by H.R. 4250.

5. Q. If an industrial plant wishes to contract to expand its premises, would H.R. 4250

permit the building trades to picket the work?

A. The answer, hopefully, is No. However, the amendment added in Committee protected only "industrial facilities." It did not protect other business, such as hospitals, hotels, small business, mines, utilities, and the list is endless.

When the amendment allegedly protecting "industrial facilities" was offered in Full Committee, the sponsor of the amendment, in response to questioning, replied that an industrial facility could set up a reserved gate and that gate could be insulated from construction union picketing. However, the terms of the amendment itself does not conform to the assurances of its sponsor. The amendment itself says that the reserved gate will be insulated from picketing "which is not directed at that separate entrance." Since the construction union picketing would not be directed at that gate, there is nothing in the so-called protection for industrial facilities amendment to preclude those construction unions from merely picketing that gate to "induce" those industrial employees not to work, since the picketing may be directed only at the construction employers. Picketing is an inducement, but does not necessarily have to be directed at an industrial facility. The limitations of the language are not as narrow as the assurances of the sponsor.

6. Q. Would H.R. 4250 permit the building trades unions to picket if the object is to secure the work of a manufacturer who is installing specialized equipment on the jobsite?

A. The question as was stated by Mr. Thompson is unfairly worded since those employers he mentioned have unions representing their employees. Where unions are representing the manufacturer's employees are not represented by a labor organization, H.R. 4250 would allow the whole site to be picketed. There is no adequate way to explain this disparity between organized and unorganized manufacturers installing specialty equipment.

7. Q. If building trades have a dispute with Contractor X at one site, would H.R. 4250 permit unions to picket the same contractor at another site?

A. There is nothing in H.R. 4250 to prohibit such picketing. According to established NLRB policy, the "situs of the dispute" travels with the employer primarily involved. It would appear that it Contractor X has a dispute with a labor organization representing its employees, the dispute would extend to all sites where that contractor is working, which might apply nationwide in large companies. Although the language is ambiguous, it appears that where the dispute is lawful, i.e., pertaining to wages and working conditions, at X, and that condition which is the subject of the dispute does not pertain to operations at another site, which is highly unlikely, there is a possibility that the dispute would have to be limited to X. However, where the dispute is unlawful at X, i.e., pertaining to issues that may not be subjects of bargaining, then the union could expand the dispute to other sites, an anomalous result.

8. Q. Would H.R. 4250 permit a union to picket against contractors who bid under State law and are awarded contracts by the State?

A. By the terms of H.R. 4250, the answer is No. However, H.R. 4250 should apply to Federal or other applicable law, including municipal law.

9. Q. Would H.R. 4250 permit building and construction unions to engage in conduct which would violate 8(b)(7)—the law regulating recognitional and organizational picketing?

A. Picketing in violation of 8(b)(7) is declared unlawful by H.R. 4250, but, note: (1) picketing could occur for the fictitious objective of maintaining "area standards"; (2) H.R. 4250 permits the whole site to be picketed, so, for at least 30 days, picketing would be permissive, and (3) only where 8(b)(7) recognitional picketing is the only objective sought would it be prohibited under the bill. The union could, easily, assert another lawful object and if the real reason were 8(b)(7), the picketing could not be found unlawful.

One further point to mention: 8(b)(7) does not appear to prohibit one labor organization from picketing to force an employer to recognize another labor organization. Therefore, for example, the Teamsters could picket to force an empolyer to recognize another labor organization, say the plumbers, without violating 8(b)(7). Accordingly, picketing could continue for unlimited time for this purpose.

10. Q. Would H.R. 4250 result in strikes in breach of contract?

A. Yes, in the sense that where one union establishes a picket line, another union which has a strike clause would probably refuse to cross that picket line, i.e., engage in "sympathy" action.

The *Buffalo Forge* case clearly indicates that an injunction does not lie where union members, in apparent violation of a no-strike clause, conduct a strike in sympathy to other union members.

RULES ADOPTED BY SELECT COMMITTEE ON NARCOTICS ABUSE AND CONTROL

(Mr. WOLFF asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. WOLFF. Mr. Speaker, pursuant to rule XI, clause 2(a), I submit for printing in the RECORD, the rules adopted by the Select Committee on Narcotics Abuse and Control.

RULES OF THE SELECT COMMITTEE ON NARCOTICS ABUSE AND CONTROL

RULE 1. RULES OF THE HOUSE

The Rules of the House of Representatives, insofar as they are applicable, shall be the rules of the Committee. The following rules, insofar as they are consistent with the Rules of the House, shall apply to the Committee.

RULE 2. MEETINGS

(a) The regular meeting day of the Committee for the conduct of its business shall be on Thursday of each week while the Congress is in session.

(b) Additional meetings may be called by the Chairman and regular meetings of the Committee may be dispensed with when, in the judgment of the Chairman, there is no need therefor.

(c) At least 24 hours (excluding Saturdays, Sundays, and legal public holidays) before each scheduled Committee meeting, each member of the Committee shall be furnished a list of the subjects to be considered or acted upon at the meeting.

RULE 3. HEARINGS

(a) Members of the Committee shall be advised and a public announcement shall be made of the time, date, place, and subject matter of any hearing to be conducted by the Committee at least one week before the commencement of such hearing, unless the Chairman determines that there is good cause to begin such hearing at an earlier date, in which event he shall make public announcement at the earliest possible date.

(b) Unless authorized by the Chairman, a witness shall not be permitted to testify or present evidence at a hearing of the Committee, and such testimony or evidence may not be included in the Committee hearing record, unless 50 copies thereof have been delivered to the Committee at least 24 hours before such hearing.

(c) A Committee member may question a witness only when recognized by the Chairman for such purpose. In accordance with clause 2(j)(2) of Rule XI of the Rules of the House, each Committee member shall be allowed 5 minutes to question a witness until each member who so desires has had such opportunity. The Chairman shall, insofar as practicable, recognize alternately on the basis of seniority those majority and minority members present at the time the hearing was called to order and others on the basis of their arrival at the hearing. Thereafter, additional time may be extended at the direction of the Chairman.

RULE 4. COMMITTEE PROCEDURE

(a) A majority of the members of the Committee shall constitute a quorum for the transaction of Committee business, except that 2 members shall constitute a quorum for purposes of taking testimony and receiving evidence.

(b) Meetings for the transaction of business and hearings of the Committee shall be open to the public or closed, in accordance with clause 2(g) of Rule XI of the Rules of the House.

(c) A vote by any member of the Committee with respect to any matter being considered by the Committee may be cast by proxy if the proxy authorization is in writing, asserts that the member is absent on official business or is otherwise unable to be present at the meeting of the Committee, designates the member of the Committee who is to execute the proxy authorization, and is limited to a specific matter, except that a member may authorize a general proxy for motions to recess or adjourn, or for other procedural matters. Each proxy to be effective shall be signed by the member assigning his vote and shall contain the date and time that proxy is signed. Proxies may not be counted for a quorum.

(d) Every motion made to the Committee and entertained by the Chairman shall be reduced to writing upon the demand of any member, and a copy made available to each member present.

(e) If the Chairman of the Committee is not present at any meeting or hearing of the Committee, the ranking member of the majority party on the Committee who is present shall preside at such meeting or hearing.

RULE 5. BROADCASTING

(a) Whenever any hearing or meeting conducted by the Committee is open to the public, the Committee may permit such hearing or meeting to be covered, in whole or in part, by television broadcast, radio broadcast, and still photography, or by any of such methods of coverage, under the rules established by clause (b).

(b)(1) If television or radio coverage of any hearing or meeting of the Committee is to be presented to the public as live coverage, such coverage shall be conducted and presented without commercial sponsorship.

(2) No witness served with a subpena by the Committee shall be required against his will to be photographed at any hearing or meeting or to give evidence or testimony while the broadcasting of such hearing or meeting, by radio or television, or still photography coverage, is being conducted. At the request of any such witness who does not wish to be subjected to radio or television coverage, all lenses shall be covered and all microphones used for coverage turned off.

(3) Not more than 4 television cameras, operating from fixed positions, shall be permitted in a hearing room. The allocation among the television networks or stations of the positions of the number of television cameras shall be in accordance with fair and equitable procedures devised by the Executive Committee of the Radio and Television Correspondents' Galleries.

(4) Television cameras shall be placed so as not to obstruct in any way the space between any witness giving evidence or testi-

mony and any member of the Committee, or the visibility of such witness and such member to each other.

(5) Television cameras shall not be placed in positions which obstruct unnecessarily the coverage of the hearing or meeting by the representatives of any other news medium.

(6) Equipment necessary for coverage by the television and radio media shall not be installed in, or removed from, the hearing room while the Committee is in session.

(7) Floodlights, spotlights, and flashguns shall not be used in providing any method of coverage of the hearing or meeting, except that the television networks or stations may install additional lighting in the hearing room, without cost to the Government, in order to raise the ambient lighting level in the hearing room to the lowest level necessary to provide adequate television coverage of the hearing at the then current state of the art of television coverage.

(8) Not more than 5 press photographers shall be permitted to cover a hearing or meeting by still photography. In the selection of such photographers, preference shall be given to photographers from Associated Press Photos and United Press International Newspictures. If request is made by more than 5 representatives of any news medium for coverage of the hearing by still photography, such coverage shall be made on the basis of a fair and equitable pool arrangement devised by the Standing Committee of Press Photographers.

(9) Photographers shall not place themselves in positions which obstruct unnecessarily the coverage of the hearing or meeting by the representatives of any other news medium.

(10) Personnel providing coverage by the television and radio media shall be then currently accredited to the Radio and Television Correspondents' Galleries.

(11) Personnel providing coverage by still photography shall be then currently accredited to the Press Photographers' Gallery.

(12) Personnel providing coverage by the television and radio media and by still photography shall conduct themselves and their coverage activities in an orderly and unobtrusive manner.

RULE 6. COMMITTEE REPORTS

Every investigative report shall be approved by a majority vote of the Committee at a meeting at which a quorum is present. Supplemental, minority, or additional views may be filed in accordance with clause 2(1)(5) of Rule XI of the Rules of the House. The time allowed for filing such views shall be 3 calendar days (excluding Saturdays, Sundays, and legal public holidays) unless the Committee agrees to a different time, but agreement on a shorter time shall require the concurrence of each member of such Committee for at least 3 calendar days (excluding Saturdays, Sundays, and legal public holidays) before the consideration of such proposed report in the Committee. If hearings have been held on the matter reported upon, every reasonable effort shall be made to have such hearings available to the members of the Committee before the consideration of the proposed report in the Committee.

RULE 7. POWERS AND DUTIES OF COMMITTEE

(a) For the purpose of carrying out any of its functions and duties, the Committee is authorized to sit and act at such times and places as it considers appropriate whether the House is sitting, has recessed, or has adjourned.

(b) The Committee may require, by subpena or otherwise, the attendance and testimony of such witnesses, and the production of such books, records, correspondence, memorandums, papers, documents, and other exhibits and materials, as it considers necessary. A subpena may be issued by the Committee only when authorized by a majority of the members of the Committee and authorized subpenas shall be signed by the Chairman or by any member designated by the Committee.

(c) The Chairman shall report on a regular basis the findings of the Committee to the following committees of the House: the Committee on Armed Services, the Committee on Government Operations, the Committee on International Relations, the Committee on Interstate and Foreign Commerce, the Committee on the Judiciary, the Committee on Merchant Marine and Fisheries, and the Committee on Ways and Means.

RULE 8. AMENDMENT OF RULES

The Rules of the Committee may be modified, amended, or repealed, by a majority vote of the Committee. Written notice of the proposed change shall be provided to each member of the Committee 2 legislative days before the meeting date on which such changes are to be discussed and voted upon.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted as follows to:

Mr. RONCALIO (at the request of Mr. WRIGHT, for today, on account of official business.

Mr. MILFORD (at the request of Mr. WRIGHT), for today and until further notice, on account of illness.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. JEFFORDS) to revise and extend their remarks and include extraneous material:)

Mr. CRANE, for 30 minutes, today.

Mr. WHALEN, for 5 minutes, today.

Mr. KINDNESS, for 5 minutes, today.

Mr. DON H. CLAUSEN, for 10 minutes, today.

Mr. HOLLENBECK, for 3 minutes, today.

(The following Members (at the request of Mr. AKAKA) to revise and extend their remarks and include extraneous material:)

Mr. ANNUNZIO, for 5 minutes, today.

Mr. MAZZOLI, for 5 minutes, today.

Mr. FISHER, for 5 minutes, today.

Mr. BAUCUS, for 10 minutes, today.

Mr. BURKE of Massachusetts, for 5 minutes, today.

Mr. THOMPSON, for 5 minutes, today.

Mr. GLICKMAN, for 5 minutes, today.

Mr. ST GERMAIN, for 5 minutes, today.

Mr. RODINO, for 5 minutes, today.

Mr. MOFFETT, for 30 minutes, today.

Mr. ROSTENKOWSKI, for 5 minutes, today.

Mr. WIRTH, for 5 minutes, today.

Mr. KOCH, for 10 minutes, today.

Mr. WEISS, for 5 minutes, today.

Mr. HARRIS, for 5 minutes, today.

Mr. QUIE (at the request of Mr. JEFFORDS), for 60 minutes, today; and to revise and extend his remarks and include extraneous matter.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

(The following Members (at the request of Mr. JEFFORDS) and to include extraneous matter:)

Mr. GOLDWATER in two instances.

Mr. STANTON.

Mr. FINDLEY in three instances.

Mr. ARMSTRONG.

Mr. MADIGAN.

Mr. LEACH in three instances.

Mr. DERWINSKI in four instances.

Mr. CAPUTO in two instances.

Mr. KINDNESS.

Mr. THONE.

Mr. TRIBLE.

Mr. TREEN in two instances.

Mr. SARASIN.

Mr. EDWARDS of Oklahoma in two instances.

Mrs. HOLT.

Mr. HANSEN in four instances.

Mr. MCKINNEY.

Mr. STEIGER in three instances.

Mr. SAWYER.

Mr. COLLINS of Texas in two instances.

Mr. LAGOMARSINO.

Mr. QUIE.

(The following Members (at the request of Mr. AKAKA) and to include extraneous material:)

Mr. DODD.

Mr. EDWARDS of California.

Mr. GONZALEZ in three instances.

Mr. ANDERSON of California in three instances.

Mr. KASTENMEIER.

Mr. BOLAND.

Mr. EARLY in two instances.

Ms. MIKULSKI in five instances.

Mr. STOKES.

Mr. DINGELL in three instances.

Mrs. BURKE of California.

Mrs. MEYNER.

Mr. ROSENTHAL.

Mr. ECKHARDT.

Mr. LEDERER.

Mr. HARRIS.

Ms. OAKAR in two instances.

Mr. BEARD of Rhode Island.

Mr. MCDONALD in three instances.

Mr. BENNETT.

Mr. STUMP.

Mr. STARK in two instances.

Mr. METCALFE.

Mr. SATTERFIELD.

Mr. LEVITAS.

Mr. AKAKA.

Mrs. SPELLMAN.

Mr. APPLEGATE.

Mr. KOCH in three instances.

Mr. EILBERG.

Mr. OTTINGER.

Mr. JACOBS.

Mr. ZEFERETTI.

ADJOURNMENT

Mr. AKAKA. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 3 o'clock and 5 minutes p.m.), under its previous order, the House adjourned until tomorrow, Wednesday, March 23, 1977, at 12 o'clock noon.

EXPENDITURE REPORTS CONCERNING OFFICIAL FOREIGN TRAVEL

Reports of various House committees and interparliamentary groups concerning the foreign currencies and U.S. dollars utilized by them in calendar year 1976 in connection with foreign travel are as follows:

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1069. A letter from the Comptroller General of the United States, transmitting a report that the failure of the Army Corps of Engineers to make funds available for construction activities at Meramec Park Lake, Mo., constitutes a deferral of budget authority which has not been reported to the Congress by the President, pursuant to section 1015(a) of the Impoundment Control Act of 1974 (H. Doc. No. 95–108); to the Committee on Appropriations and ordered to be printed.

1070. A letter from the Attorney General, transmitting notice of proposed changes in two records systems, pursuant to 5 U.S.C. 552a(o); to the Committee on Government Operations.

1071. A letter from the Attorney General, transmitting notice of a proposed change in a records system, pursuant to 5 U.S.C. 552a(o); to the Committee on Government Operations.

1072. A letter from the Director, Office of Management and Budget, Executive Office of the President, transmitting a report on actions taken on the recommendations contained in the third annual report of the National Advisory Council on Indian Education, entitled "Indian Education: The Right to be Indian," dated March 1976, pursuant to section 6(b) of the Federal Advisory Committee Act; to the Committee on Government Operations.

1073. A letter from the Deputy Comptroller General of the United States, transmitting a list of reports issued or released by the General Accounting Office during February 1977, pursuant to section 234 of the Legislative Reorganization Act of 1970; to the Committee on Government Operations.

1074. A letter from the Secretary of the Interior, transmitting a draft of proposed legislation to provide for the relief of certain residents of the Trust Territory of the Pacific Islands; to the Committee on Interior and Insular Affairs.

1075. A letter from the Secretary of the Interior, transmitting a draft of proposed legislation to amend section 2 of the act of June 30, 1954, providing for the continuance of civil government for the Trust Territory of the Pacific Islands, and for other purposes; to the Committee on Interior and Insular Affairs.

1076. A letter from the Acting Assistant Secretary of State for Congressional Relations, transmitting a report on political contributions made by Ambassador-designate Gale E. McGee and his family, pursuant to section 6 of Public Law 93–126; to the Committee on International Relations.

1077. A letter from the Acting Assistant Administrator for Legislative Affairs, Agency for International Development, Department of State, transmitting the first semiannual report on participation by small business in procurement programs of the Agency, pursuant to section 602 of Public Law 94–329; to the Committee on International Relations.

1078. A letter from the president, Overseas Private Investment Corporation, transmitting a draft of proposed legislation to amend the Foreign Assistance Act of 1961, as amended, to authorize additional authority for the Overseas Private Investment Corporation; to the Committee on International Relations.

1079. A letter from the Secretary of Health, Education, and Welfare, transmitting a 5-year plan for the extension of comprehensive mental health services through community mental health centers to persons in all areas in which there is a demonstrated need for such services, pursuant to section 304(a) of Public Law 94–63; to the Committee on Interstate and Foreign Commerce.

1080. A letter from the Chairman, Interstate Commerce Commission, transmitting a report on the Commission's determination to extend the time period for rendering a final decision in proceeding No. 36420, involving a joint-line arrangement for transportation of coal via the Louisville and Nashville Railroad and Conrail, pursuant to section 15(8) of the Interstate Commerce Act, as amended (90 Stat. 37); to the Committee on Interstate and Foreign Commerce.

1081. A letter from the Acting Comptroller of the Currency, transmitting the annual report of his office's Consumer Affairs Division, pursuant to section 18(f)(5) of the Federal Trade Commission Act, as amended (88 Stat. 2197); jointly, to the Committees on Interstate and Foreign Commerce, and Banking, Finance and Urban Affairs.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. MEEDS: Committee on Rules. House Resolution 423. Resolution providing for the consideration of H.R. 4250. A bill to protect the economic rights of labor in the building and construction industry by providing for equal treatment of craft and industrial workers and to establish collective-bargaining procedures in the construction industry (Rept. No. 95–102). Referred to the House Calendar.

Mr. DODD: Committee on Rules. House Resolution 424. Resolution providing for the consideration of H.R. 5040. A bill to authorize additional appropriations for the Department of State for fiscal year 1977 (Rept. No. 95–103). Referred to the House Calendar.

Mr. BENNETT: Committee on Armed Services. H.R. 4895. A bill to amend the Strategic and Critical Materials Stock Piling Act, and for other purposes (Rept. No. 95–104). Referred to the Committee of the Whole House on the State of the Union.

Mr. BROOKS: Committee on Government Operations. H.R. 5045. A bill to reestablish the period within which the President may transmit to the Congress plans for the reorganization of agencies of the executive branch of the Government, and for other purposes; with amendment (Rept. No. 95–105). Referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. ANDERSON of California:

H.R. 5292. A bill to regulate the trapping of mammals and birds on Federal lands, and for other purposes; jointly, to the Committees on Merchant Marine and Fisheries, Interstate and Foreign Commerce, and the Judiciary.

By Mr. ANNUNZIO:

H.R. 5293. A bill to amend the Internal Revenue Code of 1954 to provide a basic

$5,000 exemption from income tax, in the case of an individual or a married couple, for amounts received as annuities, pensions, or other retirement benefits; to the Committee on Ways and Means.

By Mr. ANNUNZIO (for himself, Mrs. FENWICK, Mr. WYLIE, Mrs. SPELLMAN, Mr. VENTO, Mr. ALLEN, Mr. ST GERMAIN, Mr. MINISH, Mr. FAUNTROY, and Mr. EVANS of Delaware):

H.R. 5294. A bill to amend the Consumer Credit Protection Act to prohibit abusive practices by debt collectors; to the Committee on Banking, Finance and Urban Affairs.

By Mr. ARMSTRONG (for himself, Mr. ABDNOR, Mr. BADILLO, Mr. BEDELL, Mr. BROYHILL, Mr. BURGENER, Mr. CORNWELL, Mr. DERWINSKI, Mrs. FENWICK, Mr. FRENZEL, Mr. FREY, Mr. HOLLENBECK, Mr. HOWARD, Mr. HYDE, Mr. LAGOMARSINO, Mr. LUJAN, Mr. MANN, and Mr. MIKVA):

H.R. 5295. A bill to remove the limitation on the amount authorized to be appropriated under the Volunteers in the National Forests Act of 1972; to the Committee on Agriculture.

By Mr. ARMSTRONG (for himself, Mr. MOORHEAD of California, Mr. PURSELL, Mr. SCHEUER, Mr. SEBELIUS, Mr. SIMON, Mr. STOCKMAN, Mr. THONE, Mr. TREEN, Mr. WHITEHURST, Mr. WHITLEY, and Mr. WINN):

H.R. 5296. A bill to remove the limitation on the amount authorized to be appropriated under the Volunteers in the National Forests Act of 1972; to the Committee on Agriculture.

By Mr. BEARD of Rhode Island:

H.R. 5297. A bill to amend the Social Security Act to establish a procedure for the prompt payment of social security benefits to individuals whose social security checks have been lost, stolen, or otherwise delayed; to expedite hearings and determinations respecting claims for benefits under titles II, XVI, and XVIII of the act and part B of title IV of the Federal Coal Mine Health and Safety Act of 1969; and to amend title II of the Social Security Act to limit to 25 percent the reduction that may be made in an individual's benefit check for any month because of any previous overpayments of monthly benefits; jointly, to the Committees on Education and Labor, Interstate and Foreign Commerce, and Ways and Means.

By Mr. BOWEN:

H.J. Res. 340. Joint resolution proposing an amendment to the Constitution of the United States; to the Committee on the Judiciary.

By Mr. MINISH:

H.J. Res. 341. Joint resolution to establish the Kosciuszko Trail; to the Committee on Interior and Insular Affairs.

By Mr. RAILSBACK (for himself, Mr. BUCHANAN, Mr. CONTE, and Mr. FLIPPO):

H.J. Res. 342. Joint resolution designating the first full week of April as "National Drafting Week"; to the Committee on Post Office and Civil Service.

By Mr. STUMP:

H.J. Res. 343. Joint resolution proposing an amendment to the Constitution of the United States providing for 4-year terms for Representatives, for a limitation on the number of terms a person may serve in the House of Representatives, and for other purposes; to the Committee on the Judiciary.

By Mr. WOLFF:

H.J. Res. 344. Joint resolution designating December 19, 1977, as Encampment Day; to the Committee on Post Office and Civil Service.

By Mr. DERWINSKI:

H. Con. Res. 171. Concurrent resolution commending the executive branch for the assistance it is providing to the beleaguered Government of Zaire; to the Committee on International Relations.

By Mr. MOFFETT (for himself, Mrs. NOLAN, Mr. CORNWELL, and Mr. FITHIAN):

H. Con. Res. 172. Concurrent resolution expressing the concern of Congress regarding the harassment of Soviet Jews and other minorities; to the Committee on International Relations.

By Mr. BALDUS (for himself, Mr. CORMAN, Mr. ADDABBO, Mr. ST GERMAIN, Mr. HANLEY, Mr. BRECKINRIDGE, Mr. LAFALCE, Mr. BEDELL, Mr. RICHMOND, Mr. RUSSO, Mr. NOLAN, Mr. BADILLO, Mr. NOWAK, Mr. LE FANTE, Mr. KILDEE, Mr. SKELTON, Mr. CARTER, Mr. COHEN, Mrs. FENWICK, Mr. PRESSLER, and Mr. QUAYLE):

H. Res. 425. A resolution requesting the President to convene a White House Conference on Small Business; to the Committee on Small Business.

By Mr. HAMMERSCHMIDT:

H. Res. 426. Resolution expressing the sense of the House that no ban on saccharin should take effect without prior congressional approval; to the Committee on Interstate and Foreign Commerce.

By Mr. MARTIN (for himself, Mr. ARMSTRONG, Mr. BEDELL, Mr. CORCORAN of Illinois, Mr. DOWNEY, Mr. DUNCAN of Tennessee, Mr. HORTON, Mr. HOWARD, Mr. KETCHUM, Mr. LENT, Mr. MILLER of Ohio, Mr. MINETA, Mr. MOORHEAD of California, Mr. WAGGONNER, Mr. CRANE, Mr. GUYER, Mr. QUAYLE, Mr. MCEWEN, Mr. COLLINS of Texas, Mr. LONG of Maryland, Mr. PATTERSON of California, Mr. TREEN, Mr. ANDREWS of North Carolina, and Mr. GUDGER):

H. Res. 427. Resolution expressing the sense of the House that no ban on saccharin should take effect without prior congressional approval; to the Committee on Interstate and Foreign Commerce.

By Mr. PREYER:

H. Res. 428. Resolution to provide for the expenses of investigations and studies to be conducted by the Select Committee on Ethics; to the Committee on House Administration.

By Mr. WHALEN:

H. Res. 429. Resolution to establish a Select Committee on Population; to the Committee on Rules.

MEMORIALS

Under clause 4 of rule XXII, memorials were presented and referred as follows:

52. By the SPEAKER: Memorial of the Legislature of the Territory of Guam, relative to the proposed "Hawaiian and United States Pacific Islands Surface Commerce Act" to the Committee on Education and Labor.

53. Also, memorial of the Legislature of the State of Nebraska relative to the North Loup Division, Pick-Sloan Missouri Basin Program, Nebraska; to the Committee on Interior and Insular Affairs.

54. Also, memorial of the Legislature of the Commonwealth of Virginia, relative to State regulation of the surface mining of coal; to the Committee on Interior and Insular Affairs.

55. Also, memorial of the Senate of the Commonwealth of Massachusetts, relative to protection of the domestic shoe industry; to the Committee on Ways and Means.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. KOCH:

H.R. 5464. A bill for the relief of Israel Wald; to the Committee on the Judiciary.

By Mr. LEVITAS:

H.R. 5465. A bill for the relief of Maj. Ralph Edwards, U.S. Air Force, retired; to the Committee on the Judiciary.

By Mr. MCCLOSKEY:

H.R. 5466. A bill for the relief of Doris Mauri Coonrad; to the Committee on the Judiciary.

By Mr. BOB WILSON:

H.R. 5467. A bill for the relief of Jordao Rodrigues Da Silva; to the Committee on the Judiciary.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 4250

By Mr. ALLEN:

On line 21, page 30, delete the word "may" and substitute therefor the word "shall".

On line 20, page 32, delete the word "authorized" and substitute therefor the word "directed".

On line 17, page 34, delete the words "only if it determines that such action will—" and substitute therefor the following language: "in order to—"

On line 11, page 35, delete the word "may" and substitute therefor the word "shall".

On line 23, page 35, delete the word "may" and substitute therefor the word "shall".

On line 6, page 40, delete the numerals "1980" and substitute therefor the numerals "1982".

On line 12, page 40, delete the numerals "1980" and substitute therefor the numerals "1982".

On line 19, page 28, delete the word "may" and substitute therefor the word "shall".

At line 4, page 31, delete the language following "section 204" which precedes the word "of" on line 5, page 31, and substitute therefor the following language: "and a written request for its assistance from any interested party to the dispute, it shall take jurisdiction of the matter, and it may do so with or without the request or suggestion."

On line 16, page 31, delete the words "decide whether to".

On line 19, page 31, delete the word "may" and substitute therefor the word "shall".

At the end of line 6, page 26, delete the period and add the following language: "of this title except (1) with respect to all construction work having a gross value of $5,000,000 or less which was contracted for and on which work had actually started on April 1, 1977, the amendments made by this title shall take effect one year after such effective date, and (2) with respect to all construction work having a gross value of more than $5,000,000 which was contracted for and on which work had actually started on April 1, 1977, the amendments made by this title shall take effect two years after such effective date."

Insert in line 16, page 23, immediately following the word "subsection:", the following language: *"Provided further,* That notwithstanding the provisions of this or any other Act, any employer at a common construction site may bring an action for injunctive relief under section 301 of the Labor Management Relations Act (29 U.S.C. 141) to enjoin any strike or picketing at a common situs in breach of a no-strike clause of a collective bargaining agreement relating to an issue which is subject to final and binding arbitration or other method of final settlement of disputes as provided in the agreement:".

Strike language immediately following word "any" on line 13, page 22, through the words "subsection (b)" on line 20, page 22, and insert in lieu thereof the following: "employer where an object thereof is the removal or exclusion from the site of any employee on the ground of sex, race, creed, color, or national origin or because of the membership or nonmembership of any employee in any labor organization: *Provided further,* That nothing in the above provisions shall be construed to authorize picketing, threatening to picket, or causing to be picketed, any employer where an object thereof is to cause or attempt to cause an employer to discriminate against any employee, or to discriminate against an employee with respect to whom membership in a labor organization has been denied or terminated on some ground other than his failure to tender the periodic dues and the initiation fees uniformly required as a condition of acquiring or retaining membership, or to exclude any labor organization on the ground that such labor organization is not affiliated with a national or international labor organization which represents employees of an employer at the common site: *Provided further,* That nothing in the above provisos shall be construed to permit any attempt by a labor organization to require an employer to recognize or bargain with any labor organization presently prohibited by paragraph (7) of subsection (b): *Provided further,* That if a labor organization engages in picketing for an object described in paragraph (7) of subsection (b) and there has been filed a petition under subsection (c) of section 9, and

a charge under subsection (b) of section 10, the Board shall conduct an election and certify the results thereof within fourteen calendar days from the filing of the later of the petition and the charge".

Strike out language following the colon on line 3, page 23, through the word "subsection" on Line 16, page 23, and substitute therefor the following language: "*Provided further*, That nothing in the above provisos shall apply at the site of the construction, alteration, painting, or repair of a building, structure, or other work involving residential structures of three residential levels or less constructed by an employer who in the last taxable year immediately preceding the year in which the determination under this subsection is made had, in his own capacity or with or through any other person, a gross volume of construction business of $9,500,000 or less, adjusted annually as determined by the Secretary of Labor, based upon the revisions of the Price Index for New One Family Houses prepared by the Bureau of the Census, if the employer within 10 days of being served with the notice required by subsection (g)(2)(A) of this section notifies each labor organization which served that notice in an affidavit that he satisfies the requirements set forth in this subsection:"

Insert on line 10, page 22, immediately following the word "provisos:", the following language: "*Provided further*, That nothing in the above provisos, shall be construed to prohibit any act which was not an unfair labor practice under the provisions of this subsection existing prior to the enactment of such provisos:"

On line 10, page 24, immediately following the word "strike", insert the following ", picket".

Insert on line 23, page 24, immediately following the word "action", the following language: ", provided the Construction Industry Collective Bargaining Committee under the provisions of Title II hereof does not disapprove and notify the labor organization of its disapproval prior to the expiration of said ten days, in which event such strike, picketing or refusal to perform services shall be postponed at least thirty days to give time to the parties involved to reconcile their differences or dispute by collective bargaining, with such assistance as the Federal Mediation and Conciliation Service of the Department of Labor may provide"

By Mr. GLICKMAN:

Section 102 is hereby amended to read as follows:

"The amendments made by this title shall take effect ninety days after the date of enactment of this title: *Provided*, That the provisions of this Act shall not be applicable as to construction work contracted for and on which work has actually started as of ninety days after the enactment of this title."

SENATE—*Tuesday, March 22, 1977*

(Legislative day of Monday, February 21, 1977)

The Senate met at 1 p.m., on the expiration of the recess, and was called to order by Hon. ROBERT C. BYRD, a Senator from the State of West Virginia.

PRAYER

The Chaplain, the Reverend Edward L. R. Elson, D.D., offered the following prayer:

Our Father-God, we thank Thee for the dark days as well as for the bright days. We thank Thee for the gentle rain which fills the streams and waters the soil to bring forth lush meadows and fertile fields. Spare us from gloomy attitudes, pale thoughts, and decisions made in the dark. Keep our spirits bright and clear and transparent. Send Thy light and Thy truth to quicken our faith, sharpen our judgment, and deepen our spiritual insights. Grant us some part in the fulfillment of Thy mighty purpose in the world. God save, bless, and guide the United States and all who serve in its government.

In Thy holy name we pray. Amen.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. EASTLAND).

The assistant legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, D.C., March 22, 1977.

To the Senate:

Being temporarily absent from the Senate on official duties, I appoint Hon. ROBERT C. BYRD, a Senator from the State of West Virginia, to perform the duties of the Chair during my absence.

JAMES O. EASTLAND,
President pro tempore.

Mr. ROBERT C. BYRD thereupon took the chair as Acting President pro tempore.

THE JOURNAL

The ACTING PRESIDENT pro tempore. The Chair recognizes the preeminently distinguished minority leader.

Mr. BAKER. Mr. President, the humble minority leader is grateful to the distinguished occupant of the chair.

Mr. President, I ask unanimous consent that the Journal of the proceedings of Monday, March 21, 1977, be approved.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

QUORUM CALL

Mr. BAKER. Mr. President, I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. BIDEN). Without objection, it is so ordered.

EXECUTIVE SESSION

Mr. ROBERT C. BYRD. Mr. President, there is a nomination on the calendar that has now been cleared on both sides of the aisle. Therefore, I ask unanimous consent that the Senate go into executive session to consider the nomination of Robert Thallon Hall to be an Assistant Secretary of Commerce.

There being no objection, the Senate proceeded to the consideration of executive business.

The PRESIDING OFFICER. The nomination will be stated.

DEPARTMENT OF COMMERCE

The second assistant legislative clerk read the nomination of Robert Thallon Hall, of Virginia, to be an Assistant Secretary of Commerce.

Mr. BAKER. Mr. President, the nomination of Mr. Hall to be an Assistant Secretary of Commerce has been cleared on this side, and there is no objection to the confirmation of the nomination.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the President of the United States be immediately notified of the confirmation of the nomination.

The PRESIDING OFFICER. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate resume the consideration of legislative business.

There being no objection, the Senate resumed the consideration of legislative business.

LAND AND WATER RESOURCES CONSERVATION ACT OF 1977

Mr. ROBERT C. BYRD. Mr. President, there is a bill on the calendar, Calendar No. 50, S. 106, a bill to provide for furthering the conservation, protection, and enhancement of the Nation's land, water, and related resources for sustained use. This measure has been cleared for action on both sides of the aisle, by unanimous consent. Therefore, I ask unanimous consent that it be placed on the unanimous-consent calendar.

The PRESIDING OFFICER. Without objection, it is so ordered.

DISPOSITION OF NOMINATIONS

Mr. ROBERT C. BYRD. Mr. President, at the leadership breakfast this morning, the President made reference to the fact that several nominations are pending before the Senate. He indicated that a good many of these had been sent up recently to the Senate. He was not complaining about the confirmation process. As a matter of fact, he indicated

that, with respect to a majority of the nominations that had not been confirmed, they had been sent up late by the administration.

Upon returning to my office, I ascertained the status of the situation as it pertains to nominations. I call the attention of the Senate to the following facts:

The executive clerk of the Senate has researched his record of major nominations submitted to the Senate by the President since January 20, 1977.

The lists which I will ask to be inserted in the RECORD at the conclusion of my remarks show the dates when nominations were sent to the Senate, the positions to be filled, the Senate committees to which they were referred, and the confirmation dates.

In toto, there have been 250 major nominations, of which 116 are in the military. Of these major nominations, 156 have been confirmed and 94 are pending. Of the 94 pending nominations, 24 were received yesterday, 15 were received this past Friday, 9 were received Monday a week ago—making a total of 48 out of 94 pending nominations that have been received within the past 7 working days.

Mr. President, I ask unanimous consent that the lists to which I have referred be printed in the RECORD.

There being no objection, the lists were ordered to be printed in the RECORD, as follows:

Nominations submitted to the Senate by the President since Jan. 20, 1977 with action thereon, if any:

Date sent up, position, comm. referred to, and date confirmed:

January 20, Sec. of State, FR, January 20.
January 20, Sec. of the Treasury, FIN, January 20.
January 20, Sec. of Defense, AS, January 20.
January 20, Attorney General, JUD, January 25.
January 20, Sec. of Interior, INT, January 20.
January 20, Sec. of Agriculture, AG, January 20.
January 20, Sec. of Commerce, COM, January 20.
January 20, Sec. of Labor, HR, January 26.
January 20, Sec. of HEW, HR, January 24.
January 20, Sec. of HUD, BANK, January 20.
January 20, Sec. of Transportation, COM, January 20.
January 20, Dir. of OMB, BUD, January 20.
January 20, Mbr. Council Economic Advisers, FIN, January 20.
January 20, United Nations Rep., FR, January 26.
January 28, Dep. Sec. Defense, AS, January 31.
January 31, 1 AF general, AS, February 25.
January 31, AF general, AS, February 25.
February 1, FEA Admr., ENR, February 3.
February 2, Sec. of the Army, AS, February 11.
February 2, 15 Army generals, AS, February 25.

March 21, Asst. Sec. HUD, BHUA.
March 21, Asst. Sec. HUD, BHUA.
March 21, 17 AF generals, AS.
Total nominations (major) 250.

Mr. BAKER. Mr. President, I commend the distinguished majority leader for his statement. I must say in that respect that in the 11 years, almost, that I have been in the Senate I have never seen the Senate act with such dispatch and promptness in the matter of the confirmation of nominations and, for that matter, in the dispatch of legislative business that has come to the floor of the Senate.

I have previously commended the majority leader for the efficient way we have moved matters before us and that, of course, includes the matter of disposing

of names that come to the Executive Calendar.

On our side I think in a great number of instances we have cleared these nominations with a minimum of difficulty. I can think of only two or three where there has been any substantial dispute and where any hold or objection has been noted by Members on our side.

I think the Senate has acted with diligence and dispatch in these matters, and I think a great debt of gratitude is owed to the majority leader in that respect.

Mr. ROBERT C. BYRD. Mr. President, I thank the distinguished minority leader. I thank him for his words of praise but, at the same time, I thank him for the cooperation the majority has had from the minority in this regard.

We have had only cooperation. There has been only one nomination to my recollection that failed, and that failed because the nominee withdrew. The one nomination that was confirmed earlier today was confirmed some days ago but that action was vitiated subsequent thereto at the request of two Senators. The matter they wished to have clarified has now been clarified. So I think the record of the Senate has been good. Thousands of nominations have actually been confirmed in this session. The last count I had, which was about a week ago, showed that the Senate had confirmed over 16,000 nominations during this session already.

My reference today has been to the major nominations. As I say, the President was not complaining, but he was interested in having the confirmations of the remaining major nominations acted upon as quickly as possible.

The kind of cooperation the majority has had from the minority, the kind of dedication of effort that Members of the Senate in the pertinent committees on both sides of the aisle have shown thus far in the confirmation process, I think, augers well for speedy action on the remainder of the President's nominations.

I again thank my friend across the aisle.

RESEARCH INTO ADVANCED AVIATION TECHNOLOGY

Mr. BAKER. Mr. President, I was pleased to note that the House approved last Thursday the NASA authorization bill for fiscal year 1978. Included in the total $4.05 billion authorization is approximately $15 million for research into advanced aviation technology, including supersonic transport aircraft. These funds are intended to insure that we will, in the future, have the technological capability to take advantage of new developments in aircraft design.

Last year, the House Subcommmittee on Aviation and Transportation Research and Development held very comprehensive hearings on the future of aviation. The hearings resulted in a report, published in October, which made a number of recommendations regarding the future role of the Federal Government in aviation R. & D. One of the subcommittee's conclusions was that it is clearly in the national interest to greatly expand Government research and development of new technology and to re-evaluate national policy toward development of supersonic transport aircraft.

Mr. President, I commend our colleagues in the House for the very thorough study which they have devoted to this issue, and I fully support their recommendations.

While I do not want to try to second-guess, at this late date, the wisdom of Congress, 1971 decision to discontinue development of an American SST, I believe it is vital to the future of the American aviation industry that we keep open our options and maintain our ability to compete in the world market.

The Anglo-French Concorde is a remarkable technological achievement, regardless of the fact that it consumes more fuel and emits more air and noise pollution than we would desire. The United States has the capability to develop a second-generation SST which will be more fuel-efficient and environmentally acceptable. To abandon future progress in this aspect of aviation R. & D. to France, Great Britain, and the Soviet Union will, in my view, result in severe economic losses to our own aviation industry—industry which generates over a million jobs spread throughout every State.

While we may not be prepared at this point to make a commitment to development of such an aircraft, the small amount of funding contained in the NASA authorization will insure that we have the option to make such a decision in the future. It is my hope, therefore, that this item will be included in the Senate's version of the authorization bill as we consider it in the days ahead.

Mr. President, I am prepared to yield back the remainder of my time.

Mr. ROBERT C. BYRD. I yield back the remainder of my time.

ORDER OF BUSINESS

The PRESIDING OFFICER (Mr. BIDEN). Under the previous order, the Senator from Oklahoma is recognized for not to exceed 15 minutes.

THE F-15 EAGLE

Mr. BARTLETT. Mr. President, the decision by Defense Secretary Harold Brown to cut this year's procurement of F-15 Eagle advance air superiority fighters from the original 108 programed to only 78 is another example of the false economies which are being made by the new administration in the name of streamlining the defense budget. The Carter administration has decided to cut the production rate for F-15 fighters down to 6½ per month, well below the present rate of 9 per month. This arbitrary delay in the F-15 Eagle procurement program not only deprives many American combat air crews of the world's finest air superiority fighter, but it increases the program unit cost to the tune of over $1 million per aircraft.

With a top speed of Mach 2.5, the F-15 Eagle is our fastest, highest flying fighter. Still, advanced technology has made the Eagle far more maneuverable than the old F-4 that it replaces. In fact, the F-15 is nearly as maneuverable as the much smaller F-16. And the Eagle, unlike the F-16, is an all weather fighter capable of tracking and attacking enemy aircraft which are trying to avoid radar detection by flying close to the Earth. Also, the F-15 can climb rapidly to high altitudes in order to engage the Soviet Union's Mig-25 FOXBAT which can fly unopposed high above present air defenses. In 1975, the F-15 set eight climb to altitude records. While its Sparrow missile permits the F-15 to intercept aircraft at long ranges, its Sidewinder missile and 20 mm. cannon permit the F-15 to exploit its superb agility in close air-to-air dogfighting. Although primarily an air superiority fighter, the F-15 has been tested in the ground attack role and can carry more ordnance and has greater range than does the F-16 lightweight fighter. Its long range virtually eliminates the need for tanker support during global deployments. Furthermore, its advanced electronic countermeasures permit the Eagle to operate effectively in the intense air defense environment found on the modern battlefield.

The McDonnell Douglas F-15 Eagle was born in 1965 when the U.S. Air Force decided to develop an air superiority fighter free from the mistakes and errors forced into the ill-starred TFX program, and in this they have succeeded magnificently. After 7 years of careful development, the first F-15A flew in 1972, the first F-15A was delivered to the Air Force in November 1974, and the first F-15 Wing was operational in 1976. Israel has already received four of the 25 F-15 Eagles it purchased to prevent Mig-25's from flying over her sovereign territory, and after extensive operational testing and competition, the Japanese air force found the F-15 best suited to its needs—better than the F-14, F-16, or F-18. Already the sound engineering has payed off in an outstanding safety record. This properly paced program has resulted in the need for few changes to the basic design and has left room for growth and improvement in the F-15 system.

One longtime critic of the Defense Department who had opposed the development of advanced air superiority fighters like the F-14 and F-15, and who still opposed the F-14, recently told the Senate Armed Services Committee that—

> The F-15 has demonstrated that it is a significant improvement in terms of air superiority so that the program could continue; yes. I think also consideration ought to be given as to whether or not some version of the F-15 might be adaptable for carrier service.

This is high praise indeed from Mr. Paul C. Warnke, our chief SALT negotiator, who also maintains that the F-15 is a "cost effective weapon."

More important than meeting the objections of a longtime critic is the ability of the Eagle to meet the current needs of our Air Force. In our report on NATO, submitted to the Senate Armed Services Committee, Senator SAM NUNN, Democrat of Georgia, and I pointed out that the Warsaw Pact superiority in numbers was being coupled with major improvements in the quality of Soviet aircraft. The introduction into Eastern Europe of advanced offensive aircraft like the Mig-23, the SU-19, and the Backfire bomber, along with the excellent Mig-21 and the Mig-25, gives the Soviet Union a long-range, low-altitude penetration capabil-

ity along with the capacity to deny NATO air superiority in the crucial early days of battle when Western ground forces would be dependent upon close air support. The F–15 Eagle is our best countermeasure to both of these Soviet threats and an effective Air Force is our best insurance against an intense "blitzkreig" attack launched with little warning. Just last week, Lt. Gen. Alton Slay, Air Force Deputy Chief of Staff for Research and Development told the Senate Armed Services Committee that the F–15 is the best fighter in the world today and the only aircraft able to meet the increased threat from Soviet all-weather fighters. I had already heard such praise from military commanders in Europe.

President Carter pledged to cut $5 to $7 billion in fat from the defense budget. Instead, he has simply delayed the delivery of additional muscle to our armed services. It makes no sense to deprive our Air Force of the best fighter plane possible, the F–15 Eagle, at a time when the Warsaw Pact has conventional superiority in Europe and when the Soviet Union has the advantage of momentum in deployment of conventional weapons.

Mr. President, I yield the floor.

ORDER OF BUSINESS

The PRESIDING OFFICER. Under the previous order the Senator from Delaware (Mr. ROTH) is recognized for not to exceed 15 minutes.

WILMINGTON BUSING CASE

Mr. ROTH. Mr. President, it was my understanding that the new administration had learned the lessons of Watergate. During his campaign and, indeed, from the day he was elected, President Carter stressed that his would be an open government. He particularly stressed that the Attorney General would be apolitical, in view of the controversy surrounding his nomination. This is one promise, I fear, the Justice Department has not kept.

For the past 2 months I have tried both in writing and by telephone, to arrange a personal meeting with the Attorney General to discuss with him the scope of participation by the Justice Department in the Wilmington busing case pending before the Court of Appeals for the Third Circuit. As early as January 24, I was assured by the then Attorney General-designate in a telephone conversation that he would be pleased to meet with me on this matter—possibly as early as the following week. I followed up that phone call with a letter on January 31, in which I outlined my position and urged that we meet at his earliest convenience.

In late February, when I learned that the Wilmington case had been set for argument on March 30, I again wrote to the Attorney General requesting that we meet as soon as possible since time was of the essence.

Subsequently, I was asked by a representative of the Attorney General to have a preliminary meeting with either the new Solicitor General or the Assistant Attorney General, in charge of civil rights. I agreed to do so. But again, we were never able to make arrangements for a meeting. Continuous efforts in the following weeks to set up such a meeting only resulted in assurance by the Assistant Attorney General that no decision in the Wilmington case would be made until I had met with top Justice Department officials.

Accordingly I was shocked and outraged to learn on the morning of March 18 that the Department of Justice would file a brief in the Wilmington case before the third circuit court of appeals that afternoon. I learned this only through an inquiry by a member of my staff to the Department.

Not only did the Department deliberately deny me the courtesy of a meeting to discuss the Wilmington case, they also refused at this late date to disclose to me the contents of their brief. Numerous phone calls were placed by members of my staff in an attempt to learn the contents of the brief which was then at the printer. My office was advised that we could have a copy late in the afternoon at the same time it was filed in court.

It is hard to square this performance with the Justice Department's assurances that a meeting would be held with me prior to a decision being made as to its participation in the Wilmington case. It is hard to square this performance with assurances of the President that the Justice Department would be apolitical when they refused, in effect to meet with me, and at the same time the Wilmington papers reported the Attorney General and other top officials—as they should have—met with my democratic colleague from Delaware. It is hard to square this performance with the campaign promises that this would be an open government.

This situation is in marked contrast to actions of the previous administration on this issue. Last year, at my request, former Attorney General Levi and former Solicitor General Bork sat down with the entire Delaware delegation as well as the Democratic Governor and State attorney general to discuss this matter. At that time the discussion centered on participation by the Department of Justice in the Wilmington decision before the Supreme Court.

I am deeply troubled by this turn of events. I believe it seriously undermines the public's confidence in the new administration's promises of openness in government and of a nonpartisan Attorney General. It also violates the important principle of public trust placed upon the Nation's highest legal officials.

The reason I was so disappointed with not having an opportunity to discuss this matter with the Attorney General is that I wanted to stress the importance of this case to the people of Delaware in light of recent Supreme Court decisions. The fact that I was not permitted the courtesy of the meeting troubles me, but even more troubling is the substances of the Department's brief in this case.

What concerns me most is the new administration's failure to implement the principle that in order to find a constitutional violation the Court must find discriminatory intent. The Supreme Court recently made it clear that this intent must be present in cases of discrimination. Yet the Justice Department's brief ignores this principle and, therefore, it is unfair to the people of Delaware.

In its liability decision, the district court conceded that the Delaware Educational Advancement Act was not purposefully racially discriminatory. Nonetheless the court held the statute unconstitutional solely because it had significant racial impact. The recent Supreme Court decision in Washington against Davis and Village of Arlington Heights against Metropolitan Housing Development Corporation make it clear that official action will not be held unconstitutional solely because it results in a racially disproportionate impact. The Supreme Court decisions require that proof of a racially discriminatory intent or purpose is essential to establish a violation of the Constitution.

Quite frankly, I was disappointed when the former Solicitor General failed to address the question of liability. But at least, he remained somewhat neutral, taking no position on the question other than noting it might be foreclosed by the Supreme Court's summary affirmance.

The brief filed before the third circuit urges that court not to reconsider the liability question. It attempts to explain away this direct conflict between the district court's findings and the Supreme Court's clear pronouncements, by stating that the district court opinion "may reflect a confusion between discriminatory intent or purpose with discriminatory animus or evil motive" and suggests that "this Court need not determine how to resolve this apparent internal inconsistency * * *."

Such "legalese" blatantly evades the critical question of discriminatory intent. By couching the question in terms of how much busing there should be between city and suburbs, the brief avoids the real question of why there should be any busing at all.

Regarding the remedy decision, the brief states that the district court based its judgment on erroneous remedial standards of racial balance. However, unlike the Book brief which clearly stated that this judgment should not stand, it recommended that the district court judgment be affirmed with clarifying instructions. Only if this first solution is unsatisfactory does the brief suggest vacating the judgment on remedy.

I submit, Mr. President, that the Davis brief is nothing more than a copout by this administration on a vital issue that affects us all, both children and adults alike.

If we are to have an open and truly responsive government as the President has promised, I suggest that the Justice Department go back to the drawing boards and think again how to best approach this significant issue in an honest and forthright manner.

It is obvious that this is one case where the people will not be fooled by symbolism and legal hairsplitting. The people need and deserve better answers.

Mr. President, I ask unanimous consent that my letters to the Attorney General be printed in the RECORD.

There being no objection, the letters

were ordered to be printed in the RECORD, as follows:

JANUARY 31, 1977.

Hon. GRIFFIN B. BELL,
Attorney General of the United States, Department of Justice, Washington, D.C.

DEAR MR. ATTORNEY GENERAL: In our telephone conversation of January 24, 1977, I stressed the significance of the Wilmington desegregation case, not only in its impact on my constituency, but in its ramifications for almost every metropolitan area in the Nation.

Although the Justice Department did select the Wilmington decision as an appropriate test case, its participation this far appears to be limited only to the remedy phase of the litigation. While I am in complete agreement regarding the excess of remedy prescribed by the District Court, I believe it is imperative to address the liability phase as well.

Although the district court in the Wilmington case ruled that certain provisions of the Delaware Educational Advancement Act which excluded the Wilmington School District from school reorganization were unconstitutional, it conceded that the provisions were not purposefully racially discriminatory. The two-judge majority opinion clearly stated:

"We cannot conclude, as plaintiffs contend that the provision excluding the Wilmington District from school reorganization were purposefully racially discriminatory. . . . In short, the record does not demonstrate that a significant purpose of the Educational Advancement Act was to foster or perpetuate discrimination through school (district) reorganization." *Evans* v. *Buchanan*, 393 F. Supp. 428, 439, (D. Del. 1975).

Judge Layton underscored this finding in his dissent at p. 450. Nonetheless, the majority held the statute unconstitutional solely because it had significant racial impact.

The recent Supreme Court decisions in *Washington* v. *Davis* and *Village of Arlington Heights* v. *Metropolitan Housing Development Corp.*, make it clear that official action will not be held unconstitutional *solely* because it results in a racially disproportionate impact. Proof of a racially discriminatory intent or purpose is essential to establish a violation of the Constitution.

While I recognize the district court's decision was affirmed *per* curiam by the Supreme Court on November 17, 1975, such *pro forma* review cannot be deemed satisfactory when it leaves unresolved fundamental legal issues. The direct conflict between the district court's findings and the Supreme Court's clear pronouncements should be ample grounds for the Third Circuit Court of Appeals to review the liability as well as remedy. At a minimum, action similar to that taken by the Supreme Court in the *Austin* and *Indianapolis* cases appears warranted. To do otherwise, will essentially deprive the Wilmington case of appellate review since the liability decision went directly to the Supreme Court without the benefit of intermediate appellate review. Such judicial procedure can only further undermine public confidence in the judiciary.

I would appreciate an opportunity to meet with you at your earliest convenience to discuss the scope of participation by your Department before the Third Circuit.

With best wishes in your new post.

Sincerely,

WILLIAM V. ROTH, Jr.,
U.S. Senate.

FEBRUARY 28, 1977.

Hon. GRIFFIN B. BELL,
Attorney General of the United States, Department of Justice, Washington, D.C.

DEAR MR. ATTORNEY GENERAL: This is a follow-up to my letter of January 31 requesting a meeting to discuss the scope of participation by the Justice Department in the Wilmington Desegregation case.

The case has been set for hearing before the Court of Appeals for the Third Circuit on March 30.

In view of the short time available I would appreciate your immediate response.

Sincerely,

WILLIAM V. ROTH, Jr.,
U.S. Senate.

Mr. ROTH. Mr. President, I yield back the remainder of my time.

ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. Under the previous order, there will now be a period for the transaction of routine morning business not to extend beyond the hour of 2 p.m., with statements therein limited to 5 minutes each.

QUORUM CALL

Mr. WALLOP. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. STAFFORD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AUTHORITY FOR THE SUBCOMMITTEE ON HEALTH AND SCIENTIFIC RESEARCH TO MEET ON MARCH 29

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that in the event the Senate has taken final action on Senate Resolution 110 by Tuesday, March 29, the Subcommittee on Health and Scientific Research of the Committee on Human Resources be authorized to meet on that date between the hours of 2 and 5 p.m. during the session of the Senate.

This has been cleared with the minority.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Chirdon, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

REPORT ON INTERNATIONAL BROADCASTING—MESSAGE FROM THE PRESIDENT—PM 54

The Presiding Officer laid before the Senate the following message from the President of the United States, which was referred to the Committee on Foreign Relations:

To the Congress of the United States:

In my letters to the Speaker and to the President of the Senate of January 31, I stated that my advisers were reviewing a report on international broadcasting in compliance with Section 403 of the Foreign Relations Authorization Act, Fiscal Year 1977. That review is now finished.

This Administration firmly supports U.S. international broadcasting as part of our commitment to the freer flow of information and ideas. Among the most valuable instruments we have for this purpose are our international radios—the Voice of America (VOA) and Radio Free Europe/Radio Liberty (RFE/RL)—which for many years have been a vital part of the lives of the peoples of Eastern Europe and the Soviet Union. My review of the U.S. international broadcasting effort has led me to the following conclusions, which are reflected in the attached report:

(1) Present U.S. international broadcast transmission facilities are inadequate; 16 additional 250 Kilowatt transmitters for broadcasts to the Soviet Union and Eastern Europe are needed by VOA and RFE/RL and can be installed in a period of three to five years;

(2) There is no significant unused transmitter capacity available for sharing among U.S. broadcasters or between U.S. and other Western broadcasters;

(3) A comprehensive outline of U.S. worldwide broadcasting needs indicates a requirement for 12 additional VOA transmitters for broadcast to Asia and Africa, beyond those required for European broadcasts;

(4) Extending Board for International Broadcasting-type transmissions to other nations where access to information is restricted would be highly impractical for a variety of reasons.

This report is transmitted pursuant to the requirements of P.L. 94–350, and I believe that implementation of its recommendations can assure the United States of effective broadcasting programs in the years ahead.

JIMMY CARTER.

THE WHITE HOUSE, *March 22, 1977.*

MESSAGE FROM THE HOUSE

At 1:03 p.m., a message from the House of Representatives delivered by Mr. Berry, one of its reading clerks, announced that the House has passed the following bills in which it requests the concurrence of the Senate:

H.R. 422. An act to amend the Tariff Schedules of the United States to provide duty-free treatment of any aircraft engine used as a temporary replacement for an aircraft engine being overhauled within the United States if duty was paid on such replacement engine during a previous importation;

H.R. 1404. An act for the relief of Smith College, Northampton, Mass.;

H.R. 3259. An act to continue to suspend for a temporary period the import duty on certain horses;

H.R. 3712. An act to amend the Library Services and Construction Act to extend the authorizations of appropriations contained in such Act; and

H.R. 4800. An act to extend the Emergency Unemployment Compensation Act of 1974 for an additional year, to revise the trigger provisions in such Act, and for other purposes.

COMMUNICATIONS FROM EXECUTIVE DEPARTMENTS, ETC.

The PRESIDING OFFICER laid before the Senate the following communications which were referred as indicated:

EC–948. A letter from the Comptroller General of the United States transmitting, pursuant to law, a deferral of Department of the Army, Corps of Engineers, budget authority that has not yet been reported to the Congress; jointly, pursuant to the order of January 30, 1975, to the Committees on Appropriations, the Budget, and Environment and Public Works, and ordered to be printed.

EC–949. A letter from the Acting Assistant Secretary of Defense, Installations and Logistics, transmitting, pursuant to law, the report of Department of Defense Procurement from Small and Other Business Firms for October 1976 (with an accompanying report); to the Committee on Banking, Housing and Urban Affairs.

EC–950. A letter from the Secretary of Transportation transmitting, pursuant to law, the calendar year 1976 report on the utilization of the authority granted to designate and rent inadequate quarters, lease housing, and hire quarters (with an accompanying report); to the Committee on Commerce, Science, and Transportation.

EC–951. A letter from the Administrator of the Federal Energy Administration transmitting, pursuant to law, a revised report to Congress pursuant to the Emergency Petroleum Allocation Act of 1973 (with an accompanying report); to the Committee on Energy and Natural Resources.

EC–952. A letter from the chairman of the Board for Sun Co. transmitting, pursuant to law, a profile of the Sun Co. businesses detailing the financial performance of 10 major segments of the Sun Co. in 1976 (with an accompany report); to the Committee on Energy and Natural Resources.

EC–953. A letter from the Secretary of the Interior transmitting a draft of proposed legislation to amend section 2 of the act of June 30, 1954, providing for the continuance of civil government for the Trust Territory of the Pacific Islands, and for other purposes (with accompanying papers); to the Committee on Energy and Natural Resources.

EC–954. A letter from the Chairman of the United States International Trade Commission transmitting, pursuant to law, the report and press release on sugar (investigation No. TA–201–16) (with an accompanying report and papers); to the Committee on Finance.

EC–955. A letter from the Acting Assistant Administrator for Legislative Affairs for the Department of State transmitting, pursuant to law, the first semiannual report concerning the participation of small business in procurement under programs of the Agency for International Development (with an accompanying report); to the Committee on Foreign Relations.

EC–956. A letter from the Acting Comptroller General of the United States transmitting, pursuant to law, a list of reports of the General Accounting Office for the month of February 1977 (with an accompanying report); to the Committee on Governmental Affairs.

EC–957. A letter from the Attorney General transmitting, pursuant to law, a report on the Department of Justice's intention to modify the system of records maintained by the Immigration and Naturalization Service, in accordance with the Privacy Act (with an accompanying report); to the Committee on Governmental Affairs.

EC–958. A letter from the Attorney General transmitting, pursuant to law, a report of the Department of Justice's intention to establish a new system of records, the Tax Division Special Projects Files, in accordance with the Privacy Act (with an accompanying report); to the Committee on Governmental Affairs.

EC–959. A letter from the Attorney General transmitting, pursuant to law, a report of the Department of Justice's intention to modify two existing systems of records, the General Personnel Records and the Employee Locator File, in accordance with the Privacy Act (with an accompanying report); to the Committee on Governmental Affairs.

EC–960. A letter from the Chairman of the Federal Election Commission transmitting, pursuant to law, a copy of correspondence which the Commission has sent to the Office of Management and Budget (with accompanying papers); to the Committee on Rules and Administration.

PETITIONS

The PRESIDING OFFICER laid before the Senate the following petitions which were referred as indicated:

POM–99. Legislative Resolution No. 24 adopted by the legislature of the State of Nebraska memorializing the U.S. Congress to support the appropriation of $7,015,000 for the continuation of construction for the North Loup Division which would start the actual construction of the Kalmus Dam for fiscal year 1978; to the Committee on Appropriations:

"LEGISLATIVE RESOLUTION 24

"Whereas, the North Loup Division, Pick-Sloan Missouri Basin Program, Nebraska, was authorized by the Congress of the United States in October 1972; and

"Whereas, the Congress of the United States has appropriated funds for the construction in fiscal year 1977 for this project; and

"Whereas, the North Loup Division has strong local support from the owners of irrigable land to be served by each of the projects, and from the communities which will benefit from the construction of these projects; and

"Whereas, there is and will continue to be strong need to maintain, strengthen and enhance Nebraska's basic industry, agriculture; and

"Whereas, there is a definite need in these project areas for surface irrigation water to help the ground water recharge which shows signs of very serious depletion; and

"Whereas, Nebraska's people need the fish and wildlife and recreational opportunities that can be provided by the North Loup developments; and

"Whereas, the Congress of the United States will conduct hearings on appropriations for the North Loup Division forthwith.

"Now, therefore, be it resolved by the members of the Eighty-Fifth Legislature of Nebraska, first session:

"1. That the First Session of the Eighty-fifth Legislature of Nebraska strongly supports the continued funding of the uninterrupted construction and development of the North Loup Division.

"2. That the Legislature memorializes Congress and the respective Appropriation Committees thereof to support the appropriations of $7,015,000 for the continuation of construction for the North Loup Division which would start actual construction of the Kalmus Dam for fiscal year 1978.

"3. That copies of this resolution, suitably engrossed, be transmitted by the Clerk of the Legislature to the United States Senate and House of Representatives of the Congress, to Honorable John L. McClellan, Chairman of the Senate Appropriations Committee, and Honorable George H. Mahon, Chairman of the House Appropriations Committee, and to each member from Nebraska in the Senate and House of Representatives of the United States."

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. PROXMIRE, from the Committee on Banking, Housing and Urban Affairs:

S. Res. 123. An original resolution waiving the provisions of section 402(a) of the Congressional Budget Act of 1974 with respect to S. 1070. Referred to the Committee on the Budget.

By Mr. LONG, from the Committee on Finance:

A special report entitled "Allocation of Budget Totals for Fiscal Year 1977—Third Concurrent Resoltuion on the Budget" (Rept. No. 95–62).

EXECUTIVE REPORTS OF COMMITTEES

As in executive session, the following reports of committees were submitted:

By Mr. SPARKMAN, from the Committee on Foreign Relations:

Hodding Carter III, of Mississippi, to be an Assistant Secretary of State.

Richard Holbrooke, of the District of Columbia, to be an Assistant Secretary of State.

John E. Reinhardt, of Maryland, to be Director of the U.S. Information Agency.

John J. Gilligan, of Ohio, to be Administrator of the Agency for International Development.

Lucy Wilson Benson, of Massachusetts, to be Under Secretary of State for Coordinating Security Assistance programs.

Terence A. Todman, of the Virgin Islands, to be an Assistant Secretary of State.

Patsy T. Mink, of Hawaii, to be Assistant Secretary of State for Oceans and International Environmental and Scientific Affairs.

(The above nominations were reported with the recommendation that they be confirmed, subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

By Mr. PROXMIRE, from the Committee on Banking, Housing and Urban Affairs:

Jay Janis, of Florida, to be Under Secretary of Housing and Urban Development.

Robert Campbell Embry, Jr., of Maryland, to be an Assistant Secretary of Housing and Urban Development.

Lawrence B. Simons, of New York, to be an Assistant Secretary of Housing and Urban Development.

(The above nominations were reported with the recommendation that they be confirmed, subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

By Mr. LONG, from the Committee on Finance:

Thomas D. Morris, of the District of Columbia, to be Inspector General, Department of Health, Education, and Welfare.

Arabella Martinez, of the District of Columbia, to be an Assistant Secretary of Health, Education, and Welfare.

(The above nominations were reported with the recommendation that they be confirmed, subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

HOUSE BILLS REFERRED

The following bills were each read twice by their titles and referred as indicated:

H.R. 422. An act to amend the Tariff Schedules of the United States to provide duty-free treatment of any aircraft engine used as a temporary replacement for an aircraft engine being overhauled within the United States if duty was paid on such replacement engine during a previous importation; to the Committee on Finance.

H.R. 1404. An act for the relief of Smith College, Northampton, Mass.; to the Committee on Finance.

H.R. 3259. An act to continue to suspend for a temporary period the import duty on certain horses; to the Committee on Finance.

H.R. 3712. An act to amend the Library Services and Construction Act to extend the authorizations of appropriations contained in such act; to the Committee on Human Resources.

H.R. 4800. An act to extend the Emergency Unemployment Compensation Act of 1974 for an additional year, to revise the trigger provisions in such act, and for other purposes; to the Committee on Finance.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first time and, by unanimous consent, the second time, and referred as indicated.

By Mr. CANNON (for himself, Mr. ROBERT C. BYRD, Mr. WILLIAMS, Mr. CRANSTON, Mr. KENNEDY, Mr. CLARK, Mr. CASE, and Mr. MATHIAS):

S. 1072. A bill to establish a universal voter registration program, and for other purposes; to the Committee on Rules and Administration.

By Mr. HANSEN:

S. 1073. A bill to amend the Federal Meat Inspection Act to require that imported meat and meat food products made in whole or in part of imported meat be labeled "imported" at all stages of distribution until delivery to the ultimate consumer; to the Committee on Agriculture, Nutrition, and Forestry.

By. Mr. HASKELL:

S. 1074. A bill to establish a national rangelands rehabilitation and maintenance program; to the Committee on Energy and Natural Resources.

By Mr. EASTLAND:

S. 1075. A bill for the relief of Joseph Spears Buchanan, Jr.; to the Committee on the Judiciary.

By Mr. GARN:

S. 1076. A bill to provide that the laws restricting trade between points in the United States to vessels of the United States shall not apply to inflatable boats used in river running; to the Committee on Commerce, Science, and Transportation.

By Mr. INOUYE:

S. 1077. A bill to regulate certain interstate commerce and to assure that essential maritime transportation is provided, and for other purposes; to the Committee on Commerce, Science, and Transportation.

By Mr. PROXMIRE (for himself and Mr. BROOKE):

S. 1078. A bill to amend section 245 of the National Housing Act to revise the experimental mortgage insurance program; to the Committee on Banking, Housing and Urban Affairs.

By Mr. ABOUREZK:

S. 1079. A bill for the relief of Russell Warren Howe; to the Committee on the Judiciary.

By Mr. MATHIAS:

S. 1080. A bill to provide an opportunity to individuals to make financial contributions, in connection with the payment of their Federal income tax, for the advancement of the arts and the humanities; to the Committee on Finance.

By Mr. BARTLETT (for himself and Mr. BELLMON) (by request):

S. 1081. A bill to amend the laws relating to the Osage Tribe in Oklahoma;

S. 1082. A bill to amend the laws relating to the Osage Tribe in Oklahoma;

S. 1083. A bill to amend the laws relating to the Osage Tribe in Oklahoma;

S. 1084. A bill to amend the laws relating to the Osage Tribe in Oklahoma;

S. 1085. A bill to amend the laws relating to the Osage Tribe in Oklahoma;

S. 1086. A bill to amend the laws relating to the Osage Tribe in Oklahoma;

S. 1087. A bill to amend the laws relating to the Osage Tribe in Oklahoma;

S. 1088. A bill to amend the laws relating to the Osage Tribe in Oklahoma; and

S. 1089. A bill to amend the laws relating to the Osage Tribe in Oklahoma; to the Committee on Indian Affairs.

By Mr. INOUYE:

S. 1090. A bill to provide for improved labor-management relations in the Federal service, and for other purposes; to the Committee on Governmental Affairs.

By Mr. BENTSEN:

S. 1091. A bill to encourage the use of life-cycle cost procurement as the general basis for Federal procurement decisions; to the Committee on Governmental Affairs.

By Mr. PELL:

S. 1092. A bill to amend title 23 of the United States Code in order to make certain improvements in the Federal-aid highway program; to the Committee on Environment and Public Works.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. CANNON (for himself, Mr. ROBERT C. BYRD, Mr. WILLIAMS, Mr. CRANSTON, Mr. KENNEDY, Mr. CLARK, Mr. CASE, and Mr. MATHIAS):

S. 1072. A bill to establish a universal voter registration program, and for other purposes; to the Committee on Rules and Administration.

THE UNIVERSAL VOTER REGISTRATION ACT OF 1977

Mr. CANNON. Mr. President, I am introducing today, with Senators ROBERT C. BYRD, WILLIAMS, CRANSTON, KENNEDY, CLARK, CASE, and MATHIAS, a bill entitled, "The Universal Voter Registration Act of 1977," to establish a universal voter registration program for Federal elections. This legislation was submitted to the Congress today by President Carter, and has our strong support.

The provisions of this bill were developed in close consultation with the President, Vice President MONDALE, Representative FRANK THOMPSON, JR., of New Jersey, and many other Members of the Senate and House. It is also being introduced today in the House of Representatives by Representative THOMPSON. As chairman of the Committee on Rules and Administration, I hope to hold early hearings to receive the views of my colleagues and members of the public on this important legislation.

The goal of the Universal Voter Registration Act of 1977 is to increase citizen participation in the electoral process. First, it will permit all those individuals who are qualified under State or Federal law to vote in Federal elections, to register and vote in Federal elections at an appropriate polling place on election day. This bill will not affect existing State voter registration laws and procedure, except as it will require States to also permit individuals to register and vote at the polling places on election day in Federal elections.

The second, and equally important, purpose of this bill is to provide financial and other forms of assistance to encourage States to provide expanded opportunities for voter registration, both before and on election day, and to assist them in modernizing the administration of elections and voter registration. Recognizing the responsibilities of State and local governments in this vital part of the electoral process, the bill would provide approximately $48 million over a 2-year period directly to the States under three different grant programs in the bill. These funds can be used to increase both the number of registered voters and voter turnout, improve voter registration and election procedures, employ trained personnel to administer elections and voter registration, and for other purposes set out in the bill, including providing the necessary funds to those units of general local government in the States responsible for such matters.

In 1976, only 55.6 percent of the citizens of voting age in the United States voted in the Presidential election. Significantly, in those States where a voter does not have to register prior to election day in order to vote, the turnout was much higher. In Minnesota, where election day registration at the polls is available, over 72 percent voted, the highest turnout in the Nation. In North Dakota, where preregistration prior to voting is not a requirement, 68.9 percent voted. In Wisconsin 66 percent voted where many parts of the State do not require preregistration, and those that do, permit election day registration at the polls. In Maine, over 65 percent voted and in Oregon, over 63 percent voted where registration at designated locations is permitted on election day.

We join President Carter in his goal for greater participation by all citizens in the selection of our Nation's leaders and believe the availability of election day registration at the polls, and funds to assist the States with their voter registration and turnout programs will help to achieve that laudable objective.

I ask unanimous consent that a summary of the bill, a table showing potential grants to the States if the act had been in effect in 1976, a report of the Library of Congress on Registration and Voting in the Presidential Election of 1976, and the text of the bill be printed at this point in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 1072

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "Universal Voter Registration Act of 1977".

FINDINGS AND PURPOSE

SEC. 2. (a) The Congress hereby finds that—

(1) the Congress has authority, under sections 4 and 8 of article I, section 1 of article II, article VI, sections 1 and 5 of article XIV, article XV, and other provisions of the Constitution of the United States, to regulate the time and manner in which citizens may register for, and vote in, elections for Federal office; and

(2) the establishment of national standards for voter registration with respect to elections for Federal office would facilitate the participating of citizens in the electoral process and would remove unequal barriers regarding such participation.

(b) It is the purpose of this Act—

(1) to establish uniform practices with respect to the time and manner in which citizens may register for, and vote in, elections for Federal office, including practices which permit citizens qualified to vote in Federal elections under State law to register for, and vote in, a Federal election at an appropriate polling place on the date of such election; and

(2) to provide financial and other assistance to encourage States to provide expanded opportunities for voter registration before and on the date of Federal elections and State or local elections, and to modernize the administration of elections and voter registration.

DEFINITIONS

SEC. 3. For the purposes of this Act—

(1) the term "Administrator" means the Administrator of Voter Registration appointed under section 4(b)(1);

(2) the term "Commission" means the Federal Election Commission;

(3) the term "Federal office" means the office of President or Vice President, or the office of elector for President or Vice President, or the office of Senator or Representative in, or Delegate or Resident Commissioner to, the Congress;

(4) the term "Federal election" means any general election and any special election, including any runoff election held with respect to a speical election, held for the purpose of electing candidates for any Federal office;

(5) the term "State" means each State of the United States, the District of Columbia, the Commonwealth of Puerto Rico, and any territory or possession of the United States;

(6) the term "State or local election" means any general election for public office other than a Federal election;

(7) the term "State or local offical" means any individual who acts as an official or agent of a government of a State or of a unit of general local government, an election board of a unit of general local government, or a voter registration board of a unit of general local government, to register qualified voters or to conduct or supervise any Federal election in a State; and

(8) the term "unit of general local government" means any city, county, town, parish, village, or other general purpose political subdivision of a State.

ESTABLISHMENT AND ADMINISTRATION

SEC. 4. (a) There are hereby established in the Federal Election Commission the positions of Administrator of Voter Registration and Associate Administrator of Voter Registration.

(b)(1) The Commission shall appoint the Administrator, who shall be responsible for administering the provisions of this Act. The Administrator shall be paid at the annual rate of basic pay in effect, from time to time, for level V of the Executive Schedule (5 U.S.C. 5316).

(2) The Commission shall appoint the Associate Administrator of Voter Registration, who shall perform such duties as may be assigned by the Administrator. During the absence or incapacity of the Administrator or during a vacancy in such position, the Associate Administrator shall act as Administrator.

(3) The Administrator and the Asssociate Administrator shall not be members of the same political party.

(c) The Administrator shall be accountable to the Commission. The Administrator shall report directly to the Commission and may not be required to report to the Commission through the staff director of the Commission. The Administrator shall coordinate, with the staff director of the Commission, all administrative and personnel matters relating to the administration of the provisions of this Act, with a view toward minimizing the costs of such administration. Any dispute arising between the Administrator and the staff director of the Commission relating to such administrative or personnel matters shall be resolved by the Commission.

DUTIES AND POWERS

SEC. 5. (a) The Administrator shall, under the direction of the Commission—

(1) establish and administer a voter registration program for Federal elections in accordance with this Act;

(2) subject to the provisions of subsection (b), and in coordination with the Secretary of Commerce, provide for the collection, analysis, and publication of information concerning voter registration in the United States;

(3) provide information and technical assistance to State or local officials concerning voter registration, and assist the Commission in carrying out its national clearinghouse functions under section 315(b) of the Federal Election Campaign Act of 1971 (2 U.S.C. 438(b));

(4) provide for the use of such facilities and supplies, in consultation with the staff director of the Commission, as may be necessary to carry out the provisions of this Act;

(5) subject to approval by the Commission, appoint such personnel as may be necessary to carry out the provisions of this Act without regard to the provisions of Title 5, United States Code, governing appointments in the competitive service;

(6) subject to approval by the Commission, appoint and fix the pay of experts and consultants for temporary services as authorized in section 3109 of title 5, United States Code; *Provided, however,* that such rates of pay for individuals shall not exceed the daily equivalent of the annual rate of basic pay in effect for grade GS–18 of the General Schedule; and

(7) take such other action as may be necessary to carry out the provisions of this Act.

(b) No information shall be disclosed relating to the identity of any individual voter in any publication made under subsection (a)(2) or in any report made, or information furnished, under section 13.

(c) The compensation of any personnel appointed by the Administrator under subsection (a)(5), and any experts and consultants appointed by the Administrator under subsection (a)(6), shall be paid by the Commission from amounts appropriated under section 16.

VOTER REGISTRATION

SEC. 6. (a) Each State and unit of general local government shall permit any individual who is eligible to register to vote in any Federal election under the laws of the State involved, or under any applicable Federal law, to so register and vote on the date of the Federal election involved at the polling place at which such individual would have been permitted to vote if such individual registered to vote before the date of such election.

(b)(1) Any individual who registers to vote at a polling place on the date of any Federal election in accordance with subsection (a) shall, if so required by the State or unit of general local government involved, establish his identity and place of residence at the time of such registration by—

(A) executing at such polling place an affidavit which the State or unit of general local government involved shall provide and which (i) attests that such individual meets the qualifications for voting under the laws of such State or under any applicable Federal law; (ii) lists such qualifications; and (iii) includes on its face a summary of the penalties established by section 11; and

(B) submitting either—

(i) a form identification establishing the identity and place of residence of such individual, which has been approved by the Commission; or

(ii) an affidavit attesting to the identity and place of residence of the individual desiring to register to vote under this session, which is executed by a person who is registered to vote at the polling place involved and is present at such polling place with such individual. The requirement of the submission of such an affidavit shall not be deemed to be a test or device within the meaning of the Voting Rights Act of 1965, as amended (42 U.S.C. 1973aa.).

(2) If a State or unit of general local government establishes or administers any rule or procedure which permits an individual to vote in a Federal election if such individual is present at the polling place involved before the closing of such polling place on the date of the election involved, then such State or unit of general local government shall establish and administer rules and procedures which permit an individual to register to vote under subsection (a), and, when registered, to vote, if such individual is present at the polling place involved before the closing of such polling place on the date of the election involved.

(3) A State or unit of general local government may not require an individual to submit more than one form of identification under paragraph (1)(B)(i) in order to establish the eligibility of such individuals to vote in the Federal election involved.

(4) The effective period of any registration made by any individual under subsection (a) may not be less than the effective period applicable to any registration made by any other method or procedure which is permitted by the State or unit of general local government involved.

(c) Nothing contained in this Act shall be construed to limit the power of any State to prescribe the qualifications for voting in any Federal election conducted in such State.

FINANCIAL ASSISTANCE

SEC. 7. (a) The Commission shall make grants to the States in accordance with the provisions of this section in order to assist the States in establishing voter registration programs under the provisions of this Act. Such grants shall be made in a manner designed to facilitate the establishment of such programs for use in the first general election for Federal office held after the date of the enactment of this Act and in each Federal election thereafter.

(b)(1) Subject to the provisions of paragraph (2), each State may receive for each general election for Federal office an amount equal to—

(A) 20 cents multiplied by the number of voters who cast ballots in such State in the most recent quadrennial general election for Federal office, if the Commission determines that such State will be in compliance with the provisions of section 6(a) at the time of the election for Federal office with respect

to which an allocation of funds is made by the Commission under this section;

(B) 20 cents multiplied by the number of voters who cast ballots in such State in the election for Federal office with respect to which an allocation of funds is made by the Commission under this section, if (i) such State has transmitted a plan to the Commission under subsection (c); (ii) the Commission approves such plan; and (iii) the Commission determines that such plan will be in effect before the date of such election; and

(c) 20 cents multiplied by the number of voters who cast ballots in such State in the election for Federal office with respect to which an allocation of funds is made by the Commission under this section, if the Commission determines that such State has placed in effect for State and local elections the method of voter registration established in section 6(a).

(2) No State shall receive any payments under subparagraph (B) or subparagraph (C) of paragraph (1) for any election for Federal office unless such State is eligible for payments under subparagraph (A) of paragraph (1) with respect to such election. No such payments shall be made in the case of any special election, or any runoff election held with respect to a special election, for Federal office.

(c)(1) In order to become eligible for financial assistance under subsection (b)(1)(B), a State shall transmit to the Administrator a plan for a voter registration outreach program in such State. Any such plan may include proposals relating to voter registration by mail, voter registration through the use of mobile units and mobile registrars, bilingual voter registration programs, other similar methods for increasing the number of registered voters in such State, and other proposals designed to improve voter registration methods and procedures. Any financial assistance received by any State under subsection (b)(1)(B) shall be used only for the purposes referred to in the preceding sentence. A State may provide all or part of such financial assistance to units of general local government located in such State to be used for such purposes.

(2) The Administrator shall review each plan transmitted under paragraph (1) shall submit to the Commission a recommendation with respect to approval or disapproval of such plan. The Commission shall determine whether to approve such plan within a reasonable time (which may not exceed 21 days) after receiving such recommendation, and shall allow maximum flexibility to each State in determining the manner in which it will carry out any plan approved by the Commission.

(d) Any State may use funds received under subsection (b)(1)(A) and subsection (b)(1)(C) for the following purposes—

(1) defraying the costs of voter registration as required in section 6(a);

(2) employing and training personnel who administer elections and voter registration;

(3) registering voters by mail;

(4) gathering and disseminating information on voting and voter registration;

(5) computerizing and otherwise modernizing election and voter registration records and procedures;

(6) improving methods of absentee voter registration and absentee voting;

(7) conducting surveys and canvassing relating to voter registration;

(8) establishing mobile registration and other methods designed to increase the number of individuals who register to vote and vote;

(9) providing for bilingual voter information, voter registration, and voting; and

(10) providing assistance to units of general local government in such State to enable such units to carry out the purposes described in paragraph (1) through paragraph (9).

(e) In determining whether any State is eligible to receive payments under subsection (b)(1)(C), the Commission may waive the requirements established in section 6(a) with respect to any local election in any jurisdiction or district which is not a general purpose political subdivision of such State.

(f)(1) Any State receiving any financial assistance under this section shall—

(A) except as provided in paragraph (2), use such financial assistance so as to supplement the amount of State and local funds that would be available, in the absence of Federal funds for the purposes for which funds are available under this section;

(B) establish such fiscal control and accounting procedures as may be necessary to assure the proper disbursement of, and accounting for, Federal funds paid to such State (including such funds paid by such State to units of general local government) under this Act; and

(C) make such reports in such form and containing such information as the Commission may reasonably require to carry out the provisions of this Act, and keep such records, and afford such access to such records, as the Commission may find necessary to verify the accuracy of such reports.

(2) The Commission may waive the application of the requirement established in paragraph (1)(A) in the case of any State, if the Commission determines that in excess of 90 percent of the individuals who are eligible to register to vote in such State are so registered to vote in elections for Federal office in such State.

(g) Payments made by the Commission under subsection (b)(1)(A) shall be made before the date of the Federal election with respect to which the State involved is entitled to receive payments, with necessary adjustments on account of overpayments or underpayments. Payments made by the Commission under subsection (b)(1)(B) or subsection (B)(1)(C) may be in installments and in advance, with necessary adjustments on account of overpayments or underpayments.

(h) If the sums appropriated under section 16 for any fiscal year for making payments to States under this section are not sufficient to pay in full the total amounts which all States are entitled to receive under this section for such fiscal year, the maximum amounts which all States are entitled to receive under this section for such fiscal year shall be ratably reduced by the Commission. In case additional funds become available for making such payments for any fiscal year during which the preceding sentence is applicable, such reduced amounts shall be increased on the same basis as they were reduced.

(i)(1) Any State which does not require any registration as a prerequisite to voting in any election for Federal office in such State shall be considered to be in compliance with the provisions of section 6(a) and shall be eligible to receive financial assistance under subsection (b)(1)(A). Any State which does not require any registration as a prerequisite to voting in any State or local election in such State shall be considered to be in compliance with the provisions of subsection (b)(1)(C) and shall be eligible to receive financial assistance under subsection (b)(1)(C).

(2) Any State referred to in paragraph (1) shall be eligible to receive financial assistance under subsection (b)(1)(B) if such State meets the requirements established in subsection (b)(1)(B) and subsection (c).

(j) It is the intent of the Congress to review the effectiveness and necessity of the financial assistance program established in this section after the first general election for Federal office held after the date of the enactment of this Act.

JUDICIAL RELIEF

SEC. 8. The Commission shall institute in the name of the United States such actions, including actions against States, units of general local government, and State or local officials, for declaratory judgments or injunctive or other appropriate relief as it determines to be necessary to prevent any violation of this Act, including (1) any activity on the part of any person or group of persons to register any individual to vote if such individual is not a qualified voter; (2) any attempted fraudulent registration of voters; (3) any pattern or practice of fraudulent registration of voters; or (4) any failure to comply with the provisions of section 6.

EXPEDITION OF ACTIONS

SEC. 9. It shall be the duty of any judge of a court of the United States designated to hear any action under section 8, or any action involving a question of constitutionality of any provision of this Act, to assign the action for hearing at the earliest practicable date, to participate in such hearing and in any determination made with respect to such action, and to expedite such determination in everyway.

REFERRAL OF APPARENT VIOLATIONS TO ATTORNEY GENERAL

SEC. 10. (a) If the Commission determines that there is probable cause to believe that a violation of section 11 has occurred or is about to occur, the Commission shall refer such apparent violation to the Attorney General of the United States.

(b) In any case in which the Commission refers an apparent violation of section 11 to the Attorney General of the United States, the Attorney General shall respond by report to the Commission with respect to any action taken by the Attorney General regarding such apparent violaton. Each report shall be transmitted no later than 60 days after the date the Commission refers any apparent violation, and at the close of every 30-day period thereafter until there is a final disposition of such apparent violation. The Commission may from time to time prepare and publish reports on the status of such referrals.

PENALTIES

SEC. 11. Any person who knowingly and willfully—

(1) registers, or attempts to register, to vote under this Act for the purpose of voting more than once in any Federal election;

(2) conspires with any person for the purpose of enabling such person to make false registration to vote in a Federal election under this Act or for the purpose of enabling or encouraging any individual to make such false registration to vote in a Federal election; or

(3) falsifies any information with respect to the name, residence, or age of such person, or any other information for the purpose of establishing eligibility to register to vote in a Federal election under this Act;

shall be fined not more than $10,000, or imprisoned for not more than 5 years, or both. In the case of any second or subsequent conviction under this section, the person convicted shall be fined not more than $25,000, or imprisoned for not more than 10 years, or both.

VOTER LISTS

SEC. 12. (a) No list of individuals registered to vote in any Federal election which has been compiled by any State or unit of general local government, or agency of a State or unit of general local government, shall be used by any person for any commercial activity.

(b) Any person who violates subsection (a) shall be fined not more than $1,000, or imprisoned for not more than 6 months, or both.

REPORTS

SEC. 13. (a) The Commission shall transmit reports to the President and to the Congress not later than March 1 of each year. Each such report shall include a detailed statement of the activities of the Commission under this Act, together with information relating to the effect of permitting registration on the date of an election, the costs to States and units of general local government of implementing such registration, alternative methods of registration, and other aspects of election administration. The Commission shall include in such report recommendations for such legislative action at it considers appropriate.

(b) The Commission shall furnish to the Congress such information relating to the administration of this Act as the Congress may request.

EFFECT ON OTHER LAWS

SEC. 14. (a) Nothing in this Act shall be construed to prevent any State from granting less restrictive registration or voting practices or more expanded registration or voting opportunities than those prescribed by this Act.

(b) Nothing in this Act shall be construed to limit or repeal any provision of (1) the Voting Rights Act of 1965 (42 U.S.C. 1973 et seq.); (2) the Federal Voting Assistance Act of 1955 (50 U.S.C. 1451 et seq.); or (3) the Overseas Citizens Voting Rights Act of 1975 (42 U.S.C. 1973dd et seq.).

(c) Nothing in this Act shall apply to elections for officials of Indian tribal governments.

SEVERABILITY

SEC. 15. If any provision of this Act, or the application of any such provision to any person, Federal election, State or local election, office, or circumstance, is judicially determined to be invalid, the remainder of this Act, or the application of such provision to other persons, Federal elections, State or local elections, offices, or circumstances, shall not be affected by such determination.

AUTHORIZATION OF APPROPRIATIONS

SEC. 16. (a) There are authorized to be appropriated, for the provision of financial assistance under section 7, such sums as may be necessary for fiscal year 1978 and fiscal year 1979.

(b) There is authorized to be appropriated $1,200,000 for fiscal year 1978, and $1,400,000 for fiscal year 1979, for the administration of this Act by the Commission.

UNIVERSAL VOTER REGISTRATION ACT— ELECTION DAY REGISTRATION

SECTION-BY-SECTION SUMMARY

Section 1. Universal Voter Registration Act of 1977.

Section 2. Findings and Purpose:

This section refers to Congress' power to regulate Federal elections and the need for a national standard for voter registration in Federal elections.

Section 3. Definitions:

This section defines the following terms: administrator, commission, Federal office, Federal election, state, state or local election, and state or local official and unit of general local government.

Section 4. Administrator of Voter Registration:

This section establishes the offices of Administrator of Voter Registration and Associate Administrator to be appointed by and be accountable to the Federal Election Commission, with the responsibility of administering this Act.

The Administrator (level V) and the Associate Administrator may not be members of the same political party.

Section 5. Duties and Powers:

This section gives the Administrator, under the direction of the Commission, authority to establish and administer a voter registration program for Federal elections; collect, analyze, and publish information on voter registration; and provide information and technical assistance to state and local officials.

Publications or reports of the Administrator may not disclose any information relating to the identity of any individual voter. (Sec. 5(b))

Section 6. Voter Registration:

Rule—Every state and unit of general local government shall permit every individual eligible under state law to register to vote, to also register and vote in Federal elections at the polling place on election day. (Sec. 6(a))

Procedure—Every individual who registers at the polling place shall, if required by the state, establish his identity and place of residence by:

(1) executing an affidavit, provided by the state or local unit of local government, which (a) attests state or Federal qualifications are met, (b) lists such qualifications, and (c) includes on its face a summary of criminal penalties for false registration, and

(2) submitting (a) an appropriate form of identification establishing identity and place of residence, approved by the Commission (no more than one such form may be required (Sec. 6(b)(3), or (b) an affidavit regarding identity and place of residence executed by a person registered to vote at that polling place and who is present at the polls with such individual. (Sec. 6(b)(1))

If a state allows an individual to vote in a Federal election if present at polls before closing date, he or she must be allowed to register to vote if also present before closing time. (Sec. 6(b)(2))

Once registered at the polling place, an individual remains registered for the same period of time as under other state registration procedures. (Sec 6(b)(4))

Section 6(c) affirms that nothing in the Act is intended to limit state power to prescribe qualifications for voting in Federal elections.

Section 7. Financial Assistance (Up to 3 Possible Payments):

The Commission is given authority to make grants to states to assist in establishing voter registration programs and in a manner to facilitate their establishment for use in the first general election after enactment of this Act and thereafter.

Payments—For each general election for Federal office, each state shall be entitled to receive an amount equal to:

(1) 20¢ times number of voters who cast ballots in the most recent quadrennial elections in such state if the Commissioner determines that the state will be in compliance with section 6(a) (permitting election day registration in Federal elections) at the time of the election for which the grant is made (Sec. 7(b)(1)(A)); and

(2) 20¢ times number of voters who cast ballots in the Federal election for which funds are payable if such state has submitted a Voter Outreach Program which the Commission has approved and determined will be in effect prior to such Federal election (Sec. 7(b)(1)(B); and

(3) 20¢ times number of voters who cast ballots in the Federal election funds are payable if the Commissioner determines that such state has adopted election day registration for state and local elections. (Sec. 7(b)(1)(C))

(NOTE.—A State must be entitled to funds under (1) before it can receive funds under (2) and (3).)

Payments under (1) shall be before the Federal election for which the state is entitled to funds. Payments under (2) or (3) may be in installments and in advance with adjustments for overpayments or underpayments. (Sec. 7(g))

Use of Funds—Outreach Funds: Section 7(c) establishes the procedure for submitting a plan for voter registration Outreach Programs to the Commission, Commission approval and limits the use of money received for adopting such a plan to the voter registration proposals in the plan.

Election Day Registration Funds—Funds received for establishing election day registration for Federal election or for state elections may be used for a broad number of purposes set forth in section 7(d).

All Funds—Section 7(f) requires all funds received to be used to supplement state funds that would be available, absent Federal money, for use in voter registration. (This can be waived if a state has a registration rate in excess of 90%. States must establish fiscal control and accounting procedures to assure proper disbursement of and accounting for Federal funds received by the State, including funds paid by state to its local subdivisions. States must also make reports and keep records and afford access to such records as the Commission may reasonably require.

No state is precluded from receiving grants if it does not require the registration of voters. (Sec. 7(i))

State and Local Elections: Section 7(e) gives the Commission power to waive the Section 6(a) requirements with respect to any local election in any jurisdiction or district which is not a general purpose political subdivision of such state.

Inadequate Funds: Section 7(h) provides for a ratable reduction of grants if money appropriated is insufficient.

Congressional Review: Section 7(j) expresses intent of Congress to review the effectiveness and necessity of the grant program after the first general election for which it is effective.

Section 8. Judicial Relief:

The Commission is given authority to institute civil actions to obtain declaratory, injunctive or other relief to prevent violations of the Act, including fraudulent registration and failure to comply with Section 6.

Section 9. Expedition of Actions:

Actions brought under Section 8 or any action involving constitutionality of this Act shall be expedited by the judges of the court hearing the matter.

Section 10. Referrals to Attorney General:

Knowing and willful violations of Section 11 shall be referred to the Attorney General who shall report back within 60 days of action taken.

Section 11. Penalties:

This section provides a fine of not more than $10,000 or imprisonment for not more than 5 years, or both, for any person who knowingly and willfully:

(1) Registers or attempts to register to vote under this Act for the purpose of voting more than once in any Federal election;

(2) Conspires with any person to enable such person to make a false registration or to enable or encourage any individual to make a false registration; or

(3) Falsifies any information with respect to the name, residence, age or any other information to establish eligibility to register to vote under the Act.

(NOTE.—Second or subsequent convictions under this Act have a penalty of $25,000 or 10 years in prison, or both.)

Section 12. Voter Lists:

Voter registration lists for Federal elections may not be used for any commercial activity; penalty for violation of $1,000 or 6 months, or both.

Section 13. Reports:

Commission annual reports to the President and the Congress by March 1 on activities under the Act.

Section 14. Effect on Other Laws:

The Act shall not prevent states from

granting less restrictive registration or voting practices or more expanded registration or voting opportunities.

The Act shall not limit or repeal any provision of the Voting Rights Act of 1965; Federal Voting Assistance Act of 1955, or the Overseas Citizens Voting Rights Act of 1975.

Section 15. Severability Clause.

Section 16. Authorization of Appropriations:

Authorized for Fiscal Year 1978 and 1979 such sums as necessary for grants to states and a specific amount for costs of the Commission to administer the Act in Fscal Year 1978 and 1979.

UNIVERSAL VOTER REGISTRATION ACT

POTENTIAL GRANTS TO THE STATES IF ACT HAD BEEN IN EFFECT IN 1976

States	1972 total votes cast [1]	Basic assistance	1976 total votes cast [1]	With bonus for State and local elections and with outreach program	With bonus for State and local elections or with outreach program

[1] Votes cast for President in thousands (unofficial figures).

NOTES

Explanation: Under the Universal Voter Registration Act, a State could receive Federal funds as follows for each biennial and quadrennial election.

20 cents per voter in the previous Presidential election; plus
20 cents per voter in the election for which the grant is made, if the State allows election day registration in State and local elections; plus
20 cents per voter in the election for which the grant is made if the State carries out an approved preregistration outreach program.

Participation percentages were computed in the Congressional Research Service.

Mr. MATHIAS. Mr. President, I am pleased to join in sponsoring the Universal Voter Registration Act of 1977, aimed at increasing voter participation in Federal elections, primarily through the introducton of election day voter registration.

Throughout my public life I have been greatly concerned over the number of Americans who simply are not bothering to vote at all. I expressed my concern several times during the recent Presidential and congressional campaigns. And, I had high hopes that the disappointing trend in voter turnout would be reversed in 1976. But, my hopes were not realized. Regrettably, this downward spiral continued in 1976.

Congress can and must play an active part in reversing this alarming trend. I am convinced that enactment of the Universal Voter Registration Act of 1977, will help move us closer to this goal and help insure that the constitutional right to vote—the bedrock of our democratic system—becomes a reality for all qualified Americans.

Furthermore, passage of this legislation would be fully consistent with prior congressional efforts to increase voter participation—including several proposals, which I have vigorously supported during my congressional career. Included among these were:

Extensions of the 1965 Voting Rights Act;
The lowering of the voting age to 18 years of age; and
The Overseas Citizens Voting Rights Act of 1976.

The keystone of the Universal Voters Registration Act of 1977, is its provision for election day registration for Federal elections. This provision is modeled upon similar statutes in effect in Minnesota and Wisconsin, where voter turnout in the 1976 election far exceeded the national average. And significantly, there has been no evidence of voter fraud in either of these jurisdictions. I believe that the stringent safeguards in the Universal Voters Registration Act, will effectively prevent voter fraud in Federal elections. Not only will the enactment of this legislation introduce election day registration to Federal elections, it will also serve as a mode[l] for the adoption of similar procedures in State and local elections nationwide.

It has been suggested that enactment of this legislation would work to the pronounced advantage of the Democratic Party. This is a delicate question in a determinedly bipartisan undertaking. The predictions may be wrong. If the predictions are not wrong, and if the registration of several million more Americans means trouble for the Republican Party, the Republican Party is going to have to do some renovating. And, to expand its ideological base to embrace a wider spectrum of the American electorate. The positive view is that these new voters will constitute a pool in which the Republican Party can seek the new members it so desperately needs. But, above all, there should be no reason for either party to regret the enfranchisement of millions of more Americans.

Mr. President, I urge my colleagues to consider this important legislation. For the time has long past when the goal of universal registration and voter participation in this country was a reality, and not a dream.

Mr. KENNEDY. Mr. President, I am pleased to cosponsor the election day registration legislation introduced today by the distinguished chairman of the Committee on Rules and Administration on behalf of the Carter administration.

Election day registration is a brilliant solution to the chaos, confusion, and irrationality of our archaic voter registration laws. By enabling citizens to register at the polling place on election day, we can eliminate many of the most serious obstacles to voter participation in America, and open up the franchise to millions of our citizens.

Election day registration is an imaginative and immensely appealing concept. The procedure is simple, workable, and effective, as the successful recent experience of Minnesota and Wisconsin demonstrates. Any citizen who wishes to vote on election day will be able to do so. Under election day registration, voters will be entitled to go to the polling place, register, and cast their ballots, subjects only to appropriate requirements of identification and fraud prevention.

The financial assistance provisions in the administration proposal are also significant. The amount of Federal funds to be made available will be more than sufficient to pay the full cost to State and local governments of election day registration. Generous additional Federal funds will also be provided for a wide range of steps to improve all aspects of voter registration and election administration.

Taken together, the requirement of election day registration and the financial assistance provisions will be the foundation of a new universal voter reg-

istration system for the Nation. It will preserve the central element of election procedures under our Federal system—local elections under local control. State and local election officials have always been the backbone of the Nation's election system, and they will continue to be the backbone of the new registration program. With their cooperation, encouragement, and support, this new system of election day registration can be the most important step ever taken to improve the Nation's voter registration procedures.

I commend President Carter and Vice President MONDALE for their commitment and vision in submitting this far-reaching reform proposal. Election day registration will be a giant step forward in our efforts to increase voter turnout, revitalize our democracy and enhance the right to vote.

Under the proposal, States will be required to permit eligible voters to register and vote at the polling place on election day, after providing appropriate identification. Registration by this method will have the same effective duration as other methods of registration in the State. Thus, a citizen who registers to vote on election day will continue to be registered for future elections; his registration cannot be canceled immediately after the election, but must be assimilated into the regular State or local registry.

The requirement of election day registration will apply only to Federal general elections, not primaries or State and local elections. States will be encouraged, however, to adopt election day registration for State and local general elections by the substantial Federal financial incentives made available in the legislation. States may also adopt election day registration for Federal and State primaries, but there will be no additional financial incentives to do so; in this way, the legislation steers a neutral course between States using open primaries and those preferring closed primaries, where party registration must be established in advance.

The bill provides three different types of Federal financial assistance, which will be payable every second year in connection with the general congressional or Presidential elections. The three types of grants will be as follows:

First, each State will be entitled to a block grant of 20 cents per voter, based on the voter turnout in the State in the preceding Presidential election. These funds are designed primarily to help States defray the cost of election day registration, but they may be used to pay other costs of voter registration and election administration.

Second, as a voter registration outreach grant, each state will be entitled to a sum of 20¢ per voter, based on voter turnout in the state in the current Federal election. These funds are intended to be used for efforts to increase voter registration prior to election day. The funds will be payable upon the approval of a State outreach plan by the Federal Election Commission. Funds may be used to pay for registration by mail, door to door canvasses, mobile registrars, bilingual registration, and a variety of other outreach programs to encourage pre-election registration.

Third, as an incentive for States to apply election day registration to State and local elections, each State will be entitled to a grant of 20¢ per voter, based on voter turnout in the State in the current Federal election, if the State applies election day registration to State and local elections in the State. However, the Federal Election Commission is authorized to waive the requirement in specialized local elections in jurisdictions such as water, sewer or other districts that are not general purpose political subdivisions.

The Federal funds may be made available well in advance of the biennial elections, and may be obtained in installments spread over the 2-year election cycle. In this way, the assistance may be used to defray ongoing State and local election costs during the years in which no Federal elections are held.

In addition, States must use the Federal funds to supplement, not replace, existing State and local expenditures for voter registration and election administration. The Federal Election Commission may waive this "maintenance of effort" requirement if at least 90 percent of the eligible voters in the State are already registered.

Based on 1976 voter turnout figures, if all States qualify for their maximum Federal financial assistance, the cost of the grants for the 1978 congressional elections will be about $48 million, spread over the 2-year election cycle.

The specific procedure for election day registration is modeled on the systems now used in Minnesota and Wisconsin. A person who wishes to register and vote on election day may be required to sign an affidavit specifying the qualifications for voting and listing the penalties for false registration.

An election day registrant may also be required to submit a form, approved by the Federal Election Commission, which establishes his identity and place of residence; only one form of identification may be required by a State. Alternatively, the registrant may use a "voucher" procedure to verify his eligibility—that is, a registered voter present with him at the polling place may submit an affidavit vouching for the person's eligibility to vote.

To deal with the problem of fraud, the bill provides stiff penalties of a $10,000 fine and 5 years' imprisonment for fraudulent registration. In the case of a second conviction, the fine is increased to $25,000 and the term of imprisonment is increased to 10 years.

Other key provisions of the bill include the following points:

The new senior positions of Administrator and Associate Administrator of Voter Registration are created within the Federal Election Commission to carry out the purposes of the bill.

The use of voter registration lists for any commercial purposes is prohibited. A violation of this provision is punishable by a $1,000 fine and/or 6 months' imprisonment.

The Federal Election Commission is required to submit a report to Congress and the President by March 1 each year. These reports must include an analysis of the cost and effect of election day registration, as well as other information relevant to the program.

Taken together, these provisions will bring a long overdue and urgently needed reform to America's voter registration laws. There are few steps we can take that will have a more beneficial impact on our elections and on the opportunity of every citizen to exercise the most important right in a democratic society—the right to vote.

Obviously, election day registration is not a panacea for America's serious problems of voter nonparticipation. In addition to the burden imposed by current registration requirements, many other factors are also present, including the serious disillusionment of many citizens with the quality of their Government. We must also deal with these other factors. But the existence and complexity of these other factors should not prevent us from dealing now with the genuine need for reform of voter registration.

I am convinced that election day registration meets this need for reform in the most effective possible way, with the least posible intrusion into the traditional election domain of State and local governments. I look forward to prompt action by Congress on the proposed election day registration legislation, and I am hopeful that it will be enacted into law in ample time to apply to the 1978 elections.

Mr. President, I ask unanimous consent that the following materials may be printed in the RECORD: an editorial from the Milwaukee Journal of November 27, 1976, entitled "New Voter Law Worked"; a table prepared from data provided by the office of the city clerk of Minneapolis, showing the number of election day registrants in the city since 1973; and a table prepared by the Library of Congress providing voter participation statistics from recent foreign elections.

I also ask unanimous consent that a memorandum from the Library of Congress on the constitutionality of the proposed legislation may be printed in the RECORD. The memorandum, prepared by Mr. Johnny H. Killian, assistant chief of the American Law Division, analyzes the relevant constitutional provisions and Supreme Court precedents, and concludes that the proposal does not appear to raise any substantial problems of congressional power.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Milwaukee Journal, Nov. 27, 1976]

NEW VOTER LAW WORKED

Amid controversy over Wisconsin's new voter registration law the most important fact is being largely overlooked. The fact is that the new law was a major success in lowering barriers to citizen participation in our democracy.

It appears now that nearly 200,000 people who otherwise would have been barred from voting actually were able to vote because the new law allowed them to register at their polling place on election day. To be horrified by that fact, one would have to imagine that a massive conspiracy of voter fraud had been underway. There simply is no evidence to support such a notion.

In fact, despite all the speculation about fraud, there apparently has been no conclusive documentation yet of even a single case. If a few cases of fraud eventually are proved, the relevant question will be whether the

new law permitted any more fraud than had occurred under the old law.

Indeed, the opportunity for an individual to commit fraud remained greater in the nearly 1,600 communities across the state where voter registration is not required at all by state law or local ordinance, nor was it required under the old law, because population is under 5,000. In those places, people wanting to vote had only to give a name and address on election day. Proof of residency was not required, as it had been on eelction day where registration was required.

A proposal before the State Elections Board for a spot check survey to verify voter residency—in both communities that require registration and those that don't—ought to be implemented if it proves financially feasible.

When the complaints about election day registration are analyzed, however, it comes clear that the big problem was not the intent of the law but bumbling implementation by local election officials. Shortages of ballots and voter registration forms occurred throughout the state. In some locations the awkward physical layout at polling places needlessly snarled registration and voting. Undoubtedly the legal prohibition against using deputy registrars contributed to the problem and ought to be repealed.

It must be recognized that some of the controversy over the new registration law is partisan. Larger voter turnout generally favors Democratic candidates and lower turnout favors Republicans. Such considerations should not muddy the waters. Vote fraud, where it can be documented, ought to be prosecuted. Procedural reforms to minimize opportunity for confusion or fraud ought to be made.

However, it is a shabby and unsupportable argument that people who decide to vote as late as election day are somehow more ignorant or less important than voters who were registered earlier. In a representative democracy certain risks are inherent. It does not appear that those risks outweighed the overwhelming benefit of the recent registration law to society and nearly 200,000 voters who decided by election day that they wanted to exercise their most fundamental citizen right.

ELECTION DAY REGISTRATION STATISTICS, CITY OF MINNEAPOLIS

Election	Number of election day registrants	Voter turnout	Percent voter turnout registered on election day
Municipal primary, 1973	2,712	49,542	5.5
Municipal general, 1973	8,371	127,178	6.6

[1] Estimate.

POWER OF CONGRESS OVER REGISTRATION OF VOTERS IN FEDERAL ELECTIONS

THE LIBRARY OF CONGRESS,
Washington, D.C., March 22, 1977.

Constitutional questions have been raised with respect to the authority of Congress to enact legislation which would mandate a system of voter registration in elections for federal offices under which any person meeting the state qualifications would be registered at the polls on election day upon presentation of proper proof of qualifications. The system would be modeled upon provisions in the laws of Minnesota and Wisconsin. Upon a reading of the pertinent provisions of the Constitution and judicial elaboration of them it does not appear that this proposal raises any substantial problems of congressional power.

Relevant sections of the Constitution are the following:

Article I, § 2, cl. 1, provides that electors in each State for members of the House of Representatives "shall have the Qualifications requisite for Electors of the most numerous Branch of the State Legislature" and the Seventeenth Amendment which contains the same language with respect to the popular election of Senators.

Article I, § 4, cl. 1, provides: "The Times, Places and Manner of holding Elections for Senators and Representatives, shall be prescribed in each State by the Legislature thereof; but the Congress may at any time by Law make or alter such Regulations, except as to the Places of chusing Senators."

Article II, § 1, cl. 4, empowers Congress to determine the time of choosing presidential electors and the day on which they are to convene to give their votes.

The breadth of the "times, places, and manner" clause was set forth in *Smiley* v. *Holm*, 285 U.S. 355, 366–367 (1932), in which the Court observed that the phrase "embrace[s] authority to provide a complete code for congressional elections, not only as to times and places, but in relation to notices, registration, supervision of voting, protection of voters, prevention of fraud and corrupt practices, counting of votes, duties of inspectors and canvassers, and making and publication of election returns; in short, to enact the numerous requirements as to procedure and safeguards which experience shows are necessary in order to enforce the fundamental right involved."

Continuing, the Court noted that the authority conferred upon Congress to "make or alter such Regulations" "plainly refers to regulations of the same general character that the legislature of the State is authorized to prescribe with respect to congressional elections. In exercising this power, the Congress may supplement these state regulations or may substitute its own. It may impose additional penalties for the violation of the state laws or provide independent sanctions. It 'has a general supervisory power over the whole subject.' [citations omitted]. But this broad authority is conferred by the constitutional provision now under consideration and is exercised by the Congress in making 'such regulations;' that is, regulations of the sort which, if there be no overruling action by the Congress, may be provided by the legislature of the State upon the same subject."

Ex parte Siebold, 100 U.S. 371, 383–384 (1880), similarly addressed the question of the meaning of the power to "make or alter such Regulations". "There is no declaration that the regulations shall be made either wholly by the State Legislatures or wholly by Congress. If Congress does not interfere, of course they may be made wholly by the State; but if it chooses to interfere, there is nothing in the words to prevent its doing so, either wholly or partially. On the contrary, their necessary implication is that it may do either. It may either make the regulations, or it may alter them. If it only alters, leaving, as manifest convenience requires, the general organization of the polls to the State, there results a necessary co-operation of the two governments in regulating the subject. But no repugnance in the system of regulations can arise thence; for the power of Congress over the subject is paramount. It may be exercised as and when Congress sees fit to exercise it. When exercised, the action of Congress, so far as it extends and conflicts with the regulations of the State, necessarily supersedes them."

It is thus a plenary power which Congress has to enact regulations governing the times, places, and manner of electing Representatives and Senators. Because the provision governing presidential electors, Article II, §1, cl. 4, does not contain the word "manner", it could be argued that Congress' power is less with respect to these elections than with respect to those in which Senators and Rep-

resentatives are chosen. Especially might this argument be made if based upon the language in some Court decisions to the effect that presidential electors are state officials, resulting in the fact that the elections in which they are chosen are not federal elections. *In re Green*, 134 U.S. 377, 379 (1890); *Ray* v. *Blair*, 343 U.S. 214, 224-225 (1952); *Oregon* v. *Mitchell*, 400 U.S. 112, 211 (1970) (Justice Harlan concurring and dissenting). But the court has long recognized the power of Congress to legislate in connection with the elections of the President and Vice President. In *Burroughs* v. *United States*, 290 U.S. 534 (1934), the Court sustained a federal law to protect presidential elections from fraud by requiring campaign contribution disclosure. A narrow reading of Congress' power under this clause, limited to specifying the time of the election and the day of casting of the electoral vote, was rejected as "without warrant." "While presidential electors are not officers or agents of the federal government [citing *Green*], they exercise federal functions under, and discharge duties in virtue of authority conferred by, the Constitution of the United States. The President is vested with the executive power of the nation. The importance of his election and the vital character of its relationship to and effect upon the welfare and safety of the whole people cannot be too strongly stated. To say that Congress is without power to pass appropriate legislation to safeguard such an election from the improper use of money to influence the result is to deny to the nation in a vital particular the power of self protection. Congress, undoubtedly, possesses that power, as it possesses every other power essential to preserve the departments and institutions of the general government from impairment or destruction, whether threatened by force of corruption." Id., 544, 545.

The Court then turned to its decision in *Ex parte Yarbrough*, 110 U.S. 651 (1884), in which it had sustained a statute protecting the right of citizens to vote free from coercion and violence in elections for President and Vice President and for Representatives in Congress. *Yarbrough* had involved an indictment charging interference with voting in congressional elections, but the *Burroughs* Court observed that the *Yarbrough* opinion "made no distinction between the two, and the principles announced, as well as the language employed, are broad enough to include" the election of presidential electors as well as the election of Congressmen. Id., 290 U.S., 545–546. Thus, the Court treated Congress' power to regulate the election of presidential electors as being identical to its power to regulate the election of Representatives (and Senators) and deemed the power to be exercisable, in part, to secure the right to vote for these officers, a right attributable ultimately to the United States Constitution. This recognition is so well settled now that in its most recent decision the Court treated the matter through simple assertion and citation to precedent. *Buckley* v. *Valeo*, 424 U.S. 1, 13 n. 16, 90 (1976).

Further, at least since *United States* v. *Classic*, 313 U.S. 299 (1941), it has not been doubted that Congress' power to make or alter regulations with respect to "times, places, and manner" extends also to primary elections in which nominees are selected and that primary elections are federal elections when Senators and Representatives are chosen and when the presidential selection process is involved. *Buckley* v. *Valeo*, supra; see *Oregon* v. *Mitchell*, supra. Note the effect of *Cousins* v. *Wigoda*, 419 U.S. 477 (1975).

These precedents would conclude the question of the validity of the proposal, were it not for the fact that a few States appear to include registration in their constitutions or laws as a qualification of voting. Article I, § 2, cl. 1, and the Seventeenth Amendment quoted above, reserve to the States the determination of qualifications for electors of Representatives and Senators and Article II, § 1, cl. 2, confers on the States to determine the appointment of electors for President and Vice President. A study published in 1972 indicated that six States did include registration as a qualification. Note, "Federal Voter Registration: A Proposal to Increase Voter Participation," 8 Colum. J. L. & Soc. Prob. 225, 234–239 (1972). Although Justice Black in his opinion in *Oregon* v. *Mitchell*, supra, 119–124, argued that under § 4 Congress could alter the qualifications the States were permitted to establish under § 2, this view was expressly or impliedly rejected by the other eight Justices and cannot be accepted. Congress does have power to alter qualifications, of course, and this power might include the situation here.* But it hardly seems necessary to consider that argument here. In the *Smiley* v. *Holm* quotation reproduced above, it was clearly set out that a registration system was one aspect of federal elections as to which Congress could make or alter regulations. The article cited above identified at least 37 States which do not consider registration as a qualification. Inasmuch as § 4 confers power to regulate times, places, and manner upon Congress, it empowers Congress, subject to the constraints of the Constitution, of course, to determine the boundaries of its legislative jurisdiction and, as stated in Article I, § 8, cl. 18, to make all necessary and proper laws for carrying into effect its legislative powers. It would therefore not be within the province of a State to withdraw from congressional jurisdiction a particular subject matter simply by defining it as something else. It would therefore, if Congress should enact the proposal, be the responsibility of the Supreme Court, considering Congress' expertise in the matter of elections, its past precedents, and the overwhelming practice in the States, to determine whether the legislation properly considers registration as included within the "manner" of conducting elections.

JOHNNY H. KILLIAN,
Assistant Chief.

Mr. WILLIAMS. Mr. President, I am pleased to join my colleagues Senators CANNON, ROBERT C. BYRD, CRANSTON, KENNEDY, CASE, and MATHIAS in sponsoring the Universal Voter Registration Act of 1977, submitted to Congress by President Carter. I share President Carter's commitment to make the electoral process more accessible to many more Americans and I applaud the President's vision and initiative in formulating this landmark legislation.

The need for S. 1072 is unmistakably clear. America has for many years had an alarmingly low rate of voter participation—much lower than that of the world's democracies. In recent years the nationwide trend has been toward even less and less citizen participation in elections. This trend undermines the basic premise upon which our Nation is built. We must take every step to reverse it, by encouraging more people to vote in election contests at every level of government.

The Universal Voter Registration Act of 1977 offers the promise of significantly increasing voter participation by permitting individuals who are qualified to vote in Federal elections, to register and vote in Federal elections at an appropriate polling place on election day. This provision of the bill addresses the heart of one of the major problems of voter participation—early voter registration cutoff dates. The bill gives cognizance to the fact that in an election year voter interest generates slowly until the last few weeks, when it picks up perceptibly, peaking in the final days of the campaign. By then, however, registration in all but a handful of States has been closed, leaving millions of citizens unregistered and thus ineligible to vote. Over 75 percent of those who were registered to vote on November 2, 1976, did vote. I believe that millions more who were unregistered prior to election day would have voted if they could have registered and voted on election day. Strong evidence supports this belief. Political scientists Steven J. Rosentone and Raymond E. Wolfinger have conducted a most impressive study of the effect of registration laws on voter turnout. Having analyzed some 90,000 voter interviews, Rosentone and Wolfinger concluded that nationwide voter turnout would increase 10 percent if registration were allowed on election day.

In Wisconsin, a recently enacted law permits voters, previously unregistered, to vote on Election Day upon showing a driver's license or other proof of age and residence. Over 200,000 Wisconsinites who had not previously registered, voted last November 2, so as to create an actual increase in the Wisconsin voting percentage over 1972. While national voter participation dropped between 1972 and 1976, Wisconsin participation surged to 10 percent above the national average. Minnesota offers just as compelling an example. Under a recently enacted law, similar to that of Wisconsin, 22 percent of the 1.9 million Minnesotans who voted on Election Day 1976, had not registered before Election Day. Minnesota's voting performance of 75 percent was up from 1972 and more than 20 percent over the national average.

It has been argued that a change in the system of registration will open up the door to fraud. I do not agree. I am confident that, properly administered, the Election Day registration will result in no compromise in the honesty and integrity of our system of voter participation. We should not allow the fact that the electoral process has, on rare occasions, been subject to manipulation by the unscrupulous few prevent us from significantly expanding the opportunity to vote. The procedures for registration mandated by S. 1072 will perhaps make the electoral system even less susceptible to fraud. Additionally, the stiff penalties allowed for violation of the bill's terms should serve as an effective deterrent against fraud. There is no evidence from those States with Election Day registration, that fraud has increased under such a system. Testifying

*The power arises under § 5 of the Fourteenth Amendment giving Congress authority to enforce the guarantees of § 1 of the Amendment. In *Oregon* v. *Mitchell*, supra, seven Justices agreed that Congress could constitutionally forbid States from disqualifying voters in presidential and vice presidential elections for failure to meet state residency requirements and could provide uniform national rules for absentee voting in such elections, as an exercise of the power granted by § 5.

before the Committee on Post Office and Civil Service in 1975, Vice President, then Senator, MONDALE said that his home State, Minnesota, had experienced "not one suggestion of fraud" under its system of Election Day registration.

The Universal Voter Registration Act of 1977 goes beyond Election Day registration and encourages greater voter participation by providing meaningful financial and other assistance to States to enable them to provide expanded opportunities for voter registration before Election Day as well as on Election Day. Further, this measure proposes three different grant programs that will channel funds directly to States to enable them to increase the number of registered voters and voter turnout, by improving voter registration and election procedures, and by employing trained personnel to administer elections and voter registration.

S. 1072 not only provides for Election Day registration but also encourages States to reform archaic laws that make registration difficult and inconvenient. I am particularly hopeful that reform of State election processes encouraged by S. 1072 will end unnecessarily burdensome requirements on the electorate. Unnecessarily complicated and difficult voting requirements make exercise of the right to vote particularly difficult for certain minorities, low-income individuals, less well-educated individuals, and senior citizens. Surely one of the basic tenets of American democracy is that all should have an equal and readily available opportunity to help choose those who govern the country. As the Honorable H. A. Boucher, former Lieutenant Governor of Alaska stated a few years ago in hearings on voter registration before the Committee on Post Office and Civil Service:

> In a democratic society, among the most fundamental human rights is the right of every citizen to vote. The vote is the very symbol of democracy. It is the basic unit of our representative form of government—the major vehicle through which the consent of the governed is offered or withheld—the prime means by which the people can express and effect their collective will. The right to vote, therefore, necessarily carries with it the right of equal access for every eligible citizen through the formal system of regulations and procedures by which the vote is cast.

I urge enactment of this landmark legislation, which would help make the dream of greater, more equal access to voting opportunities a reality.

By Mr. HANSEN:

S. 1073. A bill to amend the Federal Meat Inspection Act to require that imported meat and meat food products made in whole or in part of imported meat be labeled "imported" at all stages of distribution until delivery to the ultimate consumer; to the Committee on Agriculture, Nutrition, and Forestry.

LABELING OF IMPORTED MEAT

Mr. HANSEN. Mr. President, I am today introducing a bill which would amend the Federal Meat Inspection Act to require that imported meat and meat products be labeled "imported" at all stages of distribution in this country until delivery to the ultimate consumer.

This legislation would enable the consumer in the retail store to recognize and choose between foreign and domestically produced meat. There are many Americans who, if they had a choice, would prefer to purchase meat which has been raised and processed here in the United States.

Under existing laws and regulations which control our meat inspection system, foreign meat imported for manufacturing or processing purposes is normally shipped to us in frozen blocks of 50 to 60 pounds. These blocks are labeled as to origin. But after processing in this country, the products made from this meat bear no identification of the origin of the meat.

In 1967, Mr. President, the Congress amended our Federal meat inspection law to greatly expand Federal monitoring and control of meat production, processing and marketing to the American public. The purpose of this law is, of course, to protect the health and well-being of consumers and to enable them to know what they are buying and eating.

We have the best meat inspection and labeling law in the world. American consumers know when they buy meat regulated by this law that it has been rigorously examined for wholesomeness and purity and that it is labeled according to requirements meant to tell people what they are buying and where it came from.

The Federal law even applies to canned, processed, and prepared meats which come from foreign countries. Such products must be labeled as to country of origin, and if one buys a can of lunchmeat in a local supermarket that has been imported, it will bear a label, as required by law, to disclose the origin of the meat and to inform the consumer about other ingredients that have been included. We imported about half a billion pounds of processed and canned meat last year.

But, Mr. President, we import more than a billion pounds of frozen meat every year that is distributed to consumers in the form of various processed products. These products are not labeled as to origin and the consumer has no way of knowing when he or she is buying and consuming this foreign meat. Typical of the kind of products made from foreign meat, but not so labeled, is most hamburger, soups, TV dinners, lunch meat, and convenience foods containing meat. Products which are processed in this country need not be labeled to tell the consumer where the meat came from.

So, our law requires that foreign meat entering the United States in canned, processed, or prepared form be labeled as to origin. And it requires that domestically produced meat intended for sale to foreign countries bear a label saying it is for export and disclosing information about any preservatives used. But the law does not require disclosure of the origin of more than a billion pounds of foreign beef and meat which enter the United States every year in fresh, chilled or frozen form, and which eventually is sold to consumers in restaurants and supermarkets throughout the country.

Our laws require that labels on processed food items tell consumers the name of the product, the ingredients, the name and place of business of the manufacturer, packer, or distributor, the quantity of the contents, and whether the product was inspected. But the most important information—the origin of the meat—does not appear on products made from imported fresh, chilled or frozen meat. This is a serious oversight which my bill would correct.

Amercian consumers deserve to know if meat they buy has previously been frozen and they deserve to know where it came from. My bill would require that imported meat and meat food products made in whole or in part of imported meat be labeled "imported" at all stages of distribution through delivery to the ultimate consumer.

The bill says that—

> Any imported meat or meat food product . . . and any meat food product made in whole or in part of such imported meat, or its package or container, shall be labeled as "imported" or "imported in part" as the case may be.

In other words, Mr. President, the consumer would be told all of the things now required on meat and meat product labels, including where the meat came from.

By Mr. HASKELL:

S. 1074. A bill to establish a national rangelands rehabilitation and maintenance program; to the Committee on Energy and Natural Resources.

NATIONAL RANGELANDS REHABILITATION AND MAINTENANCE ACT OF 1977

Mr. HASKELL. Mr. President, I am introducing today legislation which, if enacted, will stabilize and significantly improve a large segment of our Nation's seriously deteriorated rangelands. The measure is virtually identical to my bill, S. 2555, the National Rangelands Policy Act of 1976, which was reported unanimously by the Senate Energy and Natural Resources Committee on April 26, 1976, and was passed by the Senate on May 3, 1976. The proposal I introduce today, the National Rangelands Rehabilitation and Maintenance Act of 1977, would supplement the landmark Federal Land Policy and Management Act enacted last Congress by establishing a 30-year program for the full rehabilitation of the rangelands administered by the Bureau of Land Management.

Approximately one-half of the land in the 11 Western States is owned by the Federal Government. The grazing of domestic livestock—both cattle and sheep—is the most significant activity occurring on these lands in terms of acreage; 262 million acres or 73 percent of this Federal land is allocated for grazing. This represents more than one-fourth of all grazing land—public and private—in the United States. Eighteen percent of our beef breeding herd is located in these Western States, and many of these cattle are on public lands at least part of each year.

It is important for all of us to remember that the grazing of livestock is one economic pursuit which can be truly compatible with many other uses of the public land, including those of particular importance to environmen-

talists, such as provision of wildlife habitat and primitive recreation opportunities. By utilizing existing technology and management techniques, these uses can be enhanced while simultaneously increasing the grazing capacity of these lands.

Mr. President, this legislation provides a unique opportunity to establish a Federal program which would be beneficial, in fact critically important, to both environmental and economic interests. In view of the importance of our western livestock industry and the truly multiple-use character of the public lands allocated to grazing, it is imperative that we pursue the wise public policies set forth in this measure to guarantee the future productivity and quality of these lands.

Presently, however, we are not pursuing public policies on our Federal rangeland which will assure such future productivity and quality. A far more dismal future is foreseen, particularly for the national resource lands under the jurisdiction of the Bureau of Land Management. Grazing is permitted on more than 160 million acres of the national resource lands. Most of this acreage is administered through a system of grazing districts established and administered by the Grazing Service in accordance with the Taylor Grazing Act of 1934. The Bureau of Land Management, created in 1946 in a consolidation of the General Land Office and the Grazing Service, succeeded to the Service's role of administering the grazing districts. Today, the BLM oversees, through approximately 20,400 licenses, leases, and permits nearly 12 million animal unit months of use of the national resource lands by approximately 3.5 million cattle and 4.9 million sheep. This activity is still conducted in part under the authority of the Taylor Grazing Act. That act authorized the allocation of Federal rangeland to livestock operators by permit for the specific purposes of stabilizing the livestock industry dependent on the public range, preventing injury to the range by overgrazing, and providing for the orderly use, improvement, and development of the range.

Mr. President, unfortunately, four decades later, several of the purposes of that act are still unmet. Stabilization of the industry has occurred and a measure of order in the grazing use of the range has been established. The industry is no longer dependent on the massive speculation associated with the cattle baron period of Western history. Stockmen are no longer threatened with sudden wholesale bankruptcies similar to those which followed the brutal winters of 1885–86 and 1886–87 and the intervening summer drought.

The institution of the permit system ended the lawless period of unrestricted grazing of public lands which began shortly after the Civil War and the notorious range wars, illegal fencings, and absence of the most elementary institutions of property law which characterized that period. The range, however, still suffers from the ill effects of past overgrazing and its productivity is not improving. Although vigorous efforts of both the agency and the permittees—cattlemen and woolgrowers alike—have slowed and in many cases arrested entirely the deterioration which occurred in the late 1800's and early 1900's when grazing was unrestricted, the sad fact remains that major areas of the range are still deteriorating and the range's overall productivity is dismally poor. So long as this condition continues—and becomes worse—the quality of our environment will be impaired and the economic viability of a significant portion of our livestock industry will be endangered.

A recent Interior Department report foretells the truly unfortunate future we may expect for these rangelands in the absence of remedial legislation. This report was written in response to a request by the Senate Committee on Appropriations in its report on the fiscal year 1975 Interior and related agencies appropriations bill. The committee asked the Department to review the condition of the Federal rangelands and the Department's range programs and submit its findings together with recommendations for correcting major deficiencies. In January 1975, the BLM fulfilled this request by submitting to the committee the "Range Condition Report." No citizen or public official concerned about the economic productivity or environmental quality of the public lands could have welcomed the findings contained in this report concerning the condition of the range on the national resource lands. I would like to share some of these findings with you.

According to the report, only 3.2 million acres or 2 percent of the national resource lands is in excellent condition. Another 45.6 million acres or 28 percent is in poor condition and 8.2 million acres or 5 percent is in bad condition. In my own State of Colorado, only 12 percent of the 7.9 million acres of BLM land is rated good or better, while 33 percent is poor or worse.

I want to emphasize that the truly dismaying aspect of the report's findings is that we are not simply faced with a condition but also a trend. With 16 percent of the range continuing to decline, the report's projections indicate that in 25 years the productive capability of the range could, at present management levels, be further decreased by as much as 25 percent.

Erosion figures on these lands are no better. An inventory of erosion conditions conducted on 144.5 million acres of the national resource lands over the past 5 years and contained in the report indicates that 91 percent of the national resource lands is presently sustaining some soil loss. Ten percent is in either a critical or severe erosion condition. Slightly less than half of the acreage—62 million acres—is in an unacceptable condition because of depleted vegetation and excessive runoff. Over 46 percent of the acreage, according to the report, is considered to be in a slightly eroding condition and no real damage has yet been sustained; however, the report contains the warning that—

> Management practices over the next few years will determine whether (the land) can be stabilized or if (it) will further deteriorate, losing productivity at an ever-increasing rate.

At present management levels, the report estimates that in 20 years another 8 percent or 11 to 12 million acres will be eroded to a serious condition and over 50 percent could be in an unacceptable erosion condition.

Mr. President, we simply cannot afford to allow further deterioration of our public range. To do so would threaten not only local and regional economic and environmental conditions but also international commitments.

At a time when critical world food shortages are forcing us to reevaluate our grain-feedlot method of bringing livestock to the market, the alternative of maintaining livestock longer on the range is being seriously frustrated by a decline in the forage resource. Similarly, a continued decline in the condition of the public range will be reflected in a potential loss of livestock grazing privileges threatening the livelihood of individual stockmen and posing the danger of serious economic disruption to western communites dependent on this economic use of adjacent public lands.

Even today, these stockmen and their communities suffer from reduced allotments each time an allotment management plan is written. Unfortunately, this loss of revenue, caused by earlier overgrazing resulting from an absence of, or unsatisfactory, Federal administration of the Federal range, must be absorbed by the individual permittees today. Yet, as the report shows, even if the far better present management levels continue, the range will decline further and more reductions in the size of the herds on these lands will be required. This will be accompanied by additional losses of income to the stockmen and the local merchants dependent on the purchasing power that income provides. I, for one, believe we cannot ask these cattlemen and woolgrowers and their friends and neighbors to suffer further from inadequate government range policies.

Other potential losses resulting from a deteriorating range are of equal or greater significance. These losses include continued and worsening erosion; deterioration in water quality; loss of wildlife and recreation values; and a general decline in the basic productive capability of these lands. Furthermore, untold indirect costs will likely be incurred through flood damage and stream and reservoir sedimentation. Each of these losses is discussed and their potential value in economic terms is estimated in the BLM report.

My colleagues will recall that in the 93d Congress we enacted Public Law 93–320, the Colorado River Basin Salinity Control Act, to implement the August 20, 1973, agreement with Mexico. This agreemen commits us, and the act requires us, to mount major—and, I might add, expensive—efforts to reverse the trend of increasing salinity in the Colorado River. These legislatively mandated efforts are threatened by a "business as usual" Federal posture toward the administration of the rangeland. Approximately 40 percent of the national resource lands allocated to grazing would be in the drainage of the Colorado River and the continued deterioration of those lands would

significantly increase the salinity of that river.

Mr. President, I am convinced that this unfortunate future need not occur—that we can halt this deterioration of the Federal rangelands, revitalize our economically troubled Western livestock industry, and improve substantially the quality of our environment. Today's permittees have taken a lead in assuring wise management of the rangelands. Indeed, they should be highly commended for making significant investments of their own money to improve lands which they do not even own. In addition, range specialists of the BLM have demonstrated on about 25 million acres of national resource lands that, with the employment of intensive management techniques, the trend can be reversed. Many would argue that this BLM interest in range rehabilitation is a belated one forced upon the agency by changing public opinion and recent court decisions. Whether this argument has validity, however, is far less important than the present commendable concern of both the agency and its permittees for the condition of its land resource. This concern can manifest itself only through our encouragement and assistance. We must supply the BLM with the necessary funds, manpower, and management directives it has previously lacked if the present modest effort is to be sustained and the management techniques involved are to be applied throughout the National Resource Lands wherever grazing occurs.

In an effort to promote and expand the existing range stabilization program, the Senate Energy and Natural Resources Committee, pursuant to section 301(c) of the Congressional Budget Act, recommended to the Budget Committee in March 1975 that the proposed fiscal year 1976 BLM budget for range and forage management be increased by $8.1 million to a total of $24.2 million. Again in March 1976, the committee recommended to the Budget Committee an increase of $8 million in the $20.8 million fiscal year 1977 BLM budget for range management. Each year, the committee noted that the proposed increases would be used to better supervise and evaluate existing range use, to make adjustments in, or further implementation of the existing 200 allotment management plans, placing approximately 4.5 million more acres under intensive management and providing forage for about 80,000 to 100,000 more cattle; to implement 90 of the 280 allotment management plans already prepared but not yet implemented, placing approximately 2 million more acres under intensive management and generating feed for an additional 36,000 to 40,000 cattle, and to gather and analyze the data necessary to begin prepartion of the 211 environmental impact statements which will be required in the preparation of the remaining allotment management plans.

In addition, last Congress, we enacted Public Law 94–579, the Federal Land Policy and Management Act of 1976. Section 401 of that act would raise from 25 to 50 percent the percentage of receipts from grazing permits and licenses to be expended for range improvements. The BLM estimates that, if full appropriations occur in the range improvement fund pursuant to this provision, the funds expended for range improvements on national resource lands will increase by $1,380,000 in fiscal year 1978 and by smaller additional sums thereafter if the fees rise as expected.

By making these various appropriation increases, we could modestly quicken the rate at which on-the-ground range rehabilitation is initiated, range improvements are developed, and allotment management plans are prepared and implemented. However, since the BLM estimates that 25 million acres are in need of immediate rehabilitation to protect watersheds and improve range and forage and since it agreed that the $895.5 million price tag for the 30-year range rehabilitation program of S. 2555 was accurate, it is apparent that both the modest appropriation increases recommended to the Budget Committee and the authorization increases contained in the Federal Land Policy and Management Act will prove woefully inadequate. The only truly effective remedy for the problems facing this segment of our Nation's rangeland is a broad based intensive management program designed to halt the deterioration of the rangeland and significantly increase the range's productive capacity.

The bill I am introducing today would establish such a management program. Many of the bill's general provisions reflect recommendations outlined in the BLM's range condition report. The legislation directs the Secretary of the Interior to establish an intensive 30-year range management program designed to correct present deficiencies and provide for full rehabilitation of the range and of the national resource lands. The bill would also provide management directives requiring that this rangeland be managed to ensure full productive capacity in a manner consistent with the protection and enhancement of resource values and with the multiple-use, sustained-yield concept of land management.

The bill provides the opportunity for strong citizen and State and local government participation. The Secretary is required early on; to propose, for public comment, specific plans for the rehabilitation of the various areas of the BLM range and to make public specific timetables for actions he proposes to take. I feel that these provisions requiring adequate notice and effective participation of State and local governments, users, and the public are extremely important. It is imperative that the Secretary carefully heed the comments of, and be held accountable for his actions by, those most directly affected—the range users and State and local governments.

Funds authorized under this legislation would total $10 million in fiscal year 1978, $14.5 million in fiscal year 1979, $19 million in fiscal year 1980, and $23.5 million in fiscal year 1981. Thereafter, the authorizations would rise $500,000 each and every fiscal year, reaching a high of $36.5 million in the last fiscal year—fiscal year 2007. The total 30-year authorization would be $853.5 million—down $41 million from the $895.5 million authorization in S. 2555 last Congress. This $41 million difference is expected to be made up by the additional moneys in the range improvement fund authorized by section 401 of the Federal Land Policy and Management Act of 1976.

Obviously, the costs of the proposed 30-year program are high. However, as I pointed out earlier, the direct and indirect costs resulting from delay and continued range deterioration are much higher.

Moreover, it should be emphasized that the benefits of such a long term management program are many. Under such a program, the BLM has estimated potential forage increases at 39 percent for livestock and 32 percent for big game animals. Erosion could be reduced to acceptable levels on an estimated 80 percent of the BLM range, and a 50-percent improvement in watershed conditions is predicted.

Overall, these benefits total an estimated $125 million annually, according to the BLM report.

Mr. President, even a cursory comparison of these $125 million annual benefits with an initial cost in the first year of $10 million and a maximum yearly cost of $36.5 million in the final year discloses a highly favorable cost-benefit ratio—one not duplicated in many Federal programs with which I am familiar. I truly believe that the type of intensive range management program which this bill would establish, is in fact, a bargain for all of us interested in improving the public range.

In addition to the reduction in the authorizations, I have made two other significant changes in the bill. First, I have added a provision to insure that 95 percent of all funds authorized by the bill would be spent on on-the-ground work. I join with the many cattlemen and woolgrowers among my constituents who believe far too much effort and funds are expended on planning and impact statement writing in comparison with the work done on the ground. Planning and impact statement writing are of critical importance if Federal moneys are to be spent wisely on the ground. But they are worthwhile activities only if those moneys are, in fact, expended.

Second, I have eliminated two controversial provisions added on the Senate floor in very close votes. One proposing a 5-year term for BLM grazing permits is now unnecessary as the Federal Land Policy and Management Act provides for 10-year permit terms. A second provision calling for permittees' payment of permit fees in kind may be unworkable and could place the Agency too much at the mercy of permittees whenever it wishes to conduct range improvement activities.

Mr. President, I urge my colleagues to again join me in supporting prompt enactment of this measure.

I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1074

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "National Rangelands Rehabilitation and Maintenance Act of 1977".

SEC. 2. FINDINGS, PURPOSES, AND DEFINITIONS.—

(a) The Congress finds that—

(1) despite increased efforts and expenditures of the Bureau of Land Management and individual users of the western public rangelands, many acres of the rangelands are producing less than their potential, a condition which threatens the livelihood of such users and the economic stability of neighboring communities, present levels of meat production, the quality and availability of scarce western water supplies, United States obligations to Mexico concerning the salinity level of the Colorado River, the maintenance of wildlife habitat, and the viability of flood prevention programs;

(2) the rangelands will remain in an unsatisfactory condition and some areas may decline further under present management levels;

(3) this condition can be corrected by a national commitment to a rangelands rehabilitation and maintenance program, a program which would provide the additional benefits of increased soil and watershed stability; protection of water quality and availability; expansion of the forage resource and a consequent rise in livestock production; enhancement, protection, and maintenance of wildlife habitat; reduced flood danger; and economic stabilization of communities and individuals dependent on such lands; and

(4) the Federal Land Policy and Management Act of 1976 (90 Stat. 2743) provides for a range betterment program which, if effectively implemented, will result in the improvement of the management of public rangelands but will not fully meet the rangelands rehabilitation and maintenance requirements of this Act.

(b) The Congress hereby finds a necessity for, and declares a national commitment to, the rehabilitation and maintenance of the rangelands. It is the purpose of this Act to establish a program to identify the current rangeland conditions and trends; to plan and effect actions to correct deficiencies in the rangelands; and to restore such lands to, and maintain them in, as full productive capacity as feasible.

(c) For the purpose of this Act—

(1) "Secretary" means the Secretary of the Interior; and

(2) "rangelands" means lands administered by the Secretary through the Bureau of Land Management on which there is domestic livestock grazing or which the Secretary determines may be suitable for domestic livestock grazing.

SEC. 3. RANGELANDS INVENTORY.—The Secretary shall develop within five years of the date of enactment of this Act, and maintain on a continuing basis thereafter, a comprehensive and appropriately detailed inventory of all rangelands. This inventory shall identify the resources of and deficiencies in the rangelands and shall be kept current so as to reflect changes in conditions. To the extent practicable such inventory shall be prepared and kept current in meeting the requirements of section 201 of the Federal Land Policy and Management Act of 1976 (90 Stat. 2743, 2747): *Provided,* That such inventory shall be made available to the public in a separate document.

SEC. 4. RANGELANDS REHABILITATION AND PROTECTION PROGRAM.—The Secretary shall develop, maintain, revise as necessary, and implement a rangelands rehabilitation and maintenance program for the improved management of the rangelands, which shall have as its purpose the correction of the deficiencies in the rangelands identified in the inventory prepared pursuant to section 3 and the rehabilitation of such lands within thirty years of enactment of this Act. Thereafter, such program shall provide for the maintenance of, or improvement in, the productive capacity of the rangelands achieved at the conclusion of such period in a manner consistent with the protection and enhancement of resource values identified by this Act and with the multiple use, sustained yield concept of land management set forth in section 103 of the Federal Land Policy and Management Act of 1976 (90 Stat. 2743, 2745–46). The program shall include plans for the various areas of the rangelands, which plans shall specify the actions, and the schedule thereof, to be undertaken on such areas within said thirty-year period. Such plans may identify areas of the rangelands which, because of their small relative size, minor resource value, scattered land ownership, or other reasons, are unsuitable for the improved management required by this Act and may provide for appropriate management of such areas to arrest further decline, and protect the multiple use values, thereof.

SEC. 5. RANGELANDS MANAGEMENT.—The Secretary shall manage the rangelands in accordance with the Taylor Grazing Act (48 Stat. 1269, as amended; 43 U.S.C. 315), the Federal Land Policy and Management Act of 1976, and other applicable law consistent with the rangelands rehabilitation and maintenance program developed pursuant to this Act.

SEC. 6. PARTICIPATION OF STATE AND LOCAL GOVERNMENTS, USERS, AND THE PUBLIC.—The Secretary, by regulation, shall establish procedures, including public hearings or meetings where appropriate, to give State and local governments, users of the rangelands, and the public adequate notice and an opportunity to comment upon the rangelands rehabilitation and maintenance program during its preparation and implementation.

SEC. 7. RANGELANDS REPORT.—The Secretary shall prepare a rangelands report covering the first full fiscal year following the enactment of this Act and thereafter shall prepare reports at three-year intervals. Each such report shall be made available to the public and submitted to the Congress no later than one hundred and twenty days after the close of the appropriate fiscal year. The report shall include, in appropriate detail, an analysis of the condition of the rangelands, the implementation of the rangelands rehabilitation and maintenance program, and the progress made in meeting the objectives of this Act.

SEC. 8. AUTHORIZATIONS.—There are hereby authorized to be appropriated for the purpose of this Act additional funds over and above the amounts appropriated to the Bureau of Land Management in fiscal year 1977 for livestock management, soil and water, and wildlife and the amounts appropriated to the Secretary during any fiscal year after enactment of this Act pursuant to the appropriation authorization in section 401 of the Federal Land Policy and Management Act of 1976 (90 Stat 2743, 2772), as follows: an increase of $10,000,000 in fiscal year 1978; additional increases of $4,500,000 per year each and every year in fiscal years 1979, 1980, and 1981; and additional increases of $500,000 per year each and every year from fiscal year 1982 through and including fiscal year 2007. Any increased amounts as authorized herein not appropriated in one or more years shall be authorized for appropriation in any subsequent year. Not less than ninety-five per centum of the amounts appropriated pursuant to the authorizations in this section shall be expended for on-the-ground range rehabilitation, protection, and improvements.

SEC. 9. CONSTRUCTION OF LAW.—Nothing in this Act shall be construed to diminish the authority of the Secretary under any existing provision of law.

By Mr. GARN:

S. 1076. A bill to provide that the laws restricting trade between points in the United States to vessels of the United States shall not apply to inflatable boats used in river running; to the Committee on Commerce, Science, and Transportation.

Mr. GARN. Mr. President, I am today introducing legislation to exempt inflatable rafts from regulation under the Jones Act.

Under the Constitution, the Federal Government is given authority to regulate commerce among the several States, and on the "navigable waters." The reach of the Federal Government into the navigable waters of the United States extends to the country of origin of ships used in interstate commerce. This reach is provided under the Jones Act, adopted in 1920, as a protectionist measure, designed to assure the continued viability of the American merchant marine and shipbuilding, industries. The Jones Act requires that coastwise shipping, that is, shipping between points within the United States must take place in U.S. bottoms, that is, in ships manufactured in the United States.

It was never contemplated, Mr. President, that such a law would affect the running of rivers in the interior of the United States. Now however, through a complex regulatory development, exactly that may happen. Commercial river runners, all over the country, may soon find that they are unable to use foreign-made rafts in pursuing their trade.

As it happens, a very large percentage of the rubber rafts now in use on the rivers of the United States are foreign made. Should the Jones Act be enforced on the river runners, they would be forced either to make huge capital investments—and might possibly not be able to get sufficient domestic boats at all—or to rely on older unsafe boats.

It appears to me, Mr. President, that we are witnessing an almost classic example of bureaucratic expansion. No one has ever seriously argued that the Jones Act was designed to promote boating safety among river runners, or even that its application to rubber rafts is essential to the maintenance of the American shipbuilding industry. In fact, I have been informed that at least one of the very few domestic manufacturers stands ready to compete against all competitors, foreign and domestic. What we are seeing is the application of a law adopted for one purpose to a completely different purpose.

It is to the credit of the Coast Guard that it has not, as yet, undertaken the regulation which would so severely cripple a small but important industry. To be honest, it appears to me that the Coast Guard is waiting, perhaps hoping that the Congress will act, to spare them the impossible task of regulating where they were not intended to regulate. My legislation would relieve them of this burden, by exempting inflatable rubber rafts used in river running from the Jones Act.

It is a simple bill, easily understood, and it will keep the regulatory lines straight.

By Mr. INOUYE:

S. 1077. A bill to regulate certain interstate commerce and to assure that essential maritime transportation is provided, and for other purposes; to the Committee on Commerce, Science, and Transportation.

Mr. INOUYE. Mr. President, today I am introducing the Essential Maritime Transportation Act of 1977. This legislation authorizes and directs the Secretary of Commerce to take specific action to assure that essential maritime transportation is provided to our noncontiguous States. It is clear that any prolonged interruption of maritime transportation upon which the residents of those States are almost totally dependent for food, energy supplies, and other necessities, threatens the economic well-being, job security, health, and safety of these persons. Indeed such a condition is an undue burden on commerce. By this act the Congress will authorize and direct the Secretary of Commerce to assure that this essential transportation is provided.

I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1077

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Essential Maritime Transportation Act of 1977".

SEC. 2. DECLARATION OF POLICY.

The Congress finds and declares that the economic well-being of noncontiguous States, and the job security, health, and safety of the residents of those States, are almost totally dependent upon the transportation by water to such States of food, energy supplies, and other necessities from the contiguous States. Any prolonged interruption of this essential maritime transportation threatens this well-being, security, health, and safety and constitutes an undue burden on commerce. It is the purpose of the Congress in this Act to authorize and direct the Secretary of Commerce to assure that essential maritime transportation is provided in the event of any such interruption.

SEC. 3. DEFINITIONS.

As used in this Act:

(1) The term "chief executive officer" means the Governor or, with respect to the Trust Territory of the Pacific Islands, the High Commissioner.

(2) The term "contiguous States" means the 48 States of the United States which are physically connected to one another.

(3) The term "essential maritime transportation" means any transportation by water between any port or place in a noncontiguous State and any other port or place in the United States, of food, energy supplies, consumer goods, or equipment and material necessary for employment.

(4) The term "interruption" means any cessation or other suspension in the provision of essential maritime transportation, whether caused by any natural disaster, war, national emergency, explosion or other property destruction, labor-management disagreement, or other natural or manmade occurrence.

(5) The term "noncontiguous State" means Alaska, Hawaii, Guam, American Samoa, the Northern Mariana Islands, and the Trust Territory of the Pacific Islands.

(6) The term "Secretary" means the Secretary of Commerce or his designee, including the Administrator of the Maritime Administration.

SEC. 4. NECESSARY MARITIME TRANSPORTATION CONTINUATION.

Notwithstanding any other provision of law, the Secretary shall, in the event of a prolonged interruption in the provision of essential maritime transportation and upon the request of the chief executive officer of an effected noncontiguous State, take any action authorized in this section, whichever is most appropriate, and shall take such other steps as are necessary, to provide for essential maritime transportation. The Secretary may, in case of any interruption of more than 5 days in duration—

(1) activate and direct any vessel of the national defense reserve fleet to provide, or to assist in providing, essential maritime transportation;

(2) request any other officer, or any department, agency, or instrumentality, of the Federal Government to make available on a nonreimbursable basis any personnel, service, or facility which the Secretary deems necessary, for use in providing essential maritime transportation;

(3) commence, on an emergency basis, a civil action in any appropriate court of the United States for an order that may terminate, or assist in terminating, such interruption; or

(4) take any other lawful action which he deems appropriate as a means of terminating such interruption or otherwise providing for essential maritime transportation.

The courts of the United States shall, notwithstanding any other provision of law, have jurisdiction to issue an order requested by the Secretary in an action under this section upon a finding by the court that (A) such order is necessary to assure the provision of essential maritime transportation; and (B) no practicable alternative to such order, which is likely to result in the prompt provision of such transportation, is available. All other Federal departments, agencies, and instrumentalities shall, in consultation with and with the assistance of the Secretary, utilize their authorities under other provisions of law in furtherance of the purpose of this Act, including, but not limited to, complying with requests made under paragraph (2).

By Mr. PROXMIRE (for himself and Mr. BROOKE):

S. 1078. A bill to amend section 245 of the National Housing Act to revise the experimental mortgage insurance program; to the Committee on Banking, Housing, and Urban Affairs.

Mr. PROXMIRE. Mr. President, I am introducing today a bill to amend the National Housing Act in order to authorize the Secretary of Housing and Urban Development to expand HUD's present experiment in developing new mortgage repayment schedules. The bill would also permit HUD greater flexibility in carrying out its program. This amendment has been requested by the administration as part of its new legislative package.

Under existing law, the Secretary is authorized to insure mortgages and loans at rates of interest which may vary according to the income of the borrowing family. The existing law, section 245 of the National Housing Act, however, provides that such a graduated mortgage payment program may be used only on an experimental basis, and limits the amount of mortgages which may be insured in this manner to 1 percent of the outstanding aggregate principal amount of all mortgages and loans insured in any one year under title II of the National Housing Act.

The amendment I am proposing would remove both the restriction that the section 245 authority be used only on an experimental basis, and the limitation on the amount of mortgages that may be insured in any one year.

The expansion of a graduated mortgage payment program represents a very promising approach toward facilitating homeownership, particularly in the case of young families who are frequently unable to meet the heavy payment burden imposed during the early years under the traditional mortgage payment schedule.

To provide assurance against default and, at the same time, permit the mortgage balance to increase initially, the amendment would permit allowable mortgage-to-value limits to be calculated on the basis of a principal obligation that may exceed the principal amount otherwise allowable, so long as the principal obligation—including any deferred interest—does not exceed 97 percent of the appraised value of the property. This would insure that a mortgagor would always have an equity of at least 3 percent of the appraised value.

The amendment would remove the present 1-percent limitation on the aggregate amount of mortgages that may be insured in order to permit HUD to insure more than the few thousand units which HUD is presently permitted to insure under the experimental financing provision.

The amendment would, additionally, authorize a limited preemption of certain State restrictions which are applicable to section 245 mortgages. The preemption is designed to overcome the problem presented in a number of States where there is substantial uncertainty as to whether State restriction on interest rates apply to the addition of deferred interest to principal, or the charging of interest on interest, under graduated payment mortgages.

I anticipate that the Committee on Banking, Housing and Urban Affairs will hold hearings on this amendment which I believe has considerable promise for improving housing opportunities in our Nation.

By Mr. MATHIAS:

S. 1080. A bill to provide an opportunity to individuals to making financial contributions, in connection with the payment of their Federal income tax, for the advancement of the arts and the humanities; to the Committee on Finance.

VOLUNTARY CITIZEN FINANCING FOR THE ARTS AND EDUCATION

Mr. MATHIAS. Mr. President, I am introducing today a bill to provide much needed financial help for our cultural and educational institutions. The bill would provide for a voluntary checkoff on Federal income tax returns for contributions to the National Endowment for the Arts and the National Endowment for the Humanities. Such contributions would be in addition to tax payments or in lieu of refunds.

An identical bill has already been in-

troduced in the House by Representative FREDERICK W. RICHMOND, of New York. The Congressman's bill continues to attract support for its concept by private cultural and educational groups across the country such as the Actors Equity Association; Associated Actors and Artists of America; the New York Shakespeare Festival; the Associated Council of the Arts; the International Conference of Symphony and Opera Musicians, and many others.

The bill provides for a checkoff space on the front page of the Federal income tax return for contributions to the National Endowments which, in turn, make grants to institutions, organizations, artists in both the performing and fine arts, and community groups engaged in cultural and educational activities.

It has been estimated that over $1 billion is needed on a yearly basis to adequately support our many fine cultural and educational activities. Yet the Federal Government appropriates only $170 million to the National Endowments which nurture those activities.

This bill provides a means for private citizens of moderate means to do their part for a most important activity in American life.

There is nothing new in the principle. For many years millionaires have received tax recognition for large gifts to museums, universities and other cultural institutions. Now tax recognition would be available under this bill for the small donor, and it should be an encouragement for modest gifts.

It is a sad fact of life for most of our cultural and educational groups that their costs of operation are twice as great as their present revenues derived from performances, art sales, gifts, royalties, and general fundraising. The cultural checkoff would provide up to $1 billion in annual revenue to assure the growth of American theater, performing and fine arts, educational theater, museums, and the like. It would assure financial security to many small struggling companies so that they might focus on their art rather than on continual fundraising.

The benefit to the Nation would be a broadening of cultural and educational performances, and displays for all Americans in which to participate, see, hear, and enjoy.

By Mr. INOUYE:

S. 1090. A bill to provide for improved labor-management relations in the Federal service, and for other purposes; to the Committee on Governmental Affairs.

Mr. INOUYE. Mr. President, today I am introducing a bill which, if enacted, would establish by law a system whereby Federal employees may join a labor union, participate in its management, and bargain collectively on matters affecting the conditions of their employment. The bill is entitled the Federal Service Labor-Management Act of 1977.

This bill will put Federal workers unions on equal footing with management in labor disputes during contract negotiations and during consultations. With the present system, which is based on Executive order rather than statutory law, disputes between individual employees and an agency are often management dominated. This bill will bring objectivity to grievances, arbitrations, impasses, unfair labor practice charges and adverse action appeals. Further, it will give the individual Federal worker a larger role in making decisions regarding his or her working conditions.

This is a well-balanced labor relations program which, I believe, will increase efficiency and morale of Government workers by providing them with the opportunity for meaningful participation in the conduct of business in general and the conditions of their employment.

This bill is strongly endorsed by Federal employees though their elective leaders.

The major provisions of the bill are as follows:

Establishes the rights of employees to join or not to join an employee organization, to participate in its management, and to bargain collectively over conditions of employment.

Establishes the Federal Labor Relations Authority consisting of three members who are appointed by the President and confirmed by the Senate with responsibility for taking leadership in the establishment of Federal labor-management relations policy and administering the provisions of the law.

Establishes within the Authority the Federal Services Impasses Panel, whose members, subject to the review of the Authority, are empowered to investigate and make findings and recommendations for the resolution of collective bargaining impasses. Authorizes the Federal Mediation and Conciliation Service to assist in negotiation impasses.

Provides the means whereby a labor organization shall be granted exclusive recognition of a bargaining unit by securing a majority vote of those employees participating in the election; dues checkoff; and payment of representation fee by nonmember employees of the bargaining unit.

Establishes a Federal Personnel Policy Board whose members are appointed by the Authority and are responsible for acting upon Federal personnel polices and regulations which affect the conditions of employment of more than one agency's employees.

States the rights and duties of both labor and management, insuring that each is free to conduct certain business without interference from the other; requires negotiation in good faith by both parties; establishes standards of conduct for labor organizations; and grants national consultation rights to unions which represent a substantial number of agency employees.

Provides for establishment of negotiated grievance procedures, including binding arbitration of grievances, subpoena powers to Authority, and conditions under which judicial review is available to either party.

Provides for resolution of unfair labor practices.

Provides that an employee against whom an adverse action is proposed is entitled to 30 days written notice, relevant evidence, pretermination hearing, transcript, and written decision.

Authorizes such sums as may be necessary for the implementation of this act.

I urge my colleagues to give this important legislation early and favorable consideration.

Mr. President, I ask unanimous consent that the text of this bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1090

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Federal Service Labor-Management Act of 1977".

SEC. 2. So much of subpart F of part III of title 5, United States Code, as precedes subchapter II of chapter 71 thereof is amended to read as follows:

"Subpart F.—LABOR-MANAGEMENT AND EMPLOYEE RELATIONS

"Chapter 71.—LABOR-MANAGEMENT RELATIONS

"SUBCHAPTER I.—GENERAL PROVISIONS

"Sec.
"7101. Findings.
"7102. Employees' rights.
"7103. Definitions; application.
"7104. Federal Labor Relations Authority.
"7105. Powers and duties of the Authority.

"SUBCHAPTER II.—RIGHTS AND DUTIES OF AGENCIES AND LABOR ORGANIZATIONS

"Sec.
"7111. Exclusive recognition of labor organizations.
"7112. National consultation rights.
"7113. Representation rights and duties.
"7114. Allotments to representatives.
"7115. Unfair labor practices.
"7116. Prevention of unfair labor practices.
"7117. Negotiation impasses; Federal Service Impasses Panel.
"7118. Standards of conduct for labor organizations.

"SUBCHAPTER III.—GRIEVANCES, APPEALS, AND REVIEW

"Sec.
"7119. Appeals from adverse decisions.

"SUBCHAPTER I.—GENERAL PROVISIONS

"§ 7101. Findings

"The Congress finds that the participation of employess through labor organizations of their own choosing in the formulation and implementation of matters affecting conditions of employment is in the public interest.

"§ 7102. Employees' rights

"Each employee shall have the right to form, join, or assist any labor organization, or to refrain from such activity, freely and without fear of penalty or reprisal, and each such employee shall be protected in his exercising of such right. Except as otherwise provided under this chapter, such right includes the right to participate in the management of a labor organization, the right to act for the organization in the capacity of a representative, and the right, in such

capacity, to present the views of the organization to agency heads and other officials of the executive branch of the Government, the Congress, or other appropriate authorities; and to bargain collectively over conditions of employment and other matters of mutual concern relating thereto through representatives of their own choosing and to engage in other lawful activities for the purpose of establishing, maintaining, and improving conditions of employment and other matters of mutual concern relating thereto.

"§ 7103. Definitions; application

"(a) For the purpose of this chapter—

"(1) 'person' means an individual, labor organization, or agency covered by this chapter;

"(2) 'employee' means an individual—

"(A) employed in an agency;

"(B) employed in a nonappropriated fund instrumentality described in section 2105(c) of this title;

"(C) employed in the Veterans' Canteen Service, Veterans' Administration, described in section 5102(c)(14) of this title; or

"(D) who was an employee (as defined under subparagraph (A), (B), or (C) of this paragraph) and was separated from service as a consequence of, or in connection with, an unfair labor practice under section 7115 of this title;

but does not include—

"(i) an alien or noncitizen of the United States who occupies a position outside of the United States;

"(ii) a member of the uniformed services;

"(iii) for the purpose of exclusive recognition or national consultation rights (except as authorized under the provisions of this chapter), a supervisor or a management official; or

"(iv) an employee of the Tennessee Valley Authority;

"(3) 'labor organization' means any organization (including any national or international union, federation, council, or department, or any affiliate thereof), composed in whole or in part of employees of an agency, in which employees participate and pay dues, and which has as its primary purpose the dealing with an agency concerning grievances and the formulation and implementation of matters affecting conditions of employment, except that such term does not include—

"(A) an organization whose basic purpose is purely social, fraternal, or limited to special interest objectives which are only incidentally related to matters affecting conditions of employment;

"(B) an organization which, by ritualistic practice, constitution, bylaws, tacit agreement among its members, or otherwise denies membership because of race, color, creed, national origin, sex, age, or preferential or nonpreferential civil service status;

"(C) an organization sponsored or assisted by an agency or by any part of any agency; or

"(D) an organization which consists of management officials or supervisors, except as authorized under this chapter;

"(4) 'Authority' means the Federal Labor Relations Authority established by section 7104 of this title;

"(5) 'Panel' means the Federal Service Impasses Panel established by section 7117 (c) of this title;

"(6) 'Board' means the Federal Personnel Policy Board established by section 7113(e) of this title;

"(7) 'agreement' means an agreement entered into as a result of collective bargaining pursuant to the provisions of this chapter;

"(8) 'grievance' means any complaint by any person—

"(A) concerning any matter relating to the employment relationship with any agency;

"(B) concerning the effect or interpretation, or a claim of breach, of an agreement; or

"(C) concerning any claimed violation, misinterpretation, or misapplication of law, rule, or regulation, affecting conditions of employment;

"(9) 'supervisor' means any employee having authority in the interest of an employer to hire, direct, assign, promote, reward, transfer, lay off, recall, suspend, discipline, or discharge other employees or to adjust their grievances, or to effectively recommend such action if in connection with the foregoing the exercise of such authority is not merely routine or clerical in nature but calls for the consistent exercise of independent judgment; except that with respect to firefighters and nurses the term 'supervisor' shall include only those employees who perform a preponderance of the above-specified acts of authority;

"(10) 'management official' means an individual who formulates, determines, effectively influences, or effectuates policies of an agency, or who, in the performance of his duties, has discretion to modify the established policies of an agency;

"(11) 'collective bargaining' or 'bargaining' means the performance of the mutual obligation of the representatives of the agency and the exclusive representative to meet at reasonable times and to confer, consult, and bargain in a good-faith effort to reach agreement with respect to the terms and conditions of employment and other matters of mutual concern relating thereto, and to execute, if requested by either party, a written document incorporating any agreements reached, but such obligation does not compel either party to agree to a proposal or to make a concession. The duty to bargain shall extend to matters which are or may be the subject of any regulation. The agency may not make or apply rules or regulations which restrict the scope of collective bargaining permitted by this chapter or which are in conflict with any agreement negotiated under this chapter;

"(12) 'confidential employee' means an employee who acts in a confidential capacity to a person who formulates or effectuates management policies in the field of labor relations;

"(13) 'conditions of employment' means personnel policies, practices, and matters affecting working conditions, including, but not limited to—

"(A) pay practices;

"(B) work hours and schedules;

"(C) overtime practices;

"(D) safety;

"(E) promotion procedures and assignment, transfer, detail, leave and reduction-in-force practices;

"(F) seniority;

"(G) procedures for taking disciplinary actions;

"(H) grievance and appeal procedures; and

"(I) all matters subject to negotiations in any agency on, or prior to, the effective date of this Act;

"(14) 'professional employee" means—

"(A) an employee engaged in the performance of work—

"(i) requiring knowledge of an advanced type in a field of science or learning customarily acquired by a prolonged course of specialized intellectual instruction and study in an institution of higher learning or a hospital (as distinguished from knowledge acquired by a general academic education, or from an apprenticeship, or from training in the performance of routine mental, manual, mechanical, or physical activities);

"(ii) requiring the consistent exercise of discretion and judgment in its performance;

"(iii) which is predominantly intellectual and varied in character (as distinguished from routine mental, manual, mechanical, or physical work); and

"(iv) which is of such a character that the output produced or the result accomplished by such work cannot be standardized in relation to a given period of time; or

"(B) an employee who has completed the courses of specialized intellectual instruction and study described in subparagraph (A) of this paragraph and is performing related work under the direction or guidance of a professional person to qualify himself to become a professional employee;

"(15) 'agency' means any department, agency, bureau, or organization of the United States Government which employs employees as defined in subsection (a)(2) of this section;

"(16) 'exclusive representative' includes any employee organization which has been—

"(A) selected or designated pursuant to the provisions of section 7111 of this Act as the representative of the employees in an appropriate collective bargaining unit; or

"(B) recognized by an agency prior to the effective date of this Act as the exclusive representative of the employees in an appropriate collective bargaining unit;

"(17) 'firefighter' includes any employee engaged in the performance of work directly connected with the control and extinguishment of fires or the maintenance and use of firefighting apparatus and equipment;

"(18) 'educational employee' includes any employee of a school system, college, or university, who—

"(A) has regular contact with students;

"(B) participates in the development, implementation, or evaluation of an educational program; or

"(C) is otherwise involved in the teaching-learning process.

"(b) This chapter does not authorize participation in the management of a labor organization or acting as a representative of such an organization by a management official or a supervisor, except as specifically provided in this chapter, or by an employee when the participation or activity would result in a conflict or apparent conflict of interest or would otherwise be incompatible with law or with the official duties of the employee.

"§ 7104. Federal Labor Relations Authority

"(a) There is established the Federal Labor Relations Authority.

"(b) The Authority shall be composed of a Chairman and 2 other members. Not more than 2 of the members shall be members of the same political party. A member shall not engage in any other business or employment.

"(c) Members of the Authority shall be appointed by the President, by and with the advice and consent of the Senate. Authority members shall be eligible for reappointment. The President shall designate one member to serve as Chairman of the Authority.

"(d) One of the original members of the Authority shall be appointed for a term of 1 year, one for a term of 3 years, and the Chairman for a term of 5 years. Thereafter, each member shall be appointed for a term of 5 years. Notwithstanding the preceding provisions of this subsection, the term of any member shall not expire before the earlier of (1) the date on which his successor takes office or (2) the last day of the session of the Congress beginning after the date his term of office would (but for this sentence) expire. An individual chosen to fill a vacancy shall be appointed for the unexpired term of the member he replaces. Any member of the Authority may be removed by the President only for neglect of duty or malfeasance in office.

"(e) A vacancy in the Authority shall not impair the right of the remaining members to exercise all of the powers of the Authority.

"(f) The Authority shall make an annual report to the President for transmittal to the Congress, which shall include information as to the cases it has heard and the decisions it has rendered.

"(g) There shall be a General Counsel of the Authority who shall be appointed by the President by and with the advice and consent of the Senate for a term of 5 years. The General Counsel shall be authorized to investigate alleged violations of this chapter, to file and prosecute complaints filed under this chapter, to intervene before the Authority in unlawful act proceedings brought under section 7105 of the chapter. He shall have direct authority over, and responsibility for, all field employees of the General Counsel in the regional offices of the Authority. The General Counsel shall exercise such other powers as the Authority may prescribe. If a vacancy occurs in the Office of General Counsel, the President shall promptly designate an Acting General Counsel and shall submit a nomination for a replacement to Congress within 40 days after the vacancy has occurred, unless Congress shall have adjourned before the expiration of said 40-day period, in which event the President shall submit a nomination not later than ten days after Congress reconvenes.

"§ 7105. Powers and duties of the Authority

"(a) The Authority shall provide leadership in establishing labor-management relations policy and guidance under this chapter, and, except as otherwise provided, shall be responsible for carrying out the purposes of this chapter.

"(b) The Authority shall adopt an official seal which shall be judicially noticed.

"(c) The principal office of the Authority shall be in the District of Columbia but it may meet and exercise any or all of its powers at any time or place. Subject to subsection (g) of this section, the Authority may, by one or more of its members or by such agents as it may desginate, make any inquiry necessary to carry out its duties wherever persons subject to this chapter are located. A member who participates in such inquiry shall not be disqualified from later participating in a decision of the Authority in the same case.

"(d) The Authority shall appoint an Executive Director, such attorneys, regional directors, administrative law judges, and other employees as it may from time to time find necessary for the proper performance of its duties. No administrative law judge's report shall be reviewed, either before or after its publication, by any person other than a member of the Authority or his legal assistant, and no administrative law judge shall advise or consult with the Authority with respect to exceptions taken to his findings, rulings, or recommendations.

"(e) The Authority may delegate to its Regional Directors, its powers under section 7111 to determine the unit appropriate for the purpose of collective bargaining, to investigate and provide for hearings, to determine whether a question of representation exists and to direct an election, conduct a secret ballot election, and certify the results thereof, except that upon the filing of a request therefore with the Authority by any interested person, the Authority may review any action of any Regional Director delegated to him under this paragraph, but such review shall not, unless specifically ordered by the Authority, operate as a stay of any action taken by the Regional Director. The Authority is also authorized to delegate to an administrative law judge its powers under section 7115 to determine whether any person has engaged in an unfair labor practice.

"(f) In the event the Authority exercises the power conferred by subsection (e) of this section to delegate its powers to a regional director or administrative law judge, it may, upon application to it, review, and upon such review, modify, affirm, or reverse the decision, certification, or order of such regional director or administrative law judge. In event that the Authority does not undertake to grant review within thirty days after a request for review is filed, the decision of the regional director or administrative law judge shall become the decision of the Authority.

"(g) All of the expenses of the Authority, including all necessary traveling and subsistence expenses outside the District of Columbia incurred by members, employees, or agents of the Authority under its orders, shall be allowed and paid on the presentation of itemized vouchers therefor approved by the Authority or by any individual it designated for that purpose.

"(h) The Authority is expressly empowered and directed to prevent any person from engaging in conduct in violation of this chapter. In order to carry out its functions under this chapter, the Authority is authorized to hold hearings, subpena witnesses, administer oaths, and take the testimony or deposition of any person under oath, and in connection therewith, to issue subpenas requiring the production and examination of any books or papers, including those of the Federal Government, relating to any matter pending before it and to take such other action as may be necessary.

"SUBCHAPTER II.—RIGHTS AND DUTIES OF AGENCIES AND LABOR ORGANIZATIONS

"§ 7111. Exclusive recognition of labor organizations

"(a) Exclusive recognition shall be granted to a labor organization which has been selected by a majority of employees in an appropriate unit who participate in the election in conformity with the requirements of this chapter.

"(b) Exclusive recognition shall not be accorded to a labor organization if—

"(1) the Authority determines the labor organization is subject to corrupt influences or influences opposed to democratic principles;

"(2) its petition is filed pursuant to subsection (c) but is not supported by credible evidence demonstrating that at least 30 per centum of the employees in the collective bargaining unit described therein wish to be represented for the purpose of collective bargaing by the organization seeking recognition;

"(3) there is currently in effect, a lawful written collective-bargaining agreement between such employer and an employee organization other than the petitioner covering any employees included in the unit described in the petition, unless such agreement has been in effect for more than 3 years, or unless the request for recognition is filed at least 60 days prior to the expiration date of such agreement, or such greater number of days prior to said expiration date as the Authority may determine is reasonable because of the budget making procedure of the agency;

"(4) within the previous 12 months an employee organization other than the petitioner, or other than the employee organization challenged if the petition is filed pursuant to subsection (c)(1), has been lawfully recognized or certified as the exclusive representative of any employees included in the unit described in petition; or

"(5) the Authority has, within the previous twelve months, conducted a secret ballot election involving any of the employees and a majority of the valid ballots cast opposed representation by any labor organization.

"(c) Whenever a petition has been filed with the Authority—

"(1) by any person alleging that 30 per centum of the employees in the appropriate unit (A) wish to be represented for collective bargaining by an exclusive representative, or (B) allege that the exclusive representative is no longer the representative of the majority of the employees in the unit; or

"(2) by any person seeking clarification of, or an amendment to, an existing certification;

the Authority shall investigate such petition, and if it has reasonable cause to believe that a question of representation exists, it shall provide for an appropriate hearing on the record upon due notice. Except as provided under subsection (f) of this section, if the Authority finds upon the record of such hearing that such a question of representation exists, it shall conduct an election by secret ballot and shall certify the results thereof. An election shall not be conducted in any bargaining unit or in any subdivision thereof within which in the preceding 12-month period, a valid election has been held.

"(d) A labor organization which—

"(1) has been designated by at least 10 per centum of the employees in the unit;

"(2) has submitted a valid copy of a current or recently expired agreement for the unit; or

"(3) has submitted other evidence that it is the exclusive representative of the employees involved;

may intervene with respect to a petition filed under subsection (c) of this section and shall be placed on the ballot of any election ordered to be held under such subsection (c).

"(e) The Authority shall determine who is eligible to vote in the election and shall establish rules governing the election which shall include provisions allowing each employee eligible to vote the opportunity to choose the labor organization he wishes to represent him from those on the ballot or no union. In any election where no choice on the ballot receives a majority, a runoff election shall be conducted between the two choices receiving the largest number of votes. A labor organization which receives the majority of the votes cast in an election shall be certified by the Authority as the exclusive representative.

"(f) The Authority may certify a labor organization as an exclusive representative—

"(1) if it determines that the conditions for a free and untrammeled election under this section cannot be established because an agency has engaged in or is engaging in an action described in section 7115 of this title; or

"(2) upon the petition of such labor organization, if, after investigation, the Authority is satisfied that—

"(A) the labor organization represents a majority of employees in an appropriate unit;

"(B) such majority status was achieved without the benefit of any action described in section 7115 of this title; and

"(C) no other person has filed a petition for recognition under subsection (c) of this section or a request for intervention under subsection (d) of this section, and no other question of representation exists in the appropriate unit.

"(g) The Authority shall decide in each case whether in order to insure employees the fullest freedom in exercising the rights guaranteed under this chapter, the unit to be established will be on an agency, plant, installation, functional, or other basis which will insure a clear and identifiable community of interest among the employees concerned.

"(h) A unit shall not be established solely on the basis of the extent to which employees in the proposed unit have organized, nor shall a unit be established if it includes—

"(1) Any management official or supervisor, except as provided under section 7137(a) of this title; except that—

"(A) with respect to firefighters, a unit that includes both supervisors and nonsupervisors may be considered; and

"(B) with respect to educational employees, a unit that includes both supervisors and nonsupervisors may be considered appropriate if the majority of employees in each category indicate by vote or other credible evidence that they desire to be included in such units;

"(2) a confidential employee;

"(3) an employee engaged in personnel work in other than a purely clerical capacity;

"(4) an employee engaged in administering the provisions of this chapter; or

"(5) both professional and nonprofessional employees, unless a majority of the professional employees vote for inclusion in the unit;

"(6) as determined by the Authority upon application by the head of the agency—

"(A) any employee engaged in intelligence, investigative, or security functions of the agency which directly affects national security; or

"(B) any employee primarily engaged investigation or audit functions relating to the work of an agency's officers or employees whose duties directly affect the internal security of that agency where such investigation or audit is undertaken to insure that such duties are discharged honestly and with integrity.

"(i) Two or more units for which the labor organization holds exclusive recognition within the agency may be consolidated into a single larger unit if the Authority determines the larger unit to be appropriate. The Authority shall certify the labor organization as the exclusive representative in the new unit when the unit is found appropriate.

"(j) A labor organization seeking exclusive recognition shall submit to the Authority and the agency a roster of its officers and representatives, a copy of its constitution and bylaws, and a statement of its objectives.

"(k) Nothing in this section shall be construed to prohibit the waiving of hearings by stipulation for the purpose of a consent election in conformity with regulations and rules or decisions of the Authority.

"§ 7112. National consultation rights

"(a) A labor organization that has been granted exclusive recognition below the agency level as the representative of a substantial number of employees of the agency shall be granted national consultation rights in accordance with criteria prescribed by the Authority. The provisions of this section shall not apply to any agency in which exclusive recognition on an agency basis is in effect. National consultation rights shall terminate when the labor organization no longer meets the criteria of the Authority. Any issue as to a labor organization's eligibility for national consultation rights, or the continuation of such rights, shall be subject to review by the Authority.

"(b) A labor organization having national consultation rights shall be informed of proposed changes in conditions of employment and shall be permitted reasonable time to present its views and to initiate proposals. Such proposals shall receive consideration by the agency before final action is taken, and the agency shall provide the organization a written statement of the reasons for its actions.

"§ 7113. Representation rights and duties

"(a) When a labor organization has been accorded exclusive recognition, it is the exclusive representative of employees in the unit and is entitled to act for and negotiate agreements covering all employees in the unit. It is responsible for representing the interests of all employees in the unit without discrimination and without regard to labor organization membership. The labor organization shall be given the opportunity to be represented at formal discussions between management and employees or employee representatives concerning grievances, personnel policies and practices, or other matters affecting general working conditions of employees in the unit. The agency and the labor organization, through appropriate representatives, shall meet and negotiate in good faith for the purpose of arriving at an agreement.

"(b) The duty of the agency and the labor organization to negotiate in good faith includes—

"(1) to approach the negotiations with a sincere resolve to reach an agreement;

"(2) to be represented at the negotiations by duly authorized representatives prepared to discuss and negotiate on all matters affecting conditions of employment;

"(3) to meet at reasonable times and convenient places as frequently as may be necessary and to avoid unnecessary delays;

"(4) to furnish, in the case of information to be furnished by an agency to the other party upon request, data normally maintained in the regular course of business, reasonably available and necessary for full and proper discussion, understanding, and negotiation of subjects within the scope of collective bargaining; and

"(5) if an agreement is reached, to execute upon request a written document embodying the agreed terms, and to take such steps as are necessary to implement the agreement.

"(c) In all aspects of the collective-bargaining relationship and the rights of any person established under or pursuant to this chapter, including the negotiation and administration of agreements, a person shall be governed by—

"(1) applicable laws; and

"(2) the terms of a controlling agreement at a higher agency level.

"(d)(1) If a policy or regulation, or an amendment thereto, affecting conditions of employment is to be issued by the Civil Service Commission or any other agency and relates to employees of more than one agency, then a copy of the proposal shall be transmitted to the Board for consideration under subsection (c) of this section.

"(2) If a policy or regulation, or an amendment thereto, affecting conditions of employment, is to be issued by the head of an agency or a management official and relates to employees of the agency for which a labor organization holds exclusive recognition at the agency level, then the proposal shall be subject to negotiation with such labor organization.

"(3) If a policy or regulation, or an amendment thereto, affecting conditions of employment is to be issued by the head of an agency or by the head of a primary national subdivision of an agency and relates to employees of such agency or subdivision, as the case may be, and exclusive recognition is not held by any labor organization for all employees of such agency or subdivision, then the proposal shall be issued in accordance with procedures and criteria established by the Authority. An agency policy or regulation affecting conditions of employment, other than those described in this paragraph, may not bar negotiations.

"(e)(1) There is established a Federal Personnel Policy Board. The Board shall consider policies and regulations, and amendments thereto, described in subsection (d)(1) of this section. The Board shall not have jurisdiction over any matter which may be considered by any other entity which is established by, or pursuant to, law and which is required by, or pursuant to, law to allow participation by labor organizations in its considerations on such matter.

"(2) The members of the Board shall be designated by the Chairman of the Authority and shall consist of—

"(A) a Chairman;

"(B) 7 members from among management officials of the agencies covered under this chapter after obtaining the concurrence of the head of the agencies concerned; and

"(C) 7 members from labor organizations holding exclusive recognition under this chapter after obtaining the concurrence of the labor organization concerned.

"(3) In designating management officials from among agencies under paragraph (2)(B) of this subsection, the Chairman of the Authority shall designate, as nearly as practicable, a number of management officials from a particular agency in the same proportion to the number 7 as the number of employees under exclusive recognition in that agency bears to the total number of employees under exclusive recognition under this chapter. However, there shall not be more than 3 management officials from any one agency.

"(4) In designating members from among labor organizations under paragraph (2)(C) of this subsection, the Chairman of the Authority shall designate, as nearly as practicable, a number of members from a particular labor organization in the same proportion to the number 7 as the number of employees represented by such labor organization under exclusive recognition is to the total number of employees under exclusive recognition. However, there shall not be more than three members from any one labor organization nor more than five from any one council, federation, alliance, association, or affiliation of labor organizations.

"(5) Every second year the Chairman of the Authority shall review the number of employees under exclusive recognition to determine adequate or proportional representation under the guidelines of paragraphs (3) and (4) of this subsection.

"(6) The Board shall meet at the call of the Chairman for consideration of any proposal transmitted under subsection (d)(1) of this section not earlier than 15 days, nor later than 30 days, after the date on which the proposal is transmitted. The Board shall study the proposals presented to it and shall submit its conclusions and recommendations to the issuing agency which shall consider such conclusions and recommendations before issuing the policy or recommendation, or amendment thereto, involved in such proposal. The actions of the Board shall be formulated by majority vote and the Chairman may vote only to break a tie.

"(7) If any 5 members of the Board wish to propose a modification or an addition to an existing or proposed policy or regulation described under subsection (d)(1) of this section which relates to employees of more than one agency, the members' proposal shall be submitted to the Chairman of the Board. The Chairman shall transmit a copy of the proposal to each member of the Board and schedule a meeting for consideration of the proposal in accordance with the procedures prescribed under paragraph (6) of this subsection.

"(8) Members of the Board described under paragraph (2)(A) and (B) of this subsection serve without additional pay. Members who represent labor organizations are not entitled to pay from the Government for services rendered to the Board.

"§ 7114. Allotments to represetatives

"(a) Where, pursuant to an agreement negotiated in accordance with the provisions of this chapter, an agency has received from an employee in a unit of written assignment which authorizes the agency to deduct from the wages of such employee amounts for the payment of regular and periodic dues of a labor organization having exclusive recognition for such unit, such assignment shall be honored. The allotments shall be made at no cost to the labor organization or to the employee. Except as required under subsection (b) of this section, any such assignment shall not be irrevocable for a period of more than 1 year.

"(b) An allotment for the deduction of labor organization dues terminates when—

"(1) the agreement between the agency and the labor organization ceases to be applicable to the employee; or

"(2) the employee has been suspended or expelled from the labor organization.

"(c) If an exclusive representative has been recognized in an appropriate collective-bargaining unit, each employee in such unit who is not a member of the recognized organization shall be required, as a condition of continued employment, to pay to such organization for the period that it is the exclusive representative an amount equal to the dues, fees, and assessments that a member is charged. Such payments shall be made in accordance with rules and regulations prescribed for such purposes by the Authority.

"§ 7115. Unfair labor practices

"(a) It shall be an unfair labor practice for an agency—

"(1) to interfere with, restrain, or coerce employees in the exercise of rights assured by this chapter;

"(2) to encourage or discourage membership in any labor organization by discrimination in regard to hiring, tenure, promotion, or other conditions of employment; except that nothing in this chapter, or in any statute of the United States, shall preclude an agency from making an agreement with a labor organization requiring as a condition of continued employment the payment of a representation fee equal to the amount of periodic dues uniformly required, on or after the thirtieth day following the beginning of such employment or on the effective date of such agreement, whichever is later;

"(3) to sponsor, control, or otherwise assist any labor organization, except that the agency may furnish customary and routine services and facilities when the services and facilities are furnished, if requested, on an impartial basis to organizations having equivalent status;

"(4) to discipline or otherwise discriminate against an employee because he has filed a complaint, affidavit, petition, or given any information or testimony under this chapter;

"(5) to refuse to consult, confer, or negotiate in good faith with a labor organization as required by this chapter;

"(6) to fail or refuse to cooperate in impasse procedures and impasse decisions as required by this chapter; or

"(7) to fail or refuse to comply with any provision of this chapter.

"(b) It shall be an unfair labor practice for a labor organization—

"(1) to interfere with, restrain, or coerce an employee in the exercise of the rights assured by this chapter;

"(2) to cause or attempt to cause an agency to discriminate against an employee in the exercise of his rights under this chapter;

"(3) to coerce or attempt to coerce, discipline, or fine a member of the labor organization as punishment or reprisal for the purpose of hindering or impeding his work performance or the discharge of his duties as an employee of an agency;

"(4) to discriminate against an employee with regard to the terms or conditions of membership because of race, color, creed, national origin, sex, age, or preferential or nonpreferential civil service status;

"(5) to refuse to consult, confer, or negotiate in good faith with an agency as required by this chapter;

"(6) to fail or refuse to cooperate in impasse procedures and impasse decisions as required by this chapter;

"(7) to call or engage in any illegal strike, work stoppage, or slowdown, or to condone any such activity by failing to take affirmative action to prevent or stop it; or

"(8) to fail or refuse to comply with any provision of this chapter.

"(c) It shall be an unfair labor practice for a labor organization which is accorded exclusive recognition to deny membership to an employee in the appropriate unit except for failure to meet reasonable occupational standards uniformly required for admission, or for failure to tender initiation fees and dues uniformly required as a condition of acquiring and retaining membership. This subsection does not preclude a labor organization from enforcing discipline in accordance with procedures under its constitution or bylaws which conform to the requirements of this chapter.

"(d) Issues which properly can be raised under—

"(1) an appeals procedure prescribed by or pursuant to law; or

"(2) the grievance procedure under section 7120 of this title;

may, in the discretion of the aggrieved party, be raised either (A) under the appropriate appeal or grievance procedure, or (B) if applicable, under the procedure for resolving complaints of unfair labor practices under section 7116 of this title. Any appeal or grievance decision shall not be construed as an unfair labor practice decision under this chapter nor as precedent for any such decision.

"§ 7116. Prevention of unfair labor practices

"(a) Notwithstanding any agreement or law, or any procedure thereunder, or the availability of any other means of adjustment or prevention, the Authority may prevent, in accordance with this section, an agency or labor organization from engaging in an unfair labor practice within the meaning of section 7115 of this title.

"(b) (1) If an agency or labor organization is charged with having engaged in or engaging in an unfair labor practice, the General Counsel, in accordance with section 7104 (g) of this title, shall investigate the charge and may issue and cause to be served upon such agency or labor organization a complaint. The complaint shall contain a notice—

"(A) of the charges;

"(B) that a hearing will be held before the Authority or a member thereof, or before an employee of the Authority designated for that purpose;

"(C) of the place fixed for the hearing; and

"(D) of the time for the hearing which shall be not earlier than 5 days after the serving of the complaint.

"(2) The person so complained of shall have the right to file an answer to the original or amended complaint and to appear in person or otherwise and give testimony at the time and place fixed in the complaint. In the discretion of the member, agent, or agency conducting the hearing, any other person may be allowed to intervene in the said proceeding and to present testimony. Any such proceeding shall so far as practicable, be conducted in accordance with the provisions of subchapter II of chapter 5 of this title; except that the parties shall not be bound by rules of evidence, whether statutory, common law, or adopted by rules of court.

"(3) No complaint shall be issued based upon an unfair labor practice which occurred more than 6 months before the filing of the charge with the Authority. If the person aggrieved was prevented from filing such charge within 6 months—

"(A) by the failure of the agency or labor organization against whom such charge is made to perform a duty owed to the aggrieved; or

"(B) due to other concealment;

which prevented discovery of the unfair labor practice within 6 months of its occurrence, the 6-month period during which a charge may be filed shall be computed from the day of discovery of the occurrence.

"(4) The Authority (or a member or employee of the Authority) shall conduct a hearing, on the record, on the complaint not earlier than 5 days after the complaint is served, and may compel under section 7133 of this title the attendance of witnesses and the production of documents. Thereafter, in its discretion, the Authority upon notice may receive further evidence or hear argument. If, upon the preponderance of the evidence received, the Authority is of the opinion that an agency or labor organization named in the complaint has engaged in or is engaging in an unfair labor practice, then the Authority shall state its findings of fact and shall issue and cause to be served on such agency or labor organization an order requiring the agency or labor organization to cease and desist from such unfair labor practice, and to take such affirmative action, including reinstatement of employees and backpay, as will effectuate the policies of this chapter. Where an order directs reinstatement of an employee, backpay may be required of the agency or labor organization, as the case may be, responsible for the discrimination or improper action suffered by the employee. Such order, upon the determination of the Authority that there has been an arbitrary, capricious, or otherwise knowing violation of this act, by any supervisor or other agency official, may direct the agency to discipline the supervisor or official by demotion, suspension, removal, or such other remedial action as the Authority deems appropriate. Such order may further require such agency or labor organization to make reports from time to time showing the extent to which it has complied with the order.

"(5) If, upon the preponderance of the evidence received, the Authority is of the opinion that the agency or labor organization named in the complaint has not engaged or is not engaging in an unfair labor practice, then the Authority shall state its findings of fact and shall issue an order dismissing the complaint.

"(c) If the evidence is presented before a member or an employee of the Authority, such member or employee, as the case may be, shall issue and cause to be served on the parties to the proceeding a proposed report, together with a recommended order, which shall be filed with the Authority, and if no exceptions are filed within 20 days after the service thereof upon such parties, or within such further period as the Authority may authorize, such recommended order shall become the order of the Authority, effective as therein prescribed.

"(d) If exceptions are filed to the proposed report referred to in subsection (c) of this section, the Authority shall determine whether such exceptions raise substantial isuses of fact or law, and shall grant review if it believes such substantial issues have been raised. If the Authority determines that the exceptions do not raise substantial issues of fact or law, it may refuse to grant review, and the recommended order shall become the order of the Authority, effective as therein described.

"(e) Notwithstanding the foregoing provisions of this section, when an unfair labor practice complaint alleges that irreparable harm will be done to the complainant if immediate corrective action is not taken and a prima facie case is established, the Authority may prohibit the action or actions complained of until the full merits of the case are heard. The Authority shall assign priority consideration to the complete adjudication of cases coming within the purview of this subsection.

"§ 7117. Negotiation impasses; Federal Service Impasses Panel

"(a) Upon request, the Federal Mediation and Conciliation Service shall provide services and assistance to agencies and labor organizations in the resolution of negotiation impasses.

"(b) When voluntary arrangements including the services of the Federal Mediation and Conciliation Service or other third party mediation service fail to resolve a negotiation impasse, either party may request the Federal Service Impasses Panel established under subsection (c) of this section to consider the matter, or the parties may agree to adopt a procedure for binding arbitration of a negotiation impasse.

"(c) There is established within the Authority a Federal Service Impasses Panel. The Panel shall be composed of a Chairman and at least 6 other members, who shall be appointed by the Authority solely on the basis of fiitness to perform the duties and functions of the office from among individuals who are familiar with Government operations and knowledgeable in labor-management relations.

"(d) Two members of the Panel shall be appointed for a term of 1 year, 2 for a term of 3 years, and the Chairman and the remaining members for a term of 5 years. Their successors shall be appointed for terms of 5 years, except that an individual chosen to fill a vacancy shall be appointed for the unexpired term of the member whom he shall replace. A member of the Panel may be removed by the Authority for neglect of duty or malfeasance in office but for no other cause.

"(e) The Panel may appoint an Executive Director and such other employees as it may from time to time find necessary for the proper performance of its duties. Each member of the Panel who is not an employee (as defined under section 2105 of this title) is entitled to pay at a rate equal to the daily equivalent of the maximum annual rate of basic pay currently paid, from time to time, under the General Schedule for each day he is engaged in the performance of official business on the work of the Panel, including traveltime, and is entitled to travel expenses and a per diem allowance under section 5703 of this title.

"(f) The Panel or its designee shall promptly investigate any impasse presented to it under subsection (b) of this section. The Panel shall consider the matter and shall either recommend procedures to the parties for the resoution of the impasse or assist the parties in arriving at a settlement through whatever methods and procedures, including factfinding and recommendations, it may deem appropriate to accomplish the purposes of this section. If the parties do not arrive at a settlement, the Panel may hold hearings, compel under section 7133 of this title the attendance of witnesses and the production of documents, and take whatever action is necessary and not inconsistent with this chapter to resolve the impasse. Notice of any final action of the Panel shall be promptly served upon the parties, and such action shall be binding upon them during the term of the agreement.

"§ 7118. Standard of conduct for labor organizations

"A labor organization representing or seeking to represent employees pursuant to this chapter shall adopt governing requirements containing explicit and detailed provisions to which it subscribes, providing for—

"(1) the maintenance of democratic procedures and practices, including provisions for periodic elections to be conducted subject to recognized safeguards and provisions defining and securing the right of individual members to participation in the affairs of the labor organization, to fair and equal treatment under the governing rules of the organization, and to fair process in disciplinary proceedings;

"(2) the prohibition of business or financial interests on the part of labor organization officers and agents which conflict with their duty to the organization and its members; and

"(3) the maintenance of fiscal integrity in the conduct of the affairs of the labor organization, including provision for accounting and financial controls and regular financial reports or summaries to be made available to members.

"SUBCHAPTER III.—GRIEVANCES, APPEALS, AND REVIEW

"§ 7119. Appeals from adverse decisions

"(a) An employee (as defined in section 7501 of this title) against whom an adverse action is taken under section 7502 of this title is entitled to appeal the adverse action to the Civil Service Commission.

"(b) The employee may submit the appeal in writing within a reasonable time after receipt of notice of the adverse decision, and is entitled to appear personally or through a representative under regulations prescribed by the Civil Service Commission. The Commission, after investigation and consideration of the evidence submitted, shall submit its findings and recommendations to the administrative authority and shall send copies of the findings and recommendations to the appellant or his representative. The administrative authority shall take the corrective action that the Commission finally recommends.

"§ 7120. Grievance procedures

"(a) An agreement entered into by an agency and a labor organization having exclusive recognition shall provide procedures for the settlement of grievances, including questions of arbitrability. An employee to whom the agreement applies may elect to have his grievance processed under either—

"(1) a procedure negotiated in accordance with this chapter, or

"(2) any applicable appeals procedures established by or pursuant to law (including procedures specified in section 7115(d) of this title).

A negotiated grievance procedure shall be fair, simple, provide for expeditious processing, and shall include, but not be limited to, procedures that—

"(A) assure a labor organization the right, in its own behalf or on behalf of any employee in the unit, to present and process grievances;

"(B) assure an employee the right to present a grievance on his own behalf, and assure the labor organization the right to be present when the grievance is adjusted if it is not the representative of the employee;

"(C) provide that any grievance not satisfactorily settled in the grievance process shall be subject to binding arbitration which may be invoked by either the labor organization or the agency.

"(b) Where a party to such agreement is aggrieved by the failure, neglect, or refusal of the other party to proceed to arbitration pursuant to the procedure provided therefor in such agreement, such aggrieved party may file a complaint in the appropriate district court of the United States or in the appropriate court of the State, territory, or possession of the United States for summary action without jury seeking an order directing that the arbitration proceed pursuant to the procedures provided therefor in such agreement.

"§ 7121. Exceptions to arbitral awards

"Either party may file an exception with the Authority to an arbitrator's award under this chapter. If upon review the Authority finds that the award is deficient because—

"(1) it is contrary to law or regulations;

"(2) it was procured by corruption, fraud, or other misconduct;

"(3) of partiality of the arbitrator; or

"(4) the arbitrator exceeded his powers;

the Authority may take such action and make such recommendations on the award as it considers necessary, consistent with applicable law or regulations and the provisions of this chapter. If no exception is filed, the decision of an arbitrator shall be final and binding. An agency shall take the actions required by a final decision of an arbitrator to make an employee whole in the circumstances, including the payment of back pay. A final decision under this section is subject to the provisions of section 7122 and of this title.

"§ 7122. Judicial review

"(a) Any person aggrieved by a final order of the Authority under section 7116 of this title (involving an unfair labor practice), under section 7121 of this title (involving an award by an arbitrator), or under section 7111(g) (involving an appropriate unit determination), may, within 60 days after the date on which the order was issued, institute an action for judicial review of the Authority's order in the United States court of appeals in the circuit in which such person resides or transacts business or in the United States court of appeals for the District of Columbia. The institution of an action for judicial review shall not operate as a stay of the Authority's order, unless the court specifically orders such stay. Review of the Authority's order shall be on the record in accordance with section 706 of this title, and the Authority's findings of fact, if supported by substantial evidence, shall be conclusive. The court shall affirm the Authority's order if it determines that it is in accordance with law. The court shall have the jurisdiction to grant to the Authority such temporary relief or restraining order that it deems just and proper, and in like manner to make and enter a decree enforcing, modifying, and enforcing as so modified, or setting aside, in whole or in part, the order of the Authority.

"(b) The Authority or the charging party shall have power to petition any court of appeals of the United States in the circuit, wherein the unlawful act in question occurred or wherein the person named in the complaint resides or transacts business, for the enforcement of such order and for appropriate temporary relief or restraining order, and shall file in the court the record in the proceedings, as provided in section 2112 of title 28, United States Code. Upon the filing of such petition, the court shall cause notice thereof to be served upon such person, and thereupon shall have jurisdiction of the proceeding and of the question determined therein, and shall have power to grant such temporary relief or restraining order as it deems just and proper, and to make and enter a decree enforcing, modifying and enforcing as so modified, or setting aside in whole or in part the order of the Authority. No objection that has not been urged before the Authority, or its member, agent, or agency, shall be considered by the court, unless the failure or neglect to urge such objection shall be excused because of extraordinary circumstances. The findings of the Authority with respect to questions of fact, if supported by substantial evidence on the record considered as a whole, shall be conclusive. If any person shall apply to the court for leave to adduce additional evidence and shall show to the satisfaction of the court that such additional evidence is material and that there were reasonable grounds for the failure to adduce such evidence in the hearing before the Authority, or its member, agent, or agency, the court may order such additional evidence to be taken before the Authority, or its member, agent, or agency, and to be made a part of the record. The Authority may modify its findings as to the facts, or make new findings by reason of additional evidence so taken and filed, and it shall file such modified or new findings,

which findings with respect to questions of fact, if supported by substantial evidence on the record considered as a whole, shall be conslusive, and shall file its recommendations, if any, for the modification or setting aside of its original order. Upon the filing of the record with it, the jurisdiction of the court shall be exclusive and its judgment and decree shall be final, except that the same shall be subject to review by the Supreme Court of the United States upon writ of certiorari or certification as provided in section 1254 of title 28, United States Code.

"(c) The Authority may, upon issuance of a complaint, as provided in section 7116(b) of this title, charging that any person has engaged in or is engaging in an unfair labor practice, petition any United States district court, within any district wherein the unfair labor practice in question is alleged to have occurred or wherein such person resides or transacts business, for appropriate temporary relief or restraining order. Upon the filing of any such petition the court shall cause notice thereof to be served upon such person, and thereupon shall have jurisdiction to grant such temporary relief (including a temporary restraining order) as it deems just and proper.

"SUBCHAPTER IV.—ADMINISTRATIVE AND OTHER PROVISIONS

"§ 7131. Reporting requirements for standards of conduct

"The provisions of subchapter III of chapter 11 of title 29 shall be applicable to labor organizations that have or are seeking to obtain recognition under this chapter, and to such organizations' officers, agents, shop stewards, other representatives and members to the extent to which such provisions would be applicable if the agency were an employer under section 402 of title 29. In addition to the authority conferred on him under section 438 of title 29, the Secretary of Labor shall have authority, by regulations issued with the written concurrence of the Authority, to prescribe simplified reports for any such labor organization. The Secretary of Labor may revoke such provision for simplified reports of any such labor organization if he determines, after such investigation as he deems proper and after due notice and opportunity for a hearing, that the purposes of this chapter and of chapter 11 of title 29 would be served thereby.

"§ 7132. Official time

"(a) Employees representing an exclusively recognized or certified labor organization in the negotiation of an agreement under this chapter, including attendance at impasse settlement proceedings, are authorized official time for such purposes during the time the employees otherwise would be in a duty status. However, the number of such employees for whom official time is authorized under this subsection shall not exceed the number of persons representing the agency.

"(b) Matters relating to the internal business of a labor organization (including, but not limited to, the solicitation of membership, elections of labor organization officials, and collection of dues) shall be performed during the nonduty hours of the employees concerned.

"(c) Except as provided under subsection (a) of this section, the Authority shall determine whether employees participating for, or on behalf of, a labor organization in any phase of proceedings before the Authority, shall be authorized official time for such purposes during regular working hours.

"§ 7133. Subpenas

"(a) For the purpose of all hearings and investigations which the Authority or any member thereof, or the Panel, or any member thereof, determines are necessary and proper for the exercise of its powers under this chapter, the Authority or the panel duly authorized agent or any member thereof or agency thereof shall at all reasonable times have access to, for the purpose of examination and the right to copy, any evidence of any person being investigated or proceeded against that relates to any matter under investigation or in question. The Authority, any member thereof, or its designee, or the Panel, or any member thereof (hereinafter referred to in this section as the 'issuer'), may upon application of any party forthwith issue to such party subpenas requiring the attendance and testimony of witnesses or the production of any evidence in such proceeding or investigation requested in such application. Within 5 days after the service of a subpena on any individual or organization requiring the production of any evidence in the possession or under the control of such individual or organization, such individual or organization may petition the issuer to revoke, and the issuer shall revoke, such subpena if in its opinion the evidence the production of which is required does not relate to any matter under consideration, or if in its opinion such subpena does not describe with sufficient particularity the evidence the production of which is required. The issuer, or any agent designated by the issuer for such purposes, may administer oaths and affirmations, examine witnesses, and receive evidence.

"(b) In case of contumacy or refusal to obey a subpena issued to any individual or organization, any district court of the United States or the United States courts of any territory or possession, within the jurisdiction of which the inquiry is carried on or within the jurisdiction of which such individual or organization guilty of contumacy or refusal to obey is found or resides or transacts business, upon application by the issuer shall have jurisdiction to issue to such to appear before the issuer to produce evidence if so ordered, or to give testimony touching the matter under consideration. Any failure to obey such order of the court may be punished by such court as a contempt thereof.

"(c) Witnesses summoned before the issuer shall be paid the same fees and mileage that are paid witnesses in the courts of the United States, and witnesses whose depositions are taken and the persons taking the same shall severally be entitled to the same fees as are paid for like services in the courts of the United States.

"(d) No person shall be excused from attending and testifying or from producing books, records, correspondence, documents, or other evidence in obedience to the subpena of the Board, on the ground that the testimony or evidence required of him may tend to incriminate him or subject him to a penalty or forfeiture; but no individual shall be prosecuted or subjected to any penalty or forfeiture for or on account of any transaction, matter, or thing concerning which he is compelled, after having claimed his privilege against self-incrimination, to testify or produce evidence, except that such individual so testifying shall not be exempt from prosecution and punishment for perjury committted in so testifying.

"(e) Any person who shall willfully resist, prevent, impede, or interfere with any member of the Authority or Panel or a member, agent, or agency thereof in the performance of duties pursuant to this chapter shall be punished by a fine of not more than $5,000 or by imprisonment for not more than one year, or both.

"§ 7134. Compilation and publication of data

"(a) The Authority shall maintain a file of its proceedings, copies of all available agreements and arbitration decisions, and shall publish the texts of its decisions and the actions taken by the Panel under section 7117 of this title.

"(b) All files maintained under subsection (a) of this section shall be open to inspection and reproduction subject to the provisions of section 552 of this title.

"§ 7135. Funding

"There are hereby authorized to be appropriated such sums as are necessary to carry out the functions and purposes of this chapter.

"§ 7136. Issuance of regulations

"The Authority, the Federal Mediation and Conciliation Service, and the Panel shall each prescribe rules and regulations to carry out the provisions of this chapter applicable to each of them, respectively. Unless otherwise specifically provided in this chapter, the provisions of subchapter II of chapter 5 of this title shall be applicable to the issuance, revision, or repeal of any such rule or regulation.

"§ 7137. Continuation of existing laws, recognitions, agreements, and procedures

"(a) Nothing contained in this chapter shall preclude—

"(1) the renewal or continuation of an exclusive recognition, certification of a representative, or a lawful agreement between an agency and a representative of its employees entered into before the effective date of this chapter; or

"(2) the renewal, continuation, or initial according of recognition for units of management officials or supervisors represented by labor organizations which historically or traditionally represent management officials or supervisors in private industry and which hold exclusive recognition for units of such officials or supervisors in any agency on the effective date of this chapter.

"(b) Policies, regulations, and procedures established under Executive Orders 10987, 11491, 11616, 11636, and 11838, or under the provision of any other Executive Order in effect on the effective date of this chapter, shall remain in full force and effect until revised or revoked by the President, or unless superseded by specific provisions of this chapter or by regulations issued pursuant to this chapter.

"(c) All laws or parts of laws of the United States inconsistent with the provisions of this chapter are modified or repealed as necessary to remove such inconsistency, and this chapter shall take precedence over all ordinances, rules, regulations, or other enactments. Except as otherwise expressly provided herein, nothing contained in this chapter shall be construed to deny or otherwise abridge any rights, privileges, or benefits guaranteed by law to employees."

SEC. 3. (a) So much of section 5596(b) of title 5, United States Code, as precedes paragraph (2) thereof is amended to read as follows:

"(b) An employee of an agency who, on the basis of a timely appeal or an administrative determination (including an unfair labor practice or a grievance decision), is found by appropriate authority under applicable law, regulation, or agreement, to have been affected by an unjustified or unwarranted personnel action that has resulted in the withdrawal or reduction of all or a part of the pay, allowances, or differentials of the employee—

"(1) is entitled, on correction of the personnel action, to receive for the period for which the personnel action was in effect—

"(A) an amount equal to all or any part of the pay, allowances, or differentials, as applicable, that the employee normally would have earned or received during that period if the personnel action had not occurred, less any amounts earned by him through other employment during that period;

"(B) interest on the amount payable under subparagraph (A) of this paragraph; and

"(C) reasonable attorneys' fees and reasonable costs and expenses of litigation related to the personnel action; and".

(b) Section 5596(b) of title 5, United States Code, is amended by adding at the end thereof the following new sentence:

"For the purpose of this subsection, 'unfair labor practice', 'grievance', and 'agreement' have the same meanings as when used in chatper 71 of this title, and 'personnel action' includes the omission or failure to take an action or confer a benefit.".

SEC. 4. (a) Chapter 75 of title 5, United States Code, is amended by redesignating subchapters III and IV as subchapters II and III, respectively, and by striking out subchapters I and II and inserting in lieu thereof the following:

"SUBCHAPTER I.—CAUSE AND PROCEDURE

"§ 7501. Definitions

"For the purpose of this subchapter—

"(1) 'employee' means—

"(A) an individual in the competitive service who is serving under a permanent, indefinite, or other nontemporary appointment and who has completed a probationary or trial period; or

"(B) a preference eligible in the excepted service who has completed one year of current continuous employment in the same line of work in—

"(i) an Executive agency;

"(ii) the government of the District of Columbia;

"(iii) the United States Postal Service; or

"(iv) the Postal Rate Commission;

but does not include an individual whose appointment is required to be confirmed by, or made with advice and consent of, the Senate; and

"(2) 'adverse action' means a removal, suspension for more than 30 days, furlough without pay, or reduction in rank or pay.

"§ 7502. Cause

"An agency may take adverse action against an employee, or debar him for future employment, only for such cause as will promote the efficiency of the service.

"§ 7503. Procedure

"(a) An employee against whom adverse action is proposed is entitled to—

"(1) at least 30 days' advance written notice of the action sought, except when such individual has been indicted for a crime for which a sentence of imprisonment is imposed or there is reasonable cause to believe such individual is guilty of a crime directly related to his employment, stating the reasons therefor in writing specifically and in detail;

"(2) receive, at the time of the notice required under paragraph (1), all statements, affidavits, investigative reports, and all other evidence relevant to the proposed action;

"(3) a hearing before a hearing examiner (who shall be an attorney licensed to practice in at least one State or territory of the United States) at which such individual may be represented by counsel, present evidence, and cross-examine witnesses;

"(4) a copy of the verbatim transcript of the hearing; and

"(5) a written decision by the hearing examiner stating the findings of fact and conclusions of law upon which the decision is based.

"(b) For purposes of subsection (a)—

"(1) The hearing examiner shall, upon application of any party to a hearing under subsection (a)(3), issue subpenas requiring the attendance and testimony of witnesses or the production of any evidence in such proceeding or investigation requested in such application. Within five days after the service of a subpena on a person requiring the production of any evidence in the possession or under the control of such person, such person may petition the hearing examiner to revoke such subpena. The hearing examiner shall revoke such subpena if in his or her opinion the evidence of which production is required does not relate to any matter under investigation, or any matter in question in such proceedings, or if in his or her opinion such subpena does not describe with sufficient particularity the evidence of which production is required. The hearing examiner may administer oaths and affirmations, examine witnesses, and receive evidence. Such attendance of witnesses and the production of such evidence may be required from any place in the United States or any territory or possession thereof, at any designated place of hearing.

"(2) In case of contumacy or refusal to obey a subpena issued to any person, any district court of the United States or the United States courts of any territory or possession, or the District Court for the District of Columbia, within the jurisdiction of which the person guilty of contumacy or refusal to obey is found or resides or transacts business, shall upon application by the party seeking compliance have jurisdiction to issue such person an order requiring such person to appear before the hearing examiner, or, if so ordered, to produce evidence or to give testimony touching the matter under investigation or in question. Any failure to obey such order of the court may be punished by such court as a contempt thereof.

"(c) The decision of the hearing examiner shall be final as to findings of fact, except that an individual suffering an adverse decision may bring an action in the district court of the United States for the district in which the individual resides, the district in which such adverse decision was made, or in the District Court for the District of Columbia, for judicial review of the conclusions of law of such decision.

"(d) The parties to the negotiated collective-bargaining agreement may agree to implement or substitute in whole or in part the above procedure as part of a collective-bargaining agreement.

"(e) This section does not apply to the suspension or removal of an employee under section 7532 of this title.".

(b) The analysis of chapter 75 of title 5, United States Code, is amended to read as follows:

"Chapter 75.—ADVERSE ACTIONS

"SUBCHAPTER I.—CAUSE AND PROCEDURE

"Sec.
"7501. Definitions.
"7502. Cause.
"7503. Procedure.

"SUBCHAPTER II.—HEARING EXAMINERS

"Sec.
"7521. Removal.

"SUBCHAPTER III.—NATIONAL SECURITY

"Sec.
"7531. Definitions.
"7532. Suspension and removal.
"7533. Effect on other statutes.".

SEC. 5. (a) Chapter 77 of title 5, United States Code, is hereby repealed.

(b) The analysis for part III of such title is amended by striking out the matter pertaining to chapter 77.

SEC. 6. (a) Subchapter II of chapter 71 of title 5, United States Code, is amended—

(1) by redesignating sections 7151, 7152, 7153, and 7154 as sections 7201, 7202, 7203, and 7204, respectively;

(2) by striking out the subchapter heading and inserting in lieu thereof the following:

"Chapter 72.—ANTIDISCRIMINATION; RIGHT TO PETITION CONGRESS

"SUBCHAPTER I.—ANTIDISCRIMINATION IN EMPLOYMENT

"Sec.
"7201. Policy.
"7202. Marital status.
"7203. Physical handicap.
"7204. Other prohibitions.

"SUBCHAPTER II.—EMPLOYEES' RIGHT TO PETITION CONGRESS

"Sec.
"7211. Employees' right to petition Congress.";

and

(3) by adding at the end thereof the following new subchapter:

"SUBCHAPTER II.—EMPLOYEES' RIGHT TO PETITION CONGRESS

"§ 7211. Employees' right to petition Congress

"The right of employees, individually or collectively, to petition Congress or a Member of Congress, or to furnish information to either House of Congress, or to a committee or member thereof, may not be interfered with or denied.".

(b) The analysis for part III of title 5, United States Code, is amended by striking out—

"Subpart F.—EMPLOYEE RELATIONS

"71. Policies ..... 7101"

and inserting in lieu thereof—

"Subpart F.—LABOR MANAGEMENT RELATIONS, ETC.

"71. Labor Management Relations.... 7101
"72. Antidiscrimination; Right to Petition Congress..... 7201"

(c)(1) Section 2105(c)(1) of title 5, United States Code, is amended by striking out "and 7154" and inserting in lieu thereof "and 7204".

(2) Section 3302(2) of title 5, United States Code, is amended by striking out "7152, 7153" and inserting in lieu thereof "7202, 7203".

(3) Sections 4540(c), 7212(a), and 9540(c) of title 10, United States Code, are each amended by striking out "7154 of title 5" and inserting in lieu thereof "7204 of title 5".

(4) Section 410(b)(1) of title 39, United States Code, is amended by striking out "chapters 71 (employee policies)" and insert ing in lieu thereof the following: "chapters 72 (antidiscrimination; right to petition Congress)".

(5) Section 1002(g) of title 39, United States Code, is amended by striking out "section 7102 of title 5" and inserting in lieu thereof "section 7211 of title 5".

SEC. 7. (a) Section 5315 of title 5, United States Code, is amended by adding at the end thereof the following clause:

"(105) Chairman, Federal Labor Relations Authority.".

(b) Section 5316 of such title is amended by adding at the end thereof the following clause:

"(137) Members, Federal Labor Relations Authority (2), and its General Counsel.".

SEC. 8. If any provision of this Act (or the amendments made thereby), or the application of such provision to any person or circumstance, shall be held invalid, the remainder of this Act (and the amendments made thereby) or the application of such provision to persons or circumstances other than those as to which it is held invalid, shall not be affected thereby.

SEC. 9. (a) Except as provided in subsection (b) of this section, the amendments made by this Act shall take effect on the first day of the first calendar month beginning more than 120 days after (1) the date of the enactment of this Act; or (2) on October 1, 1977, whichever date is later.

(b) Sections 7104, 7105 (other than subsections (f) and (g) thereof), and 7136 of title 5, United States Code, as enacted by section 2 of this Act, shall take effect (1) on the date of the enactment of this Act; or (2) on October 1, 1977, whichever date is later.

By Mr. BENTSEN:

S. 1091. A bill to encourage the use of life-cycle cost procurement as the general basis for Federal procurement decisions; to the Committee on Governmental Affairs.

Mr. BENTSEN. Mr. President, I am reintroducing today a bill designed to improve the efficiency of the Federal Government by encouraging the use of life-cycle-costing as the general basis for all Federal purchases. Life-cycle-costing means that both the purchase price and operating cost over the life of the product are considered at the time of purchase.

In 1976, the American people sent a clear message to Washington. They are tired of paying more and more for a Federal Government which seems daily to become less and less effective. They are rightly fed up with the growing costs and gargantuan deficits of an ever expanding big Government. They want the Federal Government to operate in a rational fashion and a stop put to wasteful Government expenditures. In short, the American people want the Federal Government simply to give them their money's worth.

Mr. President, Government spending should be cut through elimination of waste and inefficiency. The American people are fed up with big, inefficient Government, but they are correctly suspicious of empty anti-Government rhetoric. They want concrete proposals to make Government work more efficiently. I believe my bill represents one concrete step which can be taken immediately to achieve this goal.

In the past, Federal managers have often encouraged to make purchases solely on the basis of purchase price. And, this has often proved to be very inefficient in the long run. Common sense requires that operating costs should be considered along with purchase price when equipment is bought.

There has been some use of life-cycle-costing in the Federal Government. This limited use provides persuasive evidence that longrun costs are reduced and efficiency enhanced when procurement decisions include evaluation of operating costs over the life of the product.

At the urging of the staff of a small division within the National Bureau of Standards called the experimental technology incentives program, the General Services Administration recently began to purchase equipment using the life-cycle-costing concept. The results have been extremely encouraging to those of us who have been searching for ways to reduce the cost of government.

Using life-cycle-costing, GSA:

Purchased 27,000 room air-conditioners which are estimated to use 21 percent less energy than previous models bought by the Federal Government. GSA analysis shows that their purchase will result in a net saving to the Treasury over their lifetime of about $400,000.

Contracted for 7,700 hot water heaters which use 11 percent less energy than alternative models. It is estimated that the purchase of these heaters will result in a net lifetime saving to the Treasury of about $300,000.

Contracted for 3,720 electric and 22,200 gas ranges which are estimated to be 7 percent more energy efficient than previous models bought by the Government. The ranges are expected to save the Treasury over $500,000 during their lifetime.

Mr. President, the time has come for the Federal Government to utilize managerial techniques which are widely used in the private sector to increase efficiency and lower costs. Life-cycle-costing has long been a standard operating procurement procedure in the private sector. It is time to encourage its expanded use in the public sector. My bill will accomplish this goal by encouraging Federal managers and those who write the standards for Federal procurement to use the life-cycle-costing concept whenever practicable.

Mr. President, I ask unanimous consent that the bill and a factsheet prepared in connection with the bill be printed in the RECORD.

There being no objection, the bill and factsheet were ordered to be printed in the RECORD, as follows:

S. 1091

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Life-Cycle Cost Procurement Act of 1977".

SEC. 2. As used in this Act, the term—

(1) "life cycle cost" means the total cost of an item or system to the Government during the time of ownership including the cost of development, acquisition, operation, maintenance, energy use, support and, where applicable, disposal, as far as these costs can reasonably be determined; and

(2) "executive agency" has the same meaning as provided in section 105 of title 5, United States Code, and includes the United States Postal Service, the Postal Rate Commission, and the General Accounting Office.

SEC. 3. The Administrator of Federal Procurement Policy pursuant to section 6 of the Office of Federal Procurement Policy Act (88 Stat. 796) shall prescribe such policies, regulations, procedures, and forms as may be necessary to encourage and, where circumstances permit, to require procurement by executive agencies to be done on the basis of lowest life-cycle cost for all items and all systems, including services, whenever possible.

FACT SHEET: LIFE CYCLE COSTING BILL

Description: The bill encourages the use of life-cycle cost procurement as the general basis for Federal procurement decisions.

(1) Life-cycle cost is defined as the total cost of an item or system to the Government during the time of ownership including the cost of development, acquisition, operation, maintenance, energy use, support and, where applicable, disposal, as far as these costs can reasonably be determined.

(2) The bill requires the Administrator for Federal Procurement Policy to prescribe policies, regulations and procedures to encourage and where circumstances permit to require that procurement by Executive agencies be done on the basis of lowest life-cycle cost whenever possible for all items and systems.

By Mr. PELL:

S. 1092. A bill to amend title 23 of the United States Code in order to make certain improvements in the Federal-aid highway program; to the Committee on Environment and Public Works.

FEDERAL-AID HIGHWAY PROGRAM IMPROVEMENTS ACT OF 1977

Mr. PELL. Mr. President, today I am introducing legislation designed to meet the needs of States whose interstate highway systems are nearing completion. This bill, the Federal-Aid Highway Program Improvements Act of 1977, will provide the necessary flexibility for many States to finance their highest priorities in the highway area: The maintenance, repair, restoration and safety of their Federal-aid highways. Although Federal-aid highways constitute only one-fourth of our Nation's streets and roads, they carry 75 percent of our motor vehicles. Yet Federal-aid noninterstates have been neglected.

In recent years many States have had to conform their highway work to Federal guidelines often unrepresentative of their needs. Meanwhile their true priorities have been left undone or funded out of State funds needed elsewhere. Many States have now substantially completed their interstate routes; they are severely restricted in the ways they can use trust fund apportionments; yet their citizens continue to pay into the trust fund as they purchase gasoline, oil, special motor fuels, and tires. Only a very small part of these States' apportionments can be used for upgrading, resurfacing, rehabilitating and restoring noninterstates, which comprise over 90 percent of our Federal-aid highways. Federal Highway Trust Fund moneys are not usable for maintenance, which includes such things as fixing potholes, repairing roads ruined by the harsh winter weather and general surface repairs. These conditions are causing a greater share of our highway problems.

As we all know, the environmental consequences of Interstate highway construction are enormous, both in heavily populated areas and rural areas. These highways cut a swath from 2 to 10 times the width of a normal road. The traffic volume on the interstate system is staggering—1 percent of the total mileage of roads and streets in the United States carrying nearly 20 percent of the travel—thereby increasing noise, disturbing normal life patterns, and deteriorating air quality in the environs. Neighborhoods are separated, farms divided, vistas interrupted, fortunes made and fortunes lost depending on whether and where an Interstate Highway is constructed.

The impact of the interstate system on New England was analyzed last year in an excellent series of articles in the Boston Globe. I will ask unanimous consent that this series, written by Nick King and Robert J. Rosenthal, be printed in the RECORD at the conclusion of my remarks.

For the most part, I support completion of the original mileage of the National System of Interstate and Defense Highways. I am very disturbed, however, at its skyrocketing cost. As of December 31, 1976, nearly 90 percent of interstate mileage was open to traffic, yet 37 percent of the total cost remains to be funded. That total cost is now estimated

at $100 billion with completion scheduled for 1990. Some segments of the system, particularly in urban areas, have been withdrawn and others are being considered for such status because of their enormous environmental impact and limited benefit.

The Federal-Aid Highway Act Amendments of 1976 made some strides toward the goal of giving individual States the right to use their Federal highway funds more as they see fit. For example, $175 million was authorized in both fiscal year 1977 and fiscal year 1978 for so-called 3R—resurfacing, restoration, and rehabilitation—work on nontoll interstates more than 5 years old. This provision has been of tremendous help to a number of States, including my own State of Rhode Island, where 92 percent of the completed interstate system is over 5 years old.

Also, the expanded definition of "construction" in the 1976 act means that 3R work can be performed on both interstate and noninterstate roads out of a State's trust fund apportionment. While this section of the act affirmed existing Federal Highway Administration policy, it did give statutory authority and long-range approval to this practice.

Another important section of last year's act clarified and improved the mass transit transfer provision for areas in which interstate segments are withdrawn from a State's plan.

Although these provisions and others give substantial impetus to the prospect of achieving equitable distribution of money from the Federal highway trust fund, I believe there are further steps that must be taken. The bill I introduce today would, if enacted, take some of these necessary steps.

First of all, one of the basic and most deleterious inequities in the allowable distribution of Federal highway moneys is the Federal share provision. While the Federal Government contributes 90 percent of the funds for interstate construction, its share of primary, secondary, and urban system expenses is only 70 percent. Thus a State must raise three times the revenue to construct and perform 3R work on its Federal-aid noninterstates as it does for interstates. Yet the interstate system accounts for only a fraction of a State's Federal-aid highway mileage.

For example, Rhode Island's more than 1,500 miles of Federal-aid highways are made up of 1,400 miles of primary, secondary, and urban system roads, with just 126 miles of planned and existing interstates. Of those 126 planned interstate miles, only 71 are in existence today. So the State of Rhode Island is in the difficult position of being encouraged to spend most of its $28 million annual apportionment on less than one-half of 1 percent of its Federal-aid highway mileage.

Because of the disparity in Federal funding among the various systems, States are unable to make objective judgments on what type of construction best suits their needs. Why not go ahead and construct an interstate highway, or disrupt traffic and scenic beauty by making questionable safety improvements, when the Federal Government will pay 90 percent of the cost—instead of performing needed work on primary, secondary, or urban system roads with the State footing 30 percent of the bill? This dilemma faces State road planners constantly in my own State and, no doubt, in many others. Highway funds are desperately needed but not for interstate highway construction. Rhode Island's former department of transportation director stated this problem clearly in a letter to then-Secretary Coleman last year and I will ask unanimous consent that that letter be printed in the RECORD at the conclusion of my remarks.

Mr. President, the State of Rhode Island must raise nearly $6½ million annually through bond issuances to finance its 30 percent share of Federal-aid noninterstate construction, while at the same time being forced to let lapse $12 million in fiscal year 1976 and this year up to $25 million of its Highway Trust Fund apportionment because of overly restrictive Federal highway formulas. Yet Rhode Island motorists continue to pump into the Highway Trust Fund $22 million annually. In short, Mr. President, Rhode Island, and I am sure many other States, are not being treated fairly under the present system. We must have a change.

My bill calls for such a change. It will help Rhode Island and similar States whose needs are no longer for interstate construction, but it will not impede other States from completing vital interstate links.

Under this bill, the Federal share of primary, secondary and urban system road costs would be increased from the present 70 to 90 percent, a percentage equal to that of the interstate system. Also, the definition of "construction" would be expanded to include maintenance which many States' roads so desperately require. In addition, the limits on transferability would be removed so that States may use their funds more effectively and flexibly.

Another provision of the bill gives additional flexibility to urban areas in the use of their Federal highway trust funds by allowing trust fund apportionments to finance noise abatement measures in cities whose neighborhoods have been dissected by interstate highways.

A demonstration of how effectively cities and States might use money under this provision can be seen in Seattle's highly successful "Freeway Park." There, part of the depressed route of Interstate 5 in downtown Seattle has been covered over by a magnificent 6-acre park, complete with interesting architectural features, such as a 33-foot waterfall, concrete cliffs, and terraces; along with grassy retreats and many open spaces. This park shuts out the noise of traffic below, opens new space in the crowded downtown area, reduces air pollution in the vicinity, connects parts of the city separated since the time of the highway's construction, and has given a vital boost to the city's redevelopment.

Although the governmental cost was high—$14 million—city officials and taxpayers consider it a wise investment. Interstate highway funds were not available for construction of this needed new resource, although it was construction of an interstate highway that caused the very problems that led to the park's creation. Under my proposal, highway trust funds would be available for such construction. There are many cities throughout the country where highway trust fund moneys could be put to good use in such endeavors. Articles in the Washington Post and the New York Times on Seattle's successful investment demonstrate the value of opening the Trust Fund for such uses. I ask unanimous consent that they be printed in the RECORD, together with the text of the bill the Federal-Aid Highway Program Improvements Act of 1977.

There being no objection, material ordered to be printed in the RECORD, as follows:

S. 1092

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the Federal-Aid Highway Program Improvement Act of 1977".

DEFINITION OF CONSTRUCTION

SEC. 2. Section 101(a) of title 23 of the United States Code is amended by striking "and rehabilitation," and in its place inserting ", rehabilitation, and maintenance,". Section 101(a) is further amended by inserting before the period at the end of the definition of the term "construction" a comma and "and in the case of the Interstate System, construction necessary to reduce noise levels in urban areas, including covering over of Interstate System highways in urban areas."

INCREASED TRANSFERABILITY OF APPORTIONMENTS

SEC. 3. Section 104(d) of title 23 of the United States Code is amended by striking out paragraphs (1) and (2) and by redesignating paragraphs (3) and (4) as paragraphs (1) and (2), respectively.

INCREASED FEDERAL SHARE

SEC. 4. Subsection (a) of section 120 of title 23 of the United States Code is amended by striking out "70 per centum" wherever appearing therein and inserting in lieu thereof "90 per centum".

EFFECTIVE DATE

SEC. 5. The amendments made by sections 3 and 4 of this Act shall be applicable with respect to funds authorized for the fiscal year ending September 30, 1978, and thereafter.

[From the Boston Globe, Sept. 12, 1976]

THE INTERSTATES: THEY HAVE RESHAPED AMERICA

(By Nick King and Robert J. Rosenthal)

PASSUMPSIC, VT.— From the porch of his office here, Postmaster Dwight Cooley watches as the path for I–91 is cut through the timbered rocky hills across the river from this small town in northeastern Vermont.

In the distance he can see the diesel-driven bulldozers spurting black smoke. He can smell the burning piles of brush and trees, and he can feel the force of the dynamite blasts as they shatter stone.

"Those incredible machines," says Cooley quietly. "There's some fantastic big rigs working up there. Around here we've never seen the likes of it. They might as well finish the Interstate but I'll tell you, we never thought enough ahead about what the roads would do to us."

Almost no one did.

It has been 20 years and $61 billion since

the first interstate pavement was poured—since the first family was asked to leave its home, since the first red, white and blue interstate shield was posted.

The changes wrought by the concrete ribbons stretching through New England and the rest of the nation have been sometimes obvious, sometimes subtle, but almost always profound.

The network of superhighways has become much more than a red carpet for motorists, much more than the shortest and fastest route between here and there:

They have split communities in urban areas and homesteads in rural areas, forcing tens of thousands from their homes and places of business.

Overnight, they have transformed small towns into instant commercial centers, changing everything from the cost to the substance of the life around them.

They have created whole new industries, spawning millions of dollars and hundreds of thousands of jobs.

They have homogenized entire regions, bringing the same fast foods, motels, tourists and interchanges with them everywhere they went.

They have cemented for the foreseesable future the dependence of New England and the rest of the nation on the automobile, and contributed to the steady decline of railroads and other mass transit facilities.

They have made possible the explosion of suburbia, caused populations to shift, and created patterns of commuting thought impossible two decades ago.

They have brought higher taxes and, increased pollution, as well as increased employment and business opportunities almost everywhere they have gone.

In the words of 19-year-old Jan Ross of Lebanon, N.H., "there are too many conveniences about the Interstate to dislike it. You can go to shopping malls and visit your relatives faster. You have to use it. It"s a part of life."

The interstates are now a permanent part of life for Dwight Cooley, Jan Ross and for tens of thousands of New Englanders.

In 1919 a convoy of 20 Army trucks left Washington for San Francisco to show that trucks could be driven across the nation and to dramatize the need for better roads. The cross-country journey took 56 days. To General of the Armies John J. Pershing, the publicity stunt was proof of the feasibility and necessity of building a national highway system for commercial and military purposes.

The convoy was to leave a sharp impression on a young Army captain who rode with it. Thirty-seven years later, on June 29, 1956, the young officer, who was now President Dwight D. Eisenhower, signed into law the National System of Interstate and Defense Highways.

The act called for the construction of 41,000 miles of superhighways—later increased to 42,500—designed to connect the nation's major metropolitan areas, to speed the shipment of goods and to provide evacuation routes in case of enemy attack.

The road network would be built to uniform standards, and the highways would have only limited access. The projected budget for the project was $27 billion. The completion date was set for 1972.

Today, four years after the deadline and with the budget having more than doubled, the interstates, still have not been completed and, according to Federal officials, they may never be.

Inflation has slowed construction and protests have halted the building of some sections with opposition coming primarily from environmentalists concerned with pollution and congestion and from people who say that their communities are more important than highways.

Of the planned 42,500 miles of interstate, 37,598 miles are open to traffic but only 11,197 of those miles conform to Federal standards and can be described as complete.

In March Federal Highway Administrator Nobert T. Tiemann said that the earliest possible completion date for the Interstate would be 1990 at a projected cost of $100 billion. But even that target date is in question.

"Who knows," said Lawrence A. Staron, chief of interstate projects for the Department of Transportation, "we've had a million completion dates. You may never know when the interstate is done unless one day, like the Vietnam War, we declare it done."

As in the rest of the country, New England's interstate construction is far from being completed. A total of 1734 miles of interstate has been designated for the six-state region, which would become one of the greatest, concentrations per region of interstates in the country.

Of the 1539 miles of interstate open to traffic in New England, only 319 miles are considered "complete or essentially complete" by Department of Transportation standards. Interstate construction in New England has cost $2.9 billion, 90 percent of which has been Federally funded with the other 10 percent coming from the states.

New England has four major north-south interstates. I–95 goes from northern Maine, through the southeast corner of New Hampshire, through Boston, Providence and New Haven.

I–93 runs through central New Hampshire to Boston. I–91 goes through eastern Vermont, except where under construction, through central Massachusetts to Hartford and to New Haven where it connects to I–95. I–89 angles from the northwest corner of Vermont through New Hampshire to Concord where it connects with I–93.

The Massachusetts Turnpike, I–90, runs east-west through the state. In Connecticut, two interstates, I–84 and I–86, feed into Hartford.

In the major metropolitan centers a number of other interstates run through or around cities, such as 495 around Boston, 295 around Providence, 190 now under construction in Worcester, and 291 in Springfield and Chicopee.

I–95, which follows the East Coast from Maine to Florida, is in many ways typical of New England's other interstates. It runs through wilderness from Houlton to Bangor and then encounters ever-increasing population centers in New Hampshire, Massachusetts, Rhode Island and Connecticut.

The superhighway is typical also in that sections of it are under construction or improvement, such as the stretch running north of Boston to New Hampshire nicknamed "barrel alley" because of the warning barrels that stretch along it. Other sections have been blocked by opposition, such as the once-proposed Southwest Corridor through Boston.

Although highway officials are optimistic that most of the interstates will be completed, they say that the blocking of small segments such as these may prevent the interstate highway system from ever being finished.

In 1922, three years after the cross-country truck convoy, Gen. Pershing mapped out his vision of an interstate system. The map depicted a 8,000-mile road network consisting of main routes strategically paralleled on both sides by alternate routes.

But beyond this map there was little progress on the interstate until 1937, when President Franklin D. Roosevelt summoned Thomas H. MacDonald to the White House. MacDonald, who had been director of the Bureau of Public Roads since World War I, was known around Washington as "Chief."

Roosevelt came quickly to the point. He too envisioned an interstate highway system as a vital defense network and a stimulator of jobs in Depression America.

But Roosevelt's plan was smaller than Pershing's and to illustrate his point, he drew six lines on a map. Three of the lines went north-south and three ran east-west.

"Chief," the President said, as highway legend has it, "this is how we should build the system."

Two years later the Bureau of Public Roads endorsed Roosevelt's six-highway concept in a report to Congress. The report said that the 14,336-mile grid would "meet the requirement of the national defense and the needs of a growing peacetime traffic in a longer range."

Both the needs and the traffic would grow far beyond the expectations of the planning.

"To drive is nothing," says Louise Label, an 18-year-old soda jerk at a Dairy Queen off I–95 in Kittery, Maine. "I went up Maine to see Helen Reddy and K.C. & the Sunshine Band. It's no big deal to drive a couple of hours."

Miss Label drives a Plymouth Fury, and when she talks of driving "a couple of hours" for a concert she means the 150-mile round trip to Lewiston—on I–95. She grew up with the Interstate and she regards it as a necessary part of her life.

Jack and Jane Riek, a middleaged couple from Latham, N.Y., drive a Volvo. They remember the pre-interstate days when the trip from Buffalo to Albany took 14 hours. Now, on I–90, it takes them six.

"After a while the Interstate gets tedious and boring," Mrs. Riek said. "But it's the only way to fly if you want to get somewhere fast."

One recent vacation trip the Rieks drove the Interstate to New England. But on the way back they wanted to sightsee so they left the Interstate.

"You can't get rocking chairs, fried clams, or characters on an interstate, Mrs. Riek said recently as she was driving through Maine, "and I'm not talking about highway fried clams. I'm talking about the real thing."

People like the Rieks have seen the interstate change their lives. They remember what traveling was like without them. Louise Label doesn't. But, for both the Rieks and Miss Label, the interstate has reinforced their dependence on the automobile, as it has for millions of others.

The number of registered motor vehicles in the country has risen from 58.3 million at the time Louise Label was born to 137 million today, according to the Department of Commerce. Eighty percent of all households now own at least one car, and 30 percent own two or more. And, the department says, 20 percent of the nation's traffic uses the interstate system, which make up only 1 percent of the nation's roads.

World War II slowed the momentum for an interstate highway system. It was not until 1944 that Congress endorsed the concept.

In the Federal Aid Highway Act passed in that year, Congress scrapped Roosevelt's plan for six major highways and reverted to a more comprehensive network remarkably similar to that envisioned 22 years earlier by Gen. Pershing.

The 1944 act designated a highway network of 40,000 miles—not only as an evacuation system in the event of a war at home, but also as an employer for thousands of servicemen returning from a war abroad.

A report by the Special Congressional Committee on Post War Economic Policy and Planning concluded:

"Highway construction therefore has a place of singular importance in any program directed to the maintenance of a high level of economic activity after the war. The objective is not simply to build roads so that men will have jobs, but to have roads so that men can build America."

Delays plagued the interstate plan even

after the end of the war. One of the reasons was political (how to finance the massive construction project), and the other was the post-war economic boom that occupied the nation's industries.

But in 1952 Eisenhower was elected President, and he was finally in a position to act on the seed that had been planted by the crosscountry truck convoy in 1919 and fertilized during the recent war in Germany. Eisenhower had seen Hitler's Autobahn, a modern network of military highways throughout Germany, and he wanted a similar network for the United States.

At the same time, population had begun to shift from the cities to the newly formed suburbs, and the automobile, rubber, asphalt and oil companies as well as labor groups began lobbying for more roadbuilding.

In 1956 Congress approved legislation to finance an interstate highway system. The approval came in the form of twin acts.

The first act permitted increased excise taxes on gasoline, rubber and commercial vehicles. The second created the Highway Trust Fund which channeled the funds from these taxes into one pot to be used for Federally aided highway construction. For Interstate highways, the Federal share would be 90 percent and the states' 10 percent.

Eisenhower signed the Federal Aid Highway Act into law on June 29, 1956. It marked the beginning of the largest peacetime construction project in the history of the nation and one of the largest in the history of the world. It stipulated that during the next 16 years, $27 billion would be spent to complete the system, officially designated the National System of Interstate and Defense Highways.

Leo Saucier says he was born poor. But today, because of the Interstate, he says he is "worth something."

In 1968 Saucier borrowed $3000 to buy an acre of swampland a few hundred yards from where an I–95 exit was being built in Howland, Maine (population 1100).

He filled the land and built a gasoline station and the 95 Market and Diner. Saucier says his holdings now are worth $75,000.

People in Howland, 250 miles north of Boston, thought he was crazy to buy the swampland near the Interstate but today he is just one of 13 million Americans, 16 percent of the total work force, who work on highways or in highway-related businesses.

Highway industries, from trucking and service stations to motels and fast food, have accounted for 16 percent of the GNP in the last 15 years, according to a Department of Transportation report. The department also says that every $1 million in highway construction creates about 125 jobs.

In a report soon to be released, the DOT calls highways "essential to the prosperity of the U.S. economy."

There are many residents of Woonsocket, R.I. who agree with this assessment. I–295 passes within five miles of the old industrial city. But without direct access to the Interstate via a connector, officials and businessmen fear the city will fail to lure clients to a proposed industrial park.

The main warehouse for Mark Stevens/CVS, the buyer and distributor for 250 Consumer Value Stores in the Northeast, is based in Woonsocket.

Sidney Goldstein, the president, says 500 trucks come and go from the plant every week. He says it now takes them 20 minutes from the warehouse to the Interstate when it could take five minutes with a direct connector road.

"It doesn't look like much, but if you add 15 minutes to every trip, it adds up to one hell of a lot of dollars. Dammit, we need our highway like everyone else," says Goldstein.

Interstate highways have not only changed the economic balance in some areas of New England, but they have encouraged broader commuting patterns and the expansion of suburbia in others. At the same time census officials have noticed that increasing numbers of people commute between rural areas and from rural to metropolitan areas.

The Southern rim of New Hampshire and Maine are connected to the Boston area by interstates and since 1970, the population of Rockingham County in southern New Hampshire has increased 15 percent. More than 35 percent of the work force commutes outside of the county each day, according to census officials.

Shortly, before President Eisenhower signed the interstate bill into law in 1956, he received a report from an advisory committee headed by Gen. Lucius D. Clay.

The report concluded that interstates were vital for the national defense and the economy. The report did not discuss or project or even mention the possible effects the interstate highway system would have on the landscape, the communities and the people of the nation.

They were to be profound.

CONSTRUCTION IN MILES

State	Total designated mileage	Total open to traffic	Total complete [1]	Under way	Not yet in progress
Connecticut	338.3	281.0	7.3	23.4	33.9
Maine	311.8	291.9	5.4	19.9	----
Massachusetts	449.9	418.9	83.5	25.3	5.8
New Hampshire	214.5	193.4	.12	21.1	----
Rhode Island	99.0	68.4	11.5	6.9	23.7
Vermont	320.4	285.2	211.3	35.2	----

[1] Or essentially complete. Figure here is included in total of mileage open to traffic. (Figures from progress report issued by U.S. Department of Transportation, Mar. 31, 1976.)

[From the Boston Globe, Sept. 13, 1976]

SMALL TOWNS BECOME URBAN CENTERS ON THE INTERSTATE SYSTEM

(By Robert J. Rosenthal and Nick King)

HOULTON, MAINE.—John Mooers grew up with the sounds of the night—crickets, rain tapping at a window, rustling trees—on a farm just outside this small town in northern Maine.

Now he hears another sound. It is truck noise, commonplace nowadays in Houlton and other rural areas in New England, and it fades into the night or day only to be repeated again and again. It is the dominant sound here now. It is the sound of the interstate highway system.

For John Mooers, born 52 years ago in Houlton—the northernmost terminus of I–95—the highway has changed more than the sounds of nature. It split the potato fields his family worked for generations. It has given his produce faster access to markets. It has made it profitable for him to run his own trucking business.

"Economics," Mooers says, "economics—that's what the interestate means. It comes down to dollars and cents and changes you can't figure."

Not all the changes are visible or monetary. Many of them are subtle and they affect Mooers as well as the rest of the people who live in Houlton, a community of 8000 that is the "metropolitan center" for a 60-mile area with a population of 30,000.

Houlton always has been a cross-roads town. It is the county seat of Aroostook County. Its center of brick buildings is crowded with cars and at the old intersection of Rtes. 2, 2A and 1 there are midday traffic jams.

The same attractions that draw people from outlying areas to Boston—movies, restaurants, social events, shops, shopping centers and health care—bring people to Houlton from surrounding communities.

Because there is a Houlton exit off the interstate, the first for many miles coming from the south, and the first in America comence on Houlton has been increased.

ing down from Canada, the area's depend-

It is a kind of dependence that can be found throughout New England wherever the interstates go. Communities on the highways have become the cosmopolitan centers for the region. Pockets of growing urbanization can be found all over New England and all over the interstates.

Daniel Webster, the head of the Maine Department of Planning, says that the 300-mile corridor of I–95 is the fastest growing part of the state and that the road is a factor in Maine's having recently gone over the 1 million mark in population for the first time.

With the growth have come changes in lifestyle. Farmers have seen their land split, people have been forced to move, and many workers now commute to jobs they once would have considered to be too far away.

St. Johnsbury, Vt., has a background similar to that of Houlton. A traditional cross-roads town, it now awaits the completion of I–91. The business leaders in town become exuberant when they talk about the increase in revenue the interstate will bring while other people are wary that the traffic that has always used the town will be diverted away from it and go to the shopping centers already being planned near the interstate.

"The interstate can do nothing but bring more tourism," Karl Laborie, the executive director of the St. Johnsbury Chamber of Commerce, said, "There will be so much impact, the place will fill up."

Seven miles south of St. Johnsbury on Rte. 5, Mary Lou Keeler had a different view. I–91 is being built a few hundred yards from her home. She thinks the highway is unnecessary and talks of how construction has disrupted life in McIndoe Falls. She said the people there "are eating dust all the time" and complained about the dynamite blasts that have shaken and weakened her home.

"I'd have said no if they'd have asked me about building I–91," Mrs. Keeler said. "I just think we're going too fast on wheels. It just seems a shame to spend millions on a highway and not take into consideration the old buildings, the water and the people."

St. Johnsbury and Houlton are not unique. The increased access and traffic and what they bring can be seem all along I–95 in Maine. Portland, Augusta and Bangor are growing economically and in population.

White River Junction, Vermont, another traditional crossroads is growing fast. New Hamsphire's population has increased by 15 percent in the last five years and a new section of Lebanon, off the I–89 West Lebanon exit has four shopping centers and condominiums where there were fields 10 years ago.

The interstate has speeded the process of development, in some cases, but it also has taken some things away. The McDonald's hamburger restaurant near the Houlton exit of I–95 has taken business from local restaurants. It also has become the gathering spot for the region's youth, and families go there for a night out.

Near the McDonald's is the new $7 million Houlton Regional Hospital—an institution that will reinforce the town's metropolitan draw as ambulances now speed on the interstates connecting outlying places with growing regional centers such as Houlton.

Despite the staggering overall effect the interstates have had upon economics and population growth, the true impact of the system can best be understood in terms of people—people like farmer John Mooers.

Mooers is one of the people to whom the Interstate is much more than a noisy bustling highway. It has changed his life.

He remembers the late 1950s when there was just talk of the Interstate coming to Houlton. Mainly, he says, it was the speculators who were interested in where the road would go.

But soon the Interstate became a painful reality to Mooers especially when the men he describes as the "feel outers, the softener uppers" came to his farm and informed him that the interstate was going to cut through his farm.

To this day Mooers, a man who speaks softly from the back of his mouth and who occasionally likes to tuck a pinch of tobacco under his lip, becomes agitated about how his land was taken by the process of eminent domain.

He fought the state in court and lost a battle over compensation for 20 acres of his land. He felt he should have gotten $250 an acre and the state, after a jury trial, gave him $200.

"I knew the individual should not stop something that's for the common good. But still," Mooers says, "it bothers me that they didn't give me just compensation. I knew I couldn't stop them. Then they came in and took 20 acres of my best field."

But in practical terms Mooers says:

"All I know is now with the Interstate it means 7½ hours to Boston and 11½ to New York. Maine needs the artery because everything we've got moves south from here. We've got the ocean and a foreign country surrounding us. The railroads have died, so our trucks have to use the Interstate."

Mooers, in fact, would like to see more interstates built in Maine. He is annoyed that I-95 ehds at Houlton and does not go through the rest of Aroostook County. He says that the roads there now "are nothing but damn twitching paths."

The last 90 miles of I-95 to Houlton is a two-lane, two-way road. Construction to make it a two-lane highway in both directions has begun.

On the land Mooers' father and grandfather farmed, machines and men are now clearing, burning, and leveling fields. Asked what his father, who died before construction started, would have done if he had seen the transformation of his land, Mooers shook his head in resignation. "He would have done anything to try and stop the interstate. He knew it was coming and in the end he was simply overwhelmed by the whole thing."

This summer Mooer's youngest son worked to prepare the land his great-grandfather farmed for the Interstate.

"Sure, that's ironic," Mooers said, "but in an area where work is hard to come by that money sure looks good."

Recently Mooers took a visitor to the edge of his fields where the Interstate is being built. Driving his red Thunderbird, with a Cat Stevens recording in the tapedeck, slowly and carefully through strawberry fields Mooers stared ahead at the dust rising from where ungainly machines dug at the earth.

"Land like this you don't like to see go out of the family," Mooers said. "We used to call this 'out back.' From the place I was born, that's my 'home place,' you could just go out back on a little dirt path and make it to where I live now. I guess I'm really all nostalgia about where out back used to be."

Today that is impossible. The Interstate lies between Mooers "home place" and his white frame farm house. Instead of a little dirt path there is an over-pass. It is called the Mooers Overpass.

Mooers took the visitor to his "home place." It, too, is a well kept white frame house. As he drove the Thunderbird into the driveway he said: "Born right in this house and when I die they'll plant me a half mile or so from here."

John Mooers' life has revolved around his "home-place" and the fields between it and his farm. He drives back over the Mooers Overpass. To his right he watched the machines chop and gnaw.

"Do hate to see good farmland eaten up, you know. I'm not against progress long as it's done right. Still I don't know. . . . It might make me parochial as hell but when you come right down to it that Interstate has been an invader. But it's not too different up here than anywhere else. The dollar is what gets things done. Nobody may ever understand the things we've lost up here with that road. Maybe nobody really cares much. I don't know, you think that's what they call progress?"

WHAT IT'S COSTING

[Figures in millions]

State	Total spent	Federal	Expenditures on projects in progress or authorized	Federal
Connecticut	$717.0	$611.5	$182.1	$162.8
Maine	294.7	258.0	44.8	41.7
Massachusetts	904.0	787.8	413.5	368.2
New Hampshire	279.9	244.0	52.5	47.2
Rhode Island	275.8	239.5	49.1	43.4
Vermont	396.3	351.2	35.9	31.8

THE ORDEAL OF RELOCATION—40,000 DISPLACED IN NEW ENGLAND

(By Nick King and Robert J. Rosenthal)

WEST BOYLSTON—Just before Christmas 1974, Peter and Rita Palumbo learned they were living in the path of a construction project. It was the building of I-190 between Worcester and Leominster, and it would force the Palumbos to move.

The news made for a joyless Christmas, the Palumbos remember, and it was the beginning of a longer ordeal which shook their belief in democracy and left them painfully aware of the power of government and highways.

"I was sick over it," Mrs. Palumbo said recently. "We had worked like dogs for our house in the country. We were told to move and there was nothing we could do about it."

Thousands of people like the Palumbos have been and still are being relocated by the interstate highway system. Surprisingly, no one knows exactly how many. The U.S. Department of Transportation did not begin to keep records on relocation until 1968, a full 12 years after interstate construction began.

However, one transportation official in Washington estimates that in 20 years of construction, interstates have displaced nearly 500,000 people from their homes and businesses, 40,000 of them in New England.

Clearly, the experience of forced relocation is one of the most emotional—and least publicized—aspects of the interstate highway system. As Gilbert Barker, the Massachusetts relocation agent for the I-190 project that displaced the Palumbos and 143 others in Worcester and West Boylston, said recently:

"You can't be hit much harder in the stomach than for someone to come to your house and say, "Get out."

At the same time, Barker and other transportation officials see relocation as an unavoidable evil of highway building, particularly in urbanized regions such as southern New England.

The Federal government spends an average of $25 million a year buying property for interstate highways, officials say, and if the interstate program is completed to its projected 42,500 miles. 750,000 parcels totaling 1.8 million acres will have been taken by eminent domain—the right of local, state and Federal government to claim private land for public use.

Most of those people told to move relent and do move—often with bitterness—as the Palumbos did. Others fight in the courts. And some say that relocation improved their lives.

"There's no way they can fight to keep from moving because eminent domain is firmly established," Robert G. King, the chief of relocation for interstate projects, said in an interview in his Washington office. "They're going to have to move. The only question is how much they get paid."

When landtaking for interstate highways began in 1956, there were no procedures for relocation other than paying fair market value for the property. Once told to move, property owners were on their own.

"In the old days the hardships were horrible," Barker said. "We'd make a taking for a buck and tell the people to move out. We'd appraise the property and reimburse them later, sometimes much later."

By the time the Palumbos learned on that December day nearly two years ago that they would have to move from the path of I-190 there were relocation procedures. Relocation guidelines had been passed by Congress in 1968 and 1970. The rules take some of the financial sting out of a forced move but as the Palumbos learned, it still can be a lengthy, disruptive and even traumatic process.

Mrs. Palumbo, a parttime bookkeeper and the mother of two teenage daughters, remembers learning the bad news. Two men, strangers with documents in hand, rang the doorbell of the modest ranch house which she and her husband, a machinist, had saved for 20 years to buy. The house sat on a hill behind a dairy farm and the family had moved in just two years before.

Over coffee at the kitchen table, one of the men explained why they had come. "I'm sorry ma'am, terribly sorry, but according to these plans, your house is in the way. The Interstate's coming through."

Mr. Palumbo said she sat stunned as the men explained that the house would be appraised and taken by the state. Then the Palumbos, if they wished, could buy the house back and have it moved to a new location. Otherwise it would be auctioned off or demolished.

"They said we'd be well taken care of," Mrs. Palumbo said. "But the worst part was they couldn't say for sure when it would all happen."

The next year was a period of uncertainty as the Palumbos were led through the maze of relocation procedures.

First their home was appraised, for $45,500. Then, on March 26, 1975, it was taken by the state. The Palumbos were given the standard four-month grace period to move out and meanwhile, would pay the state $280 a month rent to live in the house they once owned.

They were urged to buy the house back for $2500, but then they would have to face skyrocketing prices for an empty house lot.

"They all said move, move, move. Find a piece of land and move," Mrs. Palumbo said. "But we spent months finding that piece of land."

Rising real estate prices are common when numbers of people are forced to find new homes. "We come along to relocate a lot of people," Barker said, "and boom, the prices go way up."

The Palumbos finally settled on a two-thirds of an acre lot about a mile from their old home site. The lot cost $13,500, and it would cost them another $5000 to move the house plus nearly $10,000 for a new foundation and septic system.

Palumbo feels he will not lose financially because of his relocation. More important to him, though, are the emotional strains and the feeling that his rights as a citizen and property owner were violated.

"The benefits may look good on paper," Palumbo said, "but we faced a jungle out

there and because of it we're different people today."

Mrs. Palumbo said she began seeing a psychiatrist to help cope with the strain of the ordeal—they didn't move to their new site until last March, 15 months after it all began.

"They say the highway is necessary," Mrs. Palumbo said. "But for us it meant nothing but aggravation."

For a homeowner who does not move his house as the Palumbos did, Congress allows up to $15,000 to help purchase a new dwelling. Tenants can receive up to $4000 to rent new quarters, and all displaced residents are eligible for moving costs. The replacement housing, according to Federal guidelines, must be "decent, safe and sanitary."

Businesses forced to move do not fare as well under relocation procedures, Barker said. They receive moving expenses and help in procuring small business loans. But if they cannot relocate or if they go out of business, they are eligible for no more than $10,000.

When people and business are forced to move because of an interstate, the lives of those left behind changes dramatically as well. In urban areas such as Worcester, Boston, and Providence, neighborhoods have been split, people have been moved and many more have been left living at the highway's edge.

The Ten Hills section of Somerville was split in 1969 by the building of I-93. One half of Bailey road, a street of neat but modest one and two-family homes clustered near an intersection of neighborhood shops, was taken for the highway.

The other half of the street remains, a street upon which people who have lived for 30 and 40 years continue to live, but now with the noise vibration and pollution of I-93 within 50 feet of their front windows.

John Sullo, a 69-year-old unemployed machinist, can remember how he and his neighbors reacted to the highway project.

"We put up a squawk," Sullo said. "We went to City Hall. People lay down in front of bulldozers. They stopped work for one day and then they started bulldozing again."

Sullo says he misses the shops that are gone—the two drug stores, the fish and grocery stores, the bakery, and the barber shop which was as much a social center as a place to get a haircut. He says resignedly that he now has to go to a supermarket just to get a quart of milk.

One of Sullo's neighbors is Emilio Paterna. The other day Paterna, 62 and a 25-year resident of Bailey road, was painting his front porch, the one that faces I-93. It is splotched with grease and worn with sand, pieces of metal and other debris from the highway.

Paterna complains bitterly about the road that split his neighborhood and forced many of his friends to live elsewhere. He says he can't sleep because of the noise and he shows visitors the cracks in the foundation and roof of his home caused by vibrations from the highway. Why doesn't he leave too?

"Leave, how can I leave my home?" asked Paterna. He gestured toward his backyard garden blooming with roses, pansies and tomatoes. "See these?" he asked, "I planted them and they grew from nothing. Would you like to leave these babies behind? I would die to move."

More often than not, highways in urban areas have skewered ethnic neighborhoods leaving them politically and economically weakened as was the case at Ten Hills. Another example is Boston's Roxbury section, which was split by the proposed Southwest Corridor which would have connected the Southeast Expressway and Rte. 128.

The corridor was cleared through Roxbury in the late 1960s. In 1970 then Gov. Francis W. Sargent stopped the project, but not before more than 1000 families had been moved and their homes levelled. Now the corridor is an urban wasteland of overgrown and junk-strewn vacant lots.

Along one edge of the corridor is a stone railroad embankment, overgrown with leafy sumac trees. Behind the leaves, barely visible, scrawled in white paint on the wall, are the words: "Stop I-95 Highways."

There are no signs of resistance left in the Greendale section of Worcester, not far from where the Palumbos used to live. The clearing for I-190 has nearly eradicated what was once a low-income enclave of French Canadians, Italians and Swedes who, by coincidence and the stroke of the planner's pen, became obstacles in the path of change.

Greendale was described as "friendly" and "handy to the bus" by the people who used to live there. It was a section of drab triple-deckers, several restaurants and small industries interspersed along a few tree-lined streets.

Mrs. Blanche Stevenson is one of the last residents of Greendale. Her apartment building is surrounded by rubble-strewn lots, all that remains of the homes of her friends. Her green triple-decker awaits the wrecker's ball and a yard sale sign tacked on the side hints at her impending move.

Like other older residents Mrs. Stevenson, 63, has roots in Greendale and does not want to move. She has the sympathy of Mrs. Kathleen Peterson, a young mother of two who used to live nearby.

But for Mrs. Peterson, relocation was an opportunity to move from a rented apartment to her first home, purchased with the help of the $4000 relocation payment from the state.

"I have no complaint," she said happily in her new suburban back yard in Shrewsbury. "Where else do you get this offer for someone to hand you some money and say move?"

The Department of Transportation estimates that a third of all tenants relocated become homeowners, often in better areas than where they lived.

Relocating also proved a boon for some of the businesses forced out of Greendale. The C&R Tire Co. moved a mile east to a major traffic artery and, according to president Edward Chew, business has improved.

Other Greendale businesses say moving may mean higher rents and the loss of old clients.

As the residents and businessmen of Greendale have realized, relocation is a much more complicated process than it appears on paper.

In his Washington office, King, the interstate relocation chief, says that relocation is neither right nor wrong:

"It is simply a matter of being fair," he said. "You have to give them back everything and make them whole again—but nothing more."

HIGHWAY FUND A SELF-PERPETUATING CIRCLE

(By Thomas Oliphant)

It is neat, painless, efficient, and productive beyond belief. It is also essential.

If the Federal government had tried to finance construction of the interstate highway system the way it finances its other public works projects, the giant road network never could have been built on anything approaching its present scale.

And so, like a well-off parent, prudently providing for an offspring, Uncle Sam set up a trust fund called the Highway Trust Fund.

Government trust funds aren't exactly like the private kind. They don't involve the transferral of assets, but rather the siphoning off a specific form of revenue for a specific purpose.

The magic in the device is that it assures the program of a steady, protected flow of funds, and frees it from the uncertain, annual ritual of the Congressional appropriations process.

There is nothing unique about the idea. Government trust funds finance Social Security and Medicare payments, as well as unemployment compensation grants.

What is unique about the highway trust fund is the way it has managed to help create and increase the demand for the very products it taxes. The dollar raised from the tax on gasoline goes to build a highway that helps increase the demand for more cars, which use more gasoline, raising more money for the trust fund, etc.

A lot more is involved than just a Federal tax of 4 cents a gallon of motor fuel, though that is by far the largest single source of revenue—a little less than 50 percent of the total.

The government also takes a big bite out of the trucking and bus companies whose growth has been so intimately linked to the interstate system's construction. New truck or bus tires and tubes are taxed at 10 cents a pound (car tires and treads, by contrast, get hit for a nickel); there's a 10 percent excise on the wholesale price of every new truck trailer or bus weighing more than 5 tons, and a 8 percent excise on the price of their parts and accessories; then, for the heavyweights—more than 13 tons—there's an additional tax of $3 per thousand pounds per year; and finally, for highway users there's a 6 cent-per-gallon tax on lubricating oil.

The productivity of this assortment of levies has been astounding. Feeding off the very growth it helped spawn, the trust fund's awesome wealth enabled the construction program to keep several jumps ahead of even the most intense inflation of the last few years.

From $2 billion in 1958, annual receipts to the trust fund mushroomed to $3 billion in 1962, $5.5 billion in 1970, and $6.7 billion last year. This year, in response to the recession and declines in gasoline prices, the take is expected to drop for the first time in the fund's 20-year history, but Federal officials confidently expect the upward trend to resume.

Spending, by law, may not exceed receipts in any year, and it never has. Quite the contrary, the trend over the last decade has been for them to fall $1 billion to $2 billion short each year; of late the fund's balance has hovered around $9 billion.

The implications of this wealth for the future of Federal transportation policy are enormous.

Even if there were no increase in annual revenues, the trust fund would receive, at the very least, some $90 billion between now and the anticipated end of the interstate construction program in 1990.

Against that, according to current cost estimates, it would take about $40 billion in Federal grants to complete the job, and that assumes everything now on the drawing board will actually be built, which is highly unlikely.

The trust fund also supports Federal grants for highway construction other than interstates—a network of rural, suburban and urban roads seven times the size of the interstate system, though far less expensive. However, no matter how virulent inflation is over the next 15 years, there's no way these projects could consume anywhere near the minimum of $50 billion left in the fund after the interstate program's future needs are allowed for.

This cycle of surplus is familiar. It is also embarrassing when compared to the starvation diet fed over the past generation to

the country's railroads and mass transit systems.

The very efficiency and productivity of the Highway Trust Fund, essential as it was to be to the building of the interstates, created a huge imbalance in overall transportation policy. Even after five years of political agitation on behalf of the cities, Federal spending for highways is more than double that for railroads and mass transit combined.

[From the Boston Globe, Sept. 15, 1976]

I–93 AND WINDHAM, N.H.—"50 YEARS OF CHANGE IN 10"

(By Robert J. Rosenthal and Nick King)

WINDHAM, N.H.—Six miles north of the Massachusetts border there is a sign on I–93 offering "food, phone, gas and lodging" at a place known as Exit 3 by the motorists who pull off there.

Exit 3 is marked by a Sunoco sign towering above the oaks and pines and granite ledge of the area.

Windham was a rural oasis, a sleepy New England town of 1300 farmers, loggers and retirees before I–93 came through in 1961.

Today, 15 years later, Windham is losing its identity to Exit 3, a bustling interchange where old Rte. 111 intersects with the modern elevated north and south corridors of I–93 on its way from Boston to the White Mountains of central New Hampshire.

The ramps of Exit 3 have brought more people, more business and more problems to Windham than anyone ever anticipated.

Windham has been transformed from a farm town to an interchange and bedroom community in a cycle repeated all along New England's interstate highways.

"We've seen 50 years of change in 10," is the way Ray Barlow sees it from behind the luncheon counter of his Windham country store.

More than 80 percent of the Interstate crisscrosses non-urban areas. Along rural stretches such as this, there is an interchange about every 4 miles. It is at these interchanges, of which there are 300 in New England, that cowpastures and cornfields have been quickly converted into key points of new commercial activity.

The interchanges are as indistinct as they are frequent. It is at these crossroads that corporate America has built shopping centers and the look-alike outlets that provide the "food, phone, gas and lodging" advertised so succinctly on the highway.

Howard Johnson's for example, has built 68 of its 168 orange-roofed franchises in New England on interstate interchanges. A spokesman said that the number of Ho Jo's restaurants and motor lodges has tripled since 1956, when interstate construction began.

Holiday Inn, which has grown from 50 establishments in 1958 to 1700 today, estimates "conservatively" that 40 percent of its motels are located within easy access to an interstate highway.

In York, Maine, near the New Hampshire border, Robert Perkins bought 30 acres of land for $400 in 1958. In 1971, while based in Thailand with the Air Force, Perkins received a check in the mail. The state of Maine had purchased eight of his acres for $27,000. The land would become part of I–95.

Perkins later built a home near an I–95 exit and became a developer. Since then he has built eight homes and sold all of them. Proximity to the interstate is one of his strongest selling points.

Perkins, now 46 and retired, says that Holiday Inn, Ramada Inn, and the Garrity Corp., have approached him about buying five acres of his land just off the exit. He says he will ask $250,000 for the land, and he expects to get it.

Perkins speaks enthusiastically about interstate highways and what they mean to New England.

"As far as I'm concerned Maine would be a dead state without the Interstate. It's like a river," Perkins said. "Everything flows in and out of the state on it."

A few hundred miles away in Newbury, Vt., a quintessential New England small town, Charles Emerson talks about interstate highways in bitter emotional terms.

Newbury was bypassed by I–91. It is a town of fine solid brick homes and farms. But there is no work. Emerson bought a gasoline station there two years ago on Rte. 5, but the Interstate has taken a lot of traffic away.

"That damn Interstate, its put us off the map," Emerson said. "You just don't get no extra boost in the summer. Since the Interstate opened I sell 10,000 gallons of gas less a summer. I don't see what good it's done to Vermont."

But in Windham, N.H., the commercial strip where Exit 3 deposits motorists on Rte. 111 is developing fast.

Tony Pincinsce's Sunoco station has perhaps the best location—directly between and beneath the Interstate's twin "barrells," as they are referred to here.

Just up the road a bank, gift shop and several markets have sprouted while down the other way is a new hardware store and a sign calling attention to "a new commercial center" with "business and commercial space available."

Nearby, Salvatore Amato is considering adding a restaurant and lounge to his motel. "The Interstate gave Rte. 111 potential," he said recently.

Although Exit 3 has not yet attracted a large shopping mall as many interchanges have, residents here expect it will soon. In the meantime, people like Mrs. Dorothy Armstrong use I–93 to commute to shopping malls in nearby Bedford and Salem.

"I love to get on that interstate and zip to wherever I'm going," Mrs. Armstrong says. "It's so easy and convenient."

As a result, local stores in smalltown places like Windham are hard pressed to compete with interchange shopping centers. For the rural grocery store with a soda fountain and post office, such competition forces adapting to the tourist and transient trade funnelled by the Interstate. The alternative is to close their doors.

But the Interstate has brought changes that have gone beyond finances and right to the character of a community.

Because the Interstate put Windham within reach of more people, farmland suddenly became more valuable as housing lots. Taxes rose sharply and people like Ray Barlow couldn't afford to keep on farming.

In 1959, when the Interstate was still under construction, Barlow converted his 400 acres of pastureland into 200 house lots. His Windham Estates development, offering the finest executive homes," was only one of several large-scale residential developments in town. Through the 1960s, 100 new homes were built each year.

Land became so valuable that, as Barlow says, "In many areas of town the land is more valuable than the house sitting on it."

Selectmen's secretary Elaine Haegle says Rockingham County, of which Windham is a part, has experienced a similar spurt of growth since the Interstate. She says it is one of the fastest growing counties in the nation.

"The highway has changed this town so much that, if you were born here, you wish you could go somewhere else," she says.

According to Mrs. Haegle, most of the expensive homes that were built on the lakeshore were purchased by newcomers from Massachusetts who use the Interstate to commute to jobs in Haverhill, Worcester, Boston and Providence. On weekdays those who have joined carpools park their unused vehicles near the access ramps to the Interstate.

Their children remain in Windham for schooling, however, and the town has recently built a new elementary school and, later, an addition to it to handle the growing school population.

The Interstate also has been a conduit for both traffic and crime and Police Chief Norman Crawford expanded his force to cope with it.

The demand for more services had been felt by Windham taxpayers.

"The newer people seem to want more than we ever did," Mrs. Haegle says. "They want garbage pickup, better roads and everything else. I guess they were used to paying higher taxes where they came from."

In an effort to broaden the town's tax base, a town meeting in May voted to rezone 50 acres of woodland between the two Interstate corridors to attract industry. Already Microwave Research Inc. of North Andover, Mass., plans to relocate in Windham with a potential employment of 200 people, town officials say.

The changes have not been easy for an erstwhile farming community. Issues such as how to mend fences and whether or not to pave a dirt road have been replaced by the more complex problems of zoning and water and sewerage systems.

"One of the weakest links in this fast growing town is our lack of professional help. We still rely on elected boards and it's all we can do to catch up," says Barlow, for many years a member of the planning board.

The pressure on Windhams part-time government to keep pace with the changes brought by the Interstate is shared by other small towns along the highway network.

"The interstate is facilitating tremendous growth in rural areas," said Calvin Beale, an economist with the US Department of Agriculture.

"This means problems for the receiving communities. They are growing more rapidly than they can absorb and this puts major strains on town services. What happens when rural and metropolitan people meet no one can say for sure."

Barlow has learned to adapt to the changes brought to Windham by the Interstate. With his housing development completed, he now runs the country store and has switched to a year-round business. It is one of more than a dozen stores catering to the motorist in a town that once supported two or three.

"I'd say my own worth has been enhanced many times by the Interstate," Barlow says.

For Barlow, Windham is home and he can balance the memories of a rural oasis with the new realities brought by the Interstate.

For the motorist traveling the Interstate, Windham is Exit 3. With its food, phone, gas and lodging it could be almost anywhere—anywhere along the interstate highway system.

[From the Boston Globe]

NO ONE ASKED HOW LIVES WOULD CHANGE

(By Nick King and Robert J. Rosenthal)

When Edward H. Holmes joined the Bureau of Public Roads as a junior engineer in 1928, the interstate highway system was simply a grand idea. In 1971, when he retired from the Department of Transportation as an associate administrator for planning, interstate highways stretched from coast to coast.

He can look back now and talk with intimate knowledge about the project that helped shape much of modern America and helped transform much of New England.

Holmes, 69, believes that interstate highways have done what they were supposed to do—connect metropolitan centers, stimulate the economy and create a network of roads for the motorists and truckers in peacetime and the military in time of war.

But Holmes also concedes that interstate highways have affected life in America far

beyond what planners could evaluate in dollars and cents.

Holmes, who lives in Kingston, recently recalled the mood of the country and the views of planners when President Eisenhower signed the National System of Interstate and Defense Highways into law in 1956.

"In the '50s when we moved ahead building, the thought was just to get it done," Holmes said. "It would be ridiculous to say we foresaw what would happen. It was the change of the philosophy of the country that happened. At that time the philosophy said build.

"There was never a relationship between planning and the urban area. We talked about fitting it all together but there was never the grasp of what the automobile would be. The automobile went beyond what we ever conceived. There was a terrific failure in planning and development but that's democracy to a certain extent."

Perhaps the single most striking reality emerging from dozens of interviews with planners, Federal officials, highway experts, builders, critics and people whose lives have been directly touched by the Interstate highway system is that no one foresaw what the interstates would do. No one asked what the impact of the interstates would be—not the politicians, not the planners, not the builders, not even the people whose lives were dramatically and sometimes permanently altered by them.

Today, it seems almost inconceivable that a project as vast and expensive as the interstate highway system could be built or even proposed without serious questions being raised about its economic, environmental and social impacts.

Most Americans are by now familiar with the curious world of interstate highways—the endless white lines, the sprawling concrete overpasses and abutments and "exit culture" that seems to have brought the same hamburgers, cellophaned cheese crackers and watery soda to every part of the nation.

But who, say the planners, was to know that the interstate would bring and take so much more than cars and trucks. Who was to know it would homogenize regions, and so dramatically alter the texture of communities, neighborhoods, and even states.

The story of the interstate highway system is as much a story of the time in which it was built as it is the story of a highway—a confident time where growth went unchallenged and an optimistic nation could almost casually authorize the expenditure of billions of dollars and the construction of thousands of miles of concrete to intersect entire regions.

As Edward Holmes describes it, no one seemed to think much about what the interstates would do to the people and places in its path, even though they were to profoundly change everything they touched.

Charlotte Kitowski of West Hartford, Conn., provides an almost classic example of the kind of person overlooked by the planners and builders in the politically benign years of the 1950s.

In March 1969—a period of political protest and confrontation that was in marked contrast to the Eisenhower years during which the interstate was authorized—Mrs. Kitowski was dividing her time between being a registered nurse and a self-described housewife.

That was about to change. Charlotte Kitowski was about to play David to the interstate Goliath.

It was then that Mrs. Kitowski learned that 11 miles of I–291, part of a multi-lane bypass around Hartford, was to be built through a reservoir near her home. And it was then Mrs. Kitowski decided to stop that highway.

"Back then," Mrs. Kitowski said recently, "I wasn't really sure how to go about stopping a highway. All I knew was that government had lost its meaning for so many people. The Vietnam War made the inadequacies of the country stand out. There was no public participation in the war. It was just going on. It seemed that was the same way highways were being built. The government was dealing with corporations, their interests were being served, not the people."

Mrs. Kitowski began her campaign against the highway going door to door in her own neighborhood and within two weeks she had written support of 2000 people.

During the next four years she would win the support of local politicians and newspapers and take her campaign to the Connecticut State House and to Washington.

At a 1970 rally at the reservoir attended by 10,000 people, Thomas Meskill, then running for governor, came to speak against the highway. As Mrs. Kitowski said, the move to block the highway quickly became an "apple pie issue."

But it was also political. After Meskill was elected governor, he switched his stance on the interstate, in response, Mrs. Kitowski believes, to business interests. She had her own political response. Her committee to stop the highway mailed out thousands of copies of Meskills two speeches, one opposing the interstate and the other in favor.

Mrs. Kitowski's tactics were ultimately successful. In July 1973, more than four years after she had begun her campaign, Gov. Meskill killed plans to build the 11-mile section of I–291.

There is a reminder of Mrs. Kitowski's opposition to highways not far from her house. It is a $10 million, 75-foot-high, four-tiered concrete interchange.

This structure, called "the stack," was built before Mrs. Kitowski began her campaign. It would have been the interchange between Interstate 84 and the defeated highway loop.

Mrs. Kitowski recalled the first time she saw "the stack."

"Looking at it I felt engulfed in cement. I would never have begun what I had begun if I had seen the stack before. That's a lesson people have to learn if they want to get involved against the weight and power of the government. If you ever begin to realize the size of the thing you're up against you'll never start."

Throughout the nation dozens of Charlotte Kitowskis began forming committees as the impact of the massive highway system began to be felt by residents, by environmentalists, by mass transit advocates and by urban planners.

Among the adverse effects cited by interstate critics were increased auto noise, pollution, and the use of diminishing fuel resources, uncontrolled growth spurred by the new highways, the neglect and the emotional issue of residential and business, relocation.

Advocates of the highway system have responded by claiming that the Interstates have done what they were designed for—linking urban centers, and facilitating the vital movement of people and goods.

They also argue that the interstates have provided a tremendous economic boost to most areas of the country, and have given Americans increased access to leisure time and job opportunities.

In any case, the increasing realization that the highway system had done more that make it easier to drive from one place to another gradually brought about changes in the planning and construction of the system:

In 1968, the first mandatory Relocation Assistance Act was passed, followed by a second in 1970. These laws gave financial assistance and advice to people forced to move by interstates.

In 1970, the National Environmental Policy Act was passed stipulating that Federally aided projects such as highways undergo environmental impact studies before any construction begins. The studies include possible air, noise, and water pollution and social and economic lifestyle patterns.

The U.S. Department of Transportation began to release highway trust funds in 1973 for urban mass transit and set up an Urban Mass Transit Administration.

But all of those changes were enacted long after the highway system had taken much of its shape. For better or worse, interstate highways are here to stay. The damage that may have been done to the environment, the character of communities altered by sudden growth, and the elevation of the automobile to its exalted status, seem to be permanent.

Permanent also are what many residents and business interests view as much needed economic and lifestyle benefits.

Although they came late, the changes slowed and even stopped the building of interstate highways and many highway builders and planners did and still do find them difficult to accept.

"To me a highway is progress and it seems that there are these people opposed to progress," says Lawrence A. Staron, chief of interstate projects for the Department of Transportation.

Robert Gubala, an environmental engineer for Connecticut Department of Transportation, approves of the environmental impact study process but says that "the burden of proof is on us to prove we're innocent rather than on opponents proving us guilty. That says something about the country."

Gubala also believes that the stopping of I–291 north by Mrs. Kitowski and subsequent halt of I–291 south, now in court over whether or not a proper impact study was done, will have severe negative impacts on Hartford.

"They've won the case but not the battle. The traffic is still awful and the need for a bypass is greater than ever. More problems have been created by not building that road. People use a lot of rhetoric but when it comes down to it they don't vote with their feet. They take the automobile," Gubala says.

Gubala, like many other transportation officials, says that the continuing emphasis on the use of the automobile can lead only to more congestion and pollution in urban area. He also says roads will continue to be built when there is a need for them.

US Department of Commerce figures show that in 1973 Americans spent $103 billion on automobiles while spending only $1.6 billion on mass transit.

Officials involved in building highways and critics of the highway builders have said that increased dependence on the automobile and the government's emphasis on highways is clearly linked to the decline of the railroads over the last 20 years.

In 1958, according to the National Assn. of Rail Passengers, there were 1448 scheduled passenger trains operating daily between cities. Today, according to Amtrak, there are 259.

According to the Assn. of American Railroads, the shipment of freight, on trains since 1956 has decreased by 12 percent.

By 1990, according to Department of Transportation estimates, the government will have spent $62 billion on mass transit and $192 billion on highways.

Even with the increases in mass transit funds, the same percentage of travelers which uses mass transit now (6 percent) will be using it in 1990, according to Transportation officials.

"The primary function of highways is to facilitate the flow of traffic," says Floyd Thiel an economist in the Department of Transportation's economic study group.

"There's a danger of being over-enthusiastic about highways. But here in the highway business we think we improve the Gross National Product.

We don't argue whether highways are socially desirable. You get mixed up over that. We know that if you put dollars into highways they multiply. We don't make value judgments—that's political. It's up to the people and the leaders to decide if we should grow."

When Thiel speaks of growth he is referring to the building of more interstates and the economic growth they create.

Between 1970 and 1975, according to the Census Bureau, New Hampshire's population increased 10.9 percent, Vermont's 5.9 percent and Maine's 6.6 percent. The majority of these increases are in communities bordering interstate highways.

During the same period the Massachusetts population has increased 2.4 percent and Connecticut 2.1 percent. Rhode Island's decreased by 2.4 percent.

According to Richard Forestal, the Census Bureau's chief of demographic statistics, New Englanders, especially those outside metropolitan areas are becoming increasingly more dependent on their cars because of the interstates.

He says that New England development was unique because the southern half of it already had a good road system before the interstates were built.

Forestal, unlike many officials interviewed in Washington, has looked at the ramifications of highways beyond statistics.

"An interstate is never an equal advantage for everybody," he said. "It changes the balance of a place economically just as the rivers, canals and railroads did. But it's awfully hard to relate technological changes to changes in society."

David Burwell, a lawyer with Public Interest Research Group of Massachusetts, is a watcher of the highway builders. He says that the interstate system is "a welfare system for the construction industry."

He also says highways and development "have a symbiotic relationship. Highways are built because of the need for development. Then development comes and more highways are needed."

Burwell concedes that the government does address community needs now but adds that questions are asked only after the decision to build a road has been reached. He says the government never would have responded to a community or human need if there had not been opposition to highways.

"The equation of the cost of the interstate never took into consideration the cost to community lifestyle," Burwell said.

"Community life and cohesiveness and disruption cannot be measured which is not to say they have no value. The interstate took in the cost of everything but the value of nothing."

Whatever the pro and con arguments, the interstate highway system has become an almost taken-for-granted reality to millions of the Americans.

The consensus among most highway experts and planners is that it could not have been built in today's financial and political climate, but there is nothing approaching consensus on whether it should have been built at all.

Perhaps the central question was best asked by Maine farmer John Mooers when he stood surveying the stretch of interstate that cut through his farmland:

"I don't know—you think that's what they call progress?"

STATE OF RHODE ISLAND AND PROVIDENCE PLANTATIONS

DEPARTMENT OF TRANSPORTATION,
Providence, R.I., April 20, 1976.

Hon. WILLIAM T. COLEMAN, Jr.,
Secretary, U.S. Department of Transportation, Washington, D.C.

DEAR SECRETARY COLEMAN: Both as Director of the Rhode Island Department of Transportation and as a consumer of transportation services, I have developed a keen interest in the concept of the "forgiving roadside".

In my latter role, I travel regularly through two "forgiving roadside" projects in neighboring Massachusetts and through one such project here in Rhode Island. Putting myself in the place of my fellow consumers, I had been puzzled that they too did not develop an interest in these projects. It is, after all, perplexing to perceive a "highway" project that in no way alters the highway itself.

Over the past several months, however, several people have begun to share my interest. The term "forgiving roadside" has thus begun to gain notoriety on several fronts here in Rhode Island.

In November, one of our prominent environmentalists criticized the way in which "forgiving roadside" projects are developed. His feeling was that they should be subjected to public hearings and to some kind of environmental assessment.

In February, a Providence Journal writer editorialized on the subject, his primary concern being the cost of these projects. As a taxpayer, his feeling was that the benefits derived from them do not justify the costs that are involved.

This feeling was immediately echoed by a Barrington resident in a letter he wrote to Governor Noel. The writer stated that it made him sick to see how his money was being wasted and after noting "the overall general conditions on Rhode Island roads," he suggested that his money could be put to better use.

The newspaper article also inspired a local student of landscape architecture to write a paper on the subject. Her feeling is that rolling, heavily treed highway medians are much more attratcive than the flat and barren medians that are being created. Aesthetics has thus entered the debate.

In my official capacity, I have of course listened to these people with great interest and I have also discussed the "forgiving roadside" concept at length with several members of my staff. I have reached two conclusions.

First of all, I do not question the utility of "forgiving roadside" projects. The thirty feet of unencumbered roadside recovery areas that these projects create have unquestionably prevented numerous injuries and deaths.

I have also concluded, however, that while "forgiving roadside" projects are beneficial in and of themselves, the fact that we have even developed such projects is symptomatic of one of the most serious and frustrating problems facing my department—the inflexibility of federal highway funding.

There is highway safety work in our state that our citizens are almost begging us to undertake. As one example, I cite the 150 high accident locations throughout the state where almost 2000 accidents occurred during 1974. Furthermore, about 10% of our 1974 highway deaths occurred at these locations.

Improvements at almost all of these locations are eligible for Title II funding under either Section 209 or Section 230. The tragic fact, however, is that we currently have projects underway at only nine of these locations. Responsible for our dismal record is a federal funding structure that has apportioned us less than a combined total of $850,000 for the current fiscal years under these two categories. Furthermore, our record would be even worse if we had not used money apportioned to us under Title I categories to finance some of these projects. Lest you argue that such an action demonstrates a certain flexibility, I need only to point out that by using Title I funds for this work, we have had to delay the initiation of other important projects. The flexibility thus rings hollow.

As a second example of work that needs to be done in Rhode Island, I cite the twenty bridges throughout our state that have been classified as being either functionally obsolete or structurally deficient. All of these bridges need to be replaced and all are eligible for federal funding, but only five of them are under study or design. Again, the reason is a lack of money in certain federal funding categories.

The major problem lies with interstate funding policies. Rhode Island has more money available to it under the interstate category than it can possibly use and it is prohibited from using this money for non-interstate projects. It is this prohibition that has spawned "forgiving roadside" projects on our interstate highways when there is much more important highway work that needs to be done.

I therefore appeal to you to use your influence to ensure that future highway acts guarantee the states the flexibility that they need to proceed with their highway programs in a rational manner. The present system is truly intolerable.

Very truly yours,

ROBERT J. RAHILL,
Director.

[From the Washington Post]

SEATTLE CELEBRATES A FREEWAY BURIAL

(By Neal R. Peirce)

SEATTLE.—This handsome city on the shores of Puget Sound has just celebrated a burial that could be one key to the revival of inner cities throughout the nation.

Buried was a short stretch of Interstate 5, a concrete canyon of 10 lanes of traffic bearing 133,000 cars through the center of Seattle each day. The traffic still moves. But the freeway trench has been bridged over with a splendidly landscaped 6-acre urban park, filled with trees and grass and flowers and cascading water—including a 32-foot high waterfall—that totally masks the roar of traffic a few feet below.

Where truck and auto noise once filled the air, children now run and splash through wading pools, people have lunch in the open air, young people enjoy sunbaths, and retirees from nearby housing move about by foot or wheelchair.

And by substituting a charming park for the blight of a freeway canyon, Seattle also has created a pedestrian access between parts of its inner city cut off from each other when the interstate road was built.

Ingenious planning and financing—and eight years of close teamwork between city, county, state and federal governments and private citizens—were necessary to make Seattle's Freeway Park a reality.

The human catalyst was civic leader James R. Ellis, whose "Forward Thrust" bond improvement program for the city's future in 1968 had resulted in the earmarking of $2.8 million for a small park beside the freeway, Ellis and others then developed the idea of bringing the freeway and using the roof of a proposed municipal garage for still more park space. In return for the city's promise not to condemn his adjacent land, a private developer was persuaded to use only half the parcel for his building and to dedicate the other half to open space as an integral part of Freeway Park.

The city acquired the property and paid for the parking garage; the state highway department, using federal and state funds, built the bridge across the freeway to support the park. Close to $1 million in community development block grants, open space funds and recreation monies were made available for the work.

The total public cost, $14 million, amounted to only $45 a square foot—in an area where raw land normally costs $63 a square foot. The entire 6-acre park cost less in property taxes than the originally planned 1-acre park would have cost. And by bringing a private developer into the picture, the city added $130,000 to its annual property tax yields

Ellis says reclaiming the air space over freeways—space already in public ownership—should be considered by at least 50 other major U.S. cities. Often adjacent land is publicly held as well. And it's not even necessary to have a depressed freeway: often buildings and parkland, with the street level raised two or three stories, can be built over and around ground-level freeways.

Ellis acknowledges there are problems in launching complex projects such as Freeway Park. Each seems to take almost 10 years from inception to completion, and it's hard to get people to make a connection with taxes they may have approved a decade before. Without that connection, they may well be unwilling to make more public investments.

And government, Ellis says, moves incredibly slowly. The private entrepreneur built his office building and a huge garage and his part of Freeway Park before the city of Seattle even invited bids. Particularly in these days of required citizen comment on any proposal, Ellis says, "the time lock on government action is a fundamental part of the credibility problem." Because of inflation, delayed projects inevitably cost more than the people were originally told they would.

Yet whatever the problems, projects like Freeway Park—and several others now under way in Seattle—are proof positive that a city with imaginative leadership can reverse physical rot and, even more important, create a sense of excitement about a city where people of every class and race and economic group enjoy public places in common. That generates, Ellis says, a positive "hands-on" feeling among people, in stark contrast to deserted streets, bolted doors and the task of "hiring enough mercenaries to protect us from each other."

Seattle's natural setting, to be sure, makes it one of the most fortunate cities on earth. It suffers many misty days, but when the cloud cover recedes, one sees majestic Mount Rainier rising in the distance, and everywhere the brilliant waters of Puget Sound and the city's lakes. Few cities are so hilly: steep, impressive hills, offering breathtaking cityscapes and waterscapes.

There have been problems in recent years: fierce unemployment rates, a rise in numbers of poor (largely black) families, a sharp drop in the middleclass population. But under Mayor Wes Uhlman and a forward-looking city council, sharp emphasis is being placed on urban conservation and the preservation of tightly-knit neighborhoods. People are encouraged to decide themselves on how public funds are spent, how traffic is controlled and the neighborhood character shaped. City-wide, the old big business establishment has lost ground to a broad coalition of arts advocates, anti-freeway buffs, assorted reformers and local homeowners and businessmen.

Community Development Director Paul Schell explains how the city's major restorations and fresh projects are being tied together by walkways and bikeways, a monorail, free downtown bus service and a proposed trolley line and funicular for one of the steepest hills. The idea is easy foot and transit access between such attractions as Seattle Center (home of the 1962 World's Fair), a revitalized and park-dotted waterfront, zesty old Pike Place Market, the new domed stadium, and restored Pioneer Square, where fashionable shops and galleries share a community with the derelicts of old Skid Road.

Now on the drawing boards: Westlake Mall, in the heart of the old, declining downtown retail core, where elegant small parks will link a hotel, art museum, department stores and an intriguing three-tiered building accommodating restaurants, elegant new shops, theaters, and a new terminal for the monorail.

Government's role in this broad renewal, Schell says, is principally to reinforce positive private decisions—of businesses to stay and expand in the city, of citizens to stay there and not flee to the suburbs with their spending dollars and the tax base they represent.

To encourage those decisions, the city has just begun a series of public service radio and television commercials that "celebrate" the city and its rich cultural and ethnic diversity.

As scenes of congested traffic and frustrated drivers play across the screen, the viewer is reminded that "if you lived in Seattle, you'd be home by now." Another ad features all kinds of distinctive neighborhoods and houses—old, new, grand, modest. The pitch: "Suburbia is white, young and middle class. But Seattle? Seattle's like America—it's for everybody!"

I know of no other city so confident of itself and future—nor so imaginative—as to take to the airwaves with a positive advertising campaign. Nor has any other begun to submerge its unsightly freeways, substituting human amenity for the blight the superhighways have brought. But there's no rule to say that other cities couldn't do the same.

[From the New York Times, Mar. 9, 1977]

SEATTLE PARK SENSIBLE RESPONSE TO FREEWAY

(By Paul Goldberger)

SEATTLE.—When this city decided a few years ago to turn an old gas works into a monumental sculptural centerpiece for a new park, it thrust itself into the vanguard of American park design. Now Seattle has confirmed its position with another unusual park, this one a 5.4-acre mass of concrete completely covering a stretch of downtown freeway. Called simply Freeway Park, it does triple duty. It provides downtown open space, eliminates freeway noise, and links together two segments of town that the highway had cut apart from each other.

Freeway Park was created, in other words, to counter the effect the freeway had on the cityscape. Downtown highways have been ruthless destroyers of the urban fabric, cutting neighborhoods in two and drastically altering the ambiance of older cities, we may not be building many more of them any longer, but plenty are there, and Freeway Park is one of the few sensible responses any designer has yet offered to the problem.

Lawrence Halprin and Associates of San Francisco were the designers of the $3.5 million park, which is tied into a new office building by Van Slyck, Callison, Nelson of Seattle and a garage by Narramore, Bain, Brody and Johnson of Seattle. The overall project cost was $24 million.

The park consists of several flat, open, planted areas, grouped largely at the ends of a site that rambles in a rough diagonal across the freeway. The central visual element, however, is a dramatic 32-foot-deep concrete canyon, filled with waterfalls.

The canyon drops from the elevated park level to ground level over the median strip of the freeway. Like many of Mr. Halperin's designs, the canyon relies heavily on concrete—it is boxy and hard-edged, a configuration that poses some safety hazard.

But Mr. Halprin believes the canyon discourages visitors from taking chances and thus poses little real physical danger. A similar concrete fountain area of a Halprin park in Portland, Ore., has had an extremely good safety record.

At Seattle, terraces and irregular stairs and passageways bring the visitor into what feels like a deep crevasse. The view of the city disappears, the planting of the park's upper levels falls away, and the visitor is left in a concrete chasm, with water tumbling powerfully down all around him.

It is a striking place, far removed from the feeling of the surrounding city. But Mr. Halprin skillfully brings back the sense of the city with one splendid gesture—at the bottom of the canyon, behind the largest of the several waterfalls is a vast window onto the freeway. The cars glide by, their sound hidden by the water, their movement framed by the windows. Suddenly the freeway becomes like a segment of an abstract movie.

The window is so successful that one can only wish that Mr. Halprin had done more with the idea of letting the park use the freeway as a design element. Most of the park is fairly conventional, as current park design goes, its major excitement emerging from what it does rather than how it does it, but the window onto the freeway is something altogether new. It transforms the mad onrush of cars not by denying their existence, but by catching their movement in a frame.

"I don't think we gain much by perceiving freeways as ugly monsters." Mr. Halprin said the other day, "We should deal with the freeway as a modern art form, integrating it into the city, taming it rather than complaining about it."

That is essentially what he has done, in a way that is far more sophisticated than most other such efforts, like the mediocre apartment towers dropped over the approaches to the George Washington Bridge in Manhattan.

Indeed, Freeway Park recalls the very finest attempts to integrate urban highways into neighborhoods; it deserves to rank with such pioneering efforts as the Brooklyn Heights Esplanade over the Brooklyn Queens Expressway or the integrating of Carl Schurz Park into the F.D.R. Drive on the Upper East Side.

ADDITIONAL COSPONSORS

S. 76

At the request of Mr. STONE, the Senator from Montana (Mr. MELCHER) and the Senator from Indiana (Mr. BAYH) were added as cosponsors of S. 76, to amend title XVIII of the Social Security Act.

S. 247

At the request of Mr. GOLDWATER, the Senator from New Jersey (Mr. WILLIAMS) was added as a cosponsor of S. 247, to provide recognition to the Women's Air Forces Service Pilots.

S. 749

At the request of Mr. ANDERSON, the Senator from West Virginia (Mr. RANDOLPH) was added as a cosponsor of S. 749, to amend the Internal Revenue Code.

S. 753

At the request of Mr. HUMPHREY, the Senator from New Hampshire (Mr. DURKIN) was added as a cosponsor of S. 753, providing disability benefits for the blind.

S. 800

At the request of Mr. HART, the Senator from New Hampshire (Mr. DURKIN)

was added as a cosponsor of S. 800, to promote the use of energy conservation.

S. 845

At the request of Mr. DOLE, the Senator from Pennsylvania (Mr. HEINZ), the Senator from Iowa (Mr. CLARK), the Senator from Indiana (Mr. BAYH), and the Senator from Vermont (Mr. STAFFORD) were added as cosponsors of S. 845, the Dole-McGovern Food Stamp Act of 1977.

S. 972

At the request of Mr. NELSON, the Senator from South Dakota (Mr. McGOVERN) was added as a cosponsor of S. 972, a bill to authorize the Small Business Administration to make grants to support the development and operation of small business development centers in order to provide small business with management development, technical information, product planning and development, and domestic and international market development, and for other purposes.

S. 975

At the request of Mr. WILLIAMS, the Senator from California (Mr. CRANSTON) was added as a cosponsor of S. 975, to improve the administration of the National Park System.

S. 995

At the request of Mr. JAVITS, the Senator from Arizona (Mr. DeCONCINI) was added as a cosponsor of S. 995, to amend the Civil Rights Act of 1964.

SENATE RESOLUTION 105

At the request of Mr. NELSON, the Senator from South Carolina (Mr. HOLLINGS), the Senator from Maryland (Mr. SARBANES), the Senator from South Dakota (Mr. McGOVERN), and the Senator from Florida (Mr. STONE) were added as cosponsors of Senate Resolution 105, calling for a White House Conference on Small Business.

SENATE RESOLUTION 120

At the resquest of Mr. HUMPHREY, the Senator from Arizona (Mr. DeCONCINI) was added as a cosponsor of Senate Resolution 120, relating to the ban on saccharin.

SENATE JOINT RESOLUTION 13

At the request of Mr. RANDOLPH, the Senator from New Mexico (Mr. SCHMITT) and the Senator from North Dakota (Mr. YOUNG) were added as cosponsors of Senate Joint Resolution 13, designating Energy Conservation Month.

SENATE RESOLUTION 123—ORIGINAL RESOLUTION REPORTED RELATING TO THE CONSIDERATION OF S. 1070

(Referred to the Committee on the Budget.)

Mr. PROXMIRE, from the Committee on Banking, Housing, and Urban Affairs, reported the following resolution:

S. RES. 123

Resolved, That the provisions of section 402(a) of the Congressional Budget Act of 1974 are waived with respect to S. 1070, a bill to authorize additional funds for housing assistance for lower income Americans in fiscal year 1977, to extend the Federal riot reinsurance and crime insurance program, to establish a National Commission on Neighborhoods, and for other purposes. The waiver is necessary in order to provide for the continuation of HUD's crime and riot insurance programs, to provide supplemental funds requested by the Administration for assisted housing programs, and for the conduct of a study of policies required to improve the Nation's urban neighborhoods.

AMENDMENTS SUBMITTED FOR PRINTING

CODE OF OFFICIAL CONDUCT—S. RES. 110

AMENDMENTS NOS. 137 THROUGH 140

(Ordered to be printed and to lie on the table.)

Mr. SCHMITT submitted four amendments intended to be proposed by him to amendment No. 65, proposed to the resolution (S. Res. 110) to establish a code of official conduct for Members, officers, and employees of the Senate; and for other purposes.

AMENDMENT NO. 145

(Ordered to be printed and to lie on the table.)

Mr. PERCY. Mr. President, I submit an amendment to Senate Resolution 110, which affects the provisions of the proposed rules on the reporting of gifts.

The intent of proposed rule XLII requiring the reporting of all gifts of food, transportation, and lodging over $250 and of all other gifts over $100 is, like the other reporting requirements, to inform the public of the private financial interests of their lawmakers. However, I believe this section goes further than is necessary to serve this public purpose and is thus an unjustified and unnecessary intrusion of private lives and purely social relationships.

The intent of proposed rule XLIII, prohibiting the acceptance of gifts valued at more than $100 from an individual with a "direct interest in legislation" is to specifically prohibit attempts to influence legislation through the giving of items of monetary value to Senators and Senate staff. In my experience, such attempts are few and far between. But this proposed rule does not seek to set a standard of what is acceptable conduct. However, like the gift reporting section of proposed rule XLII, this provision does not distinguish between legislative contacts and purely personal relationships.

The amendment I am submitting distinguishes between the receipt of gifts where disclosure or limitation may be necessary to promote public confidence and those cases where there is no cause for public concern.

The first part of the amendment requires the reporting of gifts under rule XLII only to the degree that the value of gifts received from a single source exceeds in value those given in return by the Senator or staff person to that single source during the reporting period.

Under the rule as written, a Senator or covered employee receiving an aggregate of over $250 in gifts of food, entertainment, transportation or lodging must report such gifts and identify the source. It will obviously then appear that the recipient has benefited financially when in fact he or she may have given gifts of equal or greater value in return. This is certainly the case in most social relationships, particularly for those who do most of their entertaining outside of the home.

The amendment allows such gifts in return to be acknowledged. Under the amendment, a Senator or covered employee may deduct from the aggregate of gifts valued at $35 or more that are received from a single source the aggregate of those valued at $35 or more that the member or employee gives to that source. Or, if all gifts received are aggregated for purposes of reporting, all gifts given may be deducted. Thus gifts need be reported only to the degree that they exceed in value those given in return by $250 in the case of food, entertainment, transportation and lodging and by $100 in the case of all other gifts which seems to be in keeping with the spirit and intent of the resolution before us.

The second part of this amendment applies this principle to gifts received from individuals or organizations with a direct interest in legislation under proposed rule XLIII. Obviously such an individual or organization is not going to buy influence if gifts and entertainment of equal or greater value are given in return. This amendment allows a Member or employee to deduct from the aggregate of gifts that are received from a single source the aggregate of those that the Member or employee gives to that source.

This amendment recognizes the existence of social relationships between Members or employees and donors who are covered by the proposed rule. And the public's interest remains protected by section 1 prohibiting the acceptance of any gift where the intent or result would be to affect the performance of official duties as well as by the fact that gifts would still be reportable as required under proposed rule XLII.

These amendments contemplate that Members and employees keep accurate records so that if a question does arise, the records can be made available to the Select Committee on Ethics. This is particularly important since Members and employees will still be subject to a net limit of $100 in gifts from those covered under rule XLIII.

I ask unanimous consent that the amendment be printed in the RECORD.

There being no objection, the amendment was ordered to be printed in the RECORD, as follows:

AMENDMENT NO. 145

On page 5, line 14, after "(d)" insert "(1)".

On page 5, after line 16, insert the following:

"(2) In aggregating gifts for purposes of subparagraphs (b) and (c) of this paragraph, the reporting individual may deduct from the total value of gifts received from any source during the calendar year the total value of gifts given by the reporting individual to that source during the calendar year, except that, if gifts with a fair market value of less than $35 received from that source are not aggregated, gifts with a fair market value of less than $35 given to that source may not be deducted.

On page 22, line 4, after the period insert "In determining whether an individual has accepted any gift or gifts having an aggregate value exceeding $100 during a calendar

year from any person, organization, or corporation, there may be deducted the aggregate value of gifts (other than gifts described in subparagraph (c)) given by such individual to such person, organization, or corporation during that calendar year.".

AMENDMENT NO. 146

(Ordered to be printed and to lie on the table.)

Mr. STEVENSON (for himself, Mr. RIBICOFF, and Mr. CLARK) submitted an amendment intended to be proposed by him to amendment No. 65 proposed to Senate Resolution 110, supra.

AMENDMENTS NOS. 147 AND 148

(Ordered to be printed and to lie on the table.)

Mr. WALLOP submitted two amendments intended to be proposed by him to amendment No. 65 proposed to Senate Resolution 110, supra.

AMENDMENT NO. 149

(Ordered to be printed and to lie on the table.)

Mr. PERCY. Mr. President, I submit an amendment intended to reduce the disparate treatment of earned and unearned income in Senate Resolution 110.

The amendment adds a provision to the conflict of interest section of Senate Resolution 110, stating that no Senator or staff may devote so much time to the acquisition of unearned income, such as real estate or investment management, that it would interfere with the conscientious performance of Senate duties. The amendment does not place a specific limitation on the amount of time which may be devoted to such activities, but directs the Rules Committee to report in 180 days as to whether such a specific limitation should be imposed.

I ask unanimous consent that the amendment be printed in the RECORD.

There being no objection, the amendment was ordered to be printed in the RECORD, as follows:

AMENDMENT NO. 149

On page 27, line 12, strike out "duties." and insert in lieu thereof "duties, including the expenditure of time, for the purpose of acquiring income (other than earned income), in an amount which would interfere with the conscientious performance of official duties.";

On page 53, between lines 19 and 20, add a new section as follows:

"SEC. 310. The Committee on Rules and Administration shall, within one hundred and eighty days after the day on which this resolution is agreed to, report its recommendations to the Senate as to whether a specific limitation should be placed on the amount of time which a Senator may devote to the acquisition of income (other than earned income).";

On page 53, line 20, renumber section 310 as 311.

GRAIN STANDARDS ACT AMENDMENTS—S. 1051

AMENDMENTS NOS. 141 THROUGH 144

(Ordered to be printed and to lie on the table.)

Mr. TOWER (for himself, Mr. BENTSEN, Mr. LUGAR, Mr. CURTIS, Mr. MCCLURE, Mr. ZORINSKY, Mr. BARTLETT, and Mr. PACKWOOD) submitted four amendments intended to be proposed by them jointly to the bill (S. 1051) to amend the U.S. Grain Standards Act with respect to recordkeeping requirements and supervision fees, and to establish an advisory committee to provide advice to the Administrator of the Federal Grain Inspection Service, and for other purposes.

Mr. TOWER. Mr. President, I submit today proposed amendments to the Grain Standards Act, which I intend to bring up at the time the Senate considers S. 1051, an original bill of the Committee on Agriculture.

The four amendments, which add additional sections to S. 1051, are being filed today on behalf of Senators BARTLETT, BENTSEN, CURTIS, LUGAR, MCCLURE, PACKWOOD, ZORINSKY, and myself and represent what we consider to be essential corrections to the Grain Standards Act, which was rewritten last year.

BACKGROUND

That major revision followed 2 years of lengthy investigation and hearings by the committee, following disclosures of criminal conduct and corruption at some of the ports at the Gulf of Mexico from which American-produced grain is shipped overseas.

The system adopted by the Congress after lengthy conference with the House placed the Federal Grain Inspection Service in charge of all grading and weighing of grain at points of export. With the exception of State inspection systems at interior terminals which were "grandfathered in" under the act, the Federal Government also assumed responsibility for grading and weighing of grain at interior locations as well.

The 1976 law requires Federal grading of all outbound shipments—those leaving ports—and requires weighing of grain shipments entering and leaving export terminals. The act allows, but does not require, the FGIS to perform grading of grain shipments entering export terminals, commonly called "inbound shipments."

The 1976 Grain Act amendments also allow the administrator of FGIS to designate private exchanges, boards of trade, and chambers of commerce to perform official grading and weighing at interior terminals, under a waiver for potential conflicts of interest which, under the act, are presumed to occur in all non-Federal inspection operations.

Suffice it to say that the amendments adopted by the Senate last year did not pass without strong opposition. The Senate agreed in conference to changes designed to allow continued participation by the private sector. There was a challenge, which I voiced along with others, to the presumption implicit in the Senate bill that anyone not working for the Federal Government is a crook.

Mr. President, the vigorous debate which occurred last year when the Senate revised the Grain Act is history. Whether or not we agreed at the time, the bill is now law, and it is not the purpose of this Senator, nor any of my colleagues who join in introducing and sponsoring these amendments, to try to reverse, through these amendments, steps which were taken last year.

PROBLEMS CITED

As with many of our acts, the 1976 Grain Act amendments have been difficult to implement. We placed upon the FGIS a tremendous burden, with a short period of time to accomplish the task. Understandably, problems have cropped up, and the FGIS has been extremely helpful in bringing these problems to the Congress for correction.

More importantly, grain producers and marketers have brought to this body's attention the more glaring weaknesses in the bill, first in an informal meeting sponsored by Senators DOLE and HUDDLESTON, and later at the 2 days of formal hearings by the committee.

PROPOSALS

Prior to those hearings, both Senator DOLE and Senator HUDDLESTON introduced legislation to correct many of the problems which had been discussed between producers of grain and the FGIS. Their bills addressed particularly the need for a change in record-keeping requirements for country elevators, and the payment of supervisory costs through user fees. A temporary advisory committee was proposed to assist FGIS through the transition period from a private/State/Federal system to an almost totally Federal system of grain inspection.

The day following the introduction of S. 592 by Senator DOLE and S. 593 by Senator HUDDLESTON, hearings were held to examine suggestions for changes in the law in order to insure the timely and orderly marketing of grain.

At those hearings, on February 3 and 4 of this year, dozens of witnesses testified to the need for changes as comprised in S. 592 and S. 593. In addition, four other problems were cited, and suggestions were made for solving these difficulties.

The amendments which my colleagues and I submit today encompass the solutions proposed during the committee's hearings, for which a substantial record was made.

The amendments are simple and straightforward. They seek in the most efficient manner to make minor corrections in the existing law to promote orderly marketing and inspection of grain produced in this country, and to relieve some of the costs imposed by the law on producers.

The amendments we introduce today are not sweeping, and they do not quarrel with the intent of the law. As my colleagues will note, the amendments are supported by Senators on both sides of the aisle and from every geographical area from the gulf coast to the Pacific.

Although my colleagues and I could have requested consideration of these amendments by the committee during its consideration of S. 1051, we did not do so for two reasons: At the request of Senator HUDDLESTON and Senator DOLE, we did not wish to cause a delay in the process of reporting a bill for consideration of the full Senate; and out of courtesy to our colleague, the Senator from Iowa, Mr. CLARK, who opposes these amendments but who was necessarily absent on the day when S. 1051 was considered by the committee. We did not feel that it would be proper to insist on consideration of the amendments in his absence, and we did not feel consideration

was essential to passage of the amendments by the full Senate.

Mr. President, as I said, there are four amendments:

AMENDMENT NO. 1

The first amendment would provide criteria for the Administrator of FGIS to consider in making his determination as to whether a waiver should be granted for any potential conflict of interest.

On at least two occasions, the Administrator has expressed to my staff his desire to have such criteria, either from Congress or from the advisory committee. I believe it is incumbent on Congress to provide that guidance, while leaving substantial room for additional criteria which either the Administrator or the advisory committee may suggest.

This amendment does not require the Administrator to do anything more than consider these suggested standards for a board of trade, private exchange, or chamber of commerce which seeks to be designated as an official inspection agent of the FGIS.

It is obligatory only in that the Administrator shall consider the criteria. I do not believe that is too much to ask in the way of curbing the discretion of an administrator.

AMENDMENT NO. 2

The second amendment provides that the Administrator may, and I repeat, may, designate a private exchange, board of trade or chamber of commerce to perform official grading of grain which enters export terminals so-called inbound shipments.

As I said earlier Mr. President, the present law requires that the Federal Government and only the Federal Government perform grading of outbound shipments at points of export, that is, the grain which leaves an export terminal for an overseas customer. The law likewise requires that weighing of grain shipments be performed by the FGIS both in and out of the export terminals, the purpose of these requirements being to reduce the likelihood of corrupt handling of American grain.

This second amendment, Mr. President, does not alter that philosophy. The amendment merely would allow the Administrator to designate, should certain criteria be met, an agency in the private sector to perform functions not required of FGIS under the act.

Again, the amendment is not mandatory. We must depend on the discretion of the Administrator if good reasons demonstrate that such a designation cannot be justified. But as we all know, Mr. President, circumstances do and will exist wherein such a designation will be in the public interest in order to promote the orderly and timely movement of grain.

AMENDMENT NO. 3

The third amendment, Mr. President, seeks to reduce to the minimum essential number the number of supervisory personnel in the FGIS. While in the past the central problem of the grain trade has been that too few Federal supervisors were hired, the opposite now appears to be the problem.

This amendment would require the Administrator to determine a ratio between the number of personnel essential to carry out supervisory functions and the number of bushels of all types of grain moving in export. A second ratio will be set applying to domestic trade for the previous year. Once this bushel-to-supervisor ratio is established following consultation with the Agriculture Committees of the House and Senate, the ratio would govern the ceiling for supervisory personnel in future years, adjusted up or down as the volume of grain trade increases or decreases.

Assuming S. 1051 is enacted, and supervisory personnel are paid out of appropriated funds, the ratio would act only as a ceiling. The appropriations process may dictate a lower level, but the ceiling would be set, replacing the present "blank check" which has been written into the law.

AMENDMENT NO. 4

The final amendment, Mr. President, would authorize appropriations to pay half the costs of federally mandated inspection and weighing service performed by FGIS. The other half would continue to be paid through user fees. Under the present law, the Federal Government has replaced the private sector and the States in inspecting and weighing grain. The costs of these services, designed to cover the entire bureaucratic structure outside Washington, D.C., is by FGIS' own estimate two to three times as expensive as the prevailing rates of private exchanges, boards of trade, and chambers of commerce providing the same services.

The fact of the matter is that the Federal Government is unable to provide the same level of service at the same cost as private enterprise, which should come as no surprise to my colleagues.

The problem is that producers of grain end up footing the bill for that increased cost. And while I do not advocate that the Government pay the total cost, I do not think it is fair to grant a monopoly to FGIS without funding a portion of the increased costs. Farmers and elevator operators no longer have the option of seeking out the most efficient, and least costly service. FGIS has a corner on the market, and it is too much a burden to require.

The total cost of original inspection and weighing provided by FGIS is estimated by the committee in its report to be $50 million annually. At least half this cost is due, according to witnesses who testified at the committee's hearings, to increases brought about in the conversion from private to Federal inspection and weighing. That increase is what we would propose here to fund through appropriations.

Mr. President, I think these amendments strengthen the law without subverting its purpose. They will eliminate the remaining difficulties which were brought to light during the 2 days of hearings in February. I do not believe in overlegislating, and these amendments do no make that mistake. I think the broad support which they have received from other Senators attests to their soundness.

Mr. President, the facts outlined here today are the best arguments for adoption of these amendments when the Senate considers S. 1051, and I will not argue their merits further. I thank my colleagues for bearing with me through this explanation, and I ask unanimous consent that the four amendments which I submit today for myself and my colleagues be printed in the RECORD.

There being no objection, the amendments were ordered to be printed in the RECORD, as follows:

AMENDMENT NO. 141

S. 1051 is amended by adding the following new section:

SEC. 7. Section 11(b) of the United States Grain Standards Act (90 Stat. 2881–2882; 7 U.S.C. 87 (b)) is amended by inserting in paragraph (5) thereof immediately following the first sentence, the following:

"The Administrator shall, in making a determination under this paragraph, consider—

(A) the historical record of the organization and its employees with respect to integrity in the provision of inspection or weighing services;

(B) whether there exists a balance of buyers and sellers on the Board of Directors, or other governing body of the inspection service organized under a Board of Trade or private exchange;

(C) whether there exists an autonomous committee or other governing body to manage an inspection service provided by a Chamber of Commerce; and

(D) such other criteria as the Administrator, after consultation with the Advisory Group established under this Act, and upon the Advisory Group's recommendation, may by regulation provide.

AMENDMENT NO. 142

S. 1051 is amended by adding the following new section:

SEC. 8. Notwithstanding any other provision of law, the Administrator may designate a Board of Trade, Chamber of Commerce, or private exchange for the purposes of providing official inspection and grading services on inbound shipments at points of export, provided that:

(A) A balance between buyers and sellers exists among the members of the Board of Directors or other governing body of an inspection agency established for such purposes by a Board of Trade or a private exchange;

(B) An autonomous committee composed of neither buyers nor sellers is established to govern an inspection agency set up to perform such services by a Chamber of Commerce; and

(C) Such other criteria as the Administrator, after consultation with the Advisory Group established under the Act, and upon the Advisory Group's recommendation may by regulation prescribe, are met.

AMENDMENT NO. 143

S. 1051 is amended by adding the following new section:

SEC. 9. (A) Within 60 days following the enactment of the Act, the Administrator shall establish a ratio between the number of supervisory personnel essential to carry out supervisory functions under the Act at export points, and the number of bushels of all types of grain exported from the United States within the most recent twelve-month period; within sixty days following the enactment of this Act, the Administrator shall report that ratio to the Committees on Agriculture of the House and Senate, and shall thereafter limit the number of federal supervisory personnel at points of export to the number established by applying the ratio to the number of bushels of grain moving in export in the year im-

mediately preceding the year for which supervisory personnel levels are established.

(B) The Administrator shall, within sixty days following the enactment of this Act, establish a ratio between the number of Federal supervisory personnel essential to carry out supervisory functions under the Act at non-export points in the United States, and the number of bushels of all types of grain moving in domestic trade for the previous twelve-month period; within sixty days following the enactment of this Act, the Administrator shall report that ratio to the Committees on Agriculture of the House and Senate, and shall thereafter limit the numbe rof Federal supervisory personnel at non-export points in the United States to the number established by applying the ratio to the number of bushels of all types of grain moving in domestic trade in the year immediately preceding the year for which supervisory personnel levels are established.

AMENDMENT No. 144

S. 1051 is amended by adding the following new section:

SEC. 10. Notwithstanding any other provision of law, the costs of federally mandated inspection and weighing services shall be paid in equal portions through appropriations authorized under this Act, and through fees assessed on an equal basis to users of such services.

NOTICES OF HEARINGS

PARKS AND RECREATION SUBCOMMITTEE

Mr. ABOUREZK. Mr. President, I wish to announce for the information of the Senate and the public, the scheduling of a public hearing before the Parks and Recreation Subcommittee of the Senate Energy and Natural Resources Committee.

The hearing is scheduled for April 6, 1977, beginning at 9 a.m. Testimony is invited regarding S. 393, a bill to designate certain lands in Montana to determine their suitability for preservation as wilderness.

For further information regarding the hearings you may wish to contact Mr. Thomas Williams of the subcommittee staff on extension 47145. Those wishing to testify or who wish to submit a written statement for the hearing record should write to the Parks and Recreation Subcommittee, room 3106, Dirksen Senate Office Building, Washington, D.C. 20510.

NOMINATION HEARING

Mr. WILLIAMS. Mr. President, I wish to announce that the Committee on Human Resources has scheduled a hearing on Friday, March 25, 1977, at 10 a.m. in room 4232 Dirksen Office Building, on the nominations of Ernest LeRoy Boyer of New York to be Commissioner of Education and Mary Berry of Colorado to be Assistant Secretary for Education.

Persons wishing to testify or submit statements, please contact: Lisa Walker of the committee staff, room 6302, Dirksen.

ADDITIONAL STATEMENTS

THE IMPORTANCE OF SOIL CONSERVATION

Mr. CULVER. Mr. President, the trend toward a plateau and possibly a decline in per acre crop yields in American agriculture has become more and more evident in recent years. Among the many partial explanations for this, one stands out in my mind as the most unfortunate, the most dangerous, and the most avoidable—the depletion of our soil.

I would like to take this opportunity to bring to the attention of my colleagues an article on this topic by Lee Egerstrom and Gil Bailey from the Des Moines Tribune of March 15. This article provides an accurate and to the point picture of the current status of our soil conservation programs. That picture is not an encouraging one.

From 1970 to 1976, when the Department of Agriculture was calling for all-out production, its budget requests included no funds for soil conservation. Millions of formerly untilled acres came under the plow with no protection from erosion. The Congress had to fight to maintain what was little more than a nominal cost-sharing program for soil conservation.

Those acres are still in production today. They still lack adequate protection. Without a significant and sustained reversal of the recent trends in funding for soil conservation programs we will throw away not only the progress of the past but also the potential of the future.

I ask unanimous consent that the article by Egerstrom and Bailey be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Des Moines Tribune, Mar. 15, 1977]

ROOTS OF NEW DUST BOWL

(By Lee Egerstrom and Gil Bailey)

WASHINGTON, D.C.—Three decades of soil conservation efforts, involving up to 28 million acres of trees and grasslands, have been destroyed since 1970, contributing greatly to the return of "dust bowl" conditions in the dry West.

Agriculture Department officials report at least 20 million of those acres have been put back into food production, re-creating conditions that caused the Dust Bowl of the 1930s.

As a result, President Carter and Agriculture Secretary Bob Bergland will ask Congress to greatly increase soil conservation programs when a new farm program is outlined next week, Agriculture Department officials said.

However, it may be too late to prevent a 1930s-style return of the Dust Bowl unless weather conditions change and arrest the drought in 24 western and midwestern states.

From the late 1930s until 1970, the Agriculture Department shared the cost of building "shelter belt" rows of trees to hold back wind erosion in the Great Plains and western states.

Marginal farm land was planted with erosion-resistent grasses during the soil bank days of Kennedy and Johnson administrations. In the 1960s, 28 million acres were taken out of production in what was partly a conservation program, and also a subsidized effort to limit surplus grain production.

Former President Nixon and Agriculture Secretary Earl Butz asked Congress to stop funding the Agricultural Conservation Program (ACP) in 1970, arguing that farmers should not be paid for protecting their own property.

The soil bank program was stopped, and land that had been idle was put back into production. The Nixon administration also opposed the shared cost payments for building shelter belt tree lines and grass seedings to fight wind erosion.

Congress provided limited funds for the program over the administration's objections, pointing out the program's relatively low cost. Individual farmers could not receive more than $2,500 in federal help.

President Nixon impounded the funds in 1973. A year later the federal courts ruled the impoundment unconstitutional and the Agriculture Department was ordered to administer the program now called Rural Environmental Assistance Program (REAP).

President Nixon did not include ACP and REAP in his budget requests. President Ford included it only this year.

The lack of interest in the conservation program has been devastating, according to Agriculture Department officials.

"We know how much (trees and grass) was planted over the years, but we don't have any data on how much is on the ground right now," said King Ensmiger, ACP program analysis director.

He added that well over 20 million of the 28 million acres of western farm land, formerly involved in conservation programs, is now back under cultivation and vulnerable to erosion.

While fighting the program in Congress, former Secretary Butz told farmers he would find markets for whatever quantities of wheat, soybeans and feed grains they could produce. The Russians were the new big customers.

CABINET PORTRAITS FOR POSTERITY

Mr. PERCY. Mr. President, it has recently come to my attention that since the 1800's, the visage of nearly every Cabinet member has been captured for posterity in oil—at the taxpayers' expense.

Under this arrangement, most Cabinet officers have been free to select the artist, and recent fees have ranged from $6,000 to $12,000. One portrait commissioned during the Johnson administration took 8 years to complete. Moreover, these portraits are in no way limited to those who serve for lengthy terms. Portraits are in process for Stanley Hathaway, who was Secretary of the Interior for a total of 6 weeks in 1975, and for Elliot Richardson in his 3-month tenure as Defense Secretary.

I do not for a moment suggest that we should not maintain a historical record of the Cabinet through the use of official portraits. However, it certainly seems that high-quality color photographs would be adequate. Indeed, photographs would result in a more accurate historical record than portraits painted with a certain measure of artistic license.

OMB Director Lance has reviewed my concerns in this matter and has indicated that he will recommend a reform of this practice to the President. Although the resulting savings will hardly make a dent in the total level of Federal waste, the hundreds of thousands of dollars spent on these portraits during each administration could certainly be put to better use.

Mr. President, I ask unanimous consent that an article which appeared in the Christian Science Monitor on this subject be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Christian Science Monitor, Nov. 24, 1976]

CABINET PORTRAITS FOR POSTERITY

(By Peter C. Stuart)

WASHINGTON.—A whole Cabinetful of old faces will leave office with the Ford administration in January, but their faces will remain behind—in oil paints, acrylics, and finely carved frames on the walls of the departmental offices they once governed.

A change of presidential administrations is a busy (and lucrative) time for artists who specialize in painting those firm-jawed, man-of-vision portraits of the politically powerful. Each of the 11 outgoing Cabinet secretaries is entitled to one.

For the American taxpayers who pay for nearly all the portraits, such artistic immortality doesn't come cheap. The going rate is roughly $6,000 apiece—more than an entire year's income for some 20 million impoverished Americans. And fees can run as high as $12,000.

Most of the resulting pictures grace corridors, reception areas, conference rooms, and inner sanctums throughout the Washington bureaucracy. But some of them, officials candidly admit, are tucked away in basement vaults—to be resurrected only when a secretary insists on displaying the likeness of a favorite predecessor.

All Cabinet secretaries qualify for remembrance on canvas, no matter how brief or discredited their tenures. Portraits are in process for Stanley K. Hathaway, who was Interior Secretary for a fleeting six weeks in 1975, and Elliot L. Richardson, who was Defense Secretary for just three months. "Instead of an oil painting," quips a Pentagon aide, "maybe they should put up a Polaroid snapshot."

The Interior Department forgivingly displays pictures of former Secretary Albert B. Fall, who was convicted of fraud in the Teapot Dome scandal in the 1920s, and another who defected to the Confederacy. But at the Justice Department, the only Attorney General since 1794 without an official portrait is convicted Watergate conspirator John N. Mitchell. "No request was ever made," explains a department spokesman.

Most Cabinet members are allowed to choose their own artist—former Attorney General Richard G. Kleindienst, an Arizonan, picked a painter from Carefree, Arizona, for example, while successor William B. Saxbe, an Ohioan, selected one from Columbus, Ohio—and how realistically they wish to be rendered.

Others, such as ex-Commerce secretaries, have the choice made for them after they leave and usually are painted from photographs.

Commissioned portraits of officeholders make a tidy living for some artists. New York City painter Everett Raymond Kinstler has depicted two governors, two ambassadors, an undersecretary of state, two Labor secretaries, two Agriculture secretaries (including Earl L. Butz, now on his easel), and the last three treasury secretaries (including William E. Simon, another current project).

The price of being portrayed for posterity, like just about everything else, is going up. Fifteen years ago, at the end of the Eisenhower administration, an attorney general's picture could be hung on the wall for $3,000; today it costs the Justice Department $5,000. The Defense Department pays as much as $10,000. The newest federal department, Transportation (it has had only three secretaries to paint), is the most generous at $12,000.

One department, Commerce, spares taxpayers the expense by paying for portraits from gifts, bequests, and the secretary's speaking fees, or arranging for them to be donated.

Few of these framed flatteries pose any artistic challenge to Rembrandt or Gainsborough, but some have taken as much time to paint as a masterpiece. The recently received portrait of Stewart L. Udall, Interior Secretary in the Kennedy and Johnson administrations, consumed eight years—twice as long as Michaelangelo spent on the ceilings of the Sistine Chapel.

FUNDAMENTAL MISPERCEPTIONS CONCERNING RHODESIA

Mr. HARRY F. BYRD, JR. Mr. President, I believe there are a number of serious misunderstandings which distort the American Government's view of Rhodesia. I find it incomprehensible that the United States can continue to seek to be a positive catalyst for peaceful change in Rhodesia while having no contact with the Rhodesian Government, either formal or informal.

In the March 21, 1977, issue of Barron's magazine there appeared an editorial by Mr. John Davenport which clarifies, in a concise and succinct fashion, the important issues which surround the Rhodesian question.

I ask unanimous consent that the text of this editorial be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

EMBARGO ON CHROME

(By Mr. John Davenport)

In a notable address to members of the American Bar Association in the spring of 1968, the late Dean Acheson declared that the imposition of economic sanctions against the state of Rhodesia by the U.S. and other countries at the instigation of the United Nations constituted nothing less than "barefaced aggression, unprovoked and unjustified by a single legal or moral principle." We recall these forthright words of a not undistinguished U.S. Secretary of State with a certain amount of nostalgia, not just because we saw fit to reprint them at the time (Barron's, June 2, 1968), but also because they offer perhaps the sharpest commentary that can be made on the Carter Administration's latest ploy to deal with what has become known as the Rhodesian issue.

That ploy is to jam through an all-too-acquiescent Congress legislation which nullifies the so-called Byrd Amendment of 1971, which at least allowed the U.S. to purchase high-grade chrome ore and ferro-chrome from Rhodesia to the mutual benefit of both countries. To the benefit of the U.S., because chrome is essential to the making of stainless steel and to high-technology industries. To the benefit of Rhodesia, because sale of chrome alows her to earn the foreign exchange she desperately needs to buy arms to defend herself against mounting terrorist attack, which, on the evidence, is amply supplied with Communist guns and money and contravnes all principles of international law, to say nothing of the spirit of the United Nations Charter.

We here pass over as largely irrelevant the shabby economic argument which Secretary of State Vance and others have brought forward for tightening the noose of sanctions around a country which has never harmed an American citizen, never threatened American property and the present government of which, despite everything, remains loyal to the West. The chief argument on this score is that in cutting itself off from Rhodesian chrome, the U.S. will no longer be completely dependent on Soviet Russia as an alternative source of supply, since advancing technologies both here and abroad now allow American industry to make use of lower-grade chrome available elsewhere, notably from South Africa, the racial policies of which are constantly denounced. In our book, other things equal, the U.S. should buy its raw materials where they are cheapest and most plentiful, and on both counts Rhodesia surely qualifies.

But the Administration's economic arguments are at best a smokescreen for its real purpose, which is to redeem some ill-advised political promises made during the late campaign. Acting on those promises, it will now further denigrate the government of Rhodesia's Prime Minister Ian Smith at the very time when he is seeking to fulfill commitments made under the Kissinger agreement to give Rhodesia responsible majority rule within the next two years. The new chrome embargo will not (as Secretary Vance professes to believe) enhance the chances of a peaceful and just solution to the Rhodesian question. On the contrary, it will put the seal of American approval on aggression and terrorism, and constitute the final turn of the screw in an American policy of deception and poltroonery that can only serve Soviet interests.

The seeds of this deception were planted in 1965, when Rhodesia, for many years a self-governing British colony, declared her independence of the British Empire with assuredly as much right, indeed more right, than many another African state then seeking and gaining self-determination. In this case, however, Great Britain opposed the move, but having no Redcoats at hand to put down the alleged "rebellion" (as she did in 1776), threw the whole matter into the lap of the United Nations. It did not take that body long, under pressure from other African states, to determine that Rhodesia was a "threat to the peace" because she had upset the psychology of her neighbors, and so merited non-recognition and economic reprisal. To those who pointed out that such reprisal clearly violates the provision of the UN Charter which forbids that body to intervene in the domestic affairs of any country, it was argued that in declaring independence, Rhodesia had become a species of nonstate, enjoying no standing at the bar of international justice.

To strengthen this Humpty Dumpty reasoning(Mr. Acheson's phrase), it has become the business of the State Department, and most of the news media, to depict the government of Rhodesia as a renegade and "racist" regime, where some 270,000 whites shamelessly exploit six million blacks. This is at best a caricature of the truth. In declaring independence, Rhodesia adopted a constitution that made no mention of race, creed or color in terms of the franchise and might have drawn plaudits from a Madison or Jefferson. In 1969, that constitution was amended along more racial lines, with blacks voting for blacks and whites for whites. Yet as of early this year, there were four black tribal leaders in Ian Smith's Cabinet, an equal number of blacks and whites in Rhodesia's Senate, and 16 blacks vs. 50 whites in Rhodesia's Assembly with provision that black representation would advance at least to parity as the contribution of blacks to the national income, thanks to education and rising productivity, steadily increased.

This may not be Simon-pure democracy, but on the record, Rhodesia's political system has given the nation a far better deal than the one-man, one-vote principle which has landed so many other African states in military or civil dictatorship (and, in many cases, economic penury). Between 1965 and 1975, Rhodesia staged a spectacular economic advance which surprised her friends and aggravated the enmity and envy of her foes. In a decade, Rhodesia's gross national product expanded on average by 7% per year, or better than that of the U.S., as the result of the diversification of her agriculture from tobacco to maize, cotton and cattle breeding, as well as heavy investment in mining, light

industry, roads, public housing and education. With the result that even today, under wartime conditions, 85% of Rhodesian children receive at least five years of elementary education; the literacy rate is the highest in Africa (except for South Africa); and there are more blacks in the University of Rhodesia than whites. It should likewise be noted in passing that as of today, blacks constitute some two-thirds of Rhodesia's fighting forces.

In view of all the foregoing, the notion that Rhodesia's troubles stem from seething domestic unrest as the result of white "racist" rule must be dismissed. What endangers her existence is external aggression, of the kind that the UN was supposed to stop but which it has so far encouraged. Such aggression began in a small way in the early 'Seventies, when Rhodesia's so-called black "nationalist" leaders, operating usually from outside its borders, took up terrorist tactics. It was vastly increased with the collapse of the Portuguese empire in 1974–75, and the loss of both Angola and Mozambique to Communist domination—the latter exposing Rhodesia's long eastern flank, as well as her Zambian border, to continuous infiltration and attack.

Terrorism may well be a kind of life-style in much of Africa, but in the case of Rhodesia it has surely reached new depths of degradation—the mowing down last month of three Jesuit priests and four nuns at a Christian mission being only one of countless and recurrent acts of brutality. In this spreading war, moreover, it is not whites who have suffered the most. On the contrary, over 90% of civilian casualties to date have been blacks, who, working on Rhodesia's farms or on Tribal Trust lands, have been ruthlessly put to death—in many cases literally butchered—as punishment for their loyalty to what they regard as their own homeland.

To counter this Soviet armed and orchestrated barbarity, Rhodesia's military forces have given good account of themselves. Yet to date, despite much hand-wringing, the civilized world has done little to back them up, and Western diplomacy has faltered. It is to the credit of Henry Kissinger that when Russian arms and Cuban mercenaries poured into Angola, he immediately perceived that a new imperial presence threatened the whole African continent, thus compelling a new American initiative. Yet when it came, the initiative was of a peculiar kind. In his speech in Lusaka, Zambia, last April, Kissinger dealt at best tangentially with the problem of terrorist attack across Rhodesian borders. Instead, in a desperate effort to hold the allegiance of neighboring black states and to prevent direct Soviet intervention, he refurbished an old formula: no help for Rhodesia whatever until she accepted the slippery and wholly undefined solution of "majority rule."

In pressing that policy, Kissinger found a reluctant ally in South Africa, which, though no friend of majority rule, found herself under mounting threat of UN sanctions, and desired peace in the north at almost any price. In Pretoria last September, all the cards came face up on the table, and against his own better judgment, Ian Smith bowed to American-British terms: virtual abdication of Rhodesia's 50-year-old Parliamentary system; the formation of an interim government in which whites and blacks would participate; and the drafting of a new constitution, which would give Rhodesia majority rule in two years.

These were harsh terms, but at least they held promise of an orderly transition from white to black political dominance, and the promise of an immediate lifting of sanctions when the interim government was formed. What came after is far uglier. For scarcely had the Kissinger plan been announced, than it ran into the opposition of precisely those African states which it was designed to mollify. From the so-called "front-line presidents" of Mozambique, Zaire and Zambia came swift denunciation of the Kissinger package as one more "imperialist" plot. At the ensuing Geneva conference, it turned out that the black "nationalist" Rhodesian leaders were themselves badly split between the forces of the moderate Bishop Muzorewa, who probably would command a majority of black Rohdesian votes if an election were held tomorrow, and the so-called Patriotic Front of Joshua Nkomo and the implacable Robert Mugabe, a self-admitted Marxist, who is supposed to control the bulk of the terrorist forces. Small wonder that the Geneva conference broke up in a babble of voices. Nor were matters mended when the pipe-smoking British chairman of the conference, Ivor Richards, indulged in his own shuttle diplomacy to come up with a wholly new settlement plan. This, as Ian Smith subsequently pointed out, differed from the original Kissinger proposals "as chalk from cheese," and in effect would have given native Rhodesians, black and white, little say in their own future.

In taking this position, Smith has occasioned much tongue clacking around the U.S. Department of State. Indeed, in pressing for fresh sanctions on Rhodesia, Secretary Vance has implied that Smith is again endangering the peace, and apparently continues to believe that in any forthcoming conference, all parties, including known terrorists and Communists, must be represented. In our judgment, Smith stands tall for questioning this naive assumption that good can come out of evil. Having committed himself to majority rule, this man from Bulawayo, Rhodesia, and former RAF pilot, is not going back on his word. What he is stubbornly holding out for is a constitutional transfer of power which will duly protect minorities, recognize deep tribal differences and affiliations, and maintain civilized values and procedures—a settlement "by Rhodesians and for Rhodesians."

What most other black African states, and terrorists of the stamp of Mugabe, are calling for is something totally different, namely, a black power grab of the kind that has undone so many African countries, and thereafter the socialization of Rhodesian industry and the nationalization of its land. States a pronouncement of one of the so-called "liberating" movements: "(In the new Zimbabwe) the present capitalistic system, which benefits a few settlers in Rhodesia and capitalists in South Africa, Britain and America at the expense of the laboring masses, will be abolished."

In the circumstances, there is no question where the U.S. should stand. What Congress should be debating is not how to tighten economic sanctions against Rhodesia, but how to get rid of them entirely. What the State Department should be encouraging are precisely those efforts of Mr. Smith to work out with moderate black Rhodesian leaders an "internal solution" which will square with the will of the majority of its peoples, rather than with the dictates of outsiders. And in preparing for any new international conference, Washington should surely reopen direct communication with Salisbury, where it has had no representative since 1968. As matters stand, U.S. policy is being shaped in a vacuum.

To spark such an initiative, to send to Rhodesia a small delegation of Americans (including, we would hope, at least one distinguished jurist), would take courage. But, after all, not so long ago President Carter was promising an "open" administration and a comprehensible foreign policy. The trouble with U.S. Rhodesian policy is that it is simply incomprehensive to most Americans. Incomprehensible to go on treating Rhodesia as a "non-state" when, even under wartime conditions, she is one of the better governed states of Africa. Incomprehensible, because while calling for majority rule, the U.S. goes on blocking Rhodesia's own attempts to achieve it. Incomprehensible, finally, in view of the fact that if Rhodesia goes down the drain, then we may be sure that South Africa will be next on the Soviet shopping list. Solzhenitsyn, like Spengler before him, has a name for such diplomacy: the Decline of the West. We prefer to hope that the West will rally and come to its senses, perceiving that the issue in Rhodesia, as in much of southern Africa, is not between black and white. The issue is between the region of terror and the rule of law.

ABOVE AND BEYOND THE CALL OF DUTY—A TRIBUTE TO THE AMBASSADORS OF IRAN, PAKISTAN, AND EGYPT

Mr. PERCY. Mr. President, I would like to put on the record an expression of appreciation to the three foreign Ambassadors who at considerable personal risk offered their intervention in the recent crisis involving the armed siege at three buildings in Washington.

I refer, of course, to Ambassadors Ardeshir Zahedi of Iran, Ashraf Ghorbal of Egypt, and Sahabzada Yaqub-Khan of Pakistan, who went to the B'nai B'rith National Headquarters building to negotiate the release of more than 100 hostages and the surrender of the men holding them. This compassionate act taken without regard for personal safety but on behalf of their fellow man, was wholly successful, which indicates the creativity, ingenuity and diplomatic skills of these very senior and gifted diplomats.

I know that the American people generally are grateful to Ambassadors Ghorbal, Yaqub-Khan, and Zahedi for this splendid assistance to the Mayor and law enforcement officials of the District of Columbia. Their action was clearly above and beyond the call of duty.

THE BAN ON SACCHARIN

Mr. BAYH. Mr. President, on Friday, I joined with two of my colleagues, Mr. BIDEN and Mr. MCINTYRE, in introducing a joint resolution, Senate Joint Resolution 39, which would prohibit the Food and Drug Administration from enacting its proposed ban on saccharin until the completion of additional study on the health risks of saccharin consumption to humans.

This resolution was made necessary by an unfortunate decision by the Food and Drug Administration on March 9 banning the use of saccharin as a potential health hazard. In making its announcement, the Acting Director of the FDA, Sherwin Gardner, stated that "We have no evidence that saccharin has ever caused cancer in human beings." Why, then, did the FDA feel that it was obliged to remove the artificial sweetner upon which millions of Americans rely in their daily diet?

The answer appears to be in the FDA's interpretation of the so-called Delaney amendment to the Food, Drug and Cosmetic Act passed by the Congress over 19 years ago. Under the Delaney amendment, additives shall be deemed safe after tests for cancer are conducted on either humans or on animals. In the case of saccharin, the tests were conducted by the Canadian Government on rats. The

conclusion was that in order to duplicate the level of saccharin fed to the rats in the Canadian tests, a human would have to consume at least 800 cans of diet soda a day. I am not a scientist, but even as a lay preson. I can attest to the absurdity of this reasoning.

The removal of saccharin from the market would not just affect those millions of Americans who rely upon the artificial sweetener in their diet, but it also could have a potentially devastating affect on the estimated 10 million diabetics in this country. Moreover, we need to remember that one out of every four Americans suffers from overweight and the concomitant increased risk of heart attack and arteriosclerosis. For these people, the risk to their health from the removal of saccharin is far greater than the risk of its continued use.

I hope that my colleagues in the Congress will join me in sponsoring our resolution which would prevent the FDA from carrying forward with its proposed ban until further scientific evidence is developed either by the FDA or by the Office of Technology Assessment.

IOWA JUDICIAL SELECTION COMMISSION

Mr. CULVER. Mr. President, the events of the past few years have shown all of us how vital an independent judiciary is to the preservation of our constitutional system. Federal judges, U.S. attorneys, and U.S. marshals form the foundation of our judicial structure; and, it is my belief that if we are to have a truly independent judiciary, appointments to these posts must necessarily be placed outside the influence of partisan politics.

With a new administration in Washington, with upcoming vacancies for these posts in Iowa, and with the strong possibility of an additional Federal judgeship in Iowa, it seems to me that there is a unique opportunity to reestablish public trust and confidence in our judiciary by securing the best qualified persons for these posts through a procedure that removes these appointments from the political patronage system.

It is for these reasons that Senator CLARK and I, in conjunction with the Iowa Bar Association, have established the Iowa Federal Judicial Selection Commission. This nine member commission, representing a broad cross section of Iowa's populace, will select up to five candidates for nomination to vacancies for Federal judges, U.S. attorneys, and U.S. marshals. Senator CLARK and I will receive these recommendations and immediately forward these names, without prejudice, to the President.

For the interest of my colleagues, I ask unanimous consent that the Commission's charter and membership be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

CHARTER OF THE IOWA COMMISSION ON FEDERAL JUDICIAL SELECTION

U.S. Senator John C. Culver, U.S. Senator Dick Clark, and F. James Bradley, President of the Iowa Bar Association, after extended and careful consideration of the selection process for judicial officers of the United States courts, find:

1. That the maintenance of a strong and competent federal judiciary is necessary for the protection of the rights and freedoms of all those within the jurisdiction of the United States Constitution and that such a judiciary must be preserved as a viable co-equal branch of our democratic government:

2. That only those individuals who exhibit the highest professional and personal qualifications and attributes should be appointed to serve on the federal judiciary.

3. That the selection process should not be influenced by arbitrary criteria such as sex, race, national origin, religion or political affiliation which have no bearing upon a nominees true qualifications; and

4. That the constitutional process of presidential appointment, with the advice and consent of the United States Senate, to fill vacancies in the U.S. courts can be substantially augmented and improved through the creation of a nonpartisan advisory commission composed of outstanding representatives of the Iowa Bar and leading citizens of the State of Iowa to recommend eligible persons for nomination to be federal district court judges, U.S. Attorneys and U.S. Marshals for Iowa.

In accordance with these findings, the following charter is promulgated effective immediately:

1. There is hereby created and established the Iowa Commission on Federal Judicial Selection, hereinafter referred to as the "Commission".

2. The Commission shall find qualified persons and recommend their nomination to fill vacancies on the United States District Courts for the Northern and Southern Districts of Iowa, and for United States Attorneys and Marshals for the Northern and Southern Districts of Iowa; hereinafter referred to as "judicial vacancies".

3. The Chairman of the Commission shall notify the Iowa Bar and the public at large of the existence of a judicial vacancy and of the nomination procedure to be followed by the Commission and shall request recommendations of persons to fill judicial vacancies.

4. The Commission shall consider all applications and shall also actively seek out through appropriate means qualified prospects for appointments to fill judicial vacancies. The Commission may seek and receive recommendations from any interested citizen or group.

5. The Commission shall seek, receive, review and evaluate all pertinent information on the candidates concerning their qualifications and eligibility.

6. Whenever a judicial vacancy occurs, the Commission shall meet to consider the qualifications and eligibility of all candidates for appointment.

7. Within 30 days after the occurrence of a judicial vacancy, the Commission shall select by majority vote of its membership not more than five proposed nominees who are qualified. For those judicial vacancies which exist at the time of the creation of the Commission, or at a time when there is a vacancy on the Commission, the 30-day time limitation shall begin to run 30 days after all commissioners have been officially appointed.

The proposed nominees shall be listed alphabetically and shall be certified to the two U.S. Senators from Iowa who shall immediately submit the proposed nominations, without prejudice, to the President of the United States as qualified for appointment. Along with the list of names, the Commission may submit, and the U.S. Senators from Iowa shall forward as submitted, pertinent information to aid the President and Senate in consideration of the proposed nominees.

8. No proposed nominee shall be certified as qualified by the Commission unless there is an affirmative showing that the proposed nominee possesses:

(a) All the qualifications required by law;

(b) The personal qualities of integrity, sound physical health, objectivity, emotional stability, honesty, fairness, compassion and community respect; and

(c) The professional qualities of judicial temperament, legal experience and outstanding legal ability.

9. The personal and professional qualities shall be identified and evaluated in light of guidelines and rules established by majority vote of the Commission. These guidelines and rules shall be recorded by the Commission and copies made available to the public for review without undue delay.

10. The Commission shall consist of nine members to be appointed as follows:

(a) Each United States Senator from Iowa shall appoint three members to the Commission;

(b) Three members of the Commission shall be appointed by the Iowa Bar Association from among the Iowa Bar members who are actively engaged in the practice of law with offices within the State of Iowa;

(c) The Senators and Iowa Bar Association shall cooperate in their appointments to assure that the Commission membership represents, in so far as possible, a cross-section of the people of Iowa as a whole.

(d) Not more than five appointees shall be members of the Iowa State Bar;

(e) Incumbent judges and officials of general government are not eligible for service on the Commission.

(f) Initial appointments of the members of the Commission shall be for staggered terms of two, three, and four years, as determined by lot. When a vacancy occurs on the Commission due to the resignation, disability or death of a member, a successor shall be chosen by the original appointing authority for the unexpired term. Vacancies which occur due to expiration of the member's term shall be filled by the original appointing authority for a term of four years. No member shall serve more than two full terms.

(g) No member shall be eligible for appointment to a federal judicial office so long as he or she is a member of the Commission and for a period of at least six months after ceasing to be a member.

11. An act of the Commission shall be official only upon a majority vote of its members.

12. The Commission shall designate its chairman, vice chairman and secretary. The Chairman shall call Commission meetings. Notice of a Commission meeting must be given to all members and to the public three days prior to the meeting. Operating rules of the Commission shall be recorded and made available without undue delay for public inspection.

13. The Commission shall keep the public informed of its activities and actions to the extent possible without jeopardizing the goals of the selection process or compromising the privacy of potential nominees.

14. A member of the Commission may be removed from the Commission by his or her appointing authority only if the member conducts himself or herself in a manner unbecoming an individual with this important responsibility or willfully violates the rules or official policies of the Commission.

15. Such support expenditures as may be necessary shall be paid by the Iowa State Bar Association. Members will not receive salary or per diem.

The members are:

L. J. (Roy) Ehrhardt, Elkader, attorney and past chairman, Iowa State Bar Association Grievance Commission;

Mrs. James (Dorothy) Schram, Burling-

ton, housewife, United Nations Association National Board member, Iowa UN Association general chair, member of the earlier State Commission on Judicial Reform and active in the arts in Iowa;

Charles E. Harris, Des Moines, attorney and Iowa Bar Association Board of Governors member;

Earle Grueskin, Sioux City, businessman, civic leader, former mayor and former council member;

Mrs. Janet McGovern, Riceville, farm wife;

Lee Gaudineer, Des Moines, attorney, former state senator, special staff counsel to the Iowa Bar Association Ethics Committee;

Nolden Gentry, Des Moines, attorney, Des Moines School Board member, former State Board of Public Instruction member;

Mrs. John (Betty) Kaplan, Council Bluffs, Council Bluffs Service League president, Council Bluffs Symphony Guild president-elect, past board member, Mercy Hospital of Council Bluffs and past board member, American Cancer Society; and

John Greer Spencer, attorney, former Iowa Academy of Trial lawyers president, former Clay County Bar Association president and former University of Iowa Alumni Association president.

Those interested in appointment as federal judge, U.S. attorney or U.S. marshal should make application to:

Federal Judicial Selection Commission, 1101 Fleming Bldg., Des Moines, Iowa, 50309.

DEFENSE BUDGET

Mr. GOLDWATER. Mr. President, Defense Secretary Harold Brown and his predecessor, Donald Rumsfeld, agree that the Vietnam war greatly weakened the United States while the Soviet Union was building a vastly improved military capability. They also agreed that the Soviets are concentrating their capability in regions where it can jeopardize the vital interests of the United States and its allies.

Because of this, it behooves us to take a very close look at the defense budget proposals for the fiscal year 1978. The departing Ford administration left behind a proposed defense budget of $123.1 billion. After stripping out $9.1 billion for military retired pay and $1 billion for foreign military assistance, the total reflects a 6.7-percent increase in defense spending over fiscal year 1977. Now the Carter administration has recommended changes in the Ford budget designed to get at some of the weaknesses President Carter perceives in the defense establishment. Overall this would represent a growth in real defense spending of only 4 percent above the fiscal 1977 level.

Mr. President, an especially sound appraisal of the 1978 defense budget has been prepared by the Association of the U.S. Army. I ask unanimous consent that it be printed in the RECORD.

There being no objection, the appraisal was ordered to be printed in the RECORD, as follows:

A LOOK AT THE FISCAL YEAR 1978 DEFENSE BUDGET

Just five days before he surrendered his office to incoming Secretary of Defense Harold Brown, former Secretary Donald Rumsfeld compared the state of the nation's defenses vis-a-vis the most likely adversary, the Soviet Union, with the physical state of a man who has gone too long without sleep.

A man, Rumsfeld said, can stay up until three o'clock in the morning and perform well the next day. He might even do well for several days but finally the loss of sleep will catch up with him and he will no longer be able to perform as expected. At that point he has no option but to go to bed and try to catch up on his rest.

Rumsfeld pointed out that a series of decisions by past administrations and by Congress over a span of 15 to 20 years have brought the U.S. armed forces to the point of having to rebuild their strength. Just a month later, Dr. Harold Brown, the new defense secretary, made the same points in presenting the Carter budget. Despite the heavy expenditures on defense during the Vietnam War period, most of the money was spent on consumables and when the war ended, the forces found themselves armed with war-weary or obsolescent equipment.

The Soviet Union, in the meantime, was able to concentrate on force improvement. There is little question that the USSR has moved ahead of the United States in a number of areas but there is some uncertainty about what they intend to do with that superiority. In his annual Defense Report, Secretary Rumsfeld said:

"What we are witnessing, at a minimum, is a sustained effort on the part of the leaders in the Kremlin to expand their capabilities sufficiently to become major participants in world geopolitics. In certain respects, they have already broken through or leapfrogged the barriers erected by containment policies of earlier decades. They can be expected to continue this process in the future. Certainly they will have a growing capability to do so."

Defense Secretary Brown summarized it this way: "What we do know, however, is that the Soviet Union commands the full panoply of modern military power and that its investment in nuclear and nonnuclear forces (on land, on—under and over—the sea and in the air) has been increasing for more than a decade. The capability is large in size and growing in sophistication. Much of it is concentrated in functions and regions where it can jeopardize the vital interests of the United States and its allies."

The departing Ford administration left behind a proposed Fiscal Year 1978 Department of Defense budget of $123.1 billion. After stripping out $9.1 billion for military retired pay and $1 billion for foreign military assistance the total reflects a 6.7 percent increase in defense spending over FY 77. The comparable increase figure for FY 77 was 5.8 percent.

As the Ford administration conceived this budget, it would strengthen U.S. forces by improving their readiness, quick reaction capability and sustainability. The specific budget goals were to:

Modernize the strategic forces, including the initiation of full-scale development of an improved land-based ICBM.

Work toward rebuilding the Navy to a force of about 600 combat ships by emphasizing smaller carriers and greater numbers of smaller combatant and support ships.

Continue modernization of ground and air forces by procuring new aircraft, tanks, helicopters and anti-tank missiles.

Raise inventory levels of munitions and other equipment needed to sustain high intensity combat.

Increase training, pre-positioning of equipment and in-theater force mobility to improve U.S. readiness to respond to the outbreak of a European conflict with normal or little warning.

In his briefing on the new budget, former Secretary Rumsfeld described it as "sound and austere."

"The Funds that are being requested are the funds that are needed," he said. "There was no attempt made to please those individuals who have it as their first task every morning when they get up to find out a way to hack the defense budget. *That is to say we did not place attractive items in there that can be readily reduced without any damage to the Defense program.*" (Italics added.)

Now, after just four weeks in office, the Carter administration has announced a series of recommended changes to the initial Ford defense budget which are designed to get at some of the weaknesses President Carter perceives in the defense establishment. Defense Secretary Brown has detailed a series of changes he would like to see made to the Ford budget which would reduce planned Fiscal Year 1978 defense spending by $2.755 billion to a total obligational authority of $120.4 billion. This would represent a growth in real defense spending (with retired pay and foreign military assistance stripped out) of four percent above the current (FY 77) level.

DEPARTMENT OF DEFENSE BUDGET—JANUARY AND AMENDED DEFENSE BUDGET TOTALS

[Current dollars in billions]

	Fiscal year—			
	1976 actual	1977 estimate	1978 estimate	Increase fiscal year 1977–78
January 1977 (Ford budget):				
Total obligational authority (TOA)	97.5	110.2	123.1	13.0
Budget authority (BA)	102.2	106.6	120.5	13.8
Outlays	88.5	98.3	110.1	11.8
February 1977 (Carter amendments):				
Total obligational authority (TOA)	97.5	110.2	120.4	10.2
Budget authority (BA)	102.2	106.6	117.7	11.1
Outlays	85.5	98.3	109.7	11.4

While not seeming to quarrel with much of the dollar value of the Ford budget, Secretary Brown said he is convinced, ". . . that additional opportunities exist for improving the efficiency and effectiveness of the Defense establishment. The goals of the military establishment must be to insure that U.S. military forces are fully adequate to their tasks, but at the same time lean and efficient."

Brown promised a careful look ahead at support structure, headquarters and other overhead operations and the base structure in the U.S. and abroad.

The new Secretary of Defense also reaffirmed earlier commitments to reduce personnel-related costs. He intends to re-review the report from the Quadrennial Review of Military Compensation and, although he remains committed to reducing the cost of the military retirement program, he will not pursue any changes until the new review has been completed. He pledged himself to avoid unfair treatment of military personnel ". . . who have been in the service for some time, who came in with the expectation of retirement benefits under the present system and I think would correctly feel they'd been unfairly treated if changes were applied to them."

The Carter administration has totalled out in their recommendation the Armed Forces University of Health Sciences, on which about $20 million has already been spent. They feel that the medical professional needs of the armed forces can continue to be filled by direct recruitment and through scholarship programs in private institutions. The single university building already under construction at great expense at Bethesda Naval Hospital presumably will either be turned over to the adjacent National Institutes of Health or used by the Navy.

The new administration will renew the efforts of its predecessors to make a major (40,000) cut in the paid drill strength of the Naval Reserve.

Service initiatives to expand family travel entitlements for junior enlisted personnel were at first accepted by Secretary Rumsfeld

but later dropped out of the budget by the Ford White House Office of Management and Budget. The heavy price tag ($190 million) was simply too much for the budget to bear at a time when personnel costs overall are coming under very close scrutiny. The Carter budget changes did not restore this item.

Charts prepared by the Department of Defense to support the Ford budget submission show the upturn in U.S. defense spending pointing in the general direction of a similar curve for the Soviet Union. However the same chart makes it apparent that it will take many years of increased U.S. defense spending to make the U.S. and Soviet expenditure lines meet or cross.

Put in the perspective of the total federal budget for Fiscal Year 1978 the defense proposal (including the Carter administration recommendations) will remain a constant 5.4 percent share of the U.S. gross national product but decline slightly in its share of the total federal budget and overall public spending. The percentage of the labor force committed to defense activities will increase slightly.

U.S. DEPARTMENT OF DEFENSE BUDGET—FINANCIAL SUMMARY

[In percent]

	Fiscal year–				
	1964	1968	1976	1977	1978
DOD/MAP as percentage:					
Federal budget (outlays)	42.9	43.6	24.1	23.9	23.8
Gross national product	8.2	9.4	5.5	5.4	5.4
Labor force	8.3	9.9	5.0	5.0	5.1
Net public spending	28.6	29.7	15.9	16.0	15.9

The defense budget originally submitted by President Ford included a package of efficiency measures or "restraints" designed to save $1.3 billion in total obligational auhority and $400 million in actual FY 78 outlays without reducing combat capability. All of these "restraints" are related to personnel costs. They are:

*A renewed effort to establish a "fair market rental" system for assessing the cost of living in government quarters. Also, 25 percent of any active duty pay raise in FY 78 would be shifted into the housing allowance, as was done last year. A first year saving of $73 million is projected.

*Continued efforts to get Congressional action on retirement modernization. It was hoped these changes would save about $10 billion cumulatively by the year 2000 (the anouncement that the Carter administration will restudy the QRMC and retirement programs seems to put this on "hold").

*Another try at denying paid leave for federal civilian employees when on annual summer training with the reserve components. The plan would limit total payment to these individuals during annual training periods to an amount not to exceed their normal federal civilian pay. First year savings are estimated at $30 million. Congress rejected a similar proposal last year.

*Putting service academy and ROTC pay on a par. Academy personnel and ROTC cadets in summer training would get all academic expenses plus about $125 per month for personal expenses. Present cadets and midshipmen are "grandfathered" into the existing scale of one half the pay of an 0–1. A small first year saving of $4.5 million is anticipated.

*Placing severe limits on the number of times an individual can be transferred during specified periods of time and reducing the number of officers by about 2,000. The officer reduction would include about 600 in the grades of 0–6 and higher. All reductions would be made by attrition. It is estimated that there would be 110,000 fewer moves in FY 78 than there will be in FY 77. The first year savings from these proposals are estimated at $99 million but they are predicted to reach $226 million by FY 79.

*Modifying pay procedures for DOD civilian "Blue Collar" workers to make them conform more closely to existing local civilian rates and practices. First year savings of $167 million are expected with cumulative savings of $2.4 billion by FY 1982.

President Carter has made clear since this budget submission that he is still committed to future cuts in the defense budget. Congress now has the final decisions to make.

The budget now being considered by Congress will support the broad force structure programs of all the military services. Initial recommendations by the Carter staff to cut Army strength by 10,000 in the form of two active Army brigades and replace them with two affiliated reserve component brigades eventually succumbed to the logic of the Army leadership. Nevertheless, there was an initial scare and an indication of the extremes to which the new administration might go to get an immediate reduction in personnel costs. In this case the possible saving was estimated at $67 million.

In general terms the forces to be supported by the Fiscal Year 1978 Defense Budget look like this:

DEPARTMENT OF DEFENSE—SUMMARY OF SELECTED ACTIVE MILITARY FORCES

	Actual		Estimated	
	June 30, 1964	June 30, 1976	Sept. 30, 1977	Sept. 30, 1978
Strategic forces:				
Intercontinental ballistic missiles:				
Minuteman	600	1,000	1,000	1,000
Titan II	108	54	54	54
Polaris-Poseidon missiles	336	656	656	656
Strategic bomber squadrons	78	26	24	24
Manned fighter interceptor squadrons	40	6	6	6
Army air defense firing batteries	107	0	0	0
General purpose forces:				
Land forces:				
Army divisions	16⅓	16	16	16
Marine Corps divisions	3	3	3	3
Tactical air forces:				
Air Force wings	21	26	26	26
Navy attack wings	15	13	13	12
Marine Corps wings	3	3	3	3
Naval forces:				
Attack and antisubmarine carriers	24	13	13	13
Nuclear attack submarines	19	63	67	72
Other warships	370	177	171	172
Amphibious assault ships	133	62	63	63
Airlift and sealift forces:				
Strategic airlift squadrons:				
C–5A	0	4	4	4
C–141	0	13	13	13
Troopships, cargo ships, and tankers	100	48	48	48

The Army's total force of 24 divisions (16 active and eight reserve) will complete most of its unit activations and will be preparing to convert two light divisions to the heavy configuration in the succeeding two fiscal years.

*The Air Force will continue on its way toward organization of 26 tactical fighter wings. There will continue to be a total of 24 B–52 and FB–111 squadrons.

*The Navy will continue to operate 13 attack carriers and 12 air wings. The Marine organization of three active divisions and three air wings will also continue.

*Strategic missile forces will remain constant in FY 78. There will be 450 MINUTEMAN II missiles, 550 MINUTEMAN III missiles, 54 TITAN II missiles, 10 POLARIS submarines and 31 submarines carrying the POSEIDON missile.

*The Navy will increase its nuclear-powered attack submarine fleet with five new ships, bringing the total to 72. The overall size of the surface Navy will be increased by one ship with deliveries of 13 new vessels being mostly offset by inactivation of 12 older ships.

As now proposed by President Carter, military personnel strength in the Army and Air Force would each go up by 1,000 but there would be a partially offsetting reduction of 1,000 Navy personnel. There would also be a 5,000 reduction in Defense civilian personnel with 3,000 coming from the Navy/Marines and 1,000 each from the Air Force and Defense agencies.

While not challenging at this time the long-term goals of the Ford Defense budget, Secretary Brown recommended these changes:

*Bolstering the readiness of Army equipment prepositioned in Europe (POMCUS) by improving maintenance facilities ($60 million added).

*Seriously slowing progress on the Army's Advanced Attack Helicopter program by cutting funding in half (from $220 million to $100 million).

*Terminating the Army's Non-nuclear Lance missile program and shifting remaining FY 77 funds to procurement of additional nuclear missiles (no saving involved).

*Increasing the survivability of U.S. aircraft stationed in Europe ($60 million was added to improve shelters and passive defense measures).

*Increasing the number of Civil Air Reserve Fleet Aircraft (CRAF) being modified to carry heavy cargo.

Reducing the backlog of deferred maintenance for all services ($280 million added—Army share $115 million).

Deferring full-scale development of the mobile MX strategic missile until FY 79 ($160 million reduction in this budget).

Reducing the initial buy of B–1 strategic bombers from eight to five pending further evaluation ($280 million reduction in this budget).

Cutting back on F–15 fighter production for the Air Force (from 108 per year to 78) pending further review of the long-range requirement (saving $334 million in this budget).

Deferring for one year (at a presumed saving in this budget of $277 million) planned procurement of the Air Force Advance Tanker/Cargo Aircraft pending study of future requirements.

Reducing the number of Air Force Air-

borne Warning and Control aircrafts (AWACS) to be bought in FY 78 from six to three (saving $150 million in this budget).

The Army's budget was cut by a total of $580 million. In the language of Secretary Brown's statement on the budget, adjustments were made possible ". . . because situations have been identified in which the FY 1978 request would finance deliveries which are more appropriately financed in FY 1979 or in which low levels of early production would be maintained in order to provide for an orderly transition from development to production."

Details of the Army cuts will be discussed later in this paper.

According to Secretary Brown one of the factors that entered into the formulation of the Carter recommendations was a sensing that the Ford administration had tried too hard last year to get the defense budget back on an upward swing. As Brown sees it, the result of the effort during FY 77 was a series of unidentified inefficiencies that must now be overcome by the reviews and reconsiderations he outlined.

The new administration goes along with the Ford decision to drop a new nuclear aircraft carrier from the Navy's shipbuilding program. It also wipes out all plans for a new nuclear powered strike cruiser to be armed with the AEGIS air defense missile system. Development of AEGIS will continue but, in the meantime, another type of vessel will be designated to carry it.

Former submariner Carter even went along with a recommendation to hold up on plans to overhaul some of the older POLARIS submarines to keep them going until the much improved TRIDENT submarines can join the fleet. The old POLARIS boats will not leave the fleet, they will simply not be overhauled. Navy plans to build and test much larger hydrofoil and surface-effects ships will also be cutback sharply.

While outlining the Carter amendments to the Pentagon newsmen, Secretary Brown made short work of a question about the emphasis the Soviet Union seems to be putting on recovery after a nuclear exchange.

"After a full nuclear exchange, damage would be so great that recovery would be impossible to determine," Brown said. "Our emphasis will continue to be on the retaliatory capability." This is borne out by continuation of a meager $91 million budget for civil defense in 1978, the same figure allotted last year.

Throughout his defense of the Carter recommendations, Secretary Brown referred to the need for improving our conventional and general purpose forces, primarily with the goal of keeping the nuclear threshold high. Unfortunately, the net effect of the dollar cuts does not match the intent. Of the total $2.8 billion budget cut recommended by Brown, the general purpose forces—and equipment intended for their use—are asked to absorb a whopping $2.3 billion.

DEPARTMENT OF DEFENSE BUDGET—SUMMARY OF TOA CHANGES IN FISCAL YEAR 1978 BUDGET TOTALS BY MAJOR PROGRAM

[In millions of dollars; fiscal years]

Military program	1978 (January)	Changes	1978 (February)
Strategic forces	11,015	−396	10,619
General purpose forces	44,348	−2,313	42,035
Intelligence and communications	8,239	----------	8,239
Airlift and sealift	1,674	−17	1,657
Guard and Reserve forces	7,162	−50	7,112
Research and development	11,067	−251	10,816
Central supply and maintenance	11,790	226	12,016
Training, medical, other general personnel activities	24,335	51	24,386
Administration and associated activities	2,260	−25	2,235
Support of other nations	1,259	−2	1,257
Total direct program (TOA)	123,150	−2,777	120,373

One encouraging aspect of the Carter reexamination of the budget was the fact that active military manpower spaces remained intact. This assumes even greater impact during this difficult period where the reserve components are not able to meet their strength requirements.

The $580 million Army fund cut assessed by the Carter-recommended reductions impacts most heavily ($528 million) on the Army's procurement account. The $100 million withdrawn from early procurement of the Advanced Attack Helicopter was easily the most serious. In light of the expanding Soviet armor threat the Army can ill-afford delays in getting this superb tank-killer in the inventory. The increase in costs which this delay occasions will similarly be harmful in the future.

Perhaps the biggest Army "plus" among the Carter recommendations was the addition of $115 million to upgrade material readiness. The money will be used to provide depot-level maintenance and should result in a significant increase in the number of items of equipment that are in a "ready-for-combat" condition. The new administration has directed that wherever possible the work will be done by commercial sources.

DEPOT MAINTENANCE UNFINANCED BACKLOG OF SELECTED ITEMS, END FISCAL YEAR 1978

Item	Overhaul cost (unit)	Procurement cost (unit)	Overhaul/procurement ratio	Unfinanced backlog quantity	Cost to overhaul unfinanced backlog	Force equivalence
OH-58, observation helicopter	$60,270	$143,782	1:2	130	$7,835,100	[1] 2.0
AH-1G, attack helicopter	104,173	1,564,096	1:5	52	5,416,996	[1] 1.6
M578, recovery vehicle	33,340	168,197	1:5	212	7,068,080	[3] 3.0
M577A1, command post vehicle	25,265	89,596	1:4	279	7,048,935	[2] 2.3
M113, personnel carrier	22,263	76,110	1:3	577	12,845,751	[2] .8
M60A1, tank	130,899	644,005	1:5	135	17,671,365	[3] 2.7
Chaparral missile	116,362	329,538	1:3	62	7,214,444	[4] 5.2

[1] Infantry divisions.
[2] Mechanized division(s).
[3] Armored battalion.
[4] Air defense battery.

The departing Ford budgeteers had scrapped almost all military construction projects for Fiscal Year 1978 in the hope of getting a better handle on the relationship between base structure and force structure before doing any more building. The Carter recommendations will now let the Army go ahead with a limited number of projects. The projects recommended for the upcoming year are:

*Fort Ord, California—tactical equipment shops and maintenance facilities.

*Fort Polk, Louisiana—hospital, airfield facilities and tactical equipment shops and family housing.

*Fort Benning, Georgia—brigade maintenance facilities, dental clinic, health clinic, barracks, branch exchange, post office, recreation center and reception center.

*Fort Sill, Oklahoma—health clinic, barracks, chapel, gymnasium.

*U.S. Military Academy, West Point, New York—printing plant.

In at least one way the Carter budgeteers reacted to recently publicized concerns about the ability of NATO forces to react to a no-warning or short-warning attack from the east. A total of $50 million has been added to the 1978 budget for the construction of improved equipment storage (POMCUS) in Europe.

In another direction, however, they may have ignored the advice of critics that NATO conventional forces are deficient in long-range artillery support. The Non-nuclear Lance missile program has been scrubbed entirely in FY 78 and remaining FY 77 funds ($65.6 million) will be used to buy spare nuclear-armed missiles and to balance off the cost of terminating the non-nuclear program. Even with extended-range ammunition now available to NATO artillery units, they are still outranged by the Soviet and Warsaw Pact cannoneers facing them across the borders.

There is also a mixed bag as far as the Army's program to provide squad integrity, both in the air and on the ground, is concerned. The new helicopter squad carrier, UTTAS, has the green light for production but its counterpart on the ground is being held up. The new armored personnel carrier (MICV) is still experiencing some minor developmental problems. The decision has been made to delay procurement of the first 27 vehicles until Fiscal Year 1979. The Army's initial request had been for 107 vehicles in FY 78 and another 143 in FY 79.

Major items of equipment to be procured by the Army during Fiscal Year 1978 include:

Major items of equipment for procurement in fiscal year 1978

Uttas Helicopter	56
AH-1S (Cobra/Tow) Helicopter	83
Improved Hawk missiles	509
Stinger missiles	258
Dragon	6965
Armored personnel carrier, M113A1	960
Howitzer, SP, 155MM, M109 series	250
Howitzer, SP, 8 inch, M110 series	209
Tank, M60 series	859
Howitzer, towed, 105MM, XM 204	8
Howitzer, towed, 155MM, M198	148
Truck, ¼ ton	3880
Truck, 5 ton	1616
Commercial vehicles	7975

There has also been a cut of more than $105 million in the Army's ammunition production request. This compounds the problem of rebuilding depleted stocks and improving readiness.

The FY 78 budget will permit the Army to complete the urgent formation of its three new divisions and to proceed with the conversion of stateside divisions whose mission is primarily NATO-oriented to the "heavy"

configuration. Congress is already well aware of the growing Warsaw Pact armor threat and has been supportive of efforts to increase the numbers of TOW and Dragon missiles, double the number of missile-firing Sheridan vehicles and upgrade helicopter antitank forces. That's what makes the Attack Helicopter cut so unwise.

The decision has already been made to activate the 2d Brigade, 24th Infantry Division in the heavy configuration rather than forming it as a light brigade then increasing its combat weight later.

There continues to be great emphasis on the role of the Army National Guard and the Army Reserve in the Total Army although they continue to have major problems in recruiting and retaining personnel. For the upcoming fiscal year the Army Guard has been assigned a strength of 390,000—down 10,000 from its goal in FY 77. Reserve force leaders consider this a realistic target for the Guard to work toward. On the other hand, the Army Reserve will find itself with strength goal of 219,000—an increase of 14,000 that is considered entirely unrealistic by many reservists.

For the fourth consecutive year a program to provide expanded travel entitlements for junior enlisted personnel has dropped out of the budget. No one denies it is an expensive item ($111 million for the Army alone) but it is a step in the direction of providing equity for junior personnel who can afford to be married but cannot afford the extra burden of family separations while the service member is on overseas assignment. Short of an inconceivable regulation against young soldiers marrying, there does not seem to be any other way to let them serve overseas without the threat of financial hardship or personal trauma.

The Army had hoped to improve the readiness of HAWK missile units by providing a "maintenance float" of six equipment sets to replace those requiring extensive overhaul. A $35.3 million item had been requested to cover this procurement but it was stricken by the Carter changes and the Army was instructed to find another way to solve its problem.

One of the major goals of the Army's Research and Development program is to overtake the lead of the Soviet armed forces in air defense weapons. While the aging HAWK missile system is still being upgraded to improve its capabilities R&D is continuing on PATRIOT (formerly SAM–D), a missile system that will be able to fill the entire air defense envelope from high to low altitude and permit the retirement of both the HAWK and Nike Hercules systems. Funding of $215 million will be sought from Congress for work on PATRIOT.

Developmental work will also continue on the U.S. version of the ROLAND missile system, a short-range, highly mobile weapon that can move readily with maneuvering troops. It is funded at $64 million for the upcoming year, mostly for final, pre-production testing.

The Army has chosen the Chrysler Corporation's version of the new XM–1 main battle tank for final development and eventual large-scale procurement. Continuing developmental work on the XM–1 will be funded at a level of $118 million in FY 78.

While the Army is being permitted to go ahead with development and procurement of a wide variety of chemical warfare protective and warning devices, there is no movement toward an improved retaliatory capability in the form of binary weapons. The service had hoped to be able to move ahead with construction of a production facility that would permit the gradual replacement of current—and aging—stockpiles of nerve agents with the safer binary weapons. The arguments in favor of this course apparently fell on deaf ears in both the Ford and Carter administrations.

Several actions have been proposed to get at the growing problem of reserve component personnel strength. The budget requests an increase in the reserve recruiting advertising program and an expanded number of full-time recruiters and career counselors. A separate legislative package has also been prepared to create new incentives for reserve enlistment and retention. This action has been supported by the Association of the United States Army and other military associations who have proposed legislation to Congress without having to clear Department of Defense and White House budget hurdles.

While the shriveled funding for the Selective Service System is not part of the Army's budget, the inability of the reduced system impacts heavily on Army mobilization planning and on its ability to react to a major emergency. The Army has consistently maintained that the system should be able to meet its basic requirement of having the first selectees to training posts within 30 days of a mobilization order. The existing system *might* be able to get inductees ready for training in 180 to 210 days, creating a time lag of nine to twelve months before trained inductees can enter the replacement pipeline.

Overall, the budget proposed for the Army in Fiscal Year 1978 will maintain its current strength and permit some limited improvements in readiness. Final action by Congress is still pending, of course, but there seems little chance of significant progress in closing the weapons gap that has been created by years of low-level procurement.

Every budget, whether it is for the defense of the United States or the annual operations of a Boy Scout troop, is a series of compromises. Only during an all-out war could an administration operate on the assumption that there were no limits to the amount to be spent on defense. At all other times this function must take its place in the broad perspective of government operations, with priorities set by existing need.

The proposed 1978 Defense budget fits that pattern and, if it had no other shortcomings, might be acceptable. The impression of this budget, however, is that it was generated as much from uncertainty as from compromise.

It is certainly understandable that the new administration, with barely four weeks in office at the time they proposed their changes to the original version prepared by its predecessors, might still be groping for answers. It is even understandable that they feel responsible for at least addressing some of the campaign promises they made.

The decision to slow, rather than stop, initial production of the B–1 strategic bomber appears to have the superficial appearance of a rational, reasoned compromise with one of the campaign promises. In the months that will elapse between this first compromise decision and the first day of June, when a more final decision must be made, President Carter, Secretary Brown and the others involved in the decision will have had adequate time to learn every aspect of the problem and to make a reasoned judgment.

It is more difficult to fathom the rationality in the decision to slow procurement of the Army's advanced attack helicopter. All government reports indicate the AAH program has been well-managed and has produced a superior aircraft that meets a clear requirement accepted by at least two previous administrations.

There appears to be a major conflict, too, in Secretary Brown's conclusion that well-prepared general purpose forces will force the nuclear threshold upward while, at the same time, he was outlining a cut of more than a half-billion dollars in the Army's procurement account.

No one has challenged the validity of statistics showing a continually widening gap in conventional weapons production between the United States and our evermost likely adversary, the Soviet Union. In fact, Secretary Brown agrees with this in his testimony. This gap is the basis for some conclusions that Warsaw Pact combat power close to the NATO borders is now so great that they could mount a major attack without noticeable reinforcement. The amended budget now being considered by Congress does little to close that gap.

It would have been comforting to find in either the Ford budget or the Carter revisions some implicit recognition of the critical support required by the Army Reserve and Army National Guard. Instead, the Ford budget programmed a major increase in Army Reserve strength that appears to be an impossibility and the Carter proposals threatened to substitute two reserve combat brigades for two active army brigades.

It has been comforting—and cost saving—to political leaders to embrace the concept of a Total Army, with active and reserve members walking hand-in-hind toward a balanced and effective force. But despite repeated warnings from both the participants that the idea had to be supported in more than concept, the needed financial support has not materialized. The most shocking revelation of all, that the strength of the Individual Ready Reserve is rapidly dropping to the point of being worthless, has been met with apathy and by emasculating cuts in the capabilities of the only other source of emergency replacements, Selective Service.

The problem of strategic mobility is another that gets little more than lip service. The Carter recommendations support conversion of a total of eight aircraft from the Civil Reserve Air Fleet to heavy cargo capability. But the overall budget reflects little appreciation for the magnitude of the problem of making a major reinforcement across an ocean into a hot war. There needs to be a firm acknowledgement that aircraft alone cannot do the job and that ambitious measures are needed to assure the availability of properly equipped cargo ships. Similarly, the Navy requires the ships that can, in fact, keep vital sea lanes open.

What this budget does not address, nor have its immediate predecessors, is the fact that our whole defense spending trend has to be reversed if we are to progress. Even though the defense budget is large we are not spending money in the proportions that we did in the past. The defense budget has not even kept up with inflation. The present budget, for example, in funds for R&D and procurement, reflects only a 39 percent increase since 1964 as compared with an 89 percent increase in the wholesale price index. Thus, funds for defense spending have increased at less than half the rate that would be needed to just stay even with inflation.

This is not the route to an adequate national defense—to give our country the option to seek—regardless of Soviet intentions—the means to serve peace through a systematic resistance to pressure and through conciliatory responses to moderate behavior. The first claim on our national resources should be to keep our form of society secure.

We are dedicated to that effort.

Budget Terminology — What it Really Means

Outlays: Payments actually made.

Budget Authority (BA): Authority provided by law to enter into obligations, usually resulting in outlays.

Total Obligational Authority (TOA): Current budget authority enacted annually by Congress plus unspent funding authority approved in previous years that has been transferred forward for use until spent.

GOV. ALFRED LANDON

Mr. PERCY. Mr. President, in 1936, Gov. Alfred Landon of Kansas was the Republican candidate for President of the United States running against Franklin Delano Roosevelt.

Today, 41 years later, and at a lively 89 years young, Governor Landon is a very busy man who is constantly in the public eye.

Although he has not been in public office since he was Governor, Alf Landon has continued to serve the people of Kansas and has worked diligently for the Republican Party. Alf Landon is the kind of man who will be remembered as a great American.

An article appeared recently in the Hutchison (Kans.) News, by Stuart Awbrey, that exemplifies Governor Landon's courage and his devotion to this country. It concerns his opinion about the administration's position on human rights in Russia. It is an important viewpoint because of its perception and foresight. I ask unanimous consent that the article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Hutchison (Kans.) News, Feb. 13, 1977]

ARE WE AFRAID?

(By Stuart Awbrey)

Alf Landon sat alone and quiet in the hub-bub of the small dining room. Finally he beckoned to a pair of long-time newspaper friends, to tell them he wanted to test an idea.

"I haven't made a major speech in a long time," he began. "I think it's time I did."

The occasion was a welcome to Kansas for Clayton Kirkpatrick, an editor identified by Peter Macdonald as the man who led (or perhaps dragged) "The Chicago Tribune from the 19th century into the 21st." It was a time for deep thoughts on great subjects, and no one discussed the KU–MU basketball game which was being played that night in another college town the other side of the border.

"I'm wondering if the Russians aren't beginning to worry about human rights," Landon told his two listeners.

"You know, Carter hit at the Russians and the Czechs about suppression. We haven't heard that sort of talk in a long time, and I believe it's time to support the administration on this one.

"I think the Russians are getting worried about the dissidents, about what our President and other people are saying about their society and the rights of individuals. We should follow up on what Carter has started."

The item was placed on the dinner party agenda. Some said yes, the Russians may change if we press them on human rights. Some said no, we were just being silly to try.

I hope Alf makes that speech, at some attention-getting place like the National Press Club or at a Chicago newspaper convention.

And I hope several dour old thinkers, such as Eric Sevareid and James Reston, hear him and ponder their own reactions.

Most of the nationally-known writers and commentators have been around so long they keep analyzing things in the light of how it was, or of how they perceived it, when they were younger and moving about more and talking to a wider variety of citizen.

President Carter kept on talking about morality in government even after he won the election. Reston said other nations get nervous when the United States goes on an evangelistic kick like that. I suppose the jaded governors of Western Europe do, but you can argue the point about any country.

Sevareid wrung his hands and said that if our President keeps talking about oppression in the Soviet Union, he might create new problems in diplomacy and policy. Henry Kissinger would never do it that way, he added.

He didn't point out that Kissinger doesn't believe there is a moral equation in foreign affairs, and that this was one of the reasons some of us voters decided it would be better to try another administration and another Secretary of State.

The pundits were upset because Carter and people like Andrew Young said Moscow should start living up to its commitments in Helsinki, where the Russians said they would let up on suppression and permit both people and information to flow across Communist borders.

The pundits and some old hands in the foreign service said that such demands are interfering in the affairs of another government, and that's a diplomatic no-no.

I think such talk is just stuff. Moonshine, Bill Ryan calls it.

Worriers get paid for worrying, but in this instance they should inquire if the Russians do not interfere in the affairs of other governments when it suits their purpose? They should ask if it makes any sense to trumpet an international agreement in Helsinki, and then look the other way when the Communists decide to observe only those parts of that agreement which suit them? They should inquire if the United States is to ignore in our public statements the iron doors which have slammed shut on Czechoslovakian dissenters and shrug off the pleas of Russian writers and scientists who are asking for the world's ear?

And if they want to be "pragmatic" (pragmatism being a favorite doctrine of the pundits and diplomats) they should inquire if Carter's election was not in part a signal of national despair over the lack of moral purpose in our foreign affairs?

I hope Alf makes that speech so the nation can hear him. He sees signs that the Russians are concerned, and if there is even a glimmer in that, it should be beamed across the land. The record of the last three decades shows that the Kremlin is sensitive on human rights' issues.

Carter and his State department should be encouraged when they confront the Communists with their cruelty. Those who now are trying to soft-pedal the attacks are going the wrong direction. Let's don't be afraid of a rebuke when it is deserved, and God knows the Russians often deserve one.

Mr. PERCY. Mr. President, I also had the privilege and honor to be with Governor Landon last month when I was the guest speaker in the Landon lecture series at Kansas State University. The audience consisted of KSU students, faculty and others attending a conference on the world food problem. I discussed the relationship between the world food problem and the energy crisis.

In order to share this speech with my colleagues, I ask unanimous consent that it be printed in the RECORD.

There being no objection, the speech was ordered to be printed in the RECORD, as follows:

ADDRESS BY SENATOR CHARLES H. PERCY

Governor Landon, President Acker, Dr. Flinchbaugh, Terry Matlanck, Dr. Perenich, students and faculty of Kansas State and guests:

It is a pleasure to be here today to participate in the prestigious Alfred Landon series. I am very honored to be with you.

As an Illinoisan, I have always been awed while flying over the Midwest, as I did today coming from Washington, and seeing below the checkered fields of some of the finest farmland in the world. It is a beautiful sight. Viewing those fields makes it hard to believe that we face a world food crisis.

World population growth is increasing the demand on farmers to produce enough food for the 200,000 human beings born daily. The National Research Council estimates that 12 million people have already starved to death in the twentieth century. This has occurred at a time when we are supposed to be more civilized and are producing more food per acre than ever before.

Food is mankind's sustenance. Hunger and starvation have plagued the world since Eve picked the apple from the tree in the Garden of Eden.

During the seventies, we have witnessed a sharp increase in the number of food importing countries. Throughout this period, food production has lagged behind demand in virtually every geographic region except North America. There are only seven nations, comprising one-twelfth of the world's population, which are net exporters of food.

The U.S. has the largest contingent land mass for fertile soil, good growing climate and adequate rainfall of any place on earth. Because of our agricultural productivity, we can feed our own population and still export 60 percent of our wheat and rice, 50 percent of our soybeans, 25 percent of our grain sorghum and 20 percent of our corn.

The world is becoming increasingly dependent on U.S. food supplies. So a major question persists: Do we use the dependence of other countries to our own political advantage?

There is no doubt that U.S. agriculture and food policies have enormous impact on the availability, quality and price of food throughout the world.

Spurred by the political manipulations of "petropower" some have suggested that the U.S. should make similar use of its "agripower." This means that the U.S. could unleash a "food weapon" against other nations.

I do not believe in this approach. Feeding people is a life and health matter, too serious to be left to political manipulation. Our power should be used to help other countries improve their own food production and become more secure against famines.

There is an old adage that can guide us as we seek to set a sensible and compassionate food policy: "Give a man a fish and he eats for a day, teach a man how to fish and he can eat for a lifetime."

To meet the increasing world demand for food, we have modernized and improved our technology to produce the maximum amount of crops per acre. In the last decade we have increased the production of corn by 12 bushels per acre—from 74.1 bushels to 86.2 bushels.

To help solve the world food problem, our primary concern should be to increase our food output to help meet growing demand.

The basic resources required to expand food output—land, water and energy—are no longer abundant.

Acreage for crop production is limited. Industrial growth which reduces acreage for farming claims more than one million acres a year.

Most of the world's rivers are located where the need for water for farming is least. About one-third of the earth's rivers flow through South America, which only covers one-eighth of the total land in the world.

Energy is the third basic resource which is no longer plentiful enough to increase our food output. About 60 to 80 percent of the increase in our agricultural production since the forties is solely the result of increased use of energy in the production process. The principle raw material of modern U.S. agriculture is fossil fuel.

Technological advances that have led to greater use of farm machinery and fertilizers have consumed ever-increasing amounts of energy. In U.S. corn production, gasoline consumed by farm machinery rose from 15 gallons an acre in 1945 to 22 gallons an acre in 1970. We are currently using a total equivalent of 80 gallons of gasoline to produce an acre of corn. Obviously this trend cannot continue.

Given our current rate of energy use in food production, it will be impossible in the next decade to produce enough food to meet world demand. Better use of existing energy supplies and development of alternative energy sources are key to adequate food production and the very survival of millions.

We need to help developing countries help themelves produce the food they need. But it will be a futile effort if a shortage of energy makes sufficient food production impossible.

There is no doubt that the U.S. has been an energy glutton compared to other nations. West Germany for example, has flourished without using nearly the energy consumed and wasted in America. West Germans enjoy a standard of living comparable to ours, but they use energy 50 per cent more effectively than we do.

We must face the world food crisis squarely. But we will never solve the world's hunger problem until we solve the world's energy problem.

The best solution to our energy dilemma—today and in the long run—is conservation. We can tap a new energy source—"conservation energy"—that can reduce our dependence on expensive foreign oil and dwindling domestic supplies.

"Conservation energy" is the energy derived by replacement of wasteful habits and technology with more efficient ones in our daily lives. I believe that the equivalent of about 16 million barrels of oil a day can be "produced" through "conservation energy" by 1985.

The need for a national effort to save energy is so compelling that we all must do our part. Last month Senator Hubert Humphrey and I launched a private, non-profit, nonpartisan organization called the Alliance to Save Energy. Its purpose is to develop a broadly-based constituency and to set quantitative goals for energy conservation in every sector of our society, including building construction, transportation, electrical power generation and industrial processes.

A number of groups and institutions are already working in the area of energy conservation, but the Alliance to Save Energy is the first organization created solely for this purpose. It will not compete with existing groups, but will seek to supplement and strengthen the efforts.

President Carter has strongly endorsed the goals of the Alliance. Former President Ford and Vice President Mondale are Honorary Chairmen of the organization.

We welcome suggestions from all of you about the types of activities this umbrella organization should emphasize. The following facts suggest the kinds of activities the Alliance can usefully pursue.

American Institute of Architects estimates that a national commitment to upgrading the energy efficiency of buildings would, by 1990, save the equivalent of 12.5 million barrels of oil per day.

By adopting technologies now widely employed in other countries, the steel industry can reduced its huge fuel demands by about 50 per cent by 1995, according to a 1974 Ford Foundation study.

Recycled scrap aluminum requires only five per cent as much energy as aluminum refined from virgin ore.

Eric Hirst, a research engineer at the Oak Ridge National Laboratory, reported in the December 1976 issue of *Science* magazine that a vigorous conservation program in the residential sector could reduce energy use growth to almost zero by the year 2000—with no change in life-style and even with no increased use of solar energy.

45 per cent of all industrial fuel, or about 20 per cent of the nation's fuel consumption, is used to generate process steam. If this steam were first used to generate electricity and then used as process steam, more electricity would be produced than the entire industrial sector now buys from utilities. This process known as "cogeneration" produces much cheaper electricity than centralized power plants.

The transportation sector is one of the most rapidly growing areas of our society, yet there is tremendous scope for reducing energy consumption. Former Secretary of Transportation William Coleman, concluded, before he left office, that more efficient use of energy would actually reduce the total requirement for energy in transportation over the next decade.

Conservation is crucial to solving our energy problem which has a direct effect on producing enough food to meet the demand, that is why energy conservation should be our nation's top priority.

The appeal of conservation is non-partisan and non-ideological. Conservatives and liberals, oil companies and environmentalists, Israelis and Arab OPEC countries are attracted equally by the prospect of strong economic growth and energy self-reliance for America. Few Americans are attracted by the prospect of having our foreign policy mortgaged to foreign suppliers and our domestic life controlled by vast regulatory bureaucracies.

The concept of conservation is not revolutionary. It makes no radical or unfair demands on any sector of our society. It is not a prescription for a "no-growth" economy. Conservation means doing better, not doing without.

The world's food-energy problem is a vicious circle. Food demand is directly related to population growth, which requires more production and increases the use of diminishing energy supplies.

As the Ranking Member of the Select Committee on Nutrition and Human Needs, I initiated a review of U.S. participation in the Food and Agriculture Organization of the United Nations. The report revealed that we do not have a coherent agriculture and food policy. It recommended reform of our policy setting mechanism so the Agriculture, State and Treasury Departments, and various interests within the executive branch, can be coordinated to speak with one voice on U.S. agriculture and food policy.

America is the richest, most abundant nation on earth. We are the breadbasket of the world; but we are also the energy guzzlers of the world. If we forge a sensible national energy policy, with conservation as the guiding principle, we will lead the way toward a world free of the fear of hunger.

GROSS SALARIES FOR NATIONAL AFL–CIO STAFF

Mr. GOLDWATER. Mr. President, we are constantly hearing the Nation's union leaders talk about the problems of American workers, especially about rates of pay and working conditions. Most of them bleed so profusely for the so-called downtrodden that it is difficult for us to understand exactly where these leaders themselves stand in the income tables of the country.

Because of this, I ask unanimous consent to have printed in the RECORD a listing of reported gross salaries for the national AFL–CIO staff for the year 1975–76.

There being no objection, the listing was ordered to be printed in the RECORD, as follows:

THE WORKINGS OF THE AFL–CIO

Gross salaries for the National AFL–CIO staff are $8,858,652.48 for the year 1975–76. Reimbursed expenses were $1,118,196.36 for a total of $10,046,848.84 for salaries and expenses. The only salaries reported were in excess of $10,000.

The C.O.P.E (Political Action arm of AFL–CIO) salary expenditures as reported were:

	Salary	Expenses	Total
Alexander Barkan, COPE director	$44,118.00	$5,537.16	$49,655.16
Joe Rourke, deputy director	34,317.00	2,305.02	36,622.02
John Perkins, assistant director	33,858.00	3,567.01	37,425.01
W. C. Young, National field director	28,325.00	9,914.35	38,239.35
Mary Zon, research director	31,600.50	1,181.48	32,781.98
Peter Pesole, area director	27,291.50	5,216.27	32,507.77
Madeline Matchiko, area director	25,821.50	8,431.18	34,252.68
Frank McGrath, area director	28,325.00	9,556.06	37,881.06
Clement Dowler, area director	27,291.50	7,826.06	35,117.56
Richard Fallow, area director	28,325.00	7,067.37	35,392.37
Ray Alvarez, area director	27,463.50	5,994.84	33,458.34
Fannie Neal, minorities representative	28,325.00	10,889.25	39,214.25
David Jessup, special assistant	27,627.85	3,069.98	30,697.83
Severiano Merino, field representative	27,291.50	8,004.60	35,296.10
Walter Bartkin, staff representative	28,325.00	64.00	28,389.00
Margaret Cronin, assistant research director	28,325.00	--------	28,325.00
Joan Acosta, research	20,066.90	--------	20,066.77
Richard Drennan, coordinator	26,083.40	852.37	26,935.70
Bernard Albert, publicity director	31,600.50	971.08	32,571.58
Marguerite Laddbush, employee	17,106.70	--------	17,106.70
Beatrice Lapp	14,682.50	--------	14,682.50
COPE Total	586,170.85	90,448.08	676,618.73

George Meany, the President of the A.F.L.–C.I.O., received $90,000 in salaries and $1,097.33 in expenses.

Lane Kirkland, the Secretary-Treasurer, received a salary of $60,000 plus $16,624.83 in expenses for a total of $76,624.83.

Virginia Tehas, the Secretary to Meany, received $33,868.60 plus expenses of $1,098.35 for a total of $34,966.95.

The computer division's major employees (salary) are:

	Salary	Expenses	Total
Fred Hassen, director, data processing	$36,349.60	$1,186.77	$37,536.37
Brian Smith, Sr., systems analyst	27,090.30	--------	27,090.30
Walter Richards, systems analyst	16,704.63	41.00	16,745.63
Donna Hall, keypunch	11,645.50	--------	11,645.50
Barbara Channell, keypunch	12,429.53	--------	12,429.53
Arthur Cornwell, tab operator	21,675.95	--------	21,675.95
Joe Dutrow, operator	17,239.09	--------	17,239.09
James Peters, programmer	18,363.33	--------	18,363.33
Lisa Schultz, programmer	10,036.04	--------	10,036.04
John Cannon, programmer	17,836.32	--------	17,836.32
Janet Bonillo, data control clerk	13,358.80	--------	13,358.80
Computer total	202,729.09	1,227.77	203,956.86

The A.F.L.–C.I.O. has 2 chauffeurs who make a combined total salary of $25,858.37

Other jobs and salaries and expenses of interest are:

Photographers	$24,729.40
Director—civil rights	46,800.38
Assistant to president	55,136.26
Andy Biemiller, legal director	46,741.42

The A.F.L.–C.I.O. has 13 porters who receive a combined salary of $143,742.70.

The legislative team is comprised of:

Andy Biemiller, director	$46,741.42
Ken Young, assistant director	37,261.17
Ken Peterson	34,714.26
Ken Mecklejohn	35,251.65
Robert McGlotten	36,117.14
Howard McGuigan	37,394.76
Virginia Gorman	18,292.90
Ray Denison	36,506.37
Michael Gelden, assistant to director	27,375.50

The public relations effort is:

Albert Zack, public relations director	$40,486.43
Allen Zack, public relations employee	33,780.39
Paul Laisen, public relations employee	29,257.24
Dale Larson, public relations employee	31,277.70
Charles Hughes, public relations employee	29,278.75

THE SACCHARIN ISSUE—A FOOLISH GOVERNMENT DECISION

Mr. HARRY F. BYRD, JR. Mr. President, in America's most recent rodent crisis, 17 Canadian rats have posthumously become the "mice that roared."

The Food and Drug Administration has announced its intention to remove saccharin from the American marketplace on the basis of recent Canadian tests involving ingestion of large amounts of saccharin by rats.

To me, it is incredible that the FDA decision should be based on tests which would require the equivalent to consumption by a human of some 800 cans of diet soda daily—daily—over a lifetime.

How foolish can the Government get?

Saccharin is an important diet for millions of Americans. It is ridiculous to deny its use on such inconclusive tests as the Canadian one.

We are substantially ignorant concerning the problems of testing for carcinogenicity. We do not know whether there is a threshold level below which carcinogenic substances are harmless. We do not even know the mechanisms by which food additive carcinogens cause cancer.

We are much more familiar with the effects of diabetes and obesity, which include hypertension, cardiovascular disease, and, in many cases, death. These are the considerations which should be balanced against a very low possibility of carcinogenesis in determining whether products should be allowed to be marketed.

Also to be balanced against low probabilities of carcinogenesis is the individual's right to make his own choice concerning comparative risk. Thus, cigarettes, which are much more demonstrably carcinogenic than saccharin, are marketed with a warning concerning potential hazards.

This has led Congressman TUCKER to suggest that products containing saccharin should exhibit the following warning: "Caution: The Canadians have determined that saccharin may be dangerous to your rat's health."

Mr. President, the American Enterprise Institute has recently compiled a synopsis of newspaper editorials critical of the Food and Drug Administration's actions. These articles come from newspapers covering the gamut of the political spectrum, and I ask unanimous consent that they be printed in the RECORD.

There being no objection, the articles were ordered to be prined in the RECORD, as follows:

FDA AND THE SACCHARIN BAN

CHICAGO TRIBUNE, FEBRUARY 15, 1977, EDITORIAL

"Not only is the FDA banning apparently harmless products; it is also keeping many new medications out of reach of the American people. The development of new drugs has come almost to a dead stop. Few pharmaceutical companies can afford the research it takes to prove that improbable overdoses won't harm a laboratory animal somehow. Some physicians are already arranging for patients to get drugs, like the new group of beta-blockers for treating heart disease, from Europe, where they are used effectively and apparently safely.

"The FDA is allowing 60 days for public comment on the saccharin ban. Congress should take this occasion to do alike commenting on the FDA itself, and, if necessary, change the statute under which the FDA now operates."

CLEVELAND PLAIN DEALER, MARCH 12, 1977, EDITORIAL

"Tens of millions of diabetic and overweight Americans rely on saccharin to control blood sugar or for weight control programs. When cyclamates were banned in 1969 after tests similar to the recent Canadian series, saccharin became the sole legal artificial sweetener on the market.

"How many additional heart attacks and cardiovascular disease cases might be caused by elimination of what is at present the last legal artificial sweetener are questions that were not permitted to interfere with the saccharin ban. In other words, the Delaney provision permits no flexibility, no balancing of advantages versus disadvantages in any substance ban decision."

INDIANAPOLIS NEWS, MARCH 11, 1977, EDITORIAL

"While for most Americans saccharin is merely a means of cutting calories, for countless diabetics the sugar substitute is an essential part of their diet. It would seem far more logical for the FDA to print warnings, as on cigarette packages, to notify the consumer of the possible dangers to health. Let the consumer make the choice unless the FDA can offer more substantial proof that saccharin is at least more hazardous to your health than cigarettes sold so freely over the counter.

"The FDA is rushing into action over saccharin when it has clearly not considered the merits of the case. We would like to know if those Canadian researchers considered an even more serious ailment connected with the daily consumption of 800 diet sodas—that of burping to death."

BUFFALO EVENING NEWS, MARCH 12, 1977, EDITORIAL

"Certainly consumers must be protected against any product reliably linked with cancer, but the absence here of any evidence that saccharin ever has produced a single cancer in any human would seem to reduce this ban to absurdity. At the least it points up an excessive rigidity in the law that needs careful revision by Congress."

ST. LOUIS GLOBE DEMOCRAT, MARCH 13, 1977, EDITORIAL

"If saccharin is potentially dangerous—which still appears doubtful—why is the FDA just now getting around to finding out about it?

"Clearly the nation needs a much more effective, practical way of ascertaining the safety of substances. The heavy-handed bureaucratic approach of the FDA is much too uncertain, costly and disruptive."

PROVIDENCE JOURNAL, MARCH 13, 1977, EDITORIAL

"The risk, though perhaps slight, seems real. In such situations the prudent approach is not to take unnecessary chances—not to gambl with potentially dire aftereffects that may come to light only years into the future.

"But let's be realistic about it. There is such a thing, after all, as overreacting to suspected dangers, which can be more harmful than the dangers themselves. The FDA is hardly a capricious agency, but its scientists can't always be locked into only a yes-or-no choice. They need to have somewhat more latitude to look at the problems of carcinogens from all angels.

ECONOMIC NOTES: THE UNITED STATES AND WESTERN EUROPE

Mr. GOLDWATER. Mr. President, how have the weather and fuel crises of this winter affected the U.S. economy? What effect has it had on rates of growth and inflation? What will it mean in the final analysis in terms of corporate profits and other economic indicators?

These and other questions vital to the future of this Nation, were addressed recently by Raymond J. Saulnier, nationally known economist, in a paper dealing with the overall economic trends in the United States and Western Europe. Because of its importance, I ask unanimous consent that it be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

ECONOMIC NOTES: THE UNITED STATES AND WESTERN EUROPE

(By Raymond J. Saulnier)

Evidence on the impact of the January weather/fuel crisis on the US economy is still limited but it was clearly much less than feared. The best clue to the effect is the monthly composite index of coincident indicators, which the Department of Commerce correctly describes as a rough approximation of overall economic activtiy. Preliminary estimates show the index falling in January 0.4 percent from December 1976, the high of the series; a decline two or three times greater had been thought possible.

What this means for GNP in 1977 is unclear, but likely behavior of the index in February and March can be used to estimate 1Q77 GNP, and if projections for the remaining quarters are left unchanged, which seems reasonable, we have a basis for estimating the full year's outcome. Proceeding in this manner, and assuming (conservatively) that the index will be flat in February and up moderately in March, the inference is that the weather/fuel crisis will have reduced 1977 GNP from an estimated 5.2 to 5.0 percent. Thus, the impact is in line with the "most sanguine" estimate set out in last month's notes.

Development already reported for January and February strengthen confidence that expansion in the final three quarters of 1977 will be at least as previously projected. Consumer expenditures increased faster than needed to validate the forecasts; new car sales rebounded more sharply than expected from their January decline (an 11 million annual sales rate in February). Projections of capital goods spending rise with each successive survey of business plans; the latest results still point to a smaller increase than projected in these notes but it is confidently expected that the gap will be closed before the year is over. And government purchases of goods and services are running slightly above the writer's projections.

Adjusting earlier estimates to reflect official revisions of 1976 figures, and using data reported for January and February, we have the following for 1977:

Growth—5 percent.
Inflation—5.7 percent.
Current price GNP up—11 percent.
New car sales—11.1 million.
Housing starts—1.85 million.
Corporate profits, pretax, up—12.8 percent.

Clearly, the major uncertainty in this outlook involves interest rates; these can be expected to move higher in 1977, but indications drawn from a tentative forecast of flows of funds in 1977 suggest they will not rise sufficiently to obstruct achievement of the GNP and related indicators cited above.

Unfortunately, Federal Reserve estimates of fund flows are currently available for only three quarters of 1976, and extensive revisions can be expected when fourth quarter 1976 estimates are released, but even so rough guesses can be made of upcoming demand/supply conditions.

To begin, Treasury borrowing, including off-budget agencies, seems certain to be at least $10 billion above the $80 billion (annual rate) officially estimated for 3Q67. Given GNP and related forecasts, credit demands of other borrowers—businesses, households, state and local governments and foreigners—can be expected to increase over 1967 by at least 15 percent. The sum of the two implies that total requirements will reach $320 billion in 1977, 16.4 percent above what is estimated to have been raised (annual rate) during the first three quarters of 1976. A similar analysis by the U.S. Treasury is reported to anticipate an 18.2 percent increase.

Using the $320 billion figure for total requirements and an estimate of funds to be supplied from sources other than commercial banks that reflect personal and business income implied by GNP and related forecasts, it follows that banks must supply half again as much credit in 1977 as they are reported to have supplied (annual rate) in the third quarter of 1976. In turn, expanded commercial bank credit implies an increase in bank deposits, and thus in parallel money supply aggregates, that will put moderate (possibly more than moderate) upward pressure on the 10 percent top of the Federal Reserve's target range of M2 increases.

Considering that credit requirements in 1977 are more likely to exceed than to fall short of the estimates offered above, and that Federal Reserve authorities seem to perceive their 1976 policies as perhaps overly accommodative, upward pressure on interest rates in 1977 is strongly indicated. A judgment was advanced in earlier notes that the prime rate would rise by one-half of three-quarters of a percentage point by yearend 1977 over its present 6.25 percent level, but because it contemplated less federal borrowing than now seems likely the possibility is raised that the prime rate increase may be somewhat greater, possibly by a quarter of a percentage point.

It is evident from economic data on Western Europe, available now through November/December 1976, that the policies of restraint remarked on in earlier notes has continued in force everywhere. A measure of what is happening is seen in OECD figures on 12-month changes in money supply (M1 concept): an average of increases in 15 countries (weighted by 1970 production) declined from 16.4 percent in January/February 1976 to 12 percent in October/November. Denmark and the Netherlands have been following the most severe restraints; Greece and Italy the opposite.

The effect of monetary restraint, and the fiscal restraint accompanying it, has been to hold actively in Western Europe at a broadly unchanged level since early 1976. A weighted average of industrial production indexes for 11 countries was 115 in February (1970=100) and 115.2 in November, having risen and receded slightly in the interim. A second measure of impact—the ratio of persons registered unemployed to jobs reported vacant—rose from 8.3 in December 1975/January 1976 to 9.3 in November/December 1976 (again as a production-weighted average), but yearend data on retail sales, new order input and construction contract awards are generally favorable. Certainly, no ground is seen for expecting the flat trend of 1976 to be transformed into a 1977 downturn.

The object of policy in all Western European countries, of course, has been to reduce inflation and strengthen national currencies, and in most cases modest progress has been achieved. A weighted average of increases in consumer price indexes for 15 countries declined from 10.6 percent in January/February 1976 to 9.9 in November/December, and would have been down significantly more but for sharply accelerating inflation in Italy and Spain. Matching this lack of inflation control, the Italian lira and Spanish peseta are the weakest currencies relative to the US dollar, while the currencies of Germany, the Netherlands, Switzerland and Belgium, where inflation control has been most successful, are the strongest.

The stellar all-round performance is still Germany's—the Bundesbank reports real output rose in 4Q76 at a 6 percent rate—and for inflation control alone it is clearly Switzerland—consumer prices up only 1.1 percent in November/December 1976 from a year before. France is pursuing a generally severe monetary policy but as yet with little success in slowing inflation. Whether it can be maintained is an open question, but the UK's performance improved measurably in the past few months.

Policy advice being pressed on Western European governments by the United States—that they reflate their economies—seems unlikely to have much impact. Switzerland is positioned to adopt a more expansionary line, but other countries, including Germany, are more likely to continue policies currently in force. Policy in 1977 will surely differ from 1976, however, in there being no trend to greater restraint, and there is a distinct likelihood of cautious relaxing as the year progresses.

In the circumstances, growth in Western Europe will almost certainly be lower in 1977 (3.9 percent) than has been characteristic of the area in recent years, but with the distinct possibility of expansion speeding up in the second half of 1977 and in 1978.

SCOTTSDALE, ARIZ.

Mr. GOLDWATER. Mr. President, we hear a great deal today about municipal ills, the problems of American citizens striving to provide essential services in a time of high inflation. Many of these problems concern methods of law enforcement and related problems such as fire control and garbage removal. Today, I should like to point out that there can be a brighter side to this picture. In fact, some municipalities have done miraculous work in many problem areas through the use of imagination and energy. An especially refreshing story along these lines was printed in the Wall Street Journal of March 9, and it tells of the progress made in my hometown of Scottsdale, Ariz. Because it is an encouraging story and highly unusual, I ask unanimous consent that it be printed in the RECORD.

There being no objection, the story was ordered to be printed in the RECORD, as follows:

[From the Wall Street Journal, Mar. 9, 1977]

HOW A CITY STRETCHES TAX DOLLARS BY USING IMAGINATION AND ENERGY

(By William E. Blundell)

SCOTTSDALE, ARIZ.—Having a party? Go to your nearby community center and check out a Funpack, a big container stuffed with games and sports equipment. It's free, courtesy of the city.

Having a fire? Quick, call Rural-Metro, one of the most unusual fire departments in the nation. It designs and builds some of its own trucks and uses exotic equipment like the Snail, a robot fireman that clanks heedlessly into the heart of a blaze to put it out.

Having a dish-throwing spat with your spouse? The local police will bring along a "crises intervention specialist," a trained social worker and counselor who will try to patch up the quarrel and to help you get along better in the future.

All this, and much more, is routine in Scottsdale, a small city of about 80,000 people on the eastern fringe of sprawling Phoenix. Scottsdale, whose extensive commercial district includes hundreds of shops selling Western-style items, used to call itself "the West's most Western town." It isn't. But it certainly ranks as one of the most innovative communities anywhere, with a city government that manages to provide, at minimal cost, a lot of things you don't find even in much larger cities.

WEST OF EDEN

Scottsdale is no civic Eden where all problems have been solved. It got a nasty shock in 1975 when revenue estimates didn't pan out, partly because of success in holding down population growth. (The city's popula-

tion was 10,000 in 1960 and 68,000 in 1970, so today's 80,000 represents a slowdown.) An ensuing budget crisis forced temporary layoffs, an increase in water charges, a property-tax increase and installation of a garbage-pickup fee.

Another problem: Scottsdale's population, once young, is aging fast; 19% of the household heads are retirees, and the proportion is climbing. Young people are gradually drifting away because jobs and low-cost housing are scarce.

But on balance, Scottsdale is clearly a city that works. At a time when so many other towns and cities are being forced to retrench, Scottsdale illustrates that a little imagination and energy can stretch the tax dollar a long way.

The city government's share of the total property taxes paid on a $50,000 home here amounts to $80 a year, and the tax rate has been increased only once in six years. Yet the town has showered residents with extra services, cleared its small slum areas, built a sparkling civic center around a sculpture-studded grassy mall and put together a highly praised park system. "I really think we've been able to give Cadillac service at Ford cost," says Jim Jenkins, the city's finance chief.

POLICEMEN DO POLICE WORK

Scottsdale gets results by often throwing tradition out the window and trying new ideas to improve efficiency and reduce cost.

The police department, for one, frees uniformed officers for patrol and investigations by turning over housekeeping or routine tasks to lower-paid civilians. One-third of the department's 159 employees are civilians, far above the proportion found in most departments, says Chief Walter Nemetz. Among the civilians are 13 police assistants who have completed training at a police academy but who don't carry a badge or gun.

Clad in blue blazers and gray slacks, the assistants conduct initial interviews and submit reports on crimes and accidents, jobs that can take a lot of a uniformed officer's time. The pay and benefits of each assistant cost the city about $1,000 a month, compared with more than $1,500 for a veteran patrolman, and the program gives the department a chance to size up the assistants as potential recruits for the uniformed force.

The hiring of female officers, which has aroused controversy in recent years, is old hat here; Chief Nemetz, a veteran of the Los Angeles police department, has been hiring them since 1972 and now has a uniformed force that is 10 percent female. He assigns them to the same duties as male officers, even to breaking up an occasional bar brawl.

"Women often tend to be more effective at that," the chief says. "They're better able to quiet the place down because the men try to help them rather than side against them. You don't get any macho points for knocking a woman on her fanny."

Since 1974 the police force has divided the city into three sections, each covered by its own group of officers. The officers hold neighborhood meetings and even knock on doors to make themselves known and enlist community support. This "return to the idea of the beat cop," as Chief Nemetz puts it, helped drive major crime in Scottsdale down 5 percent in 1975, compared with a nationwide increase of 12 percent. Figures aren't available, but major crime in town fell still further last year, the chief says.

A PRIVATE FIRE COMPANY

At Rural-Metro, the fire department, nobody is sitting around waiting for an alarm. "A lot of firemen spend 90% of their time playing Ping-Pong and polishing chrome. Not ours," says one city official. The firemen are hustling because Rural-Metro is a private company, owned and headed by a garrulous former newsman named Louis Witzeman. He has a contract with the city and knows that if his charges run too high, his customers can contract with someone else or form its own department.

At Rural-Metro there is precious little chrome to polish; the department saves money by using unornamented, basic trucks built by FMC Corp. or assembled by the firefighters themselves from ordered parts.

A truck put together here costs Rural-Metro about $28,000, compared with more than $40,000 for an FMC truck and about $70,000 for a glittering extras-laden model from one of the old-line fire truck makers.

Using its own funds, Rural-Metro developed the remote-controlled Snail, a small, unmanned tracked vehicle that brings a hose into the heart of a fire and directs a stream of water on it.

The 45 full-time firefighters of Rural-Metro who are assigned to Scottsdale are complemented by 29 auxiliary firemen called "fire wranglers." All are city employes, trained in firefighting, who leave their desks to cover a blaze when alerted by beeper paging units worn on their belts. Cost to the city: $35 to $55 a month per man, depending on the number of fires.

All these economies add up to a total fire-protection budget of $880,000 for Scottsdale. The city figures that's less than half what it would cost to run a conventional fire department.

Borrowing an idea from European firefighters. Rural-Metro uses four-inch diameter hose, which delivers several times more water than the 2½-inch hose still standard in American firehouses. "Tradition, just tradition," Chief Witzeman says. "Tradition is one of the biggest things screwing up the firefighting business." He long ago abandoned another tradition when he read studies showing that a shade of yellow-green was more visible at night than red; all Rural-Metro equipment now is painted the new color.

Such willingness to experiment is a hallmark of the city government. For example, the parks department, which operates one big public swimming pool, provides some more aquatic amusement with "spray pads." The pads, areas of sculpted and textured concrete washed by spray heads mounted on poles, cost $12,000 each; another pool would cost $125,000.

Scottsdale's sanitation department is so mechanized that the garbage men almost never have to soil their hands on a can. "Godzilla trucks," each run by one man in a radio-equipped, air-conditioned cab, rove through alleys behind homes. With hydraulic claws they snatch up huge plastic trash containers, empty them by tipping them into the rear of the truck and put them back where they were. Smaller "barrel-snatcher" trucks pick up individual containers at streetside where back alleys don't exist.

Some Scottsdale innovations haven't panned out. Dreams of a garbage truck adapted to many different tasks had to be abandoned, for example, because a prototype kept breaking down. Then there was the "trash hog," a big mobile unit for the interim storage of garbage. The idea was that collections would be quicker if the trucks didn't have to keep interrupting them by making long hauls to the dump and back. More garbage was spilled than stowed, however, and the plan was dropped.

But Scottsdale's commitment to new ideas is unflagging. It recently got a grant from the National Science Foundation to contract for the services of a "city technologist" to help officials put new technical ideas into effect. His first assignment: Adapt solar power to public buildings.

The town also may be one of the smallest in the country to employ a full time "grants planner," an indication of the effort the city makes to round up outside financing for many of its ideas. Scottsdale dines often at the federal trough—an irony in a conservative town and state where suspicion of "handouts" is the norm. Officials take a pragmatic view of this. "They're not going to stop the printing presses in Washington just because we don't like it; they'll just print our money and give it to someone else," says George Britton, supervisor of outside funding efforts.

Leverage is the aim. "If we can't get several federal, state or other oustide dollars for every one of ours—well, we're embarrassed," Mr. Britton says. The city's urban-redevelopment effort, completed within the past six years, gave it no cause for embarrassment.

In one part of the redevelopment project, Scottsdale got rid of rundown structures near its downtown core and replaced them with a grassy area—part of its civic-center complex—bedecked with fountains and statues and fringed by restaurants, a new hotel-motel and a center for the arts. Redevelopment also involved moving more than 300 persons from ramshackle housing in a high-flood-risk area to new low-income units on higher ground nearby; the city also built a community center for the same neighborhood and got U.S. Labor Department funding to finance training and city jobs for some of the residents.

Scottsdale used money from six different federal funding programs to accomplish its redevelopment. The total cost was about $8 million: Scottsdale's share was about $500,000. The work here is frequently cited by the federal Department of Housing and Urban Development as an example of how urban renewal should work.

The city has been equally adept at dealing with the U.S. Army Corps of Engineers in an effort to solve flooding problems. The city is split in two by the Indian Bend Wash, an area prone to extensive and dangerous floods; the corps wanted to solve the problem building an ugly concrete channel right through the middle of town. Citizens and town officials, however, persuaded the corps to try something new—a chain of grassy-banked ponds, linked by streams, that would not only control heavy runoff but also serve as the focus of a green belt studded with parks and other recreational facilities. The project, which will cost more than $30 million, is to be finished in 1980. Again, most funding will come from outside.

Scottsdale doesn't have any racial problems to speak of; the population is almost entirely white. Nor is there much poverty; the median income for heads of households is more than $17,000 a year.

As for the problems it does have—such as the aging of the population and the conflict between the desire to hold down population growth and the desire to hold on to the revenue that growth brings with it—Scottsdale is attacking them with characteristic vigor. New plants, and jobs, are being wooed by an economic-development commission. The city also has adopted, for its largely undeveloped and spacious northeastern section, a regional plan permitting high-density zoning; this, it is hoped, will encourage builders to put up lower-cost housing.

It is too early to tell if Scottsdale can overcome its problems, but City Manager Frank Aleshire is optimistic, partly because Scottsdale is still small enough to be responsive. "The big cities, counties and state governments are almost paralyzed," he says. "The bureaucracies are terrible: buildings full of people passing papers. But a town like this can still be managed."

THE CLOSING OF FRANKFORD ARSENAL—AN UNWELCOME EPITAPH AND A QUESTION FOR THE FUTURE

Mr. HEINZ. Mr. President, on March 17, the Department of the Army an-

nounced that they intend to proceed with plans to close the Frankford Arsenal. This obviously is going to take place despite Vice President MONDALE's pledge to the people of Philadelphia to "keep open" the Frankford Arsenal.

The economic impact of this closing on Philadelphia will no doubt affect the residents of the entire area and certainly will warrant adjustment assistance. I hope that the Carter administration will be sensitive to these needs and will act promptly to meet those needs.

A recent news article from the Washington Post and an editorial from the Philadelphia Inquirer outline the impact of the Army's recent action, and I ask unanimous consent that these newspaper reports be printed in the RECORD.

There being no objection, the reports were ordered to be printed in the RECORD, as follows:

[From the Washington Post, Mar. 19, 1977]

FRANKFORD ARSENAL CLOSING DESPITE MONDALE'S PROMISE

(By William Claiborne)

PHILADELPHIA.—Bullet Row, a nondescript street that slices through a grimy labyrinth of red brick factories at the Frankford Arsenal here, is mostly deserted and forgotten these days. But the older, more sentimental workers still call it "the street that beat Hitler."

Here 22,000 workers, many of them women, toiled round the clock during World War II at clacking and clattering conveyors heaped with brass shell casings, producing 1½ billion cartridges—which was every small-caliber round fired by American troops in the European and Pacific theaters.

Here a paper and powder wad factory serving Union riflemen in the Civil War evolved into one of the world's biggest munitions manufacturing centers.

Here engineers and assembly line workers alike still boast of a long line of firsts—the first recoilless rifle, the first "snooperscope" for World War II GIs, the first laser rangefinder, the first aircraft seat ejection and the first computer-driven-fire control system.

But despite a promise by Walter Mondale the night before the election that the arsenal would not be closed and its 2,000 jobs not lost, the Army announced yesterday that the facility would be shut down in the fall.

Amid increasingly bitter charges here of campaign "double-crosses," political favoritism and military-industrial pressure tactics, Vice President Mondale said yesterday that "the cost involved could not justify a reversal of the decision" to close the base.

In a statement with "mea culpa" undertones, the Vice President said, "I regret that I have not been able to keep this promise" despite a sincere and conscientious effort.

When the Army ceremoniously lowers its flag for the last time at the gate of the sprawling arsenal, it will signal not only the demise of a 161-year-old military landmark but the passing of an era of weapons preparedness that critics of the closing say will compromise national security for years to come.

The Army, following a major policy shift initiated in 1964 by then Defense Secretary Robert S. McNamara and reaffirmed by his successors, has been slowly phasing out its own weapons research and development and turning the bulk of it over to private industry.

The shift, urged in 1963 by a 22-member study panel that included 18 top executives of defense contractor companies, has stirred fears in some quarters of the military that the United States may no longer be able to mobilize quickly in the event of war.

The closing has also stirred the passions of politicians and special-interest groups.

Volatile Mayor Frank Rizzo has charged that it evolved out of a vendetta by former President Nixon, after the city in 1972 put four Democrats back in Congress and delivered a plurality to the Democratic presidential ticket.

Supporters of Rizzo have since weaved a conspiratorial theory that says President Carter's well-publicized hostility toward Rizzo helped doom the arsenal after the change of administrations.

Carter in his recent nationally broadcast question-and-answer radio program said he would "do everything possible to honor (Mondale's) commitment." He said plaintively, "If there is one question the Vice President has talked to me about since we've been in the White House, it is the Frankford Arsenal."

Mondale said yesterday that he has instructed Defense Department officials to make concessions to Philadelphia, that a naval international logistics office employing 500 persons would be transferred here, and that 700 new jobs will be added to the Philadelphia naval shipyard.

Also, Frankford officials say that 1,200 employees are being offered jobs at Picatinny Arsenal in Dover, N.J., 80 miles to the north, where the remnants of the Frankford research and development operations are to be moved.

But officers of the arsenal union, the National Association of Government Employees, claim that a poll they conducted shows only 200 would actually make the move.

Overshadowing the arguments over the loss of jobs and the local economic impact are more cosmic questions about the effect on the nation's ability to mobilize in time of war.

Thomas Odom, a physicist and director of product assurance, estimated it would take Picatinny Arsenal 10 years to gain the engineering capacity lost with Frankford's closure.

He said that when the Springfield Armory closed only 54 employees transferred to Rock Island, Ill., where some of the Army's research and development functions were moved, and that the Army had to begin anew to develop "hands on" expertise in new employees.

"Just because a guy has an engineering degree or some training in machine work doesn't mean he steps right in and become expert in weapons development. It takes years to grow with the commodity," he said.

Odom, who earns $36,000 as Frankford's top quality-control official, and says he will retire rather than move to Picatinny, recalled that with the advent of space technology the arsenal system lost many professionals who lured by more money, became "gypsy" engineers, moving from one defense contract to another.

Those engineers, Odom said, have never stayed with one project long enough to develop what he called the "breakthrough capacity"—such intimate familiarity with a project that seemingly insurmountable obstacles can be broken through by sheer weight of knowledge.

"Now they say the Army is going to be a smart buyer and save money by letting private industry do the research and development. But industry's track record on defense contracts isn't so hot," Odom said, remarking on huge cost overruns for several major projects.

He cited the Springfield M-85 tank machine gun. Before the closing of the Springfield Armory it cost the Army $1,715 apiece. After General Electric took over the contracts, it cost $4,800 apiece he said.

Moreover, according to Odom and other engineers and workers interviewed here, the Army will not even be able to function effectively as an evaluator of the quality of new weapons, because it will no longer have enough experienced technicians. Odom went on:

"This country was never built on munitions industry in peacetime, and we survived World War II. We always had the in-house capacity to transfer quickly to private industry in wartime, and we always came out with superior material. So why change the system now!"

Odom suggested that the military-industrial complex, which he termed a "club'" of industrialists who constantly shift back and forth between government and private business, had become "enamoured with the idea of getting into the munitions business" and had exerted enough influence on Congress to approve of arsenal closings.

The Army says closing Frankford will save $23 million and result in a more consolidated and streamlined research and development system, with armament developing being done at Picatinny, Rock Island and Watervliet, N.Y., and testing at the Aberdeen-Edgewater complex in Maryland.

Lt. Col. Frank Hackley, the arsenal's commander, said that many structures at Frankford are obsolete and that previous consolidations of defense operations have proved that the government can save millions of dollars. He observed:

"The arsenal system in peacetime is extremely vulnerable when people begin looking around for ways of saving money. On one hand, the public is complaining about not trimming the fat on defense budgets, and on the other it raises Cain when a base is closed."

Hackley said that, among some Pentagon officials, Frankford has an image of being as "stagnant" as some of its old buildings, and that it has become known as a "retirement billet" for its succession of commanding officers.

"All the blame does not lie in Washington. Some of it rests here. People over the years could have tried harder to modernize," he said.

[From the Philadelphia Inquirer, Mar. 21, 1977]

GOOD FAITH IS NOT ENOUGH

Walter Mondale, as candidate for Vice President, should never have made that pre-election promise in Philadelphia to keep the Frankford Arsenal open unless he was prepared, if elected, to honor the pledge.

Last week, after nearly two months as Vice President, he announced in effect that he can't deliver. "I regret that I have not been able to keep this promise," he said—while declaring it was made "in good faith and with the best of intentions."

We do not question the good faith and intentions of Vice President Mondale—but merely declaring them does not fulfill his responsibilities.

If, indeed, Frankford Arsenal is to be totally and permanently closed as a defense facility, the Carter Administration and particularly Vice President Mondale have an obligation at the very least to convert the site to some other and perhaps more constructive use.

The site consists of prime acreage in the nation's fourth largest city with good transportation by land, sea and air. Convenient access to New York and Washington is combined with regional availability of a large pool of educational and scientific research facilities and personnel.

Use of this location for some major and needed federal installation—perhaps in the field of energy research and development, for example—is a matter on which President Carter and Vice President Mondale should devote earnest and urgent attention. Conversion of the site to some private-sector use also is a possibility—or maybe a combination of governmental and private usage.

Mr. Mondale says he couldn't keep his promise—but that isn't good enough. Campaign promises cannot be so lightly dismissed. The Frankford Arsenal was important to the Carter Administration before the election—important enough to make a campaign issue of it. We cannot accept the idea that it isn't important now.

As we said, our confidence in the good faith of Walter Mondale continues, but that good faith must be demonstrated in terms of a tangible future for the Frankford Arsenal facility.

UNITED STATES-JAPAN RELATIONS IMPROVED BY PRIME MINISTER FUKUDA'S VISIT

Mr. MATSUNAGA. Mr. President, earlier this afternoon the Prime Minister of Japan, His Excellency Takeo Fukuda, in addressing the National Press Club, expressed great optimism about Japanese-American relations. It is an optimism shared by our President Jimmy Carter, whose emphasis on the importance of United States-Japan relations has become clear in the barely 2 months of his administration.

One of the first foreign leaders President Carter contacted after assuming office was Prime Minister Fukuda. The result of that contact is the Prime Minister's current visit, the first such visit by an Asian leader during Mr. Carter's administration.

Prime Minister Fukuda noted in his excellent speech, that—

> It is significant that the President and I have met so soon after each of us has come into office, and while both Governments are examining afresh how we shall respond to new challenges in the world.

That significance is a recognition by both leaders of the importance of cooperation and partnership between the two nations they represent.

One of our strongest allies, and our second largest trading partner, Japan has become a world power in its own right. The past decades have seen world attention focus on the Far East. Japan is that region's most stable democratic nation, and enjoys one of the strongest economies in the world today.

I applaud the recognition by the President of the crucial importance of our relationship with Japan.

I doubt that I need to point out that Prime Minister Fukuda's visit coincides with the appearance of that beautiful reminder of our deep friendship with Japan, the cherry blossoms given by the people of Japan to the people of America. It is my hope that this spring will see two blooms—the cherry blossoms and the strengthening of our relationships with our ally, Japan.

I ask unanimous consent to have printed in the RECORD the text of Prime Minister Fukuda's address to the National Press Club.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

ADDRESS BY PRIME MINISTER OF JAPAN TAKEO FUKUDA

Mr. Chairman, ladies and gentlemen: Having completed, just this morning, my very fruitful talks with President Carter, I am delighted with this opportunity to address the distinguished members of the National Press Club.

It is significant that the President and I have met so soon after each of us has come into office, and while both Governments are examining afresh how we shall respond to new challenges in the world.

The central theme of my talks with the President was "Japanese-American Cooperation in a Global Context". In other words: What can Japan and the United States do together to help make the world a better place to live in?

I am completely satisfied with what we have accomplished in our discussion.

In addressing the Diet shortly after I formed my Cabinet, I spoke of what we Japanese should expect of each other today.

I said that no human being can live in isolation. Society exists to serve each individual in the development of his or her potentialities, the fruits of which are shared and complement each other. As society also is bettered, each individual finds greater opportunities for his or her complete fulfillment.

I believe similar principles are appropriate in the international community. In today's increasingly interdependent world, no nation, any longer, can go it alone. All nations must help and complement each other, sharing responsibilities in the world community. As the world community is bettered, each nation finds greater opportunities for fulfilling its own aspirations.

Looking at the current world situation, I cannot help recalling the tragic developments of the early 1930s. For most of you here today, that era is perhaps a historical rather than a personal memory. For me, however, as a young man in London, those years left on my mind a lasting impression of missed opportunities.

In their attempts to escape the black clouds of depression which then hung over the whole world, the major countries, one after another abandoned the open economic system of free trade, switching to the closed system of protectionism.

As a result, world economic conditions further deteriorated. Between 1929 and 1933, world trade shrank by 40 percent, and the combined industrial product of the major economic powers dropped by 30 percent. Economic paralysis contributed to social instability and extreme political nationalism, which in turn provided the background for World War II.

I am not suggesting we are once again on the road to a world war. Yet I feel deep anxiety about the social and political consequences for the world if we slide once again into protectionism, or a breakup of the world economy into rival trade blocs. Surely we have learned by now that such a course can only exacerbate world economic conditions.

Heeding the lessons of history, the major trading nations must pledge never again to abandon free trade for self-destructive protectionism.

The world economy has not yet fully recovered from the oil crisis of 1973. Especially in many of the non-oil-producing developing countries, the suffering has been indescribable, and we, the advanced industrial democracies, are in a position to ease their burdens, although our own economies have not returned to normal.

Clearly it is necessary for those of us with the capacity to do so to restore swiftly our own economic health, and thus to reinvigorate the world economy in linked prosperity. This is the realistic course. The responsibilities of the so-called "engine economies" are great indeed.

Recognizing this, the President and I found ourselves in complete agreement on the need to revitalize our respective economies, in close cooperation, and thus to help revitalize the world economy.

The United States and Japan alone account for 35 percent of the world's gross product. The European Communities add another 21 percent. Combined, as the free world's three strongest economic entities, we account for 56 percent of gross world product. By working together in harmony, we have the capacity—and the obligation—to restore our interdependent world economy to stable growth.

Together the great industrial powers can help reinforce each other's economic recovery; we can generate more favorable trade and development opportunities for the developing countries, and thus improve North-South relations; and over the long run, we can help promote a more balanced development of the total world economy.

Without real cooperation among the major advanced industrial economies, none of these goals is feasible.

Japan recognizes its own key role and responsibilities in meeting these challenges, and my Government is determined to join Japan's full capacity to that of the United States, and of our economic allies in Europe, to make the most of these opportunities which history offers us.

For its part, my Government has submitted a stimulative budget for fiscal 1977, beginning April 1, primarily through expansion of public works. We have set a goal of 6.7 percent real growth for the year. You will recognize that this is the highest growth target of any of the major industrial nations.

One of the anticipated effects of reaching this target will be a substantial increase this year in Japan's imports. Last year our exports grew faster than our imports. In 1977 we expect our imports to grow faster than our exports, thus stimulating the economic recovery of our trading partners and contributing to world economic recovery.

I should quickly add that this policy is not without difficulties. Especially, we must guard against the risk of a new round of inflation.

Also, the Japanese economy has just recovered from the staggering blow of the oil crisis. The quadrupling of crude-oil prices increased our payments to the oil-producing countries to the stupendous sum of $20 billion. Those costs had to be absorbed by the valiant efforts of our people, and emergency fiscal measures to save the Japanese economy from collapse.

We are still paying the consequences. Public finance currently depends nearly 30 percent on public borrowing, through bond issues, and it is not easy to say when the Government will be able to do away with deficit financing.

Despite these difficulties, and our vulnerabilities, my Government remains committed to a stimulative policy which will revitalize Japan's domestic economy, and, at the same time, further my parallel goal of enlisting the creative power of Japan's economic recovery in world recovery.

During the thirty-odd years since World War II, the Japanese people have worked very hard at building a free and democratic society, with a decent living environment for all our people, a deep respect for fundamental human rights, and an equally deep commitment to international cooperation and peace. In the course of those decades, this open system has made Japan into a world economic power of 110 million people, with a half a trillion-dollar Gross National Prod-

uct, and the will as well as the capacity to participate constructively in world economic growth and development.

Throughout past history, great economic powers have always been great military powers as well. Japan, however, has set for herself a different ideal, unprecedented in history, of relying for her safety and survival on her trust in the justice and good faith of nations. We have chosen not to take the path to great military power. Although we possess the economic and technological capability of producing nuclear arms, we have firmly rejected the acquisition of such weapons.

The course the Japanese people have chosen is possible because of our continuing security arrangement with the United States, an alliance which serves the vital mutual interests of both countries. It should be recognized that a Japan which is an economic but not a military superpower can only be viewed as a stabilizing force in the world, posing no threat to any of its neighbors, but devoting its energies exclusively to constructive and creative purposes, at home and abroad.

We believe in these ways Japan can best contribute to world peace, stability and development.

Out of its concern for peace, Japan has consistently supported arms control and, in particular, nuclear disarmament. I was therefore encouraged by President Carter's Inaugural pledge to "move this year a step toward our ultimate goal—the elimination of all nuclear weapons from this earth".

Reaching this goal may indeed be an arduous task, but we must begin. I therefore welcomed the President's proposal for a total ban for a specified period of time, as a concrete step towards this goal. It would be of great significance for Japan and the United States to collaborate closely in promoting an enforceable test-ban agreement.

Equally important is the challenge of controlling conventional arms. I am especially concerned about military build-ups in areas of the world where political tensions are already high, and may be aggravated by further imports of armaments. Mindful of the danger, Japan took the initiative at the last session of the United Nations General Assembly in calling the attention of the world to the question of international transfer of conventional weapons. We are gratified that the United States shares our concern for this matter.

Japan's firm policy has been not to export arms to any region in conflict. I understand the complexities of the arms-transfer problem, but I believe Japan and the United States could usefully join in exploring the possibilities—in consultation with other governments, of course, and in a spirit of mutual trust—for the kinds of self-restraints and international arrangements which could bring this problem under better control.

Both Governments have long recognized the need for Japan and the United States to participate in the promotion of peace and prosperity in Asia. Japan is providing active and growing support to the self-reliant nation-building efforts of Asian countries, particularly such self-help programs of intra-regional cooperation as those under way in the Association of Southeast Asian Nations. A Japan-ASEAN Consultative Forum is being established, and its inaugural meeting will be held tomorrow in Jakarta. My Government will be warmly receptive to ASEAN requests for cooperation of various region-serving projects. On a bilateral basis, 50 percent of Japan's official development assistance already goes to Southeast Asia, and this aid is being expanded both quantitatively and qualitatively.

The goal we share with our neighbors is an Asia at peace with itself and the world, and increasingly capable of meeting the material and social needs of its diverse peoples.

At the same time, I consider it indispensable to this goal that the United States—as a global power with a leadership role in world politics—continue its active interest and constructive participation in the nation-building efforts of Asian people.

I realize the anxiety is sometimes expressed that, following the bitter experience in Vietnam, the United States might turn its back on Asia. I have no such fear, for I know that the United States, like Japan, is historically a Pacific nation. Our two countries are linked in our destiny to the future vitality of this vast, populous, and potentially prosperous region.

My friends, never before have relations between Japan and the United States been closer or more cordial. This does not mean we can take each other for granted. We must continue to work at perfecting our partnership, always keeping each other informed of our intentions. We need especially to deal soberly and wisely with each of the small problems that inevitably arise in so extensive a relationship, making certain that none of them becomes a big problem.

Our communications with each other should continue to multiply and deepen, as befits our expanding cooperation on the world scene. Laudable programs and exchange between our two people are being carried out by private individuals and organizations on both sides—academic institutions, business and professional organizations, and private foundations and societies. Both Governments are also helping, and I think it important to encourage and expand these efforts.

Five years ago, in my capacity as Minister for Foreign Affairs, I initiated the Japan Foundation for cultural exchanges between Japan and the rest of the world. I am gratified that comparable steps are being taken on the American side, by the setting up of the U.S.-Japan Friendship Trust Fund. This Fund is about to commence its activities, which will significantly increase cultural interchanges of scholars, artists and professionals between Japan and the United States.

I have nothing but optimism about the future of Japanese-American relations. Through goodwill and unstinting efforts on both sides, we have built a mature and responsible partnership. That partnership now faces its greatest—and ultimately most rewarding—test: joining our two great peoples together in a cooperative adventure in the global context, to achieve our shared dream of a more stable, peaceful and prosperous world.

I am confident that future generations will gather the fruits of our combined endeavors.

WITHDRAWAL OF PROPOSED INSURANCE REGULATIONS

Mr. LONG. Mr. President, the Treasury has just announced the withdrawal of proposed regulations under section 79 of the Internal Revenue Code. These proposed regulations have been the cause of much concern among employers, large and small, and among life insurance underwriters because of their potentially serious impact on employee group term life insurance and group permanent life insurance plans throughout the country. I am also concerned, and not just because the proposed regulations apparently would have seriously undercut a congressional policy established in the Revenue Act of 1964. I am concerned because in recent years the Internal Revenue Service has shown a tendency to use a very blunt instrument in its efforts to correct abuses of the Internal Revenue Code. Let me say at this point that I heartily endorse efforts of the Revenue Service and Treasury to reach and correct abuses of the tax code and expect to be critical of any tax administration which fails to carry out this function properly. Further, the proposed regulations which have just been withdrawn were issued under the previous administration.

While I expect the Treasury and Revenue Service to take action whenever there appears to be a situation where taxpayers are realizing a tax benefit which was never intended by the Congress, such action should not go beyond correction of the abuse and nullify or unduly restrict a result clearly intended by the Congress. Furthermore, where taxpayers have relied on rulings of the Internal Revenue Service in structuring their business, in other words with respect to those taxpayers who have "clean" hands, appropriate relief—transitional rules or otherwise—should be provided. Assuming earlier tax rulings or regulations were wrong and the current position of the Treasury is correct, fair tax administration requires achievement of a balance between the rights of those taxpayers who have relied on the earlier rulings and the rights of the public to full enforcement of the tax law as it is currently interpretated. Anything less than this either erodes the confidence of taxpayers who are expected to make extensive plans and substantial investments in reliance on the Treasury's current interpretation of tax laws, or erodes the confidence of the public in a fair administration of the tax laws.

In the instant case the Congress, in the Revenue Act of 1964, encouraged the continuation of existing and establishment of new nondiscriminatory employee group life insurance plans by providing that an employee will not be taxed on the employer's cost of providing the employee with group life insurance not in excess of $50,000 per employee. The employee would be taxed on the cost of employer provided group life insurance in excess of $50,000, such cost to be measured by a uniform premium table. At that time, the Finance Committee report included a uniform premium table based on 1940 mortality tables, but stated that such table "will be changed from time to time as mortality experience or other factors indicate that this is appropriate." After consultation with the insurance industry, the Treasury in 1966 issued regulations under the new law prescribing uniform premium tables based on 1958 mortality tables. Since average life expectancy has increased with the improvements of medicine, the 1958 mortality tables called for a significantly lower premium than the 1940 tables. In the proposed regulations, the Treasury would substitute premium tables based on 1940 mortality tables, which means that the premium cost taxed to the employee for insurance in excess of $50,000 would be significantly higher than under the premium tables based on 1958 mortality tables. In fact, most insurance companies use mortality tables more recent than 1958 in developing premium rates, since the lower pre-

miums make them more competitive. Further, it is pointed out that insurance companies under State law cannot use mortality tables older than the 1958 table. It would appear, on its face, that the proposed regulation's reversion to 1940 tables is clearly unreasonable and contrary to congressional intent.

In addition to group life term insurance plans, many employers provide group permanent life insurance in conjunction with the group term insurance in order to provide insurance protection beyond retirement. This was recognized by the Congress at the time of the 1964 act. Since only the cost of the group term insurance up to $50,000 is excluded from the employee's income, it is necessary to insure that there is a proper allocation of the employer's premium between the cost of group term and cost of group permanent with respect to participating employees. The cost of the group permanent insurance is treated as income to the employee. The abuse which prompted the proposed regulations, which have just been withdrawn, is in the area of improper allocations of the total premium cost between group term insurance and group permanent insurance.

In addition to prescribing uniform premium tables based on 1940 mortality tables, the proposed regulations met the allocation problem by providing group term insurance and group permanent insurance must be provided under separate policies. Since many States prohibit the issuance of a combination of group term and group permanent insurance under two contracts, this appears to be an unnecessarily harsh method of meeting the allocation problem. This could have been avoided by consultation with the insurance industry, which indicates there are several ways in which costs could be allocated between group term and group permanent insurance so as to avoid any abuses.

These views have been expressed in a letter to Secretary Blumenthal which has been cosigned by 14 members of the Finance Committee. I ask unanimous consent that that letter be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
Washington, D.C., March 17, 1977.

Hon. W. M. BLUMENTHAL,
Secretary of the Treasury,
Washington, D.C.

DEAR MR. SECRETARY: Through this letter we wish to register our strong opposition to the proposed treatment of group term life insurance under section 79 of the Internal Revenue Code. Such proposed regulations are contrary to the clear intent of Congress and are a reversal of the Service's long-standing position which is of great concern to us.

We ask that you reconsider the points discussed below:

First, as to changing the uniform rate tables—when Congress adopted section 79 in the Revenue Act of 1964, it was based upon sound public policy and was considered socially desirable. We felt the provision of a basic amount of life insurance would do much to keep together family units when the principal breadwinner died prematurely. We provided that insurance up to $50,000 was a reasonable amount, and provided for favorable tax treatment on the premiums up to this amount. But, if insurance coverage were provided in excess of $50,000 then the amount of the premium for the excess would be considered imputed income to the employee.

In devising a table for determining this figure, the House bill provided that the employee's imputed income could be determined either by use of (a) a uniform rate table, or (b) the actual premium cost under the policy. However, the Senate bill provided a uniform rate table only. The Conference Committee adopted the Senate approach. During the legislative consideration both Committees indicated:

"This table will reflect costs of such protection based upon insurance company experience and, of course, will be changed from time to time as mortality experience or other factors indicate that this is appropriate. Until provided otherwise by regulation, however, the cost per $1,000 of group-term life insurance protection can be determined from table 11 below." (H. Rep. No. 749, 88th Cong., 1st Sess. (1963) p. 41 and S. Rep. No. 830, 88th Cong., 2d Sess. (1964) p. 47)

The Table 11 referred to is the same table as is now proposed as Table II. Keep in mind these reports were written in 1963 and 1964. We specifically directed that any future changes would reflect subsequent mortality experience.

The Conference Committee reaffirmed this intent.

"It is the understanding of the conferees that the Treasury Department will study the table of premiums at attained ages contained in the committee reports on the bill to see whether this table should not be replaced by a table which reflects the most recent mortality experience and which may possibly make some allowance for expense factors." (H. Rep. No. 1149, 88th Cong., 2d Sess. (1964) p. 22)

Pursuant to the above, Treasury officials met with insurance industry representatives to see "whether this table (Table 11) should not be replaced by a table which reflects the most recent mortality experience and which may possibly make some allowance for expense factors." These representatives, aware that the Table 11 rates, above, were based on a 1939–41 mortality study, devised a more current table, now known as Table I. The Treasury accepted this Table, and since it reflected the most recent mortality experience it became a part of the section 79 regulations both in its proposed form in 1964, and in final form in 1966. These representatives of the Treasury and insurance industry, in devising Table I used 1958 group-term mortality experience, which is the oldest table permitted by state insurance concerns, brought it up to date, and included an average expense factor. Both the government and the life insurance industry were satisfied as to its fairness and accuracy.

The preamble to the proposed regulations, suggests that Table II (the table tentatively accepted by Congress back in 1964) "better reflects the actual cost of group-term life insurance than Table I." In our judgment, this is not the case, and the Treasury Department in making this proposal seems to be going against the clear intent of the Congress.

Instead of returning to the temporary 1964 table, the Treasury, if it feels a change is necessary in the current table, "should reflect the most recent mortality experience."

The actuarial studies we have seen reflect that mortality generally has improved. The data on insurance company experience we have seen, for the period 1958 through 1974. indicate the rates in Table I or not only more accurate than in the proposed Table II, but indeed suggest that Table I rates may even be higher than warranted under current conditions.

Specifically, the actuarial studies we have seen reflect the trend of mortality rates since the adoption of section 79 has been generally downward. This suggests that an increase in the imputed income rates is not warranted in most age brackets.

Additionally, the original rate table did not take into account a factor which experience shows is significant today. An assumption was made, when the Table I rates were being developed, that the female population among those insured for group life insurance in excess of $50,000 was zero. That assumption is unrealistic today. Some credence should be given to the lower mortality experienced by females.

Thus, it appears that these proposed regulations are moving in the wrong direction, contrary to the intent of Congress. The record is clear that any changes are to reflect recent insurance company experience, and will be changed as mortality experience indicates is appropriate. To our knowledge, the Treasury Department did not review insurance company experience before proposing these changes and certainly the mortality experience would suggest that adoption of Table II is clearly unwarranted.

In addition to retaining Table I, a second issue which concerns us is the attempt to disqualify, under the proposed regulations, the whole life plans by requiring that separate policy contracts for term and permanent insurance be issue.

We favor amending existing regulations with respect to plans which utilize individual whole life policies.

The proposed regulations attempt to disqualify these whole life plans by requiring that separate policy contracts for term and permanent insurance be issued. We recognize that such a limitation on the right of contract would completely eliminate any possibility of tax avoidance. However, the two contract requirement would, in our opinion, disqualify certain types of group permanent insurance which do not involve any element of tax avoidance and are socially desirable.

For over forty years paid up group permanent insurance has been combined with group term insurance under a single contract. When Congress adopted section 79 in 1964, these group permanent plans were known to exist. Under such plans employees make contributions after tax dollars to purchase paid up insurance so that when the term insurance provided by employers expires at retirement, the employees will have some life insurance protection during their post retirement years.

As indicated the proposed regulation would disqualify these group permanent plans, because they have been written in a single contract. Moreover, the laws of many states prohibit issuing such a combination of coverages in two contracts. Therefore it would not be possible under the law of many states to split these group permanent plans into two contracts, one for the term coverage, the other to provide for the paid up permanent insurance. We are informed that one insurance company insures more than one million workers under this type of plan. Some of these plans are based upon labor bargaining contracts which cannot be modified without reopening long term contracts. The employees covered are for the most part blue collar workers and the coverage averages about $10,000 per worker.

We believe that the result Treasury seeks should be achieved without disqualifying sound group plans now in existence. We are told that the insurance companies generally agree that the two contract approach should not be adopted as a sole method of providing permanent life insurance through a group life insurance plan. They are proposing other solutions which get at the individual whole life policy abuse without imposing restric-

tions on the right of contract as to whether it is a single contract or a two contract arrangement. These solutions should eliminate unfair competition in the marketing of individual whole life policy and should remove a service criticism we have received from life insurance companies which do not sell section 79 plans on a tax avoidance basis. We urge that the view of the industry be given careful consideration.

Thank you for your consideration. Please keep us advised with respect to this matter.

Sincerely yours,

Russell B. Long, Carl T. Curtis, Spark M. Matsunaga, Clifford P. Hansen, Bob Packwood, Bob Dole, Bill Roth, Abe Ribicoff, Paul Laxalt, John Danforth, Mike Gravel, H. E. Talmadge, Lloyd Bentsen, —— ——.

U.S. Senators.

THE SYMBOLISM OF THE AMERICAN FLAG

Mr. PELL. Mr. President, each year the Warwick Emblem Club, No. 416, sponsors an essay contest in Rhode Island's Warwick Secondary Schools and presents the winning contestant a U.S. savings bond.

This year's winner, Miss Robin Gorton of Winman Junior High School, captured top honors with a thoughtful essay about the symbolism of the American flag.

Mr. President, in order to share Miss Gorton's essay with my colleagues, I ask unanimous consent that it be printed in the RECORD.

There being no objection, the essay was ordered to be printed in the RECORD, as follows:

WHAT THE AMERICAN FLAG MEANS TO ME

(By Robin Gorton)

Every country in the world has a flag which symbolizes a particular characteristic about that country. To me, our American flag is the most beautiful flag in the world. It symbolizes the American dream of "Life, liberty and the pursuit of happiness." From the "Don't Tread on Me" flag to the "Stars and Stripes Forever" flag, this symbol of America has withstood numerous wars and is still a shining example of a nation enjoying democracy.

Although the three familiar colors of the flag were taken from the Union Jack flag of England, the symbolism is American alone, and represents the love and patriotism our forefathers had for this country. In the flag, the color red symbolizes the blood spilled on the ground by patriots through many wars. It also symbolizes the love our ancestors had for our country. The color white symbolizes the purity and innocence of a new nation just starting out. Together, the red and white colors from the thirteen stripes on the flag; one stripe for each original colony.

These bands represent the colonies' joining to form a new nation never to be separated. The blue field represents the loyalty of the citizens who endured the problems which the new nation faced. The stars represent our current fifty states and as the number of states increase, so will the number of stars. Shining against a blue field they are a symbol of an everchanging nation under the form of democracy.

If you were to think of the states as stars in a universe, you would realize that together they represent one great nation as do separate stars form one great universe.

Walking down the Avenue of the Americas at the United Nations Building, I remember seeing the world flags displayed around it. Every flag meant something to the people in its respective country, but the American flag stood out distinctly as the representative of liberty and independence. The Russian flag means something to the people of Russia, but the American flag signifies liberty and happiness to people all over the world. Foreigners regard America as the place where the oppressed can find peace and when I look at the flag, I can imagine the oppressed gazing with admiration upon that flag, with the prospect of freedom shining in their eyes.

My love for my country is very strong and I hope that the American flag will always be respected and loved and continue to stand as the symbol of freedom for all people throughout the world.

A TRIBUTE TO AGRICULTURE

Mr. HUMPHREY. Mr. President, I wish to share with my colleagues the letter which I directed to President Carter on January 31, 1977, recommending that he declare the last week of March as National Agricultural Week, and the first day of that week as National Agriculture Day.

In my letter, I pointed out the importance of agriculture, recalling Senate Joint Resolution 163 which I helped pass the Senate in 1974 in recognition of the importance of agriculture. At that time I suggested:

Without a sound wholesome food supply, this country—or any country—cannot hope to progress, or even survive. Describe to me a country's agricultural development, and I will describe to you that country's cultural and economic achievements.

I also pointed out that the agricultural industry has assets totaling over $600 billion, and in recent years we have exported around $23 billion annually in agricultural products, resulting in a net favorable balance of trade of approximately $12 billion. These exports have helped pay the bill on our petroleum exports.

I also pointed out that one farmer today produces enough food to feed over 50 people, and that almost 1 out of every 5 persons in America is involved, in some capacity, with agriculture.

The response from the White House was to decline to issue such a proclamation without a resolution having been passed by both Houses of Congress, in the absence of a well-established tradition, such as Thanksgiving.

I am encouraged that the President met with a group of farmers for lunch in order to recognize the contributions of agriculture, and I know that Secretary Bergland will also be doing his part to recognize this event.

I feel that our agricultural producers are among the unsung heroes of this Nation, and I wish to salute them and join others in paying tribute to this great and awesome industry.

Mr. President, I ask unanimous consent that my letter to the President and the response to it be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

COMMITTEE ON
AGRICULTURE AND FORESTRY,
Washington, D.C., January 31, 1977.

THE PRESIDENT,
The White House,
Washington, D.C.

DEAR MR. PRESIDENT: As the first President in many years to have come from an agricultural background, I know that you are well aware of the importance of agriculture to the American economy. Therefore, it would be fitting and appropriate for you to declare by presidential proclamation, the last week of March as National Agricultural Week, and the first day of that week as National Agriculture Day.

In 1974, I took the lead to have the Senate enact S.J. Resolution 163 authorizing the President to proclaim the last full week in March of each year as "National Agriculture Week," and the Monday of each such week as "National Agriculture Day."

At that time, I said, "Without a sound, wholesome food supply, this country—or any country—cannot hope to progress, or even to survive. Describe to me a country's agricultural development, and I will describe for you that country's cultural and economic achievements."

While the House of Representatives did not act upon this measure, many members of the agricultural community have proceeded to publicize the occasion, and have made it an important event.

Your recognition of this event would go far in bringing it the national attention which it deserves.

National Agriculture day and week provide the opportunity to honor the unsung heroes of the nation's largest industry, our farmers. The agricultural industry has assets totalling over $600 billion, and in recent years, we have exported around $23 billion in agricultural products, resulting in a net trade balance of about $12 billion. These exports help to pay the bill for our petroleum imports.

Although there are less than 3 million farms today, the American farmers not only cultivate enough produce to feed 215 million Americans and export about a fourth of their production, but millions of needy people around the world have received assistance through our humanitarian assistance programs—made possible by the awesome production of the American farmer.

One farmer today produces enough food to feed 52 people, and the farming industry spends approximately $80 billion for goods and services to produce crops and livestock. This outlay of funds provides jobs for millions of Americans, and almost one out of every five persons in America is involved, in some capacity, with agriculture.

Agriculture plays a major role in our society, and I hope you share my feelings that our people should be given the opportunity to pay tribute to its contributions to the health and prosperity of the nation.

In recognition of the importance of agriculture, and the helpfulness of an official declaration, by you, Mr. President, I urge you to take this step.

Sincerely,

HUBERT H. HUMPHREY.

OFFICE OF MANAGEMENT AND BUDGET,
Washington, D.C., March 1, 1977.

Hon. HUBERT H. HUMPHREY,
U.S. Senate, Washington, D.C.

DEAR SENATOR HUMPHREY: This is in reply to your letter to the President of January 31, 1977, requesting issuance of a proclamation designating the last week in March as National Agricultural Week and the first day of that week as National Agriculture Day.

As I am sure you can appreciate, the President receives numerous requests for issuance of commemorative proclamations. There simply are not enough days, weeks and months in the year to accommodate them. Consequently, it has become necessary to establish certain basic criteria to govern their issuance. In general, proclamations are issued either in response to a request contained in a joint congressional resolution which has passed both Houses of the Congress or when there is a well-established tradition, such as Thanksgiving Day. Exceptions are confined

to unusual circumstances of current national significance, e.g., the Bicentennial Year.

I can assure you, however, that the contributions made by our agricultural community, as described in your letter, will receive appropriate recognition in the President's annual proclamation in honor of National Farm-City Week in November.

Sincerely,

WILLIAM M. NICHOLS,
General Counsel.

S. 898—SPILL PREVENTION AND CLEANUP FOR ENERGY TRANSPORTATION SYSTEMS ACT OF 1977

Mr. BROOKE. Mr. President, on March 3, 1977, I introduced S. 898, the Spill Prevention and Cleanup for Energy Transportation Systems Act of 1977.

I ask unanimous consent to have a section-by-section analysis of the bill printed in the RECORD.

There being no objection, the analysis was ordered to be printed in the RECORD, as follows:

SECTION-BY-SECTION ANALYSIS

TITLE I—OIL AND TOXIC SUBSTANCE TANKER POLLUTION LIABILITY AND COMPENSATION

Sec. 1 Findings and declaration of policy. The damages and cleanup costs resulting from oil and toxic substance spills by tankers are matters of national concern. Such spills infringe upon the rights of shoreline property owners, harm the general health and welfare of citizens and create environmental risks. Existing laws with respect to liability and compensation for spills are inadequate and there is a need for reform.

The purpose of this Act is to enact a comprehensive national law governing pollution liability and compensation for tankers carrying oil and toxic substances; to maximize the incentives for all persons transporting oil and toxic substances to take the necessary or appropriate steps to prevent their discharge; to establish a strict liability standard for cleanup costs and damages resulting from the discharge of oil; to create a single and all-inclusive compensation fund to pay for all cleanup and damages resulting from such discharge; to provide adequate funds and expeditious procedure to compensate those injured by a discharge; and to provide for the restoration, rehabilitation or replacement of the natural resources damaged by an oil discharge.

SEC. 2. Defines the terms used in the Act. Definitions include the "aquatic and terrestrial environment," which means the seabed, subsoil resources and territorial sea of the United States and fisheries zone over which we assert exclusive fishery management. The term also refers to the waters of the contiguous zone, within the safety zone around a deepwater port and superjacent to the Continental Shelf of the United States; and to the fish, wildlife and other living resources of such lands and waters and their recreational and scenic values.

"Cleanup costs" are defined to include the costs of Federal, state, local and foreign governments that are incurred in removing, attempting to remove, or taking other measures to prevent, reduce or mitigate damages to the public health or welfare or to the public or private property and natural resources by an oil discharge.

"Damages" are defined to include all direct and proximate damages, except cleanup costs, suffered by any person or government unit as a result of a discharge of oil or toxic substances from tankers, including the loss or injury of any real or personal property.

Sec. 3. Prohibits the discharge of oil in harmful quantities as determined pursuant to the Federal Water Pollution Control Act. A civil penalty of not more than $10,000 is established for violations of this provision. Under this section, a person in charge of a vessel who fails to report an oil discharge as soon as he/she has knowledge of it is subject to a fine no greater than $50,000 or one year imprisonment or both.

It also requires the Federal Government to act immediately to clean up a discharge unless the responsible party will act more expeditiously. Government funds to clean up a spill can be made available immediately from the liability fund established pursuant to a subsequent section of the Act.

Sec. 4. Makes the owner and operator of any tanker discharging oil or toxic substances jointly liable for all cleanup costs incurred by governmental or private parties. Such liability will not be in excess of $150 per gross ton only unless the discharge was the result of gross negligence or willful misconduct within the knowledge and privacy of the owner, operator or person in charge; or if the discharge is in violation of applicable safety, construction or operating standards or regulations as established in a subsequent Title of the Act.

The section makes the owner and operator of a vessel carrying oil from the trans-Alaskan pipeline responsible for cleanup costs and damages to the Canadian government or its residents if a discharge occurs, without regard to fault.

The section also allows for the owner or operator of a vessel emitting a discharge to be subrogated to the rights of any person entitled to recover damages if the discharge was caused by negligence on the part of the owner or operator of an onshore or offshore facility or on the part of a licensee of a deepwater port. However, the Act will not limit or affect any rights that an owner or operator of a vessel or that the federal fund may have against any third party whose acts may have caused or contributed to a discharge. But, an owner or operator of a vessel may recover cleanup and damage expenditures from the Federal Government for a discharge that was caused solely by negligence on the part of the Federal Government in failing to maintain adequate aids to navigation. And, the federal fund is entitled to seek recovery from the Federal Government for cleanup and damage expenditures by the fund.

SEC. 5. Calls for the establishment of the Federal Oil and Toxic Substances Tanker Pollution Liability and Compensation Administration within the Department of Transportation. The new agency will have an Administrator who will be appointed by the President. The Administrator will report and be responsible to the Secretary of Transportation, but the Administrator's decisions will not be subject to review, delay, reversal or other action by the Secretary or any other officer or employee of the Department of Transportation. The agency will also have a Deputy Administrator and a General Counsel, both of whom will be appointed by the President with the advice and consent of the Senate.

The Administrator will be able to establish and maintain a federal compensation fund; to act as trustee of the natural resources of the marine environment; to require financial responsibility disclosure; to establish regulations and provide for the fair and expeditious settlement of claims; to provide public access to information and conduct public education programs; to submit an annual report; and to perform any other functions prescribed by law or by the Secretary.

Also, the Administrator has full rule making and investigative authority.

Sec. 6. This section calls for the establishment within the administration of a Federal Oil and Toxic Substances Pollution Compensation Fund. The fund would be a nonprofit corporate entity which could sue or be sued in its own name.

The fund will be disbursed for cleanup costs resulting from the discharge of oil or toxic substances incurred pursuant to Sec. 102 of the Act, to Sec. 311 of the Federal Water Pollution Control Amendments Act of 1972, to any state or official law, or by the owner or operator of a vessel or onshore or offshore facility or a licensee if it can be shown that such discharge was caused solely by an act of war or negligence on the part of the Federal Government in establishing and maintaining aids to navigation. Money will also be disbursed for all damages not actually compensated pursuant to Sec. 102 of the Act and for damages whenever the sources of the discharge cannot be determined or is beyond the jurisdiction of the United States; and for research into methods for preventing, containing and removing discharges of oil as authorized. The Fund will not be liable to pay cleanup costs and damages of any claimant whose negligence or intentional act was the sole cause of the discharge.

In all claims or actions by the Fund against any owner, operator or other person providing financial responsibility, the Fund will recover both the amount it paid for cleanup operations, without reduction, and the interest on that amount at the existing commercial interest rate from the date that reimbursement is requested to the date it is paid to the Fund.

The Fund will be provisioned through the collection of a 5-cent per-barrel fee imposed on the owner of oil or toxic substances when the oil or toxic substances are transferred between either a vessel and an onshore or offshore facility or a vessel and a deepwater port.

The fee collection will be suspended when the Fund reaches $250 million. Collection will be resumed every time the Fund is reduced below $200 million and will cease when the $250 million ceiling is reached again. Whenever the money in the Fund is less than the claims for cleanup costs and damages for which it is liable, the Fund will borrow the balance required to pay such claims from the United States Treasury at an interest rate to be determined by the Treasury's Secretary.

Sec. 7. Provides for funds in the Pollution Fund established pursuant to the Federal Water Pollution Control Act Amendments of 1972 to be made available for staging and deploying cleanup equipment in the event the Administrator determines that a vessel, because of a malfunction, collision, or other existing or potential damage, is likely to cause a major discharge of oil or other toxic substance.

Sec. 8. Allows the Administrator, or the authorized representative of any state, to act on behalf of the public as trustee of the natural resources to recover for damages to such resources.

Sec. 9. Requires each owner or operator to establish financial responsibility through evidence of insurance, surety bonds, qualification as a self-insurer and/or other evidence of financial responsibility satisfactory to the Administrator. Any claim is brought directly against the source of financial responsibility and failure to comply with the provisions ascertaining such responsibility will result in a fine of not more than $25,000. Failure to comply could also result in a denial of entry to U.S. ports, detainment at a U.S. port or refusal of the clearance required by section 4197 of the Revised Statutes of the United States.

Sec. 10. This section allows the Administrator to prescribe or amend the regulations for filing, processing, settlement and adjudication of claims for cleanup costs and damages resulting from the discharge of oil. Claims will be filed not later than two years after the date of discovery of damage nor later than six years after the date of the incident which caused the damage.

If the source of the discharge can be determined and liability is conceded, a final and binding settlement may be arranged. If the source of the discharge is unknown and cannot be determined, the Administrator may promulgate regulations to arrange a settlement. If liability cannot be conceded or if a settlement cannot be negotiated, the claim may be submitted to an Administrative Law Judge.

Sec. 11. Provides for annual reports.

Sec. 12. This section allows any state to impose additional requirements or liability for any discharge of oil or toxic substances resulting in damages or cleanup costs within the jurisdiction of any state. However, any person who receives compensation pursuant to this Act will be precluded from recovering compensation pursuant to any other State or Federal law. And, conversely, any person who receives compensation pursuant to any other State or Federal law will be precluded from receiving compensation for the same damages under the Act.

Sec. 13. This section authorizes the appropriation for administering the Act at $10 million for the fiscal year ending September 30, 1977; $5 million for the fiscal year ending September 30, 1978; and $5 million for the fiscal year ending September 30, 1979.

TITLE II—PREVENTION OF TANKER COLLISION AND CARGO LOSS

Sec. 1. Findings and Purposes.

The transportation of certain hazardous substances including crude oil and petroleum products creates a significant environmental hazard and that international agreements and other existing authorities inadequately protect the marine environment from tanker discharges, particularly within the Fishery conservation zone established pursuant to the Fishery Conservation and Management Act of 1976. There is a need for the Congress to establish more comprehensive and stringent standards for tanker construction and operation in the waters of the territorial seas and the fishery conservation zone of the United States, so as to prevent the spillage of oil or other hazardous substances.

Therefore, the Congress establishes comprehensive regulations for the safe construction, maintenance and operation of vessels carrying oil or other hazardous substances; extends the regulations designed to protect the marine environment to include in their coverage the Fishery Conservation Zone established pursuant to the Fishery Conservation and Management Act of 1976; and establishes a vessel traffic system including a Vessel Traffic Safety and Discharge Information System.

Sec. 2. This section amends the Ports and Waterways Safety Act to encompass the United States fishery conservation zone in the waters to be protected by Coast Guard regulations.

Sec. 3. This section amends the Ports and Waterways Safety Act of 1972 to allow the Secretary of Transportation to establish an off-shore vessel traffic control system in the ports, navigable waters, territorial seas and fisheries conservation zone of the United States. The traffic control system will establish a surveillance and communications capability for identifying the location and course of vessels and for communicating with them. It will include regulations for control of vessel traffic which include, but are not limited to, times for entry, movement or departure; vessel routing schemes, including mandatory shipping lanes; vessel size and speed limitations and vessel operating conditions; and restricted operation, in any hazardous area or under hazardous conditions by any vessel which has particular operating characteristics or capabilities.

The traffic control system will also direct the anchoring, mooring, or movement of any vessel when necessary to prevent damage to the vessel or its cargo, stores, supplies or fuel; require vessels to install the equipment necessary for compliance; and establish procedures for reporting to and utilizing the Vessel Traffic, Safety and Discharge Information System.

A Vessel Traffic Safety and Discharge Information System will be established and administered by the National Transportation Safety Board. The System will include, but is not limited to: all registration, personnel licensing, ownership and financial responsibility records of each vessel even cleared to enter U.S. ports; records of each violation of regulations promulgated under any section of this Act; and reports of investigations and inspections conducted pursuant to this Act. The Board will assume all responsibility for the functions of the Port and Safety Reporting System established pursuant to the Federal Ports and Waterways Act of 1972. Thus, it will investigate and report on any major spill of oil or other hazardous substance in the waters protected by this Act under the direction of the Secretary.

There will be within each U.S. port a capability for accessing the System; and the National Transportation Safety Board will, within eighteen months of enactment, report to the Congress on the adequacy of existing short range navigational aids in shipping lanes and make recommendations for improvements or modifications.

However, nothing in this Title will apply to any vessel of any foreign nation which is in transit through the waters protected by the Act, or in transit through part of any international strait, which is not destined for a port or a place in the United States.

The Secretary of Transportation shall establish, for any vessel affected by this section, such additional standards governing the design, construction, alteration, repair, manning and maintenance of any vessel as may be necessary for increased navigation and vessel safety and for enhancing the protection of the marine environment. The standards include, but are not limited to; superstructures, hulls, cargo holds or tanks, fittings, equipment, appliances, propulsion machinery, auxiliary machinery and boilers; the handling or stowage of cargo and the machinery and appliances used for such handling; the equipment and appliances used for life saving, fire protection and prevention and mitigation of damage to the marine environment; the requirements for manning vessels and the duties and qualifications of the vessel's officers and crew; the vessel's maneuvering, stopping ability and other features which reduce the possibility of collision, grounding or other accidents; the reduction of cargo loss in the event of an accident; and the reduction or elimination of discharges during ballasting, deballasting, cargo handling or other such activities.

All vessels under the Act's jurisdiction will be equipped, after January 1, 1978, with the following: a radar system with short-range and long-range capabilities and with true-north features; a collision avoidance system; a loran-C long-range navigation aid; satellite navigation capability; a transponder which can automatically report position and identification; adequate voice communication equipment; a fathometer; two gyrocompasses; up-to-date charts; a segregated ballast system and a gas inerting system, if the vessel carries oil in bulk and is of a size in excess of 20,000 deadweight tons; a double bottom fitted throughout the cargo length of the vessel or a double hull, if the construction of the vessel is contracted for, or actually commenced, after June 30, 1977; a redundant propulsion source; shaft horsepower in the ratio of one horsepower to each two and a half deadweight tons; and adequate fire prevention equipment.

Amendments to Sec. 202 also prohibit vessels from entering U.S. navigable waters unless they have received a certificate of compliance by the Secretary. The certificate is issued if, after an inspection pursuant to Sec. 403 of the Ports and Waterways Safety Act, as amended, the vessel is found in compliance with the provisions of Title 52 of the Revised U.S. Statutes and the rules and regulations applicable to vessels under this section, or any other law or treaty. The Secretary will cooperate with the State Department to establish inspections at ports of loading by Coast Guard inspectors. No vessel will carry any cargo it is not certified to carry and the certificate can be revoked for noncompliance. Otherwise, the certificate will remain valid for a period not to exceed one year.

The Secretary shall prescribe manning and training requirements for vessels. The standards can include, but are not limited to: instruction in vessel and cargo handling and vessel navigation under normal operating conditions in coastal and confined waters and on the high seas; instruction in vessel and hazardous cargo handling and vessel navigation in emergency situations under accident or potential accident conditions; license qualifications by specific class and size of vessels; measurement of qualification for licenses by use of simulators developed for the training of marine-oriented skills; health and physical fitness criteria for all personnel; periodic retraining, and specific training for upgrading positions, changing vessel class or size, or assuming new responsibilities; determination of licenses, conditions of licensing, and period of licensing by reference to experience, amount of training completed, and regular performance testing completed, and regular performance testing; recordation of safety and/or pollution control violations on licenses; or suspension of personnel with an unsatisfactory record of compliance with safety and pollution control standards.

No personnel holding licenses of a foreign nation will serve as bridge officers of a vessel entering United States waters unless the Secretary has certified that the licensing nation's manning and training requirements are substantially similar to those established in the Act.

The Secretary of Transportation is authorized to have persons serve as maritime safety officers with the power, with or without a warrant or other process, to arrest any person suspected of disobeying the provisions of the Act; to board and inspect any vessel which is subject to the Act's provisions; to enter and inspect any short area, containing any dock, bridge or other structure which is subject to the Act's provisions; and to order any vessel to anchor or operate in a directed manner if it is reasonable to assume that the vessel does not comply with any regulation issued under the Act or if it is believed that the weather, visibility, sea conditions or the vessel's conditions jeopardize safety.

An inspection program will be established so the vessel is inspected at least once each year and so there is a program of unannounced inspections.

Inspections may be conducted by a maritime safety officer appointed by the Secretary or by an agent of qualified inspection organizations approved by the Secretary. The owner of the inspected vessel will reimburse the Secretary for the inspection's cost. Vessels will have on board such documents that the Secretary deems necessary for proper inspection or enforcement.

All records of the inspection program will be kept in the Vessel Traffic Safety and Discharge Information System mentioned in a prior section. The Secretary may accept, as evidence of compliance with the Act's provisions, any certificates or documents issued by any foreign nation pursuant to any treaty, convention or other international agreement to which the United States is party.

Any person founded by the Secretary, after

notice and an opportunity for a hearing in accordance with section 554 of Title 5, U.S. Code, to have committed an act prohibited by the Act will be liable for a civil penalty not to exceed $25,000 for each violation. Each day of a continuing violation will constitute a separate offense and the civil penalty for these offenses will be determined by the Secretary after considering the nature, circumstances, extent and gravity of the prohibited acts committed and the degree of culpability, any history of prior offenses, the ability to pay and other necessary matters. Any person who willingly and knowingly commits an action prohibited by the Act is subject to a criminal penalty. The offense is punishable by a fine of not more than $50,000 or imprisonment for not more than one year, or both. If a dangerous weapon is used or if bodily injury is considered, the offense is punishable by a fine of not more than $100,000 or imprisonment for not more than ten years, of both.

TITLE III—FINDINGS AND PURPOSES

The Congress finds that the lack of technology which insures tanker structural integrity and maneuverability poses a serious safety hazard to the marine environment. And, the lack of equipment to contain or recover oil spills on the high seas remains a serious deficiency in efforts to protect the marine environment. There is a need for effective and intensive oceanographic research to provide the government with necessary information.

The purpose of this section is to establish an effective program of engineering, naval architectural and materials research to produce safer vessels and effective oil spill recovery systems and to consolidate basic ocean sciences research and establish a national plan for oceanographic research.

The Secretary of Transportation will establish within the Coast Guard the Office of Operational and Environmental Safety Research which will, in cooperation with the National Transportation Safety Board and the Environmental Protection Agency, be responsible for all engineering, architectural, materials and other research related to vessel integrity and safety of structures and operations.

Eighteen months after the enactment of the Act, the Office of Operational and Safety Research will furnish reports to the Senate Commerce and/or Appropriations Committee on the following: the adequacy of vessel control and stopping systems; possible new vessel bridge design standards; an evaluation of markings of U.S. waterways, harbors and navigational hazards in consideration of increased tanker traffic; recommendations on standards for ongoing training for physical conditions of licensed officers, including a review of standards for female officers; regulations for deepwater port handling of oil and other hazardous cargo, and navigation in and around these ports; the development potential of high seas, foul weather recovery technology; and the effectiveness of chemical cleanup methods including dispersants, burning agents and oil-water separations.

The Secretary of Commerce will establish within the National Oceanic and Atmospheric Administration (NOAA) an Office of National Marine Research and Information which will assume all research functions of NOAA and all responsibility for coordinating and directing federal non-military research related to U.S. waters and natural resources. The Office's Director will establish an interagency Oceans Research Planning Board which will include, but is not limited to, representatives of the Coast Guard, the EPA, the National Marine Fisheries Service and the Office of the Sea Grant Program. The Board will complete a National Ocean Research Plan within two years of enactment. The plan will outline a national ocean research program and will include, but not be limited to, work on the effects of ocean movement on petroleum and petroleum products, the effects of water temperature on movement and dispersal of petroleum and petroleum products and the effects of oil on the marine eco-system.

NUTRITIONAL BENEFITS FROM FEDERAL FOOD PROGRAMS

Mr. HUMPHREY. Mr. President, I wish to share with my colleagues an article in the March 1977 issue of the American Journal of Diseases of Childhood entitled, "Nutritional Benefits From Federal Food Assistance."

This article, by Anthony G. Kafatos and Paul Zee, indicates that USDA supplemental feeding led to a marked improvement in the height, weight, head circumference, and levels of hemoglobin, serum iron, and vitamins A and C in the cases of 4,000 preschool black children from low-income families in South Memphis over a 3-year period.

Those of us who helped pioneer the WIC program were convinced that basic health improvements and ultimately mental development would be the result of such feeding programs. Other indicators have also suggested important benefits from WIC and other feeding programs.

While additional work is needed in terms of improving the data from such programs, I am certainly encouraged that these indicators showed marked improvement over the 3-year period.

The article ended:

We conclude that federal food assistance to pre-school children produces significant improvement in growth rates and other nutritional measurements and that such programs should be improved and continued to eradicate persisting deficiencies.

Mr. President, I ask unanimous consent that this article be printed at this point in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

NUTRITIONAL BENEFITS FROM FEDERAL FOOD ASSISTANCE

(By Anthony G. Kafatos, MD, MPH, and Paul Zee, MD, PhD)

Approximately 4,000 preschool black children from low-income families in South Memphis participated for three years in a supplementary food program sponsored by the US Department of Agriculture. Part of this group received additional benefit from food stamps, day-care centers, and an infant-feeding program. We evaluated the effects of this participation in 250 children selected randomly from the enrollment list of the supplementary program. Each child was examined for height, weight, head circumference, and levels of hemoglobin, serum iron, and vitamins A and C. The data were then compared with those from a similar survey in the same area conducted three years before.

The results of this comparison indicate considerable improvements in height and weight and a reduction in the incidence of anemia and in the numbers of children with low plasma vitamin A levels.

In the absence of other recognizable intervening factors, we concluded that federal food assistance programs were primarily responsible for the observed nutritional improvements.—(*Am J Dis Child* 131:265–269, 1977)

In 1969, high frequencies of stunted growth and anemia were found within the preschool population of a predominantly black community in South Memphis.[1] These deficiencies were attributed to an inadequate diet due to low family income, and these data provided us with baselines for evaluating the effects of increased federal food assistance to the children of this urban community. Reported here are the results of a follow-up nutrition survey conducted in 1972 after the study population had participated for three years in a supplementary food program sponsored by the US Department of Agriculture (USDA) and had received additional benefit from food stamps, day-care centers, and an infant-feeding program. These findings, by comparison with baseline values, demonstrate considerable improvements in height and weight and a significant decrease in the frequency of anemia.

COMMUNITY CHARACTERISTICS

The subjects of this survey were all residents of a predominantly black community in South Memphis. The area encompasses nine census tracts and in 1970, had a population of 37,520, of whom 4,972 were under 6 years of age.[2] Living conditions from 1969 to 1972 were typical of those in urban poverty neighborhoods: nearly 20% of the 10,902 occupied housing units were dilapidated or deteriorating; overcrowding was common, with more than one person per room in 30% of the houses; and many homes were without adequate kitchen or plumbing facilities. The median family income for each of the nine census tracts ranged from $2,986 to $4,783 a year. Yearly earnings for one half the families were below official poverty guidelines, and 34% to 54% of this group received public financial assistance.[3] According to census statistics, 11.4% of the male labor force was unemployed in 1970.[2]

Averaged data on infant mortality and prematurity in the community were available for the period of 1966 to 1971 (Memphis and Shelby County Public Health Department, unpublished data, September 1973). From 1966 to 1968, infant mortality per census tract ranged from 22 to 84 per 1,000 live births (Memphis mortality, 25 infants); from 1969 through 1971, they ranged from 13 to 37 per 1,000 live births (Memphis mortality, 17.5 infants). The incidence of low birth weights ranged from 18 to 28 per 100 live births in 1966 to 1968 (Memphis rate, 12 infants) and from 14 to 25 per 100 live births in 1971 (Memphis rate, 10.1 infants).

Three clinics staffed by nurses and nurse practitioners from the Public Health Department are open in the area on weekdays to provide immunizations and treatment for minor illnesses. Before 1969, the majority of preschool children in this community did not benefit directly from federal food assistance. Only 14% of the families participated in the food stamp program, and USDA supplementary foods were not being distributed in the area. The nutritional status of these children was poor.[1] Approximately 50% of the preschool population were below the 25th percentiles for height and weight on anthropometric charts, and low plasma vitamin A levels and anemia were common. These deficiencies correlated with low income and a consequent inability to obtain a sufficient quantity and quality of food.

Early in 1969 a supplementary food program was initiated in the community through a contract between the US and Tennessee Departments of Agriculture, the Memphis and Shelby County Health Department, St. Jude Children's Research Hospital, and Memphis Area Project South (MAP-South), a black self-help organization that has been active

Footnotes at end of article.

in the area since 1967. Families in need of supplementary food are identified by MAP-South neighborhood aides who live and work in the community. Medical personnel at St. Jude Hospital authorize the distribution of food, using the following criteria to determine eligibility: (1) the family must reside in the MAP-South area (nine census tracts), (2) family income must be below poverty guidelines of the federal government, and (3) the children must be less than 6 years of age.

The types and quantities of supplementary food are determined from criteria of the USDA. The monthly allotment for children of three different age groups is presented in Table 1. In addition, a prepared infant formula enriched with iron, minerals, and vitamins had been provided since 1970 to all newborns in the community for the first six months of life. This formula and occasionally other foods are financed from private sources.

TABLE 1.—MONTHLY ALLOTMENT OF USDA SUPPLEMENTARY FOOD TO CHILDREN 0 TO 6 YRS. OF AGE

Food item and unit of issue (gm)	Quantity per child by age group		
	0–12 mo	13 mo–3 yr	3–6 yr
Evaporated milk, can, 369	30	30	10
Farina,[1] box, 397	2	2	2
Corn syrup blend, bottle, 680	3	0	0
Fruit juice, can, 1,361	2	3	3
Scrambled egg mix, package, 340	2	4	4

Peanut butter,[2] can, 907	0	1	1
Instant potatoes,[3] package, 454	0	1	1

[1] Wheat cereal.
[2] Discontinued from August 1970 to April 1972.
[3] Discontinued in February 1971.

POPULATION SAMPLE

The population surveyed consisted of approximately 4,000 preschool children enrolled in the supplementary food program in 1972. Cross-sectional samples and sampling procedures were similar to those in the 1969 survey.[1] Every 12th family chart was taken from the MAP-South files for a total of 340 charts. Despite at least three attempts, 26% of the families could not be contacted at home or the legal guardian was not available to give consent. Another 32% of the families were lost because of incomplete or incorrect addresses or because a child had become ineligible for the survey. Moving without leaving a new address was the most frequent cause of our failure to locate families in the original sample. The migratory nature of the study population was not unexpected, as the 1970 census indicated that 49% of the residents had moved since 1965.[2]

From the 340 charts, we were able to locate 154 families with 250 preschool children (primary sample). The distribution of this sample by age and sex is given in Table 2. A secondary sample of 60 children, or every 4th child in the primary sample, was brought to the St. Jude Nutrition Clinic for a complete pediatric workup.

TABLE 2.—PRIMARY SAMPLES: DISTRIBUTION BY AGE AND SEX [1]

Age (years)	Boys		Girls	
	1969	1972	1969	1972
0 to 1	13	20	8	19
1 to 2	20	14	29	24
2 to 3	24	21	23	21
3 to 4	27	15	23	27
4 to 5	38	20	30	22
5 to 6	31	20	34	27
Total	153	110	147	140

[1] Total boys and girls: 300 in 1969 and 250 in 1972.

Footnotes at end of article.

MATERIALS AND METHODS

All home visits and measurements were made by one of us (A.G.K.) with the help or an assistant from the St Jude Nutrition Clinic. The purpose of the visit was explained to the parents and with their consent, the child's general condition was evaluated. Recumbent length or height was measured with a metal tape permanently attached to a plank with a fixed headboard. Weights were determined with a portable scale that was standardized with a 11.3-kg weight before each examination. Each height and weight was plotted on the appropriate anthropometric percentile grid of Stuart and Stevenson.[4] Head circumferences were measured with a plastic tape and plotted on the Nellhaus grid.[5] The variability in physical measurements between the 1969 and 1972 surveys could not be tested.

Capillary blood was obtained for the following tests: (1) hemoglobin concentrations and red and while blood cell counts by Coulter counter, which automatically computes the hematocrit and red blood cell indices; (2) total serum protein content and serum albumin value,[6] (3) vitamin A and C levels.[7-9] Test results were analyzed by the x-square method.[10]

Children in the secondary sample received a complete pediatric examinaton. This included blood tests for the presence of sickle cell hemoglobin and glucose-6-phosphate dehydrogenase deficiency,[11] as well as measurement of serum iron value and total iron-binding capacity.[12]

RESULTS

In 1969, 16% of the preschool children in this urban community were below the 3rd percentiles for height and weight on the Stuart-Stevenson grid, and 50% were below the 25th percentiles,[1, 4] By 1972, heights had shifted significantly to a more normal distribution, and weights were significantly improved in the 25th and 50th percentile groups (Table 3). Head circumferences were more than two standard deviations below the reference mean in 15% of the 300 children surveyed in 1969. Three years later, the frequency of below-normal head sizes was 12% among 250 children who were 0 to 6 years of age and 9% among 77 children who were 0 to 2 years of age, all of whom had received an enriched infant formula for the first six months of life.

TABLE 3.—DISTRIBUTION OF HEIGHTS AND WEIGHTS ON ANTHROPOMETRIC CHARTS [1]

	Heights [2]		Weights [2]	
	1969	1972	1969	1972
Below 3d percentile	16	6	16	12
Below 25th percentile	50	29	50	39
Below 50th percentile	70	54	73	58
Below 75th percentile	90	72	86	78
Total number of children	300	250	300	250

[1] Reference values were those of Stuart and Stevenson.
[2] Changes in height were statistically significant ($P<.001$) for all percentile groups, whereas those for weight were significant in the 25th ($P<.01$) and 50th ($P<.001$) percentile groups only.

The possible contribution of low birth weights (<2,500 gm) to the above findings was examined. Precise birth weights were available for 226 of the 250 children in our primary sample. Of this number, 30 children weighed less than 2,500 gm at birth. In the present survey, 45% of this group were above the 50th percentile for height; the remaining children were clustered in the lower percentiles. As shown in Table 4, this latter group did contribute to the excess number of small children encountered during the survey, but the effect was slight.

TABLE 4.—CONTRIBUTION OF CHILDREN WITH LOW BIRTH WEIGHT TO FREQUENCY OF SUBNORMAL HEIGHT AND WEIGHT

	Height (percentile)		Weight (percentile)		Total number of children
	Below 3d	Below 10th	Below 3d	Below 10th	
1969:					
Normal birth weight	15.0	25.7	10.7	22.9	140
Normal and low birth weight	17.4	28.9	16.2	28.3	166
1972:					
Normal birth weight	5.1	11.2	9.7	19.9	196
Normal and low birth weight	5.8	11.9	11.5	23.0	226

Mean hemoglobin concentrations and hematocrit readings are shown in Table 5. Although averaged hemoglobin values were normal (>10 gm/100 ml) for the 0- to 3-year-old age group in both surveys, the frequency of anemia was significantly greater in 1969 than in 1972 (Table 6). In the first survey, 25.7% of preschool children had hemoglobin levels of less than 10 gm/100 ml, compared to 10.9% three years later. This decrease in prevalence of anemia was more clearly demonstrated in the children who were born after 1970 and who were thus eligible for an iron-enriched formula during the first six months of life. Only 10% of this group had hemoglobin values below 10 gm/100 ml, whereas in the prior survey the rate for children born from 1967 to 1969 was 40%. When low-birth-weight infants were excluded, these frequencies were 11% and 39%, respectively. Significant decreases in frequency of anemia were also noted for the 3- to 6-year-old age group (Table 6).

Serum iron values for 55 children from the 1972 secondary sample substantiated the presence of iron-deficiency anemia. Fifty-three per cent of the children less than 2 years of age had transferrin saturation values under 15%, and 37% of those between 2 and 6 years of age had values of less than 20%, which is compatible with iron deficiency. Thirty-six per cent of the children had normal hemoglobin levels associated with low transferrin saturation. The prevalence of sickle cell hemoglobin (7%) and of glucose-6-phosphate dehydrogenase deficiency (11%) in the secondary sample was comparable to that in the general black population.

TABLE 5.—MEAN HEMOGLOBIN AND HEMATOCRIT LEVELS IN PRIMARY SAMPLES

Age group	Hemoglobin concentration, gm/100 ml		Hematocrit reading, percent	
	1969	1972	1969	1972
0 to 3 yr:				
Number of patients	123	119	123	119
Mean	10.9	11.5	33.7	33.9
SD	1.4	1.2	2.9	3.4
3 to 6 yr:				
Number of patients	177	131	177	131
Mean	11.6	11.8	34.4	35.2
SD	1.1	0.9	2.4	2.6

TABLE 6.—DISTRIBUTION OF HEMOGLOBIN LEVELS

Hemoglobin range, gm/100 ml	Children, percent [1]			
	0 to 3 yr		3 to 6 yr	
	1969	1972	1969	1972
<9	9.8	5.0	1.7	0
9 to 9.9	17.9	5.9	7.9	3.8
10 to 10.9	22.0	18.5	15.3	6.9
11 to 11.9	25.2	32.7	40.7	39.7
12 to 12.9	21.1	31.1	24.3	40.5
13 to 13.9	3.2	5.0	8.5	7.6
>14	.8	1.7	1.7	0

Footnotes on following page.

[1] The prevalence of hemoglobin levels below 10 gm/100 ml in children 0 to 3 yr of age dropped from 27.7 percent in 1969 to 10.9 percent in 1972 ($P < 0.001$). In the older children, the frequency of hemoglobin values below 11 gm/100 ml dropped from 24.9 percent to 10.7 percent ($P < 0.01$). The total number of children 0 to 3 yr of age in the 1969 survey was 123; in the 1972 survey, 119. The total number of children 3 to 6 yr of age in the 1969 survey was 177; in the 1972 survey, 130.

The mean plasma vitamin A concentration (±SD) in 1969 was 22.6±13.0 μg/100 ml and in 1972 it was 26.8±20.3 μg/100 ml. Mean carotene levels (±SD) were 90.2±33.2 μg/100 ml and 88.9±39.7 μg/100 ml, respectively; in both survey years, two thirds of these values were within the low or acceptable range, i.e., below 100 μg/100 ml.[9] Inherent in the vitamin A-carotene procedure is the possibility that the high carotene values may be associated with low vitamin A levels. This correlation was indeed present in our sample but to a low degree (correlation coefficient, $r=0.30$) when deficient vitamin A levels were correlated with their associated carotene concentration. Carotene values ranged from 14 to 197 μg/100 ml and fell well within the range of linearity for our method, which is from 0 to 300 μg/100 ml.

Although no gross clinical signs of hypovitaminosis A were noted in 1969, 44% of 57 randomly selected preschool children had plasma vitamin A levels below 20 μg/100 ml (Table 7), the lowest acceptable value in healthy children.[9] In 1972, only 27% of 250 children had levels below this concentration. Ascorbic acid concentrations, not measured in 1969, were low in 18% of all children examined and deficient in 5.2% (Table 7). Albumin levels below 3.5 gm/100 ml were found in 5.7% of 209 children in 1969 but in only 2% of the 248 children examined in 1972, which represents a statistically significant improvement ($P<.05$).

TABLE 7.—FREQUENCY OF LOW BLOOD LEVELS OF VITAMINS A AND C

Deficient or low concentrations [1]	Percent	
	1969 (57 children)	1972 (250 children)
Vitamin A:		
<10 μg/100 ml	18	[2] 6
<20 μg/100 ml	44	[2] 27
Vitamin C:		
<0.1 mg/100 ml	[3] NT	5
<0.2 mg/100 ml	NT	18

[1] Data from Interdepartmental Committee on Nutrition for National Defense.
[2] † P <0.001.
[3] ‡ NT indicates not tested.

Physical examinations, chest roentgenograms, and skin tests for tuberculosis and histoplasmosis showed no evidence of serious chronic infections. The incidence of mild upper respiratory tract or skin infection was 25% in 1969 and 20% in 1972. White blood cell counts higher than 10,000/cu mm were found in 20% of the children in 1972.

Economic conditions in the community remained depressed during the evaluation period (Table 8). Half of all families surveyed earned less than $2,500 a year, compared to $1,838 a year in 1969. The 1972 federal poverty guidelines [4] list $2,790 as the lowest acceptable annual income for a family of two and $5,880 for a family of seven, the median number in this study. Participation in the federal food stamp program rose from 14% in 1969 to 56% in 1972, while the percentage of children receiving free meals at day-care centers rose from 0% to 10%. The median charge for food stamps purchasing $145 of food was $38 a month. Seventeen per cent of these households did not spend additional cash for food; the remaining families spent an extra $35 a month on meals.

TABLE 8.—Information from Family Interviews*

	1969	1972
Median annual income per household	$1,838	$2,500
Median annual income per capita	$334	$396
Median household size	6.8	7.0
Participation in food stamp program, %	14	56

* Data compiled from 130 (1969) and 145 (1972) successful interviews.

COMMENT

Federal support to child nutrition programs increased substantially during the three-year period from 1969 to 1972. In fiscal 1972 Congress appropriated $1.2 billion for this purpose, a three-fold increase over the 1969 appropriation.[13] Although several small-scale evaluations have been completed and more ambitious studies are underway,[13 14] the benefits of this strengthened federal support are still doubted by some.[15]

The present survey indicates definite nutritional improvement among black preschool children who participated in federal food assistance programs in South Memphis. High frequencies of retarded height and weight, first noted in 1969, had significantly decreased by 1972, with the distribution of heights approaching that for healthy white children living under normal conditions of home life in Boston (Table 3). Data for healthy black children receiving optimal care were not available for comparison; however, growth rates for blacks have been found by others to be nearly identical to those of whites.[16–18] The frequency of anemia also improved significantly during this period, from approximately 25% in 1969 to 11% in 1972 (Table 5).

As in most large-scale nutrition surveys, the data in this study are cross-sectional and do not speak to the nutritional experience of individual children. We encountered uncontrollable variables that prevented direct correlation of food consumption with nutritional improvement. For instance, we were not able to monitor a child's actual daily intake of food, nor could we control whether or not a family collected its food allotment on a regular basis. Nevertheless, in the absence of other recognizable intervening factors, we believe that the following factors were primarily responsible for the observed nutritional improvements: (1) community implementation of a USDA supplementary food program, (2) six-month's provision of a fortified infant formula to all newborn infants in the community, (3) a 56% participation in the food stamp program, and (4) free meals provided by day-care centers. Changes in family size and annual family income (Table 8) were not sufficient to be considered as major contributing factors. A social and political awakening within the population could have stimulated greater self-reliance and resourcefulness and hence resulted in improved diets, but this possibility could not be substantiated. A reduced rate of prematurity in the nine-census-tracts area would have contributed to improved growth indices, but the annual percentages of low birth weights in the 1969-to-1972 period were not significantly different from each other (16.0%, 16.5%, and 17.6%, respectively).

Despite the improvements demonstrated by this survey, a number of nutritional deficiencies still persist in this preschool population. A probable explanation is that the food packages are not designed to guarantee intake of all necessary nutrients. The persistence of anemia in these children undoubtedly stems from insufficient iron to supplement the home diet. Farina, a wheat cereal fortified with iron, is distributed throughout the community but is disliked by most of the children and consequently not eaten. The high incidence of low vitamin A and C levels may be due to a variety of reasons: the scarcity of vegetable and fruits in the Memphis ghetto diet; the aversion of most children to vegetables, even if they are offered; and the low vitamin A content of the supplementary foods. Some of these deficiencies could be corrected by proper nutritional counseling, which presently is a serious omission in food distribution programs involving commodities or stamps. However, the expense of providing a large population with professional counseling can be prohibitive. Certainly a less expensive and equally effective approach would be to adjust the commodity food program to the deficiencies of its recipients. Such programs should also provide more protective foods. A striking example of how effective this can be was shown by an earlier study of infants who received a six-month's supply of iron-fortified formula after birth.[19] Frequencies of anemia and hypovitaminosis A in this group were significantly lower than in a similar group fed evaporated milk.

We conclude that federal food assistance to preschool children produces significant improvements in growth rates and other nutritional measurements and that such programs should be improved and continued to eradicate persisting deficiencies.

INDIA: THE WORLD'S LARGEST DEMOCRACY

Mr. KENNEDY. Mr. President, the news from India this week is surely a source of encouragement and inspiration for all who believe in democracy. This week's election in India is not only a high tribute to the democratic tradition of the Indian people, but to the democratic spirit of its leaders.

All friends of India, and of democratic government, will welcome these developments in India—which began some several weeks ago with the announcement by Prime Minister Indira Gandhi of new elections.

Her actions then, and her statement today to the people of India, augur well for the world's largest democracy and they redeem Mrs. Gandhi's pledge in 1975 to remain faithful to India's democratic tradition. She—and all Indians—have every right "to be proud of their great country."

Mr. President, I wish to share with the Senate the important remarks of Mrs. Gandhi, and I ask unanimous consent that her statement be printed in the RECORD.

STATEMENT OF INDIRA GANDHI TO THE PEOPLE OF INDIA, MARCH 22, 1977

The Collective judgment of the people must be respected. My colleagues and I accept their verdict unreservedly and in a spirit of humility.

Elections are a part of the democratic process to which we are deeply committed. I have always said, and I do believe, that winning or losing of elections is less important than the strengthening of our country and insuring a better life for our people.

I give my good wishes to the new government that will be formed. I hope that the secular, socialist and democratic foundations of India will be reinforced. The Congress Party and I are ready to give constructive cooperation in the common tasks that face our nation.

We are proud of our great country. As I take leave of you as Prime Minister, I should like to express my deep gratitude to my colleagues, to my party, and to millions of men, women, and children who have given me their trust, their cooperation, and even their affection over the years. My love and concern for the welfare of every section of the people remains unchanged. Since childhood my aim has been to serve the people to the limit of my endurance. This I shall continue to do. My good wishes to you now and always.

THE NEED FOR INTERNATIONAL PRICE STABILIZATION FOR COMMODITIES

Mr. HUMPHREY. Mr. President, President Carter is to be commended for displaying a sensitivity to the economic concerns and problems of the less developed nations of the world. The President should also be commended for the judiciousness in which he has selected his international economic policy team which will be dealing with these problems.

In order to come to grips with the increasing gap between the rich and poor nations of the world, the President has taken the initiative on a number of fronts. First, he has pledged the United States to significant increases in concessional economic assistance, both bilateral and multilateral. Second, and just as importantly, the President has demonstrated a willingness to discuss the issue of agreements aimed at stabilizing the commodities of the less developed nations.

In raising the issue of wildly fluctuating prices for primary commodities of less developed nations, the New York Times noted in an editorial last week:

Such wild price gyrations have become common in freely traded commodities, creating a climate of uncertainty among producing and consuming nations. For the United States, uncertainty is not a major problem; much as a consumer may hate to pay $3.50 a can for a Max-Pax, the impact of coffee prices on the United States living standards is not great. The economy is so rich and diversified that it can take such ups and downs in stride.

But for the less developed countries specializing in a single export, such as tin or rubber or coffee, price fluctuations can be devastating. Hard times may push the incomes of millions of laborers below subsistence. Good times bring relief, yet sow the seeds for future collapse as small producers rush to expand output. In addition, price fluctuations may make it impossible to attract needed foreign investment: Most banks and corporations are leery of staking the future on a roller coaster.

One answer to the problem is commodity price stabilization: long-term agreements between suppliers and consumers that allow both to plan for the future. . . .

Mr. President, it is essential for the United States to take the lead in establishing mechanisms which will lead to a more equitable and stable international economic system in which all nations could derive benefit. The issues of trade, debt, commodity price stabilization, and technology transfer are all legitimate and critical concerns of the developing nations. At present, the debt service burden for many of these countries is reaching the crisis point. The price of petroleum from the OPEC countries—an essential commodity—combined with the need for manufactured goods from Western industrialized nations, have skyrocketed since 1973. At the same time, the governments of many developing countries have seen the prices of their primary commodities plummet, leaving little if any resources available for internal development needs.

This set of circumstances creates a nightmare for any economic planner, who may be able to gage the cost of imports of essential commodities for his country, but has no idea what the future price will be for the primary export of that country, which must balance off imports. Commodity stabilization agreements would guard against this uncertainty—an uncertainty which is a major impediment to development in many third world countries.

Mr. President, it is essential for the United States to begin grappling with this growing disparity between the rich and poor nations of the world. As Mr. William Colby, former Director of the Central Intelligence Agency, testified before our Senate Arms Control Subcommittee, this growing gap in income between the rich and the poor is as much a threat to the security of the West as any strategic nuclear imbalance between the United States and the Soviet Union. It is time we begin weighing the costs of what should be done today in creating a more stable and equitable international economic system against the potential disastrous future costs if we fail to act.

Mr. President, I ask unanimous consent that the New York Times editorial be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

[From the New York Times, Mar. 14, 1977]

BRAKING THE COMMODITY ROLLER COASTER

The other day commodity dealers paid about $2.15 a pound for cocoa. One year ago a pound cost 75 cents. In November 1974, refiners frantically snapped up scarce raw sugar for 57 cents a pound. Today those refiners can buy all they want for 11 cents a pound.

Such wild price gyrations have become common in freely traded commodities, creating a climate of uncertainty among producing and consuming nations. For the United States, uncertainty is not a major problem; much as a consumer may hate to pay $3.50 a can for Max-Pax, the impact of coffee prices on United States living standards is not great. The economy is so rich and diversified that it can take such ups and downs in stride.

But for less developed countries specializing in a single export, such as tin or rubber or coffee, price fluctuations can be devastating. Hard times may push the incomes of millions of laborers below subsistence. Good times bring relief, yet sow the seeds for future collapse as small producers rush to expand output. In addition, price fluctuations may make it impossible to attract needed foreign investment: Most banks and corporations are leery of staking the future on a roller coaster.

One answer to the problem is commodity price stabilization: long-term agreements between suppliers and consumers that allow both to plan for the future. The idea has long been advocated by the less developed countries; agreements on tin and coffee exist today, at least on paper. But under the Ford Administration, opposition from Treasury Secretary William Simon prevented active participation by the world's largest consumer, the United States. The Carter Administration has now expressed a willingness to discuss the subject, though it has not yet taken a position, preferring to wait until the poor nations have made their case, in meetings this spring.

Ideally, commodity agreements stabilize prices through the use of production controls or stockpiles. By agreement, when prices fall because of abundant harvests or reduced demand, the producers either restrict output, or sell the excess to a stockpile maintained by the agreement partners. When prices rise,

production quotas are suspended and "buffer stocks" are sold on world markets. The object is to reduce the annual swings in price.

William Simon vetoed price agreements as a matter of principle. A free marketeer, Mr. Simon viewed any move away from unfettered competition as a step backward. Ideology aside, other critics have been skeptical that international agreements can survive divergent national interests.

Successful stabilization clearly requires substantial international cooperation. As noted, supplies can be controlled in one of two ways: national production quotas, or stockpiles controlled jointly by producer and consumer nations.

National production quotas, which can be imposed to prevent prices from falling rapidly, unfortunately create an incentive for suppliers to cheat by selling extra output under the table. Just this sort of chiseling has spoiled past coffee stabilization agreements.

Buffer stockpiles, on the other hand, are easily monitored. But they require a substantial initial cash investment, money which would almost certainly have to be supplied by the rich consumer nations. American economists believe that for copper, for instance, a successful buffer against price fluctuation might require an outlay of $7 billion to purchase and stockpile excess supplies. But the third world's voice in these matters, the United Nations Conference on Trade and Development, is more optimistic, contending that a common fund of $3 billion could sustain stocks for ten major commodities.

It is true that stabilization agreements have rarely worked well in the past; but then, they have rarely been proposed with the present sense of urgency. Thanks to OPEC's oil prices, the developing nations are in worse shape today than they've been in decades. Stabilization agreements could give them an important boost.

The Carter Administration's current neutrality is born of conflicting motives. On the one hand, the United States has probably the smallest economic stake in commodity price stability and it would almost certainly have to finance the required stockpiles. On the other hand, Washington wants to help the poor nations. They have been living beyond their means for three years, running up huge fuel bills and paying for them with borrowed funds. Effective stabilization agreements for some commodities—cocoa, tin and rubber appear to be prime candidates—are clearly worth a try. As gesture and substance, American cooperation on price stabilization is preferable to foreign aid handouts.

AMERICANS WANT THE GENOCIDE CONVENTION

Mr. PROXMIRE. Mr. President, for over two decades now the Senate has failed to ratify the Genocide Convention. Throughout these years the Senate Foreign Relations Committee has considered this treaty numerous times and recommended its passage each time. Over 100 different human rights groups representing over 100 million Americans have worked for ratification of the Genocide Convention and continue to support the ideals for which it stands. The Senate's lack of support for this issue is not only frustrating but also unfair to millions of our constituents who want the Genocide Convention to be a part of U.S. policy.

Just yesterday a man called me, dismayed over the tragic religious persecution of missionaries in Africa. His anger was aimed not only at African leaders, but also at American leaders. He said:

All we can do is sit and wring our hands. The Senate can't even pass a bill condemning these brutal mass murders. The inhumanity lies not only in the wrongdoing, but also in the failure to try to do something about it.

This is typical of the angry citizens all over the Nation, citizens who cannot understand our hesitation to do what is obviously the moral thing to do—to pass the Genocide Convention. Mr. President, it is our responsibility to America, and to the world, to ratify the Genocide Convention now.

BOB KLEPPERICH AND THE MINNESOTA CLOSEUP PROGRAM

Mr. HUMPHREY. Mr. President, I rise today to pay tribute to an exemplary teacher and his work on a great program. I have had a special interest in educational programs which motivate our young peope to take an interest in this great country of ours. And when I see one that really works, I think it is important that we take notice. The closeup program is one that really works.

Closeup is a nonprofit, nonpartisan forum on the involvement of youth in Government. The basic method of the program is simple: To bring young people to Washington to see our Government firsthand; to meet people in Government; to see Government in action. But the result is the important thing, and the result is a genuine understanding and appreciation of the nature of our system of government and its opportunities for involvement.

Of special pride to me are the results this program has had on my own State. During the last 6 years, more than 2,400 students and teachers from around my State have had an opportunity to take advantage of this fine educational opportunity. They have taken back home to Minnesota their enthusiasm and excitement and translated it into involvement. Whenever I go back home, I see the results of these young people and I am heartened.

No program is successful without the efforts of many people. While I know that hundreds of Minnesota teachers have devoted many hours of voluntary effort to create an ongoing interest in politics and Government among these Minnesota participants, one teacher stands out for his leadership and dedication. Bob Klepperich is a teacher from Monroe High School in St. Paul, who has, for the past 6 years, been instrumental in the growth and continued success of the Minnesota program. Through his effort, the Minnesota program now includes 74 high schools from across the southern part of the State. He has gained the respect of the educators, the business community, and our political leaders. Through his quiet tutelage, he has been the true teacher—teaching all of us to work together in a true community effort.

It has recently come to my attention that Mr. Klepperich is presently in Washington for the final week of the 1977 Minnesota closeup experience. I think it is fitting that we take this opportunity to salute this outstanding educator.

COMPETITION IN THE AIRLINE INDUSTRY

Mr. ABOUREZK. Mr. President, the Senator from Massachusetts, Senator KENNEDY has been in the vanguard of the effort to revitalize competition in the airline industry. I was pleased to join him and Senator CANNON as cosponsor of the Air Transportation Regulatory Reform Act of 1977 along with Senator CHURCH of Idaho and Senator ALLEN of Alabama. The airline industry is potentially very competitive, and we must strive to inject this vital aspect of the free enterprise ethic into commercial aviation.

In this regard, Mr. President, I ask unanimous consent to have printed in the RECORD the statement Senator KENNEDY delivered on March 21, 1977, before the Subcommittee on Aviation of the Senate Committee on Commerce.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT OF SENATOR EDWARD M. KENNEDY BEFORE THE SENATE SUBCOMMITTEE ON AVIATION—HEARINGS ON S. 689, THE AIR TRANSPORTATION REGULATORY REFORM ACT OF 1977

It is a pleasure to be here today before the Aviation Subcommittee. It is especially satisfying to be here as one of the authors of S. 689, the Air Transportation Regulatory Reform Act of 1977. S. 689 would modernize the federal regulatory scheme that a depression-weary Congress imposed on a fledgling airline industry in 1938.

S. 689 is the outgrowth of an emerging consensus among legislators, executive branch officials, consumer groups, airline regulators, economists, and many in the business community that rigid federal economic regulation of the airlines tends to increase prices, foster inefficiency and perpetuate excessive government control, bureaucracy and red tape. This consensus cuts across political parties—President Jimmy Carter and former President Gerald Ford have both made airline regulatory reform high priority items on their legislative agendas. The consensus crosses some usually quite impregnable ideological boundaries—the American Conservative Union, on the one hand, and Ralph Nader on the other, begin from distant starting points yet end up in the same place. The consensus has been built brick by brick in recent years by serious and careful non-partisan examinations of the economics of today's airline industry and the nature of government and competition in the 1970's.

In my 14 years in the Senate, I have seldom come across a national economic problem of such apparent complexity and political sensitivity that has been studied by so many independent and diverse sources yet prompted sets of recommendations that are so similar. While the academic economists, the think tanks, the government officials, the congressional committees and millions of citizens in homes, offices and factories all over the Nation are wrangling over what should be included in an economic stimulus package, those same forces are in surprisingly detailed agreement on what to do with airline regulation. Virtually every independent study undertaken in the last 20 years has concluded that less regulation is the appropriate policy. Whether one reads the House Antitrust Subcommittee report of 1956, the seminal and exhaustive study of the industry by Professor Richard Caves in 1965, the 1976 report of a unanimous Senate Subcommittee on Administrative Practice and Procedure, which I chaired, the recommendations of the three Republicans and two Democrats serving on the CAB last year, the Report to Congress on airline fares issued by the General Account-

ing Office earlier this year, or the President's statement to the Congress this month—the message has always been the same: namely, it is time to revitalize the airline industry with competition.

S. 689 is a responsible and effective blueprint to make that policy public law. The time for action is now. We are approaching 40 years of federal airline regulation that has been mired in the restrictive legislative provisions of the 1930's. The architects of the 1938 system were well-intentioned. But, in the 1930's, there was not much of an airline industry to regulate, and very little real-world, practical airline experience to guide the Congress. Congress was reacting to a troublesome and tragic depression that shook its faith in the free enterprise tenets of our economic system. Most importantly, the Congress was creating an agency designed not to regulate prices but prevent the dissipation of a large government mail subsidy. The restrictive price and entry provisions of the Act, which loom so large in today's regulatory system, were copied directly from the Interstate Commerce Act of 1880's governing railroads with little thought of their future effect upon an industry come of age.

Today economic conditions and the industry itself have changed radically. The total domestic industry investment in 1938 equals the cost of one Boeing 747 in 1977. The regulatory system chosen in 1938 to prevent airlines wasting federal subsidy by pricing too low is ill suited to today's airline industry and economy where the problem is to prevent airline prices that are too high. While times have changed, the regulatory scheme has not, and a fundamental overhaul is in order.

Much of the evidence underlying the need for change was submitted during hearings before this subcommittee in April and June of last year. I testified at those hearings and presented to the Aviation Subcommittee the results of a separate examination of airline regulation conducted in 1974 and 1975 by the Subcommittee on Administrative Practice and Procedure, which I chaired. The Administrative Practice Subcommittee's 255 page report and eight volumes of hearings were issued 13 months ago. The detailed findings and conclusions of the report are very familiar to the subcommittee, so I will not repeat them in full detail here. In several key areas of Board activity, however, I would like to summarize the case for change and how S. 689 addresses those problems.

REGULATION OF AIR FARES

First, I would like to focus on the problem of CAB regulation of air fares. Every coach and first-class air fare in the United States today is fixed according to a detailed formula established by the CAB. The formula is the result of several years of complicated hearing before the CAB. The formula which applies to all firms is based on the average industry costs, adjusted in several important ways, and designed to earn the industry a fair profit. The air fare level consists of a fixed charge plus a mileage charge so that trips of equal mileage cost the same. Every three months the Board publishes recent industry data from which it is a relatively easy thing for any firm to determine precisely what fare level the industry is entitled to set. A new tariff embodying that fare level can be filed and the Board should be reasonably certain to approve it.

This complex and rigid administrative system provides plenty of work for lawyers, accountants, economists, printers and file clerks but it has failed miserably to keep air fares within the reach of millions of potential travelers.

The 1938 Congress could not have known how regulated fares would differ from unregulated fares but the Congress in 1977 has a mass of credible evidence on this point. We can compare the CAB regulated fares with concrete examples of fares charged in many markets in Texas and California where carriers not crossing state lines make pricing decisions without the artificial regulatory constraints of CAB's formula.

In Texas, there is no active governmental regulation of air fares and, as a result, air fares are anywhere from 20–60% lower than the CAB formula rate and rates in comparable federally regulated markets. The situation is similar in California.

While the traveler flying the 456 miles between San Diego and San Francisco pays $32 on an intrastate carrier, the 399 mile flight between Boston and Washington on a CAB carrier costs $51.

The 150,000 yearly passengers flying the 213 miles from Los Angeles to Fresno pay $20 on the intrastate carrier, while the 650,000 yearly passengers flying the 236 miles from Los Angeles to Las Vegas pay $38 on the CAB carrier. In Texas, the CAB regulated fare between Dallas and Houston is $35 but the intrastate carrier flies that route for $25 in the day and $15 on evenings and weekends. There are dozens of other examples of low-fare, all-jet service by companies like Pacific Southwest Airlines, Air California, and Southwest Airlines in Texas.

Are these cases mere aberrations or is regularly scheduled low-fare service feasible in other markets that happen to cross state lines? The answer is an unequivocal yes. Lower-fare service is possible throughout the Nation. Studies by both Boeing and Lockheed, for example, show how their plans can be flown profitably at fares much lower than those established by the federal government. Most recently, in 188-page Report to the Congress, the General Accounting Office estimated that the nation's air fares may be anywhere from 22 to 52 percent higher than they could be under less regulation. The GAO's two-year study was based on actual airline costs and employed two separate representative samples, one consisting of 48 and the other of 110 domestic markets. Under those conditions the GAO found that from 1969 to 1974, federally regulated trunk carriers could have operated at lower costs than they did and the potential savings to travelers were estimated to be $1.4 to $1.8 billion annually, which for the six-year period translates into a potential $10 billion savings. The GAO's comprehensive study is an independent, rigorous and dramatic confirmation of the numerous studies done by well-respected economists like Theodore Keeler, James Miller, George Douglas and others. Also, it confirms the actual cost studies done by Boeing and Lockheed who build the planes and have a reasonably good idea of what it costs to purchase and operate them. Most importantly, it confirms the lessons we have been drawing from the dozens of California and Texas markets. The actual fares charged by the intrastate carriers are dramatically close to what the GAO estimated could be charged on those routes in its study. For example, the GAO's estimated unregulated coach fare for Dallas-Houston for the year 1974 is 13¢ higher than what Southwest Airlines' actually charges in 1977. Meanwhile, the CAB formula rate for that route is over $35.

If lower fares are feasible, it makes very little sense to maintain a federal pricing formula that virtually outlaws selective or general price reductions. Although today's regulatory system does sometimes allow certain types of discount fares provided they are restricted and limited in a variety of ways, there is no compelling public policy reason why the federal government should prevent airline companies from lowering their fares generally, or experimenting with cheaper coach seats on some of its routes.

S. 689 responds quite directly to this problem. Under the bill, an airline would be allowed to reduce its prices without Board interference as long as the airline covers the direct costs of the particular service to which the fare applies. It would also allow airlines to increase fares within certain limits without CAB approval. The bill recognizes that liberalized entry into markets by new and existing carriers cannot be separated from pricing freedom—one makes very little sense without the other. It is the threat of entry that will keep prices down, and make it unprofitable for an airline to try to price predatorily.

S. 689 contains a "direct cost" standard for fare reductions which will allow—but not compel—significant price reductions and prevent below-cost pricing. The most important aspect of S. 689's rate provision is the amount of downward pricing flexibility. To simply change the CAB pricing formula to allow no more than 10 or 20% fare reductions by existing carriers would be a very serious mistake.

First, it would significantly diminish the prospects of getting the deep fare reductions that theory, reality and common sense demonstrate are possible in many markets of this country accessible to tens of millions of citizens. If an airline can fly profitably and safely for $25, the Congress should not pass a law allowing a regulatory agency to require the airline to charge $40.

Secondly, restricting price cuts would tend to strengthen the current regulatory incentives for general and frequent fare increases. Since reductions of 10 to 20% do not usually generate enough additional passengers to help fill airplanes, there would be no strong incentives for an existing carrier to compete in price. Instead, most carriers would continue to engage in costly service and frill competition, and continue increasing fares regularly. In the last three and a half years, carriers have successfully sought fare increases totalling 27% and, unless the legislation we pass reorders incentives, this trend will certainly continue and could be accelerated. Service competition, high unit costs, high fares and frequent fare increases are all deeply-imbedded in the regulated airline industry. Only major legislative change will lead the industry to respond positively to consumer preference to compete through price reductions, and to compete through increased efficiency.

On the question of price increases, S. 689 allows airlines freedom to raise fares 10% per year through 1979 and 20% thereafter. If the current price reduction and entry provisions of S. 689 are maintained and administered in a spirit that conforms with their intent by current and future CAB's, then I am reasonably confident that airlines will not be in a position to use the power to raise prices in a monopolistic, unfair way. But, until and unless we totally remove all entry restrictions and the industry becomes truly price competitive, we should maintain the CAB's power to review and, if appropriate, disallow substantial fare increases.

Are the airlines ready for price competition or will it be wasteful and destructive? The fact is that current regulation brings about its own peculiar form of wasteful competition, and it exacts a fiercesome cost. The formidable regulatory controls over price competition have been circumvented through service competition. The airlines channel their competitive energies into costlier service and chase the travel dollars with frills and lavish scheduling which sends planes off across the country half-empty. This form of competition is potentially no less dangerous or risky than price competition, but regulation has no power to control scheduling. This kind of competition is very costly. It explains why airline prices can be too high at the very same time airline profits are too low.

To attract passengers who would not otherwise fly airlines should lower their prices, not fly more empty seats. Consumer travel

mushroomed on routes in California and Texas as a direct result of lower air fares. During 1970–74, for example, high-fare markets similar to Dallas-Houston grew at less than 10% per year while in Dallas-Houston where Southwest offered 30–60% fare reductions traffic increased nearly 130%. The CAB airlines are starting to learn this lesson themselves. Texas International Airlines—a major competitor of an intrastate airline—has seen traffic increase 700% on some non-Texas routes where it has started to experiment with 50% fare reductions.

One hears a variety of arguments to the effect that allowing airlines to lower their prices will not bring lower fares because airline costs are not going to go down. Some will say that the lower fares charged by intrastate carriers cannot be duplicated nationwide. This is quite simply false.

When compared to CAB carriers, the sophisticated low-fare airlines pay comparable wages to their unionized employees, pay more for jet fuel, about the same for jet planes, and perhaps a little less for salaried executives. They fly in rain as well as shine, get charged for landing at airports, and maintain their jet fleets to meet the same FAA safety standards imposed on the CAB carriers. They combine 41 years of operating experience without one fatality. Then why the lower rates?

The largest part of the difference is due to one simple fact: The intrastate carriers put more passengers on their planes. PSA puts 158 seats in a Boeing 727–200 jet aircraft and fills approximately 60% of the seats on average. American Airlines puts 121 seats on exactly the same type of aircraft, and flies it on average 55% full. Thus, when flying PSA, 95 passengers share in the cost of the flight, while on the American plane only 66 passengers must share the same cost.

So, when PSA flies the 456 miles between San Diego and San Francisco it charges $32, but when American flies between Boston and Washington it charges $51. American Airlines own cost figures show that if it put more seats in its plane and filled them 60% full it could lower its Boston-Washington fare to around $35. The fact is that fuller planes explain the lower fares, and when given the choice, consumers have invariably chosen the fuller plane, lower fare alternative. There is no economic, technical, or other reason why this cannot be duplicated nationwide.

Loosening the regulatory harness on price competition will not guarantee the perfect market place or magically make the airlines profitable overnight. Perhaps not all firms will practice it perfectly or, to borrow from economic jargon, achieve "equilibrium." But, "equilibrium" is hardly being achieved under the current system where service competition is sometimes aggressive, always costly and never perfect. The freedom to compete in price under S. 689 is not likely to be any more abused than the freedom to compete in scheduling and other services under current law. In fact, since price cuts attract new passengers and accelerate growth, price competition is likely to be productive while service competition is wasteful.

REGULATION OF ENTRY

In the area of entry regulation fundamental redirection is also necessary. Under the current law, as formulated in 1938, the Board must find an applicant to be fit, willing and able to perform service. In addition, under the statute the Board must find the service to be required by the "public convenience and necessity." Finally, the Board as a practical matter has almost unlimited discretion to expedite, delay or ignore applications to provide service.

S. 689 would substantially amend current law. To assess the need for those changes, let us examine how the 1938 law has dealt with the question of entry.

In 1938 there were 16 trunk airlines, but today there are only 10. The six who are no longer operating in most cases became financially shaky and merged with the ten survivors. Although we have one third fewer trunk airlines operating today, it is not for lack of firms wishing to offer service. Since 1950, there have been over 80 applications by new firms to provide trunk service, but none have been granted, and only 5 percent were even given the courtesy of a formal hearing. In other words, no newcomer to the trunk industry has been allowed to participate in an industry that has grown 300-fold in 40 years.

Although some new classes of carriers have been allowed to perform scheduled service, they are dwarfed by the trunks. Local service carriers were certificated by Congress, not by the Board, and only 2 new local service carriers have been certificated since 1955. Today air service performed by firms not operating in 1938 accounts for a mere ten percent of the domestic market. The regulatory scheme and the Board decisions under it have combined to prevent meaningful entry into the industry.

Nor have the Board's route award procedures been particularly fair or effective in allowing existing airlines to serve new markets. In fact, after a series of private meetings with airline executives several years ago, the CAB simply refused to grant any more hearings in competitive route cases. This so-called route moratorium is now unmistakably over but the statute that allowed it and the regulatory philosophy that spawned it are still around. They are held in check by the exceptional good sense of today's Board and the relatively recent but intense public attention on airline regulation.

Another problem with entry policy is that even when hearings are being held, and the Board isn't merely sitting on cases, Board decisions lack any clear or predictable standards for deciding which towns and cities will receive additional air service and which carriers will be permitted to provide it. A Board's own comprehensive staff study of its route awards, for example, terms its carrier selection process as "random." The only apparent consistent thread running through entry cases, according to the Department of Transportation, is the protection of the present group of air carriers. How the Board treats the issue of "diversion" under current law illustrates this. "Diversion" occurs if allowing a new competitor in the market diverts revenues from the old carrier already in the market to the new one. Diversion of revenue from the old carrier means, of course, additional revenue for the new one. More fundamentally, a diversion will certainly occur if the consumers prefer the new carrier. On both counts, diversion may be quite desirable. But, in order to protect existing carriers, the CAB counts "diversion" as an important reason against the award of new routes.

Finally, even if the Board were to begin allowing new carriers to enter the industry, setting all route cases for hearing and awarding competitive service, the regulatory system nonetheless remains too rigid to foster confidence in air transportation's future. There are currently 57,000 city pairs now served by a variety of carriers in an industry that estimates its future capital requirements at 65 billion dollars over the next 15 years. There are scores upon scores of domestic markets in every region of the country that might attract innovative service or a new carrier. Yet, each application for service is subject to lengthy hearings under current regulation. Thus airline management must think in terms of legal precedents administrative practice and federal regulatory lore, instead of sound marketing and commercial development. Carriers are dissuaded from filing applications before the Board because the prospects for success are small, the legal costs high and the litigation resources of both the Board and the company limited. In fact, airlines don't compete in price they compete in "lawyering."

These problems—foreclosing entry to new carriers random selection, obsessive concern with preventing diversion the inability of regulation to respond well to true market conditions— are addressed through the entry provisions of S. 680.

First the general entry provisions of current law are changed both procedurally and substantively. Procedurally, S. 680 mandatorily speeds up Board route cases so that routes will automatically be awarded if the Board does not act within prescribed time limits requires the Board for the first time to abide by strict evidentiary standards similar to those that bind judicial decisions; places on the opposing party the burden of proving a route award is against the public interest; on appeals from the CAB's denial of entry, allows the reviewing court to apply its expert judgment as to whether the Board properly followed the strict new evidentiary requirements.

Substantively, S. 689 retains the "public convenience and necessity" standard of current law but generally redefines that phrase to emphasize the importance of maximum feasible competition. Specifically, S. 689's entry provision spells out what is consistent with the public convenience and necessity, such as the introduction of new air service, lower fares, and better efficiency. It also spells out factors inconsistent with the public convenience and necessity, such as the tendency to create a monopoly or excessive concentration. And, it provides that "diversion" is not itself a factor inconsistent with the "public convenience and necessity."

Two other provisions of S. 689, to a limited but important extent, would allow CAB carriers and the three most experienced non-CAB carriers to begin passenger service in special circumstances without the necessity of a full-blown route proceeding. First, the Board must authorize service to applicants who are "fit, willing and able" to perform service in markets where nonstop service is already authorized but not performed. There now exists substantial unused authority in 13 of the top 75 markets. Carriers provide non-stop service in only 16 percent of the authorized markets. A route award is designed to serve the public; it should not be used by private companies as a monopolistic franchise to be squirreled away for some rainy day. If some sound and qualified company wants to provide the service, then that carrier should be allowed to do so without requiring a second investigation and agency decision on the question of "public convenience and necessity."

The second semi-automatic entry provision of S. 689 is the most important one. Under this provision, existing carriers are authorized to add automatically several new points to existing routes annually. Extremely large carriers are limited to one new route a year not to exceed 2000 miles while existing CAB certificated passenger carriers and the three largest intrastate carriers are allowed up to 4 new routes per year all of which cannot exceed 4000 miles. Under the entry provision, bureaucratic second-guessing and Washington lawyers will not be interposed between qualified airline management and the market. Carriers will be able to enter more quickly and flexibly under this provision, although the Board would still have to choose between carriers in the event of duplicative applications. Service under this provision is restricted as to fare increases and capacity reductions. These restrictions help insure that management's initial fare and level of service decisions will be cautious, realistic, and firmly grounded in the char-

acteristics of the particular market, and the eligible participants are limited to those with significant passenger experience.

The entry provisions of S. 689 when taken together are a substantial improvement over current law. I cannot overemphasize the point that new entry provisions must be sufficiently precise, definite and uncomplicated to ensure ease of entry to existing firms and qualified new ones. Entry should not be a guessing game played with rulemakings and hearings at the CAB. Unless entry is a real and continuing threat in each market of the country, the flexible pricing provisions of S. 689 may result simply in unchecked spiraling price increases. This point cannot be stressed enough. The mere existence of a competitor reasonably able to enter a market is an effective and indispensable discipline on fare increase. Low barriers to entry are the best incentive for incumbent carriers to keep service good and prices economical. Forty years of history tell us that without precise entry requirements the CAB's exercise of discretion is too cautious and too uncertain to either encourage newcomers or force existing carriers to behave as if quick entry were a realistic threat.

That the threat of new competition polices prices is not just sound economic theory. It is demonstrably true in the real world experience of airlines. Some carriers argue that pricing flexibility alone is good reform, and that price competition will occur without vastly liberalized entry provisions. They say that they can compete in price. I agree that they can but history shows that they will not. In the 1950's, for example, it was not until non-scheduled carriers began offering low-fare service with fuller airplanes did the scheduled lines think of offering lower priced coach service. Prior to that only the much higher-priced first class service was offered. In California, the CAB carriers are meeting the low-fares of the intrastate carriers to stay competitive, but they have never attempted to reduce regular fares in markets where there is no low-fare carriers. In Texas, Southwest Airlines was licensed by the Texas Aeronautics Commission to fly low-fare scheduled service but had to defend itself in lawsuits brought by the CAB carriers who were charging vastly higher fares than those proposed by Southwest. The CAB carriers argued that the fares were uneconomical, cream-skimming, unlawful, unjust, unreasonable and harmful to the public. It was only several years later after Southwest actually began low-fare service did the CAB carriers try to match the low fares. Texas International Airlines has learned its lesson so well that it is offering dramatic fare reductions on several routes outside of Texas.

There are now three companies seeking CAB permission to fly from Chicago to 14 other cities at fares from 20 to 60% lower than those now charged. The first to file for this authority was a newly formed company headed by the former chief operating officer of a major CAB carrier. Shortly, thereafter, the Texas intrastate carrier filed. At first a major CAB carrier opposed the non-CAB carriers' request for an expedited hearing. Only when that failed and the CAB ruled that it would expedite the case did the CAB carrier decide to file for similar low-fare authority.

American Airlines recently received CAB permission to offer a coast-to-coast discount fare 45% below regular coach fares. Although the fare is quite restricted with advance reservations, minimum and maximum stay requirements and other conditions American claims this shows that the current system can provide low fares. But this restricted low-fare has come hot on the heels of a new less restricted low-cost charter program and a Board determination to decide quickly World Airways's ten-year old proposal to fly scheduled service coast-to-coast for half price. And it became effective less than a week before hearings on legislation which would allow new now-fare carriers to enter the industry.

Realistic threats of new carriers charging lower prices are often enough to make the higher-priced incumbent act first with low-fares of its own. But those threats will not be realistic unless the entry provisions of current law are overhauled at least to the extent proposed in S. 689.

ANTITRUST IMMUNITY

S. 689 addresses several matters in addition to rate and entry regulation. The bill would also repeal the Board's current power to confer antitrust immunity on the airlines. That power has been seriously abused in the past.

For four years the Board encouraged capacity reduction agreements between large airlines on major routes. These are simply agreements to reduce flights. This meant fewer flights for travelers with no commensurate reduction in fares. It also meant fewer jobs for airline employees and diminished service to some communities. Las Vegas estimated that it lost $1 million in non-gambling revenue during one two-month period as a result of these agreements. Yet this antitrust immunity was conferred without a CAB hearing. Also, antitrust immunity is used to allow the airline to fix among themselves the commissions they pay to travel agents. Whatever the justification under current regulation, this kind of price-fixing scheme makes little sense in a reformed price competitive airline industry.

There are hundreds upon hundreds of other agreements that the Board routinely approves and exempts from the antitrust laws. Some are not well-known. For example the federally regulated airlines have agreed among themselves to "recommend that" a handicapped "passenger use first-class wherever possible." In addition, another agreement reads: "Persons who have malodorous conditions, gross disfigurements, or other unpleasant characteristics so unusual as to offend fellow passengers should not be carried by any Members."

I am sure there may be instances where the physical difficulty of transporting certain persons might justify individual airlines to refuse passage. But, a private collective agreement by which all airlines deny passage to a vaguely defined class of persons raises a serious antitrust and other public policy problems.

Another airline agreement immune from the antitrust laws limits each federally regulated carrier to one advertisement in the yellow pages: the size and shape of the ads are likewise limited.

Still another agreement provides that no airline can provide air-to-ground telephone service for its passengers until the airline trade association determines that new technology makes this restriction unnecessary. This looks suspiciously like an agreement among competitors by which no firm will offer to customers a potentialy useful service until all firms are capable of doing so.

Neither the advertising nor the air-telephone resolutions offer public benefits sufficient to justify what would otherwise be illegal conspiracies to restrain trade.

On the other hand, agreements among airline to interline passengers, baggage, and freight bring convenience and efficiency to air travel and serve the passengers and shippers well. They are certainly in the public interest. But, no case has been made to show why these perfectly reasonable arrangements would violate the antitrust laws. It is quite unlikely that the FTC or the Justice Department or the courts would find them illegal.

There may exist some agreements that are clearly in the public interest but that would require some limited form of antitrust immunity under a less regulated system. But neither the CAB nor the airlines have pointed to any agreements that would fit that category. If some do exist, a very limited and precise statutory antitrust exemption would be appropriate.

SERVICE TO SMALL COMMUNITIES

Apart from the specific provisions of S. 689, there are some who have expressed doubts about the wisdom of reduced regulation. Briefly, I would like to address two questions that have been raised.

The first is whether less regulation will somehow jeopardize service to small communities. Some factions of the aviation industry have tried to spread the notion that less regulation will result in substantial loss of service. This notion is simply false and should be laid to rest. In discussing service to small towns, we should not confuse three quite separate points.

First, the CAB now administers a 70 million dollar subsidy program to underwrite otherwise unprofitable but necessary air service. S. 689 would not eliminate direct subsidies. On the contrary an improved federal subsidy program for small town service should be an important feature of our reform legislation.

The direct subsidy program should not, however, be confused with the myth that the Board's conventional price and entry regulations somehow guarantee service to small communities. They do no such thing. The Board is prohibited by law from controlling either equipment or schedules so has virtually no control over how a town is served either in terms of frequency or timing. And, it seldom requires that a particular route be flown. The restrictions the Board places on airline operating authority are primarily designed to keep competition out of protected markets rather than compel service that would not otherwise be provided. For example, one regional airline serves 39 points where it is the only certificated carrier and faces no restrictions at any of those monopoly points. It can pattern service to those points any way it chooses. By contrast, at the 28 points it serves in competition with other airlines it faces restrictions on the type of service it can provide.

In addition, the present system of economic regulation has allowed the cessation of certificated service to many small communities. The Board has been quite liberal in allowing airlines to drop unprofitable points. In the last fifteen years 170 points have lost certificated air service, an amount equal to nearly one third of the points previously served and leaves about 400 points still receiving certificated service. This trend will continue and shows signs of accelerating in the future, mainly because of the natural and Board-sanctioned trend of regional carriers to replace smaller planes with large aircraft that cannot economically or conveniently service small towns.

Although Board regulation did not maintain air service to those 170 communities, unregulated commuter carriers voluntarily serve nearly 100 of those towns today. By flying small aircraft, commuters are exempt from Board regulation and are free to fly where and when they want and charge whatever the market will bear. Today they provide the only scheduled service to about 150 communities and those communities tend to be the smallest receiving scheduled service. A DOT study shows that the frequency of service provided by commuters is about twice as great as that provided by certificated carriers at points with the same traffic volume. Yet, they generally charge comparable or lower fares over short distances than CAB carriers. Commuters are quite stable even though they have no certificate obligations and serve the most marginal points. In fact only four of the 100 communities emplaning

6 or more passengers a day lost commuter service during the two and one-half years between June 1973 and January 1, 1976. The commuter carriers operating in an unregulated environment guarantee better than do CAB rules stable, high-quality, convenient service to small communities.

Third, there is no evidence to support the myth that airlines are providing significant money-losing service to small communities that is subsidized by highly profitable operations where the CAB protects them from competition. The dense and most popular markets are already quite competitive and the two, three or more carriers serving them generate little or no "excess" profit that these same carriers use to serve towns they would prefer not to serve. The fact is that CAB regulation positively discourages this kind of cross-subsidy. A detailed study of United's system by the Administrative Practice and Procedure Subcommittee and a review of Eastern's system by the Department of Transportation strongly confirm that cross-subsidized routes amount to nothing more than a trifilingly small percentage of certificated service.

In my view S. 689 has the potential to improve service to small communities in several important ways. Lower fares on many routes will attract people from large and small communities who will want to take advantage of them. The demand for air service and the economic incentives to provide it will increase.

Also this bill is the best vehicle by which to reform the current direct subsidy program to ensure improved air service to small towns for fewer federal dollars. The current program is administered today to obtain passenger service under a statutory provision drafted 4 decades ago to improve mail service. Under current law, the subsidy can only be paid to certificated carriers. The subsidy system has many problems. For one thing, it subsidizes a good deal of jet service to communities that would be better served by smaller but more frequent and timely aircraft of the sort flown by the non-certificated commuter carriers. One recent Board analysis showed the cost to subsidize commuter air service to 8 midwestern communities would be about one-seventh the cost to subsidize the only legally eligible regional carrier. The current system provides no meaningful incentive for regionals to develop small-town service since good profits on some routes allow the CAB to lessen the overall subsidy to the carrier.

The current subsidy program needs drastic improvement. S. 689 says that there shall be such a program but does not specify how it would operate. In devising a new program I would make the following suggestions.

The first and primary goal should be to provide air service to communities that require but might not otherwise receive it. Accordingly the government should subsidize particular air service not particular companies.

Second, communities presently receiving certificated service in most every case should be included in the new subsidy program.

Third, no qualified airline, and especially no commuter airline, should be ineligible to provide the required air service and receive the federal subsidy.

Fourth, although the program should be designed to maximize service and minimize cost, the program should give appropriate weight to the views of the local community to be subsidized, the desirability of a local firm providing the air service, and other factors.

Fifth, the Board should be authorized and required to devise regulations so that passengers traveling by reasonably reliable scheduled service to and from small towns are given the advantages of interlining, joint fares and other conveniences irrespective of whether the scheduled service is provided by a certificated, or non-certificated air carrier.

Sixth, if the Congress determines to extend the federal aircraft loan guarantee program beyond its current expiration date, eligibility to participate should not hinge on whether an otherwise qualified carrier has a CAB certificate.

If fundamental redirection of the direct subsidy program is combined with S. 689's drastic reduction in the regulation of non-subsidized service, the nation's communities, travelers and commerce will all benefit.

AIRLINE EMPLOYEES

The fear of losing service to small communities is not the only red herring strewn along the path of reform. The over blown rhetoric and unwarranted claims that reform means disruption, bankruptcy, and drastically reduced service have created misplaced but good faith concern on the part of some employees of CAB carriers. The fact is that current regulation provides very few benefits to workers that would not be available in a more competitive environment. Less regulation will enhance the interests of workers in the airline industry. The fear that airline employees will lose jobs because of regulatory reform has no evidence to support it anymore than the allegation that towns will lose service. There will not be disruption so there is no threat to jobs. The trend under current regulation is for the CAB to allow certificated carriers to withdraw from those few small communities that they prefer not to serve. Regulated carriers dropped 170 points in the last 15 years, and any safeguards for affected employees came through the collective bargaining process, not economic regulation.

In fact, the CAB has not been specially sensitive to labor concerns. Until recently the Board encouraged some large air carriers to mutually agree to reduce service on heavily travelled routes but ignored the protests that this was procedurally improper and would cost people jobs. One set of agreements translated into an estimated 1000 lost jobs. Under current regulation, the Board has the power to sanction such agreements in the future, but under S. 689 that power would be repealed.

Moreover the employees of the less regulated intrastate carriers have done quite well on several scores without federal economic regulation. During the recent economic downturn, thousands upon thousands of employees were laid off by the high-priced CAB carriers. In 1975 alone federally regulated airlines reduced employment by nearly 10,000. During this same period, the intrastate carriers were increasing the number of employees, mainly because the low fares continued to stimulate significant traffic growth, company expansion and profits.

The wage levels paid to all categories of employees by intrastate carriers compares quite favorably to those paid by CAB airlines. They are also well organized by major unions. 1975 figures show that a Boeing 727 captain from American Airlines had an average seniority of 18 years and earned $55,272 annually, while PSA's B–727 captains were paid over $59,000 per year with only 11 years seniority. The licensed mechanics at Southwest Airlines earned $23,000 annually with less than 3 years seniority, while Continental's mechanics were earning about $3000 less. Many of these employees of intrastate airline are represented by the Teamsters, the Transport Workers Union, International Association of Machinists and other unions. On the other hand, one of the top 5 domestic carriers which is regulated by the CAB is by and large non-union.

Airline employees have nothing to fear under this legislation. A more dynamic and flexible industry will provide airlines new opportunities to expand and grow, and this will create new employment opportunities for workers, and new organizing opportunities for unions. Let me quote you one paragraph from a letter my office received from one of the local representatives of a major airline union:

"Concering deregulation I have formed three opinions: a consumer's opinion which is totally for it; a labor leader's opinion which is totally against it; and an unbiased employee's opinion which is becoming more of a friendly skeptic."

That was some months ago, and I am hopeful that by the end of these hearings that person will be a friendly advocate.

Unlike the railroad crisis where Congress by statute replaced weak and virtually bankrupt firms, with a quasi-governmental corporation, directed the successor firm to reduce and consolidate uneconomic rail service, and then compensated the employees whose jobs were eliminated by statute, airline regulatory reform is not putting companies out of business or displacing workers from jobs. On the contrary, this is an industry where the status quo is preventing new jobs from being created. There are firms fit, and willing and able at this very moment to provide new, and innovative and profitable air services for which they will need hundreds and probably thousands of employees. Ask the people who live in Chicago's southwest side if daily plane service by two new firms to fourteen new cities out of close by Midway airport will reduce or increase employment in the area. The major barrier to new firms and new employment in the airline industry is not the economy, not a shortage of capital, not a lack of consumer demand for low-cost air travel, not a lack of spirit or entrepreneural initiative. Rather the barrier is a 1938 statute that in 1977 we must change.

A less regulated air transport system will benefit all workers as well as airline employees. There are 300,000 airline employees, 14.2 million workers represented by the AFL–CIO, 1.8 by the National Educational Association, nearly ¾ of a million by the United Auto Workers, just to name a few, and unions represent only one out of four workers in this country. It is all of those people we should focus upon in considering this question. The average family income of people flying today is over $25,000, while the average family income of the population is about 40% less than that. Lower air fares on the magnitude of 20 to 60% where they are possible will be a dramatic and meaningful opportunity for the millions of citizens who cannot afford to fly today. Regular air travel still eludes the financial grasp of all but the well-to-do, and current federal regulation is the primary villain. One of our important goals in this legislation is to make air travel more accessible. Governmental meddling that impedes travel with high prices is no less objectionable in a democratic society than governmental interference that impedes travel with restrictive laws.

A place called Harlingen, Texas located in the Rio Grande Valley has in recent years begun to receive low-fare service from a non-CAB carrier. At the same time the CAB carrier certificated to serve Harlingen at fares of $42 was successfully petitioning the CAB to withdraw from what it claimed to be an unprofitable service obligation unpatronized by Harlingen's citizens. Southwest Airlines was beginning air service to Harlingen from Houston at fares of $25 in the day and $15 on evenings and weekends.

Let me quote from a letter I recently received from David Allex, the President of Harlingen's Chamber of Commerce:

"Both of the Standard Metropolitan Statistical Areas . . . served by the Harlingen Airport rank second and third lowest in per capita income in the entire United States. Hundreds of cases have arisen where the indigent are now able to journey to Houston for much needed (and unavailable in our

area) cancer and other medical treatments; where blacks and Mexican Americans have seen their small businesses prosper due to the fact that they are now able to get to the Houston and Dallas markets where low income but exceptionally bright minority students can further their education at universities hundreds of miles away; and, where airline traffic has increased 121.5% from 1973 to 1976, making available hundreds of new jobs in our area due to the influx of new tourists coming in by airlines. All this because the fares which go as low as $15 have made air transportation available to virtually all of our citizens and to the citizens of Texas.

"Perhaps parenthetically, it is worthwhile to note that it is just today that a major interstate carrier (namely Texas International Airlines) has initiated low cost air fares throughout Texas—the so-called 'peanut fares.' It is reported to us that not only is the airline making record profit in other routes using these low cost fares, but that the airline is presently booked full for the next couple of weeks. As you may have guessed, they have matched our intrastate carrier, Southwest Airlines, fares. All this, while the airline reports record profit margins.

"Harlingen's story can be repeated in many other communities in this country. The 'Air Transportation Regulatory Reform Act' is a responsible, practical and comprehensive formula to redirect our nation's air transportation system into one that better serves consumers, communities, and the airlines themselves. It is also a response to the millions of citizens who quite accurately believe that the federal government and the agencies this Congress creates are not always the sole repositories of expertise, wisdom and managerial efficiency. The basic distrust of a market economy in the 1930's and that era's fundamental ignorance of what a then infant industry would develop into as an adult explain the regulatory choice made forty years ago. But those forces have run their course. It is now time for less government, not more. A vital economy is much more likely to be suffocated by choking regulation than by 'cut throat' competition.

"The sophistication of our technology, the thriving commerce of the 1970's, the demonstrated desires of millions of travelers, a confidence in private business management and a basic preference for a free market economy combine to allow us to act boldly. The heavy federal presense should be withdrawn from the air transportation system."

INDIA AND IDA—CORRECTING SOME MISPERCEPTIONS

Mr. HUMPHREY. Mr. President, history has just been made on the Indian Subcontinent. Nearly 200 million secret ballots were cast by the citizens of India, representing the greatest outpouring of voters the world has ever witnessed in a free election.

As the New York Times noted in its editorial this morning:

Whatever its foreign policy, India has begun to earn a new claim on American sympathies, and perhaps aid. All who love freedom are measurably safer today than before the Indian election, and they have an obligation to encourage the spread of the democratic habit.

Mr. President, I believe the New York Times editorial places this election in its proper perspective. I believe the major thrust of any American foreign policy is to not only encourage, but also assist in supporting democratic institutions.

As the New York Times editorial further pointed out:

The news from India is an inspiration to all democracies . . . An impoverished people rejected the siren song of authoritarians everywhere that bread must be bought at the price of freedom. This historic election will reverberate through many lands; even some Americans had begun to despair of the fate of democracy before the seemingly inevitable march of tyranny.

At the height of her power, Mrs. Gandhi must have felt the stigma of illegitimacy that arose from her people's democratic instincts. To her credit, the election she called when she thought she would surely win turned out to be fair and open, as promised. Ironically, nothing less than her defeat could fully demonstrate the return of democracy that had been her proclaimed aim.

This set of circumstances highlights my concern over the misperceptions in the Congress over the allocation made available to India from the International Development Association, or IDA as it is more commonly known. I have had the opportunity to discuss this latter matter with India's Ambassador to the United States, the Honorable Kewal Singh, whom, I might add, my colleagues should get to know. He is a very distinguished and articulate statesman.

As the Ambassador pointed out to me in earlier correspondence:

The basic facts and figures which support continuance of India's share in IDA commitments, at least at the current level, are summarized in the enclosed note. As the note clearly shows, India's entitlement on the basis of its population, economic considerations, credit worthiness, performance, etc. should be definitely higher than the current level of 40% and thus, there is no question of an excess flow of IDA resources to India. IDA projects do contribute significantly to the improvement of standards of the poorest sections of the people by concentrating on agriculture and infra-structure programmes. Economic assistance to India has been utilized so as to produce the maximum beneficial impact and this has been testified to by the international agencies themselves. In regard specifically to IDA assistance, you would be interested to know that on per capita basis India's share in IDA lending is the lowest, $1 per capita. Even in regard to net aid from all sources, India gets just about the least per capita assistance in comparison to other developing countries.

Mr. President, I believe the allocation of official development assistance to India has been effective. Prior to independence, India's food production growth had stagnated at 0.11 percent per year. Since 1950, India has averaged a 2.8-percent per year increase in food production. The last 2 years have seen record harvests in that country.

As the Ambassador also pointed out, India does not borrow from major lending agencies such as the Asian Development Bank. Overall, India's per capita official development assistance is one of the lowest in the world—$2.28 per capita.

It is my belief India can make a major contribution to the world's food production system. Therefore, it is imperative that sufficient resources be allocated to that nation in order for her food production capacity to be realized.

Mr. President, I ask unanimous consent that Ambassador Singh's letter of March 3 to me and his attached memorandum be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

AMBASSADOR OF INDIA,
Washington, D.C., March 3, 1977.

Hon. HUBERT H. HUMPHREY,
U.S. Senate,
Washington, D.C.

MY DEAR SENATOR HUMPHREY: In the course of recent discussions on IDA V appropriations some reservations were expressed about India's share of IDA commitments.

2. The basic facts and figures which support continuance of India's share in IDA commitments, at least at the current level, are summarised in the enclosed note. As the note clearly shows, India's entitlement on the basis of its population, economic considerations, credit worthiness, performance etc. should be definitely higher than the current level of 40% and thus, there is no question of an excess flow of IDA resources to India. IDA projects do contribute significantly to the improvement of standards of the poorest sections of the people by concentrating on agriculture and infra-structure programes. Economic assistance to India has been utilised so as to produce the maximum beneficial impact and this has been testified too by the international agencies themselves. In regard specifically to IDA assistance, you would be interested to know that on per capita basis India's share in IDA lending is lowest, $1 per capita. Even in regard to net aid from all sources, India gets just about the least per capita assistance in comparison to other developing countries.

3. In view of low volume of per capita aid received by India, the quality of aid is of utmost importance to India, which would lose more than other countries if her access to IDA funds is reduced. India's share does not in any manner limit IDA lending to other poorer countries since IDA determines levels of assistance on the basis of absorptive capacity of population, size and GNP and recipient countries. It also deserves to be noted that India does not borrow from major lending agencies, such as the Asian Development Bank whose resources are available to other countries interested in receiving assistance.

4. There is a great deal of misinformation, over-simplification and, occasionally, even misperception of the facts relating to developmental assistance to India. It would be a pity indeed if all this were permitted to influence the working of a multilateral agency which has made remarkable contributions to India's economic progress.

5. Knowing the importance that you attach to building up stronger friendship between India and the United States and improving mutual understanding and cooperation in every field, I thought I should bring these facts to your personal attention. I am confident that in any discussion on this subject, objective consideration will be given to all the relevant facts, including those mentioned above and summarised in the attached note.

With warm personal regards and best wishes,

Yours sincerely,

KEWAL SINGH.

NOTE

India's share in IDA commitments for the period 1961–68 was 48.6 percent. It was reduced to 40 percent from 19 9 onwards. The reason for reducing India's share was apparently to permit more lending to Indonesia and other UN designated Least Developed Countries (LDCs). Although on grounds of poverty, creditworthiness, performance and project readiness India should get a higher share, in order to increase the geographical coverage of IDA, a ceiling of 40 percent was laid down.

During the period of IDA V if 90 percent of IDA funds go to countries with a per capital income of $200 and less (this as an

objective has been supported by the U.S. Treasury in the testimony before the Congress), India, with a population of 600 million on an arithmetical basis should be entitled to 54 percent of the total IDA commitments as against the current 40 percent. It is, therefore, not correct to say that there is an excess flow of IDA resources to India. In fact, it is less than India's entitlement. In terms of per capital IDA commitments, India received in FY 76 $1.12 of IDA money. This may be compared with $1.75 to Pakistan, $2.38 to Bangladesh, $1.83 to Sri Lanka; $4.58 to Losotho, $3.14 to Madagascar, $1.76 to Egypt etc.

IDA PROJECTS IN INDIA

The criticism on this count is not justified by facts. Most of the IDA financed projects are for the improvement of agriculture and infrastructure and are directed towards improvement in the standards of living and productivity of the poorer sections of the people. The following table indicates the distribution of IDA money in different types of projects over the 5 year period, FY 72–76.

	Percent
Agriculture (including irrigation, fertilizer, rural electrification and agricultural credit)	39.7
Water supply, urban development and Human resources	6.3
Railway/telecommunications	16.4
Transmission and distribution of Electricity	9.0
D.F.C's	1.0
Programme loans	27.6

The primary objective of the programme loans is to assist in meeting the import requirements of export oriented industries which, in any case, deserve high priority.

ECONOMIC PROGRESS IN INDIA

The economic growth of India—whether the total period from Independence til today is taken into account or the short term period of last two years—is *not* unimpressive. The total growth in GNP in 75–76 was 8.8 percent. It is expected to be of the order of about 6 percent in 1976/77. Foodgrains production increased by 19 percent in one year. The foodgrains stocks have increased to over 18 million tonnes. There is a fair amount of price stability in the country. Exports are rising at the rate of 8 percent in real terms at a time when the world trade has been relatively stagnant. Industrial production grew at the rate of about 6 percent in 1975–76 and is expected to grow at the rate of over 10 percent in 1976–77. Power generation has grown at the rate of 13 percent. To-day there is a fairly easy availability of practically all raw materials power and transport services to enable economic activity to grow at a brisk pace. In fact all economic indicators go to show that the economy is poised for a major break-through into a period of sustained development.

DEFENSE EXPENDITURE

Taking into account the length of her borders and the threats to India's security which have been existing for the last so many years, India's defense expenditure can certainly not be considered high. As a proportion of GNP India spends only 2.9 percent annually on defense which is much less than that of other neighboring countries.

HUMAN RIGHTS

The argument that human rights are disregarded in India does not bear scrutiny.

OVERALL DEVELOPMENT ASSISTANCE

It may be mentioned that so far as total official Developmental Assistance flows are concerned, India receives about the least assistance on a per capita basis, not only among the lower income developing countries but among LDCs in general (statement enclosed). It may also be mentioned that there has been no US AID bilateral programme with India for the last 6 years. It is also noteworthy that during FY 77 there will be a reverse flow of resources from India to USA because the debt service of $150 million is far more than the aid received under PL 480. The same situation is also likely to continue in FY 78.

NET PER CAPITA RECEIPTS BY SELECTED DEVELOPING COUNTRIES OF OFFICIAL DEVELOPMENT ASSISTANCE FROM DAC COUNTRIES AND ASSISTANCE FROM MULTILATERAL AGENCIES, 1975

Name of the country	Population in (millions)	Per capita income in U.S. dollars	Assistance received in U.S. dollars (millions)	Per capita assistance in U.S. dollars
Asia:				
Bangladesh	78.600	110	922	11.73
Pakistan	69.229	140	426	6.16

TO MOSCOW WITH WARNKE

Mr. PELL. Mr. President, a thoughtful and provoking editorial has come to my attention on the challenge to be faced in SALT now that the debate over Mr. Paul Warnke's nomination is behind us, and Mr. Warnke is preparing to go to Moscow.

The Christian Science Monitor notes that SALT is more than just a kindness to the Russians. According to the Monitor's editorial—

It is imperative for two basic reasons. One, because it is needed to prevent mutual destruction, or, in a more positive vein, to maintain world strategic stability. Second, arms regulation is imperative to stop the proliferation of nuclear weapons around the world. If the two superpowers cannot put restraints on their own appetites, they can hardly enjoin other nations to reduce their nuclear arsenals or entirely forgo the option of developing them. Nuclear peace must begin in Washington and Moscow.

Mr. President, I ask unanimous consent that the full text of this editorial be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

[From the Christian Science Monitor, Mar. 16, 1977]

TO MOSCOW WITH WARNKE

The rancorous opposition that attended the Senate confirmation of Paul Warnke as chief negotiator in the strategic arms talks may have its silver lining. It places added pressures on Mr. Warnke to be tough with the Russians (although we did not doubt he would be in any event). And, with Congress circling SALT like a hawk, figuratively and literally, he has in effect a strong bargaining card to play if and when he encounters Soviet intransigeance. The Russians can be reminded that anything Mr. Warnke brings home will be treated with special skepticism by the lawmakers.

So far so good. The United States now has an able, knowledgeable arms diplomat to lead the negotiations. It also indicates wisely it remains firmly committed to achieving a permanent treaty on weapons control even though it abhors the Soviet system and has nothing in common with the Kremlin's Marxist ideals.

This is a reasonable position. President Carter recognizes that SALT has a validity outside détente. It is not just a kindness to the Russians. It is imperative for two basic reasons. One, because it is needed to prevent mutual destruction or, in a more positive vein, to maintain world strategic stability. When asked what he hoped to achieve as negotiators, Mr. Warnke made just this point, adding he hoped "there would be no circumstances under which anybody would be able to contemplate the initiation of nuclear war in order to achieve any kind of political objective."

Second, arms regulation is imperative to stop the proliferation of nuclear weapons around the world. If the two superpowers cannot put restraints on their own appetites, they can hardly enjoin other nations to reduce their nuclear arsenals or entirely forgo the option of developing them. Nuclear peace must begin in Washington and Moscow.

The big question at this point is to what extent the Russians still share this view. For the first time in recent years Moscow has publicly criticized an American President by name. Mr. Carter is angrily chided for his blunt stand in support of human rights in Eastern Europe and his argument rejected that human rights criticism and strategic arms talks can be kept separate. Washington may not link these issues, Kremlin spokesmen say, but Moscow does.

Is this public window dressing for home consumption? Or a genuine warning to a new American President whose unorthodox ways undoubtedly have dismayed the Soviet leadership? That remains to be seen when Secretary Vance and Mr. Warnke visit the Soviet Union at the end of the month. Although the atmosphere has distinctly cooled in Moscow since Mr. Carter's inauguration, it is

hard to conceive the Russians will back away from their own self-interest and frustrate an arms agreement because of the human rights issue.

However, both sides ought to be careful they do not undermine the climate for a useful and productive meeting. This will be the first high-level get-together in the Carter administration. Much will hang on it. Either the sides agree to move forward to try to put a cap on strategic arms—or each will be headed down the terrible path of building even more lethal, more senseless weaponry.

(This concludes additional statements submitted by Senators today.)

RECESS UNTIL 2 P.M.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate stand in recess until the hour of 2 p.m. today.

There being no objection, the Senate, at 1:35 p.m., recessed until 2 p.m.; whereupon, the Senate reassembled when called to order by the Presiding Officer (Mr. CULVER).

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Morning business is closed.

OFFICIAL CONDUCT AMENDMENTS OF 1977

The PRESIDING OFFICER. The pending business will be stated.

The legislative clerk read as follows:

A resolution (S. Res. 110) to establish a code of official conduct for the Members, officers, and employees of the U.S. Senate, and for other purposes.

The PRESIDING OFFICER. The pending amendment will be stated.

The legislative clerk read as follows:
